[CWI-AM-R9307] p 3846 N94-32106
Quantum homogeneous spaces, duality, and quantum 2-spheres
[CWI-AM-R9309] p 3857 N94-32192

GROUP VELOCITY
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684

GUARDS (SHIELDS)
Design and performance of the telescope and detector covers on the Extreme Ultraviolet Explorer satellite
p 3605 N94-33309

GULF STREAM
Operations summary for the convection and moisture experiment (CAMEX)
[NASA-TM-108445] p 3786 N94-33004

GUN LAUNCHERS
Basic and applied studies of the ram accelerator as a hypervelocity projectile launcher
[AD-A277392] p 3602 N94-32288

GUN PROPELLANTS
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124

GYROSCOPES
An investigation of airborne GPS/INS for high accuracy position and velocity determination
[DE94-006139] p 3576 N94-31306

H

H ALPHA LINE
Multiwavelength search for protoplanetary disks
p 3599 N94-31430

H I REGIONS
A twisted disk equation that describes warped galaxy disks p 3928 N94-31118
Study of stellar associations located in the region contained between the Magellanic Clouds
[ISBN-0-315-86692-6] p 3935 N94-31913
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309

H-INFINITY CONTROL
Digital state-feedback H(infinity) control of Pritchard-Salamon systems: A Popov function approach
[REPT-93-69] p 3830 N94-31647
Parametric robust control and system identification: Unified approach
[NASA-CR-195826] p 3836 N94-32080

H-60 HELICOPTER
Technical evaluation of the UH-60Q: Aircraft in typical aeromedical evacuation missions
[AD-A276944] p 3586 N94-32217
Technical evaluation of the UH-60Q: Medical oxygen system
[AD-A276983] p 3579 N94-32242

HADRONS
Particle identification in a segmented calorimeter (NUMASS test data, September 1991)
[USIP-93-08] p 3711 N94-31085
State of hadron collider physics
[DE94-005279] p 3863 N94-31147
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA
[ETN-94-96021] p 3865 N94-31534
B lifetimes at CDF
[DE94-006850] p 3866 N94-31669
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions
[DE94-006315] p 3867 N94-31779
Probing lepton number violation via Majorana neutrinos at hadron supercolliders
[PB94-147055] p 3868 N94-31922
A search for rapidity gaps in jet events and a study of color coherence in multijet events at D0
[DE94-006849] p 3872 N94-32627
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter
[DE94-007178] p 3938 N94-32638
Proceedings of the Workshop on B Physics at Hadron Accelerators
[DE94-007961] p 3877 N94-32748
String-parton model description of relativistic heavy-ion collisions
[DE94-009164] p 3874 N94-32850

HAFNIUM OXIDES
Electrostatic reduction of particulates for laser resistant hafnia coatings
[DE94-005824] p 3651 N94-31557

HALF SPACES
Radiation from an aperture into an anisotropic plasma half-space p 3885 N94-31205
Penetrable wedge analysis
[AD-A277219] p 3845 N94-32022
Monoenergetic neutral particle transport in semi-infinite media
[AD-A277155] p 3870 N94-32368

HALLEY'S COMET
Composition and properties of dust from Comet Halley
p 3936 N94-31947

HALOS
A twisted disk equation that describes warped galaxy disks p 3928 N94-31118

HAMILTONIAN FUNCTIONS
A worst-case analysis of an approximate algorithm for finding the minimum hamiltonian cycle on paths
[REPT-93-042] p 3809 N94-31192
A brief introduction to symplectic integrators and recent results
[DE94-006225] p 3845 N94-31783
Quantum dynamics in dual spaces
[DE94-008303] p 3913 N94-32824

HAND (ANATOMY)
Minimization of carpal tunnel syndrome
[AD-A276409] p 3795 N94-31363
Digit-Eyes: Vision-based human hand tracking
[NASA-CR-195913] p 3803 N94-31447

HANDBOOKS
Cleanroom engineering handbook. Volume 1: Cleanroom engineering process introduction and overview
[AD-A275949] p 3587 N94-31356
Aircraft icing handbook (update)
[AD-A276499] p 3574 N94-31678
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260
Management of government quality assurance functions for NASA contracts
[NHB-5300.4(2B-2)] p 3731 N94-32387
Briefing and review meeting implementation of the military handbook 17 for polymer matrix and metal matrix composites
[AD-A277446] p 3663 N94-33010
Forecasters handbook for the Philippine Islands and surrounding waters
[AD-A277993] p 3787 N94-33089

HARBORS
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260

HARDNESS
Conductive paints
[DE94-008508] p 3661 N94-32788

HARDWARE
VME rollback hardware for time warp multiprocessor systems
[NASA-CR-191796] p 3826 N94-32483
A flexible IBM-PC based data acquisition system for nuclear physics experiments
[USIP-92-02] p 3922 N94-32856

HARDWARE DESCRIPTION LANGUAGES
Formal semantics for a subset of VHDL and its use in analysis of the FTPP scoreboard circuit
[NASA-CR-191577] p 3827 N94-32734

HARMONIC ANALYSIS
Applied harmonic analysis
[AD-A278384] p 3685 N94-33353
HARMONIC CONTROL
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108
HARMONIC EXCITATION
Doubly asymptotic approximations: Theoretical and numerical analyses
[ONERA-NT-1993-7] p 3840 N94-31231
HARMONIC GENERATIONS
Wavevector-frequency analysis with applications to acoustics
[AD-A276618] p 3861 N94-32125
High conversion efficiency pumped-cavity second harmonic generation of a diode laser
[DE94-006805] p 3717 N94-32134
New developments in second-order nonlinear optical polymeric materials
[AD-A277409] p 3658 N94-32578
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054
Second-order nonlinear optical polymers: From fundamentals to applications
[AD-A277514] p 3664 N94-33348
HARMONIC OSCILLATION
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
HARMONIC RADIATION
Second-order nonlinear optical polymers: From fundamentals to applications
[AD-A277514] p 3664 N94-33348
HARMONICS
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846
Optimal adaptive estimation algorithm for harmonic current reduction using power limited active line conditioners
[AD-A277354] p 3693 N94-32336
HARRIER AIRCRAFT
Numerical simulation of combined external/internal transonic flow on the forebody/inlet of the AV-8B Harrier 2 p 3569 N94-31759
HARTREE APPROXIMATION
Nonlinearity as an origin of nonuniqueness in solution of Hartree's equation
[DE94-006538] p 3841 N94-31311
HAZARDS
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems
[DE94-007250] p 3609 N94-31382
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260
Environmental issues related to biomass: An overview
[DE94-007226] p 3767 N94-32784
HEAD-UP DISPLAYS
Synthetic vision technology demonstration. Volume 1: Executive summary
[DOT/FAA/RD-93/40-VOL-1] p 3582 N94-33076
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Synthetic vision technology demonstration. Volume 4: Appendices
[DOT/FAA/RD-93/40-VOL-4] p 3583 N94-33079
HEALTH
Controlling hazardous energy sources (lockout/tagout)
[NASA-TM-105290] p 3669 N94-32861
HEAO 1
A multi-frequency study of an x ray selected sample of active galactic nuclei p 3937 N94-31987
HEARING
A silicon condenser microphone: Materials and technology
[ISBN-9-09-005899-0] p 3688 N94-31518
Three dimensional audio versus head down TCAS displays
[NASA-CR-177636] p 3576 N94-33063
HEAT AFFECTED ZONE
A review of weldment failure modes and weldability testing methods
[AD-A278096] p 3729 N94-33251
HEAT BUDGET
A model for the evolution of CO2 on Mars p 3946 N94-33205
HEAT ENGINES
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632
Materials development program: Ceramic technology project bibliography, 1984-1992
[DE94-009297] p 3662 N94-32935
HEAT EXCHANGERS
Heat transfer studies on a rectangular channel with offset plate fins
[AD-A277300] p 3912 N94-32043
Oscillating-flow loss test results in rectangular heat exchanger passages
[NASA-CR-185297] p 3615 N94-32792
HEAT FLUX
The prediction of convective transfer on the thermal insulation of a solid-propellant rocket motor
[ONERA-NT-1993-15] p 3614 N94-31423
Errors associated with the use of heat flow transducers p 3796 N94-31742
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765
A long-term simulation of surface fluxes and soil moisture
[DE94-006661] p 3774 N94-32772
HEAT GENERATION
Numerical model of the thermal behavior of an extremity in a cold environment including counter-current heat exchange between the blood vessels
[AD-A278099] p 3798 N94-33040
HEAT MEASUREMENT
Errors associated with the use of heat flow transducers p 3796 N94-31742
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765
Amorphous/crystalline structure and phase transformations in metastable semiconducting Ge(1-x)Sn(x)
[DE94-008659] p 3901 N94-32115
Ionization EM calorimetry with accordion electrodes and liquid krypton or argon
[DE94-009082] p 3713 N94-32821
HEAT PIPES
Space Station WP-2 application of LDEF MLI results p 3592 N94-31016
Development of lightweight radiators for lunar based power systems
[NASA-TM-106604] p 3726 N94-32272
Physics of heat pipe rewetting
[NASA-CR-195902] p 3913 N94-33148
HEAT PUMPS
Metal hydride heat pump engineering demonstration and evaluation model
[NASA-CR-188286] p 3669 N94-32857
HEAT RESISTANT ALLOYS
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047
HEAT SHIELDING
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
Development of lightweight ceramic ablators and arc-jet test results
[NASA-TM-108798] p 3617 N94-33117
HEAT SINKS
Energetic and general circulation p 3777 N94-30983
HEAT SOURCES
Energetic and general circulation p 3777 N94-30983
HEAT TRANSFER
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276463] p 3860 N94-31242
Compressible convection with ionization p 3911 N94-31498
Chemical vapour deposition of tungsten for the application in integrated circuits
[ISBN-9-09-005151-1] p 3641 N94-31519
Solid surface
[NASA-TM-109746] p 3634 N94-31883
Heat transfer studies on a rectangular channel with offset plate fins
[AD-A277300] p 3912 N94-32043
The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis
[AD-A277207] p 3784 N94-32094
Numerical model of the thermal behavior of an extremity in a cold environment including counter-current heat exchange between the blood vessels
[AD-A278099] p 3798 N94-33040
HEAT TRANSMISSION
Computer implementation of Arnott's formulation of thermoacoustics using MATLAB
[AD-A276356] p 3860 N94-31257
HEAT TREATMENT
Acoustic emission from crack growth in 7050 aluminum and 7075 aluminum as a function of temperature and heat treatment
[DREP-CRS-93-15] p 3642 N94-31871
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023
Work hardening behavior in aluminum alloy 2090
[DE94-007036] p 3643 N94-32064
Continuous measurement of aging response in aluminum alloys by eddy current methods
[AD-A277233] p 3644 N94-32371
HEATERS
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320
HEATING
NATO Advanced Study Institute on Unsteady Combustion. Volume 2: Research papers, September 6-17, 1993
[AD-A276572] p 3634 N94-32033
HEAVING
Heave dynamics of an air cushion vehicle bag and finger skirt
[ISBN-0-315-87053-2] p 3568 N94-31734
HEAVY ELEMENTS
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657
HEAVY IONS
Control heavy ion collisions in the systems Ar-40 + Ca-40 and Si-28 + Si-28, and the nature of particle emission in fusion-evaporation reactions
[ETN-94-95749] p 3866 N94-31614
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions
[DE94-006315] p 3867 N94-31779
Antiproton production in heavy ion collisions
[DE94-007552] p 3870 N94-32271
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter
[DE94-007178] p 3938 N94-32638
String-parton model description of relativistic heavy-ion collisions
[DE94-009164] p 3874 N94-32850
RHIC chromatic correction system
[DE94-008532] p 3883 N94-32994
HEAVY WATER
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351
HEIGHT
World height system definition and implementation
[AD-A276725] p 3747 N94-32160
Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224
HELICAL ANTENNAS
Predicting antenna parameters from antenna physical dimensions
[AD-A276442] p 3672 N94-31300
HELICAL WINDINGS
Nonlinear analysis of springs using helical finite elements p 3859 N94-31906
HELICOPTER CONTROL
Controls design with crossfeeds for hovering rotorcraft using quantitative feedback theory
[NASA-CR-195765] p 3585 N94-31203
Development of a reconfigurable helicopter flight control system
[ISBN-0-315-87218-7] p 3585 N94-31837
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108
HELICOPTER DESIGN
Estimating the impact of crashworthiness standards on mortality and morbidity events in the US Army rotary-wing aircraft mishaps
[AD-A277121] p 3575 N94-32363
HELICOPTER PERFORMANCE
An analysis of the maintenance performance measurement system for LAMPS MK 3 helicopter squadrons
[AD-A276421] p 3565 N94-31332
HELICOPTER WAKES
Experimental and numerical simulation of helicopter rotor fuselage interaction
[ONERA-NT-1993-8] p 3568 N94-31421

User's guide for a flat wake rotor inflow/wake velocity prediction code, DOWN
[NASA-TM-104139] p 3572 N94-32873
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108

HELICOPTERS
Development of a reconfigurable helicopter flight control system
[ISBN-0-315-87218-7] p 3585 N94-31837
Evaluation of intensity distribution profiles for US. Army rotorcraft position lighting adapted for image intensifier operations
[AD-A276459] p 3804 N94-32171
Status of developing a multifunctional aviation grease
[AD-A276755] p 3656 N94-32184
Heliport Noise Model (HNM) version 2.2 (user's guide)
[AD-A277072] p 3861 N94-32418
A novel potential/viscous flow coupling technique for computing helicopter flow fields
[NASA-CR-193272] p 3571 N94-32476

HELIOSTATS
Operational experience and evaluation of a dual-element stretched-membrane heliostat
[DE94-008827] p 3763 N94-32965

HELIUM
Elimination of two atomic electrons by a single high energy photon
[DE94-006834] p 3864 N94-31320
Double photoionization of helium with synchrotron x rays: Proceedings
[DE94-006737] p 3866 N94-31668

HELIUM ATOMS
Diamagnetism in helium Rydberg atoms
[ETN-94-96015] p 3865 N94-31549

HELIUM COMPOUNDS
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598

HELIUM ISOTOPES
Spin-structure function of the neutron He-3: SLAC results
[DE94-008927] p 3875 N94-33189

HELMHOLTZ EQUATIONS
Finite element solution to the Helmholtz equation with high wave number. Part 1: The h-version of the FEM
[AD-A277396] p 3848 N94-32341

HEMODYNAMICS
Incompressible viscous flow in tubes with occlusions
[ISBN-0-315-75467-2] p 3704 N94-31778

HEPTANES
Silicone grease as a precursor to a pseudo crown-ether ligand: Crystal structure of (K(+)K(Me2SiO)7(+))(Hln(CH2CMe3)3(-))4)
[AD-A276343] p 3895 N94-31327

HETEROCYCLIC COMPOUNDS
Isomeric poly(benzophenone)s: Synthesis of highly crystalline poly (4, 4 foot-benzophenone) and amorphous poly (2, 5-benzophenone), a soluble poly (p-phenylene) derivative
[AD-A277261] p 3655 N94-32017

HETERODYNING
Optically switched submillimeter-wave oscillator
[AD-A278014] p 3698 N94-33249

HETEROGENEITY
A heterogeneous computing environment for simulating astrophysical fluid flows p 3928 N94-31119
Effect of surface forces on the rheology of particle-liquid systems and the consolidation of ceramic powders
[AD-A277092] p 3657 N94-32391

HETEROJUNCTION DEVICES
Processing boron and boron carbide thin films for protective coatings and device fabrication
[AD-A277266] p 3900 N94-32041
Reconfigurable optical switches with monolithic electrical-to-optical interfaces
[DE94-007745] p 3881 N94-32385

HETEROJUNCTIONS
Passivation of III-V compound semiconductor based devices
[AD-A276178] p 3894 N94-31056
Ion beam synthesis of IrSi3 by 1-MeV Ir ion implantation into Si(111)
[DE94-006556] p 3896 N94-31501
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622

HEURISTIC METHODS
Simple Patch: A new heuristic for the product traveling salesman problem
[REPT-93-85] p 3845 N94-31702
On the convergence of stochastic iterative dynamic programming
[AD-A276517] p 3815 N94-31933
Varying execution discipline to increase performance
[DE94-007844] p 3819 N94-32651
Multiple-valued programmable logic array minimization by solution space search
[AD-A278033] p 3821 N94-33090
A heuristic multiple target tracker p 3686 N94-33346

HIBERNATION
Characterization and utilization of opiate-like hibernation factors
[AD-A278136] p 3794 N94-33098

HIERARCHIES
Detecting the erosion of hierarchic information structures
[RUU-CS-93-10] p 3916 N94-31385
A hierarchical approach to test generation for CMOS VLSI circuits
[ISBN-9-09-005449-9] p 3689 N94-31535
Report on implementing part relationships using VML metaclasses
[PB94-147485] p 3813 N94-31686
A brief introduction to symplectic integrators and recent results
[DE94-006225] p 3845 N94-31763
DTIC Thesaurus on diskette with dBase 4.1 runtime (computer diskette)
[AD-M000306] p 3922 N94-33256

HIGH ALTITUDE
Medical problems in high mountain environments. A handbook for medical officers
[AD-A278095] p 3798 N94-33268

HIGH ELECTRON MOBILITY TRANSISTORS
Characteristics of III-V semiconductor devices at high temperature
[NASA-TM-106574] p 3697 N94-33052

HIGH ENERGY INTERACTIONS
High energy physics program at the University of Alabama
[DE94-006544] p 3875 N94-31488
High energy physics studies
[DE94-005970] p 3876 N94-31505
RHIC spin physics
[DE94-005452] p 3876 N94-32099
The future of high energy physics in the US statement for the Science Subcommittee of the House Science, Space and Technology Committee
[DE94-008986] p 3876 N94-32586
The future of high-energy physics in the US: Statement for the 1994 HEPAP Subpanel
[DE94-008994] p 3876 N94-32588
A search for rapidity gaps in jet events and a study of color coherence in multijet events at D0
[DE94-006849] p 3872 N94-32627
Minimax: Multiparticle physics at the Tevatron collider
[DE94-007095] p 3873 N94-32689
String-parton model description of relativistic heavy-ion collisions
[DE94-009164] p 3874 N94-32850

HIGH FREQUENCIES
Atmospheric effects assessment program: Ionospheric sounding
[AD-A276447] p 3770 N94-31303
A multichannel architecture for Naval Task Force Communication
[AD-A276230] p 3673 N94-31446
Design, development, and testing of a Network Frequency Selection Service (NFSS)
[AD-A277362] p 3680 N94-32283
Broadband, high-power, 2-30 MHz, twin-whip antenna. Computer and 1/10-scale model design study
[AD-A277619] p 3682 N94-32971
High frequency active auroral research program (HAARP) imager
[AD-A277469] p 3775 N94-32999
High frequence and automatic link establishment (HF and ALE) radio propagation test to Antarctica
[AD-A277730] p 3682 N94-33001
Advanced high frequency partial discharge measuring system
[NASA-CR-195240] p 3697 N94-33044

HIGH GAIN
The Galileo high gain antenna deployment anomaly p 3607 N94-33319

HIGH POLYMERS
Novel sol-gel deposition for repair of conducting paths in polyceramic systems
[AD-A278381] p 3664 N94-33350

HIGH POWER LASERS
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency conversion
[AD-A276126] p 3714 N94-31278
Inertial fusion with ultra-powerful lasers
[DE94-007242] p 3887 N94-31400
Automatic resonator alignment and power stabilization of high power C02 lasers
[ISBN-0-315-77217-4] p 3714 N94-31472
DOE reactor-pumped laser program
[DE94-006372] p 3715 N94-31485
Large-area conditioning of optics for high-power laser systems
[DE94-007028] p 3716 N94-31636
Sol-gel coatings for high power laser optics: Past, present, and future
[DE94-007240] p 3718 N94-32252
High power diode lasers for solid-state laser pumps p 3722 N94-32448
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Short-pulse, high-intensity lasers at Los Alamos
[DE94-007545] p 3720 N94-32760
Ultrafast x ray sources
[AD-A277455] p 3721 N94-33012

HIGH PRESSURE
Development of high-pressure diaphragms for the AEDC impulse tunnel
[AD-A277053] p 3588 N94-32009

HIGH RESOLUTION
Concept, construction and testing of a high resolution QCLAM electron spectrometer with large solid angle and high impulse acceptance for the electron accelerator S-DALINAC
[ETN-94-95755] p 3711 N94-31515
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-008261] p 3707 N94-32410
Rapid estimates of crop acreage and production at European scale using high resolution imagery p 3754 N94-32557
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351

HIGH REYNOLDS NUMBER
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216
Solution of the average-passage equations for the incompressible flow through multiple-blade-row turbomachinery
[AD-A276515] p 3583 N94-31931
The structure of high Reynolds number turbulent boundary layers, part A
[AD-A278392] p 3710 N94-33162

HIGH SPEED
A high-speed linear algebra library with automatic parallelism p 3828 N94-32440
High-speed data search p 3923 N94-32441

HIGH SPEED CAMERAS
A new high-speed IR camera system p 3713 N94-32459

HIGH SPEED PHOTOGRAPHY
Simultaneous pressure measurement and high-speed photography study of cavitation in a dynamically loaded journal bearing
[NASA-TM-106456] p 3728 N94-32893

HIGH STRENGTH
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065

HIGH STRENGTH STEELS
Simpler J(sub Ic) test and data analysis procedures for high strength steels
[AD-A277731] p 3648 N94-33281

HIGH TEMPERATURE
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF p 3593 N94-31024
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
High temperature ductility loss in titanium alloys: A review
[DE94-006606] p 3640 N94-31345
GaAs/GaN strained layer superlattice materials for high temperature transistors, phase 1
[AD-A276115] p 3897 N94-31528
In-situ TEM crystallization of anorthite-glass films on (alpha)-Al2O3
[DE94-006317] p 3652 N94-31780
High temperature NASP engine seal development
[NASA-TM-109750] p 3725 N94-31804
Creep-fatigue criteria and inelastic behavior of modified 9Cr-1Mo steel at elevated temperatures
[DE94-007915] p 3642 N94-31918
Computer modelling of cyclic deformation of high-temperature materials
[AD-A277056] p 3623 N94-32012
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047
Mechanics of failure of high temperature metal matrix composites
[AD-A277397] p 3624 N94-32342

Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
Effect of elevated temperature and cyclic loading on properties and damage modes in ceramic composites
[DE94-008736] p 3662 N94-32891
Characteristics of III-V semiconductor devices at high temperature
[NASA-TM-106574] p 3697 N94-33052
Enhanced thermal capacity aerogels summary report, FY 1993
[DE94-008888] p 3639 N94-33260

HIGH TEMPERATURE AIR
Effect of elevated temperature and cyclic loading on properties and damage modes in ceramic composites
[DE94-008736] p 3662 N94-32891
Stabilized alumina/ethanol colloidal dispersion for seeding high temperature air flows
[NASA-TM-106591] p 3713 N94-32983

HIGH TEMPERATURE SUPERCONDUCTORS
Preliminary results from the CONCAP-2-01 and EIOM-3 experiments on STS-46 p 3596 N94-31042
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
High-temperature superconducting transformer performance, cost, and market evaluation
[DE94-005494] p 3687 N94-31152
Electron spin resonance measurements of Er(3+) and Mn(2+) in the high temperature superconductor compounds La(2-x)Sr(x)CuO(4-delta)
[ETN-94-95746] p 3898 N94-31612
Short coherence length superconductors: Intermediate regime between BCS and bosons
[DE94-007694] p 3904 N94-32645
Strongly anisotropic s-wave versus d-wave gap in cuprate superconductors: Evidence and theory
[DE94-007579] p 3904 N94-32746
Quantum fluctuations of vortices in Josephson-coupled superconductors
[DE94-007609] p 3905 N94-32747
New advances in the modeling of high-temperature superconductors
[DE94-007649] p 3905 N94-32815
Proceedings, Strongly Correlated Electronic Materials: The 1993 Los Alamos Symposium
[DE94-009293] p 3906 N94-32913
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
Evidence for symmetry breaking local distortions in thallium barium copper oxide
[DE94-006149] p 3907 N94-32944
A quest for a new superconducting state
[DE94-008439] p 3908 N94-32991
High temperature superconducting Josephson junction array systems, phase 1
[AD-A277937] p 3908 N94-33246
The path for long range conduction in high J(sub c) TlBa2Ca2Cu3O(8+x) spray-pyrolyzed deposits
[DE94-007211] p 3909 N94-33271

HIGH TEMPERATURE TESTS
Evolution of the interface properties with temperature in the T800H/ bismaleimide composites
[ONERA-NT-1993-14] p 3619 N94-31478
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941

HIGH VOLTAGES
Modal analysis of multiterminal high voltage direct current transmission
[DE94-006426] p 3691 N94-31785
Advanced high frequency partial discharge measuring system
[NASA-CR-195240] p 3697 N94-33044
Time resolved measurements of light produced by onset of plasma formation on electrodes of fast pulsed high voltage diodes
[AD-A277974] p 3894 N94-33264

HIGHLY MANEUVERABLE AIRCRAFT
Installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119

HILBERT SPACE
Frames and stable bases for shift-invariant subspaces of L(sub 2)(IR(sup d))
[AD-A276470] p 3843 N94-31474
The Cameron-Martin theorem
[W-9315] p 3844 N94-31676
Finite element solution to the Helmholtz equation with high wave number. Part 1: The h-version of the FEM
[AD-A277396] p 3848 N94-32341

HISTOGRAMS
Parallel processing for differencing and histogramming
[AD-A277060] p 3826 N94-32274

HISTORIES
Mars: Five views on what is known
[NASA-TM-109751] p 3942 N94-31805
A historical perspective on fifteen years of laser damage thresholds at LLNL
[DE94-007930] p 3719 N94-32613
Chronology of KSC and KSC related events for 1993
[NASA-TM-109196] p 3966 N94-33072

HMX
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124

HOLE BURNING
Development of materials for spectral hole burning applications
[AD-A278408] p 3909 N94-33324

HOLE DISTRIBUTION (ELECTRONICS)
Transverse mode analysis of hole-coupled free-electron lasers
[ETN-94-96019] p 3715 N94-31532

HOLE GEOMETRY (MECHANICS)
New thick film feedthrough configurations
[DE94-008706] p 3694 N94-32582

HOLES (ELECTRON DEFICIENCIES)
Transverse mode analysis of hole-coupled free-electron lasers
[ETN-94-96019] p 3715 N94-31532
High pressure experiments on the Y-Ba-Cu-O superconductors: A major role for holes
[ETN-94-96013] p 3897 N94-31547
Analytical solutions of minimum ionization particle induced current shapes of silicon detectors and simulation of charge collection properties
[DE94-007523] p 3870 N94-32355

HOLES (MECHANICS)
Finite element analysis of MB326H Macchi wing lower spar cap fatigue cracks
[AD-A277062] p 3580 N94-32264

HOLOGRAPHY
Photoelectron diffraction and holography: Present status and future prospects
[DE94-006298] p 3712 N94-31629
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831
Reversible optical storage in azo polymers
[AD-A277109] p 3654 N94-31980
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681
Imaging of surface structure with energy-dependent photoelectron diffraction
[DE94-009096] p 3907 N94-32934

HOMING DEVICES
Optical processing of MMW for agile beamsteering and beamforming
[AD-A277161] p 3880 N94-32068
Calibration and validation studies in the LENS facility
[AD-A278403] p 3591 N94-33167

HOMOGENEOUS TURBULENCE
Laser-induced fluorescence/particle tracking system for stratified flow research
[AD-A275917] p 3701 N94-31341

HOMOGENIZING
Competition between crystallization and mixing/demixing in polymer mixture
[ETN-94-95753] p 3651 N94-31513
Liquid-assisted diffusion bonding of NiAl
[DE94-008687] p 3645 N94-32522

HONEYCOMB STRUCTURES
Honeycomb sandwich structures: Vented versus unvented designs for space systems
[AD-A276713] p 3624 N94-32122
MSAT boom joint testing and load absorber design
p 3606 N94-33315

HORIZONTAL FLIGHT
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108

HORSESHOE VORTICES
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071

HOT CORROSION
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023

HOT ELECTRONS
An extended approach to oxidations and nitridations of Si and Ge(x)Si(1-x) materials
[AD-A276056] p 3631 N94-31282

HOT PRESSING
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665

HOUSINGS
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065
Leveraging metal matrix composites to reduce costs in space mechanisms p 3604 N94-33301

HOVERING
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108

HOVERING STABILITY
Controls design with crossfeeds for hovering rotorcraft using quantitative feedback theory
[NASA-CR-195765] p 3585 N94-31203

HUBBLE CONSTANT
Measuring the Hubble constant and our Virgo-infall velocity independently p 3926 N94-31968

HUBBLE DIAGRAM
Fireworks in velocity and configuration space applied to cosmology
[USIP-93-90] p 3927 N94-31086

HULLS (STRUCTURES)
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065
Magnetohydrodynamic boundary layer control system
[AD-D016120] p 3710 N94-32958

HUMAN BEHAVIOR
An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine
[AD-A277516] p 3805 N94-33349

HUMAN BODY
Minutes: Accredited Standards Committee on Bioacoustics, S3. US TAG for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock
[AD-A276201] p 3795 N94-31490
Virtual reality in medical education and assessment
p 3798 N94-32471

HUMAN FACTORS ENGINEERING
AGARD highlights 94/1, April 1994
[AGARD-HIGHLIGHTS-94/1] p 3956 N94-31196
A review of microclimate cooling systems in the chemical, biological, radiological environment
[AD-A276446] p 3802 N94-31302
Minimization of carpal tunnel syndrome
[AD-A276409] p 3795 N94-31363
Assessment of interior modifications in C-130 and C-141 aircraft for night vision goggle operations
[AD-A276843] p 3582 N94-32223
THE VERTICAL p 3806 N94-32435
The relationship between integrative task design for information systems professionals and perceived information systems effectiveness p 3919 N94-32487
The role of guideline-based design tools
[DE94-007482] p 3804 N94-32596
Design of graphic screens using Neuro Linguistic Programming
[DE94-007634] p 3819 N94-32599
Aircrew Eye/Respiratory Protection (AERP): 16-hour extended wear evaluation of chemical protective equipment
[AD-A277288] p 3804 N94-32609
Aviation human factors research in US universities: Potential contributions to national needs
[NASA-TM-108814] p 3575 N94-32927
Use of a pitch adjustable foot restraint system: Operator strength capability and load requirements
[NASA-TP-3477] p 3805 N94-33050
Cockpit Electronic Display Workshop: Proceedings (computer diskette)
[AD-M000330] p 3805 N94-33171
Cockpit Electronic Display Workshop: A synopsis
[AD-A277728] p 3583 N94-33280

HUMAN PERFORMANCE
Development and enhancement of a model of performance and decision making under stress in a real life setting
[AD-A276029] p 3799 N94-31440
Effects of methamphetamine and fatigue on long- and short-term memory
[AD-A276452] p 3799 N94-32187
A systems approach to computer-based training
p 3823 N94-32436

HUMAN REACTIONS
Situational awareness: A feasibility investigation of near-threshold skills development
[AD-A276467] p 3798 N94-31243
HUMAN RESOURCES
European business confronted with the 21st century: Men, the essential risk
[ESA-SP-1167] p 3914 N94-31181
HUMAN TOLERANCES
Review of pharmacological approach to improve cold tolerance p 3796 N94-31740
Lipid metabolism in cold-exposed humans p 3796 N94-31741
Numerical model of the thermal behavior of an extremity in a cold environment including counter-current heat exchange between the blood vessels
[AD-A278099] p 3798 N94-33040
Exposure assessment of JAVELIN missile combustion products
[AD-A278128] p 3616 N94-33059
HUMAN-COMPUTER INTERFACE
Development concept for Dutch user support
[PB94-125523] p 3598 N94-31208
Extender's guide for artifacts and drafts
[AD-A276344] p 3810 N94-31328
Developing the Multimedia User Interface Component (MUSIC) for the Icarus Presentation System (IPS)
[AD-A276341] p 3810 N94-31335
Digit-Eyes: Vision-based human hand tracking
[NASA-CR-195913] p 3803 N94-31447
Automatic generation of context-sensitive textual help
[REPT-93-68] p 3812 N94-31646
GKS-9X: An experimental application
[PB94-147048] p 3813 N94-31685
Designing in virtual reality: Modelling Objects in a Virtual Environment (MOVE)
[REPT-93-91] p 3813 N94-31704
Beyond the read-eval loop: The artifacts system
[AD-A276589] p 3803 N94-32034
Human Computer Interface Specifications (HCIS) for the Integrated Maintenance Information System (IMIS)
[AD-A277184] p 3566 N94-32254
Modular Simulator System (MSS). Interface requirements specification for the generic MSS
[AD-A276965] p 3588 N94-32311
Interactive graphical model building using telepresence and virtual reality
[DE94-001421] p 3818 N94-32353
The intelligent monitoring system: Generic Database Interface (GDI). Revised user manual
[AD-A277131] p 3919 N94-32382
THE VERTICAL p 3806 N94-32435
Relationships between access and use in information systems: Remote access to and browsing of online catalogs p 3919 N94-32488
On the implementation of error handling in dynamic interfaces to scientific codes
[DE94-008970] p 3818 N94-32585
The role of guideline-based design tools
[DE94-007482] p 3804 N94-32596
Design of graphic screens using Neuro Linguistic Programming
[DE94-007634] p 3819 N94-32599
The hypermedia technology as front end to knowledge processing systems p 3854 N94-33343
HURRICANES
Remote sensing for hurricane Andrew impact assessment p 3758 N94-32464
HYBRID CIRCUITS
Superconducting and semiconducting hybrids and advance memory concepts for superconducting electronics
[AD-A277766] p 3907 N94-32988
HYBRID COMPUTERS
Real time simulation model for designing converter regulation
[ETN-94-95735] p 3689 N94-31576
HYBRID PROPELLANTS
Shock tube ignition and combustion of aluminum/magnesium alloy particles in oxygen at high pressure p 3631 N94-31286
HYBRID PROPULSION
Energy storage specification requirements for hybrid-electric vehicle
[DE94-008642] p 3694 N94-32521
HYDRATES
Gas hydrate detection and mapping on the US east coast
[DE94-005959] p 3742 N94-31504
HYDROCARBON COMBUSTION
Ignition studies in nonpremixed hydrogen/air combustion
[AD-A275954] p 3632 N94-31348
HYDROCARBON FUELS
Fuel property effects on engine combustion processes
[DE94-005529] p 3631 N94-31153
HYDROCARBONS
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894
Development and preliminary evaluation of aryl ester boundary additives for perfluoropolyethers
[NASA-TM-106603] p 3663 N94-33024
HYDROCYANIC ACID
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
Cometary molecules p 3935 N94-31869
HYDRODYNAMICS
Workshop on advances in smooth particle hydrodynamics
[DE94-006221] p 3956 N94-31308
Fluid-structure interaction in case of water hammer with cavitation
[PB94-148277] p 3702 N94-31588
Studies in physico-chemical hydrodynamics of extended systems
[DE94-006752] p 3706 N94-32149
Boundary element analysis of three-dimensional nonlinear hydrodynamics in a reduced gravity environment p 3668 N94-32715
A study of near-surface and underwater explosions by computer simulations
[DE94-009038] p 3708 N94-32849
Convection in Type 2 supernovae
[DE94-009373] p 3938 N94-32914
HYDROGEN
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
Compressible convection with ionization p 3911 N94-31498
Hydrogen incorporation and radiation induced dynamics in metal-oxide-silicon structures: A study using nuclear reaction analysis
[ETN-94-95742] p 3898 N94-31610
Modern integral equation techniques for quantum reactive scattering theory
[DE94-007039] p 3857 N94-31639
Metal hydrides in hydrogen energy systems
[VTT-TIED-1407] p 3759 N94-31655
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309
Boron and hydrogen in Ni3Al. Part 2: Mechanical testing of bicrystals
[DE94-007441] p 3904 N94-32606
HYDROGEN ATOMS
Rate coefficient for the reaction H + O2 yields OH + O: Results from 2000 to 5300 K
[DE94-008105] p 3871 N94-32615
HYDROGEN BONDS
Electric field-induced changes in odd-numbered nylons
[AD-A278003] p 3664 N94-33138
HYDROGEN COMPOUNDS
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
HYDROGEN EMBRITTLEMENT
Prediction of hydrogen entry and permeation in metals and alloys
[AD-A276637] p 3642 N94-31995
HYDROGEN ENGINES
The hydrogen hybrid option
[DE94-006733] p 3667 N94-32148
HYDROGEN FUELS
NEMO: Advanced energy systems and technologies
[DE94-721996] p 3760 N94-31767
Scenarios for multi-unit inertial fusion energy plants producing hydrogen fuel
[DE94-006614] p 3666 N94-32114
HYDROGEN IONS
Spectroscopic study of the molecular collisions (hydrogen-nitrogen and hydrogen-oxygen) at energies of several MeV
[ISBN-0-315-86794-9] p 3867 N94-31753
HYDROGEN OXYGEN ENGINES
The 7.5K lbf thrust engine preliminary design for Orbit Transfer Vehicle
[NASA-CR-189175] p 3614 N94-31618
HYDROGEN PEROXIDE
Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056
Formation of gas-phase peroxides in a rural atmosphere: An interpretation of the recent SOS/SERON field results
[DE94-002995] p 3766 N94-32692
HYDROGEN PLASMA
Stark broadening of the 2S state of hydrogen and deuterium in arc plasmas of low density
[ETN-94-95731] p 3888 N94-31572
HYDROGEN PRODUCTION
Biological conversion of synthesis gas
[DE94-000094] p 3760 N94-31811
Scenarios for multi-unit inertial fusion energy plants producing hydrogen fuel
[DE94-006614] p 3666 N94-32114
HYDROGENATION
Experimental and theoretical studies of hydrogenated amorphous semiconductor alloys and superlattices
[AD-A276159] p 3686 N94-31079
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
Electrochemical surface modification of silicon monocrystals: A surface analytic examination
[ETN-94-95733] p 3633 N94-31574
HYDROGRAPHY
Results of real-time testing and demonstration of the US Army Corps of Engineers real-time on-the-fly positioning system
[AD-A276160] p 3576 N94-31080
Hydrographic service Royal Australian Navy
[AD-A277134] p 3788 N94-32066
Three dimensional vorticity field in the California current system
[AD-A276951] p 3788 N94-32220
Real-time centimeter positioning with GPS: A system developed by the US Army Corps of Engineers
[AD-A278152] p 3577 N94-33095
Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992
[AD-A277935] p 3791 N94-33245
HYDROLOGICAL CYCLE
Cumulus convection parameterization and numerical modelling of moist atmospheres p 3783 N94-31989
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
HYDROLOGY
Hydrologic Database user's manual
[DE94-003950] p 3743 N94-31603
Application of ERS-1 SAR data for hydrological studies p 3754 N94-32558
Snowmelt forecasting. Further cold regions development of operational hydrological forecasting, volume 2
[AD-A278123] p 3757 N94-33269
HYDROLOGY MODELS
ADCIRC: An advanced three-dimensional circulation model for shelves, coasts, and estuaries. User's manual for ADCIRC-2DDI
[AD-A276150] p 3787 N94-31250
HYDROLYSIS
Preparation of catalyst particles using methods of colloid chemistry. Part 1: Preparation of silica particles from alcohol solutions
[PB94-135597] p 3634 N94-31679
Improved resealing procedures for the second deseal/reseal program in RAAF F111 aircraft fuel tanks
[AD-A277069] p 3580 N94-32378
HYDROPHONES
Prediction of the plane wave beamformed acoustic arrival structure for the 1992 Barents Sea coastal tomography test
[AD-A276741] p 3788 N94-32181
Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise)
[AD-A277009] p 3789 N94-32401
HYDROSTATICS
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916
HYDROTHERMAL SYSTEMS
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981
HYDROXYL EMISSION
Simulation of CO2 release at 800 km altitude
[AD-A276692] p 3776 N94-33272
HYDROXYL RADICALS
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
Simulation of CO2 release at 800 km altitude
[AD-A276692] p 3776 N94-33272
HYPERBARIC CHAMBERS
Effects of combined breathing impediments on diver's respiratory performance
[AD-A277437] p 3805 N94-33084
HYPERBOLIC DIFFERENTIAL EQUATIONS
Fully discrete arbitrary-order schemes for a model hyperbolic conservation law
[CRANFIELD-AERO-9307] p 3843 N94-31539
A numerical method for mixing/chemically reacting compressible flow with finite rate chemistry p 3634 N94-31824

HYPERCUBE MULTIPROCESSORS
Spacecraft On-Board Information Extraction Computer (SOBIEC) p 3808 N94-32433
Development of a low-latency scalar communication routine on message-passing architectures [DE94-007061] p 3827 N94-32683
HYPERFINE STRUCTURE
Impact of observed hyperfine splitting on X-ray laser gain [DE94-005822] p 3717 N94-32128
HYPERONS
Hyperon polarization and magnetic moments [DE94-006041] p 3864 N94-31507
The Nijmegen hyperon-nucleon potentials [DE94-007557] p 3869 N94-32139
Hyperon polarization, crystal channeling, and E781 at Fermilab [DE94-008224] p 3877 N94-32802
HYPERSONIC AIRCRAFT
Hypervelocity Tunnel 9 Mach 10/14 Calibration [AD-A275960] p 3587 N94-31318
HYPERSONIC BOUNDARY LAYER
Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882
HYPERSONIC FLIGHT
Hypervelocity Tunnel 9 Mach 10/14 Calibration [AD-A275960] p 3587 N94-31318
HYPERSONIC FLOW
Analysis of the photodiode boundary layer transition indicator [DE94-005311] p 3701 N94-31268
Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882
Vibrational energy transfer of diatomic gases in hypersonic expanding flows p 3570 N94-31958
Surface boundary conditions and related technical issues concerning Burnett equations for 2-D hypersonic flow [AD-A277322] p 3706 N94-32256
Calibration and validation studies in the LENS facility [AD-A278403] p 3591 N94-33167
HYPERSONIC NOZZLES
Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882
HYPERSONIC SHOCK
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879
HYPERSONIC SPEED
Hypervelocity Tunnel 9 Mach 10/14 Calibration [AD-A275960] p 3587 N94-31318
HYPERSONIC VEHICLES
A new inverse method for generating high-speed aerodynamic flows with application to waverider design p 3569 N94-31828
HYPERSONIC WIND TUNNELS
Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882
HYPERSONICS
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216
Hypervelocity Tunnel 9 Mach 10/14 Calibration [AD-A275960] p 3587 N94-31318
Computational radiative heat transfer in homogeneous and nonhomogeneous nonscattering media p 3702 N94-31563
A new inverse method for generating high-speed aerodynamic flows with application to waverider design p 3569 N94-31828
Vibrational energy transfer of diatomic gases in hypersonic expanding flows p 3570 N94-31958
HYPERVELOCITY IMPACT
Physical properties of glasses exposed to Earth-facing and trailing-side environments on LDEF p 3594 N94-31030
Morphology correlation of craters formed by hypervelocity impacts p 3594 N94-31031
Space hypervelocity microparticle impact damage in polymer matrix composites [ISBN-0-315-87057-5] p 3652 N94-31692
Development of high-pressure diaphragms for the AEDC impulse tunnel [AD-A277053] p 3588 N94-32009
Biospheric effects of a large extraterrestrial impact: Case study of the Cretaceous/Tertiary boundary crater [NASA-CR-195827] p 3942 N94-32740
HYPERVELOCITY LAUNCHERS
Development of high-pressure diaphragms for the AEDC impulse tunnel [AD-A277053] p 3588 N94-32009
Basic and applied studies of the ram accelerator as a hypervelocity projectile launcher [AD-A277392] p 3602 N94-32288
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher [DE94-005244] p 3603 N94-32671
HYPERVELOCITY PROJECTILES
Basic and applied studies of the ram accelerator as a hypervelocity projectile launcher [AD-A277392] p 3602 N94-32288
HYPERVELOCITY WIND TUNNELS
Development of high-pressure diaphragms for the AEDC impulse tunnel [AD-A277053] p 3588 N94-32009
HYPOTHERMIA
Validation and sensitivity analysis of Texas human thermal model predictions during cold water immersion [AD-A275240] p 3797 N94-32156
HYPOTHESES
On the relationship between generalization error, hypothesis complexity, and sample complexity for radial basis functions [AD-A276802] p 3851 N94-32142
Varying execution discipline to increase performance [DE94-007844] p 3819 N94-32651
HYPSOMETERS
Study of subpolar glaciers of Spitzbergen using SPOT, ERS-1, and hypsometric data: Results and perspectives p 3753 N94-32553
HYSTERESIS
Element-specific magnetic hysteresis measurements, a new application of circularly polarized soft x-rays [DE94-007122] p 3858 N94-31397
The ferroelectric behavior of odd-numbered nylons [AD-A278126] p 3663 N94-33058

I

ICE
Satellite radar altimetry over the continental ice sheets p 3742 N94-31570
Microwave sensor for ice detection p 3583 N94-32457
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation [DE94-007564] p 3637 N94-32743
The distribution of Martian ground ice at other epochs p 3948 N94-33218
Temporal changes in the geographic distribution, elevation, and potential origin of the Martian outflow channels p 3951 N94-33235
ICE FLOES
Modeling of fracture and damage in quasibrittle materials p 3734 N94-31479
ICE FORMATION
Development of a three-dimensional icing model for predicting ice accretion on aircraft [ONERA-NT-1993-5] p 3574 N94-31230
Continuous measurement of aircraft wing icing p 3576 N94-32454
The distribution of Martian ground ice at other epochs p 3948 N94-33218
ICE PREVENTION
Aircraft icing handbook (update) [AD-A276499] p 3574 N94-31678
WHIPICE — computer program for analysis of aircraft deicing [NASA-TM-109749] p 3574 N94-31803
IDEAL FLUIDS
Stability and instability criteria for magnetohydrodynamics [PB94-148475] p 3889 N94-31772
IDENTIFYING
Particle identification in a segmented calorimeter (NUMASS test data, September 1991) [USIP-93-08] p 3711 N94-31085
IGNEOUS ROCKS
Evidence for ultramafic lavas on Syrtis Major p 3950 N94-33229
IGNITERS
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic [DE94-006467] p 3666 N94-31827
IGNITION
Ignition studies in nonpremixed hydrogen/air combustion [AD-A275954] p 3632 N94-31348
IGNITION SYSTEMS
Laser Diode Ignition (LDI) [DE94-006590] p 3666 N94-31579
IGNITRONS
High-power microwave-tube transmitters [DE94-005340] p 3686 N94-31150
High power switch design for the Nova upgrade laser (Project HERCULES: High Energy Research Concerning the Ultimate Lifetime of Experimental Switches) [DE94-007921] p 3719 N94-32654
ILLUMINANCE
The properties of sunflecks in a flexible plant canopy, and their relationship to turbulence p 3782 N94-31775
ILLUMINATING
Evaluation for the development of taxiway lighting intensity standards [AD-A276706] p 3588 N94-32120
Evaluation of intensity distribution profiles for US. Army rotorcraft position lighting adapted for image intensifier operations [AD-A276459] p 3804 N94-32171
Optical processing for semiconductor device fabrication p 3885 N94-32445
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars p 3947 N94-33211
IMAGE ANALYSIS
Computing the precision of localization in a plane using projective invariants [TELECOM-93-D-005] p 3840 N94-31095
Tracking roads in an aerial image by Kalman filtering [TELECOM-93-D-007] p 3711 N94-31096
Automatic extraction of cartographic objects by fusion of data extracted from satellite images [TELECOM-93-E-001] p 3742 N94-31165
Camera-space manipulation with natural visual information p 3829 N94-31207
Feature discovery in gray level imagery for one-class object recognition [DE94-005268] p 3671 N94-31267
Analytical applications of scanning tunneling microscopy [AD-A276066] p 3711 N94-31283
Radar image classification by texture measurements [ONERA-NT-1993-3] p 3673 N94-31419
Volumetric modelling of three dimensional scenes by octree decomposition of geometric models [ISBN-0-315-86866-X] p 3814 N94-31728
Safe navigation and active vision for autonomous vehicles: A purposive and direct solution p 3832 N94-31842
Feasibility evaluation of new data interpretation approaches for vegetation analysis from airborne imaging spectroscopy p 3745 N94-31862
The use of ERS-1 within an operational ice monitoring program p 3751 N94-32545
PSIDD: A Post-Scan Interactive Data Display system for ultrasonic scans [NASA-TM-4545] p 3732 N94-33038
IMAGE CLASSIFICATION
A neuron network for image classification: From algorithm to implantation [TELECOM-93-E-005] p 3687 N94-31168
Filtering and recognition of moving boats in radar images [REPT-93-039] p 3671 N94-31190
Radar image classification by texture measurements [ONERA-NT-1993-3] p 3673 N94-31419
Evaluation of GER- and FLI-data with reference to forest p 3746 N94-31868
A differential theory of learning for efficient statistical pattern recognition [AD-A277313] p 3800 N94-32277
An intelligent interactive visual database management system for Space Shuttle closeout image management p 3923 N94-32469
Monitoring land cover and crop types in Denmark using ERS-1 SAR and optical satellite images p 3748 N94-32528
SPOT imagery for updating land cover information of 1:50,000 numerical topographic maps p 3749 N94-32532
Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536
Robust multisource classification method using the Markov random field methods p 3750 N94-32537
Technique of ERS-1 image processing in association with SPOT data p 3750 N94-32538
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539
Land cover change detection with ERS-1 data and data from other remote sensing satellites. Example: The delta of the River Ebro (Spain) p 3755 N94-32564
Statistical analysis and mapping of cotton and food crop cultivation surfaces in the west of Burkina Faso: Contribution of combined SPOT P and XS data p 3757 N94-32575
TRMM-related research: Tropical rainfall and energy analysis experiment [NASA-CR-195834] p 3787 N94-33288

IMAGE ENHANCEMENT
Digital image profilers for detecting faint sources which have bright companions
[NASA-CR-191348] p 3927 N94-32695
Theory and application of image enhancement
[AD-A277896] p 3821 N94-33031
IMAGE FILTERS
Filtering and recognition of moving boats in radar images
[REPT-93-039] p 3671 N94-31190
Morphological directional coding of images
[ISBN-0-315-86336-6] p 3814 N94-31715
IMAGE INTENSIFIERS
Variable-resolution imagery for flight simulation
[AD-A276199] p 3586 N94-31058
Evaluation of intensity distribution profiles for US. Army rotorcraft position lighting adapted for image intensifier operations
[AD-A276459] p 3804 N94-32171
IMAGE PROCESSING
Phase unwrapping problems in ISAR images
[TELECOM-93-D-008] p 3670 N94-31097
Entropy, information (and image), part 1
[TELECOM-93-D-009] p 3910 N94-31098
Regular wavelets: Application to fixed image compression
[TELECOM-93-E-004] p 3858 N94-31167
Interactive reconstruction of anatomical structures with free-form surfaces
[TELECOM-93-E-002] p 3794 N94-31195
Feature discovery in gray level imagery for one-class object recognition
[DE94-005268] p 3671 N94-31267
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
Imaging AMS
[DE94-006662] p 3632 N94-31349
Concurrent architectures for VLSI signal and image processing
[AD-A276124] p 3688 N94-31445
Optical and image transmission through desert atmospheres
[AD-A276022] p 3742 N94-31496
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
Morphological directional coding of images
[ISBN-0-315-86336-6] p 3814 N94-31715
Linearly separable stack-like architecture for the design of weighted order statistic filters with application in image processing
[ISBN-0-315-87284-5] p 3675 N94-31731
Algorithms and parallel architectures for laser acoustic imaging
[ISBN-0-315-86466-4] p 3716 N94-31797
Texture library for 3-dimensional visualization systems
[AD-A276125] p 3917 N94-31829
Possibilities of GER data for soil surface characteristics in the Almaden area p 3744 N94-31859
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Alternatives to hierarchical techniques in stereo correlation
[AD-A276570] p 3746 N94-31938
Robot motion vision by fixation p 3833 N94-31991
High performance hardware and software for pattern recognition and image processing
[AD-A276405] p 3816 N94-32130
Algebraic functions for recognition
[AD-A276803] p 3846 N94-32167
Optical flow from 1D correlation: Application to a simple time-to-crash detector
[AD-A276777] p 3880 N94-32186
Real time character recognition for F-111C video tape records
[AD-A277061] p 3580 N94-32263
Neural models of spatial orientation in novel environments
[AD-A277383] p 3835 N94-32340
A visual detection model for DCT coefficient quantization p 3850 N94-32467
From Optics to Radar, SPOT and ERS Applications
[ISBN-2-85428-345-7] p 3747 N94-32523
Contribution of SAR ERS1 data to study the French Guiana tropical coast environment
[BRGM-93034] p 3748 N94-32527
The contribution of satellite data in communication infrastructure projects p 3749 N94-32530
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images p 3750 N94-32535
Technique of ERS-1 image processing in association with SPOT data p 3750 N94-32538
Production of terrain data: Optical radar complementarity p 3750 N94-32540
SAR image feature extraction system: A pre-operational application of ERS-1 SAR p 3751 N94-32543
Optimal geological data extraction from SPOT-radar synergism with samples from Djebel Amour (Algeria), Red Sea Hills (Sudan), Sirte Basin (Libya), and Magdalena Valley (Colombia) p 3752 N94-32548
The processing technology and some applications of Almaz-1 data p 3756 N94-32573
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681
VLSI for high-speed digital signal processing
[AD-A277617] p 3697 N94-32957
High frequency active auroral research program (HAARP) imager
[AD-A277469] p 3775 N94-32999
Theory and application of image enhancement
[AD-A277896] p 3821 N94-33031
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069
Global color views of Mars p 3948 N94-33217
IMAGE RECONSTRUCTION
Interactive reconstruction of anatomical structures with free-form surfaces
[TELECOM-93-E-002] p 3794 N94-31195
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565
Stereoscopic correspondence based on the structure of shading
[ISBN-0-315-86418-4] p 3814 N94-31718
Volumetric modelling of three dimensional scenes by octree decomposition of geometric models
[ISBN-0-315-86866-X] p 3814 N94-31728
Linearly separable stack-like architecture for the design of weighted order statistic filters with application in image processing
[ISBN-0-315-87284-5] p 3675 N94-31731
A neural network model for the visual perception of the depth of a scene from stereoscopy and shading
[ISBN-0-315-86753-1] p 3831 N94-31750
IMAGE RESOLUTION
Incoherent imaging by Z-contrast stem: Towards 1 Angstrom resolution
[DE94-006551] p 3896 N94-31489
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203
IMAGERY
Variable-resolution imagery for flight simulation
[AD-A276199] p 3586 N94-31058
Visual evaluation of computer-generated textures
[AD-A277201] p 3816 N94-32093
IMAGING RADAR
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
Comparing SPOT and SIR A for mapping superficial formations in tropical forest regions: Example of the Yaoundy Region (Cameroon) p 3755 N94-32562
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea p 3755 N94-32565
IMAGING SPECTROMETERS
European Imaging Spectroscopy Aircraft Campaign
[ESA-SP-360] p 3743 N94-31853
The European Imaging Spectroscopy Airborne Campaign (EISAC). Data takes and evaluation programme: An overview p 3743 N94-31854
Ground based radiometric and atmospheric measurements p 3744 N94-31855
NORSMAP 1989: Norwegian remote sensing spectroscopy for mapping and monitoring or algal blooms and pollution p 3744 N94-31856
Analysis of GER imaging spectrometry data for the identification of soil and vegetation parameters in land degradation studies p 3744 N94-31857
Inflight calibration, preprocessing, and data evaluation of GER 2 imaging spectrometry data p 3744 N94-31858
Possibilities of GER data for soil surface characteristics in the Almaden area p 3744 N94-31859
The effects of vegetation on the ability to map soils using GERIS data p 3744 N94-31860
Investigation on correction models for airborne imaging spectrometry data from the EISAC-campaign for geoscientific purposes p 3745 N94-31861
Feasibility evaluation of new data interpretation approaches for vegetation analysis from airborne imaging spectroscopy p 3745 N94-31862
Monitoring fertilizer application by imaging spectrometry (Somerset Levels test site) p 3745 N94-31863
High resolution spectroscopy in agriculture: Results of the EISAC 1989 campaign p 3745 N94-31864
Extraction of agricultural parameters from imaging-spectrometry data and simulated MERIS data through red edge analysis p 3745 N94-31865
Evaluation of Fluorescence Line Imager (FLI) airborne imaging spectrometer data for roadside tree damage assessment p 3745 N94-31866
Extraction of forests stand age parameters from airborne imaging spectroscopy data p 3745 N94-31867
Evaluation of GER- and FLI-data with reference to forest p 3746 N94-31868
Earth observational research using multistage EOS-like data
[NASA-CR-195833] p 3757 N94-33019
MODIS. Volume 2: MODIS level 1 geolocation, characterization and calibration algorithm theoretical basis document, version 1
[NASA-TM-104594-VOL-2] p 3613 N94-33289
IMAGING TECHNIQUES
Studying transient mobility and energy loss using scanning tunneling microscopy
[AD-A276292] p 3877 N94-31256
New and emerging techniques for imaging surfaces
[AD-A276497] p 3878 N94-31262
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
Imaging AMS
[DE94-006662] p 3632 N94-31349
Incoherent imaging by Z-contrast stem: Towards 1 Angstrom resolution
[DE94-006551] p 3896 N94-31489
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565
Soot and liquid-phase fuel distributions in a newly designed optically accessible DI diesel engine
[DE94-005648] p 3723 N94-31651
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831
Elastic modulus measurements of LDEF glasses and glass-ceramics using a speckle technique
[NASA-CR-195911] p 3653 N94-31851
A multi-frequency study of an x ray selected sample of active galactic nuclei p 3937 N94-31987
Robot motion vision by fixation p 3833 N94-31991
Night vision camcorder system
[AD-A277004] p 3712 N94-32002
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3692 N94-32112
Design and early results of the sodium-layer laser guide star adaptive optics experiment at the Lawrence Livermore National Laboratory
[DE94-006653] p 3926 N94-32189
Ocean optics, ocean imaging and optical tomography
[AD-A277010] p 3789 N94-32402
A versatile nondestructive evaluation imaging workstation p 3732 N94-32458
A new high-speed IR camera system p 3713 N94-32459
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Dual-band infrared imaging to detect corrosion damage within airframes and concrete structures
[DE94-006047] p 3580 N94-32658
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681
Digital image profilers for detecting faint sources which have bright companions
[NASA-CR-191348] p 3927 N94-32695
An electrical test system for conductor formation process analysis
[DE94-007291] p 3696 N94-32786
Imaging of surface structure with energy-dependent photoelectron diffraction
[DE94-009096] p 3907 N94-32934
High frequency active auroral research program (HAARP) imager
[AD-A277469] p 3775 N94-32999
Earth observational research using multistage EOS-like data
[NASA-CR-195833] p 3757 N94-33019
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069

Synthetic vision technology demonstration. Volume 1: Executive summary
[DOT/FAA/RD-93/40-VOL-1] p 3582 N94-33076
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Synthetic vision technology demonstration. Volume 4: Appendices
[DOT/FAA/RD-93/40-VOL-4] p 3583 N94-33079
Scalar imaging velocimetry studies of turbulent flow structure and dynamics
[AD-A278395] p 3710 N94-33164
Nanoscale structural changes upon electrooxidation of Au(111) as probed by potentiodynamic scanning tunneling microscopy
[AD-A276780] p 3909 N94-33275
Simplified ultra-high resolution optic for soft x ray imaging
[AD-A278424] p 3885 N94-33331

IMPACT DAMAGE
Physical properties of glasses exposed to Earth-facing and trailing-side environments on LDEF p 3594 N94-31030
Morphology correlation of craters formed by hypervelocity impacts p 3594 N94-31031
Micrometeoroid/space debris effects on materials p 3595 N94-31032
Space environmental effects on polymer composites: Research needs and opportunities p 3595 N94-31035
Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112
Space hypervelocity microparticle impact damage in polymer matrix composites
[ISBN-0-315-87057-5] p 3652 N94-31692
Evaluating in-plane elastic constants of damaged carbon-epoxy laminates using a quantitative ultrasonic technique p 3621 N94-31793
Location of impact damage sites in composite aircraft structures, task 3.4.1
[DSIS-94-01590] p 3621 N94-31892
Low velocity impact damage in carbon fiber/PEEK composite laminates
[ISBN-0-315-86546-6] p 3622 N94-31909
Experimental measurement of dynamic failure and fragmentation properties of metals
[DE94-007377] p 3737 N94-32135
Assessment of impact damage in composite structures
[AD-A277063] p 3624 N94-32265

IMPACT LOADS
Study of wave propagation and dynamic response of laminated composite structures
[AD-A276123] p 3619 N94-31444
Point-contact and point-impact dynamics for multibody chains
[ISBN-0-315-87056-7] p 3734 N94-31737
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses p 3653 N94-31942
Development of high-pressure diaphragms for the AEDC impulse tunnel
[AD-A277053] p 3588 N94-32009

IMPACT MELTS
Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada p 3948 N94-33219

IMPACT PREDICTION
Planetesimal dynamics in the vicinity of a growing protoplanet p 3935 N94-31926

IMPACT STRENGTH
Development of stitched/RTM composite primary structures p 3628 N94-33127

IMPACT TESTS
Determining the bearing capacity of flexible airfield pavements using a heavy weight deflectometer
[ISBN-0-315-86210-6] p 3587 N94-31710
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses p 3653 N94-31942
Experimental measurement of dynamic failure and fragmentation properties of metals
[DE94-007377] p 3737 N94-32135
Test and analysis results for composite transport fuselage and wing structures p 3628 N94-33129

IMPINGEMENT
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879

IMPLANTED ELECTRODES (BIOLOGY)
Perspectives of glucose sensing based on a charge-modulating competition reaction
[ISBN-9-09-005754-4] p 3795 N94-31652
Neostriatal neuronal activity and behavior
[AD-A278429] p 3802 N94-33333

IMPLOSIONS
Measurement of ICF fuel ion temperature on Nova
[DE94-006150] p 3892 N94-32730

IMPULSES
Development of high-pressure diaphragms for the AEDC impulse tunnel
[AD-A277053] p 3588 N94-32009
System analysis of ultra-wideband instrumentation radars: Impulse versus stepped-chirp approaches
[AD-A276624] p 3677 N94-32087
Limiting vibration in systems with constant amplitude actuators through command preshaping
[NASA-CR-188284] p 3739 N94-32907

IMPURITIES
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
Growth and characterization of III-V semiconductors with rare earth impurities for optoelectronic devices
[AD-A276021] p 3896 N94-31455
Impurities and conductivity in a D-wave superconductor
[DE94-006222] p 3898 N94-31628
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
Development of sample charge compensation for characterization of impurities in semiconductor materials
[AD-A277113] p 3899 N94-31983
Characterization of atomic and molecular impurity sources and transport at the tokamak edge
[DE94-007212] p 3891 N94-32619
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672

IN SITU MEASUREMENT
New and emerging techniques for imaging surfaces
[AD-A276497] p 3878 N94-31262
Characterization of the corrosion resistance of duplex stainless steels using local current density mapping techniques
[DE94-007980] p 3646 N94-32699
Scanning tunneling microscopy and infrared spectroscopy as combined in-situ probes of electrochemical adlayer structure: Cyanide on Pt(111)
[AD-A276715] p 3909 N94-33274

IN-FLIGHT MONITORING
OARE flight maneuvers and calibration measurements on STS-58
[NASA-TM-109093] p 3613 N94-32924

INCLUSIONS
Correlation of flux composition and inclusion characteristics with submerged arc weld metal properties in HY-100 steel
[AD-A277040] p 3726 N94-32261
Pressureless sintering of ceramic composites
[AD-A277274] p 3657 N94-32404

INCOMPRESSIBLE FLOW
Solution of the incompressible Navier-Stokes equations in general coordinates by Krylov subspace and multigrid methods
[REPT-93-64] p 3703 N94-31660
Simulations of the creation and motion of vortex rings
[W-9319] p 3703 N94-31691
Finite element numerical simulation of turbulent flows
[ISBN-0-315-86418-8] p 3703 N94-31717
Finite element vorticity-based methods for the solution of the incompressible and compressible Navier-Stokes equations
[ISBN-0-315-87265-9] p 3703 N94-31730
Incompressible viscous flow in tubes with occlusions
[ISBN-0-315-75467-2] p 3704 N94-31778
Tip effects on the vortex wake of an axisymmetric body at angle of attack p 3570 N94-31907
Solution of the average-passage equations for the incompressible flow through multiple-blade-row turbomachinery
[AD-A276515] p 3583 N94-31931
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
Additive turbulent decomposition of the incompressible and compressible Navier-Stokes equations
[AD-A277321] p 3708 N94-32511

INCONEL (TRADEMARK)
Operation of D3-D with all-graphite walls
[DE94-004858] p 3886 N94-31304

INDENTATION
Indentability of conventional and negative Poisson's ratio foams p 3629 N94-33131

INDEXES (DOCUMENTATION)
Aeronautical engineering: A continuing bibliography with indexes (supplement 302)
[NASA-SP-7037(302)] p 3565 N94-31342
Aeronautical engineering: A continuing bibliography with indexes (supplement 303)
[NASA-SP-7037(303)] p 3565 N94-31381
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 388)
[NASA-SP-7011(388)] p 3795 N94-31414
Index to NASA news releases and speeches, 1993
[NASA-TM-109722] p 3917 N94-31688
The new Metals and Alloys Indexes, search manual: A phase diagram research tool
[DE94-005371] p 3643 N94-32098
A guide to experimental elementary particle physics literature, 1988-1992
[DE94-007445] p 3873 N94-32768
Aeronautical engineering: A continuing bibliography with indexes (supplement 304)
[NASA-SP-7037(304)] p 3566 N94-32853
Research and Technology Objectives and Plans Summary (RTOPS)
[NASA-TM-105441] p 3966 N94-32885
DTIC Thesaurus on diskette (ASC2) (computer diskette)
[AD-M000309] p 3922 N94-33257

INDIAN OCEAN
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260

INDIAN SPACECRAFT
INSAT-2A and 2B development mechanisms p 3603 N94-33293

INDIUM
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055

INDIUM GALLIUM ARSENIDES
A 1-picosecond InGaAs photodetector for operation at 1300-1600 nm
[AD-A275959] p 3895 N94-31350
High speed, strained layer, multiquantum well, GaInAsP and GaAs lasers and heterostructures
[AD-A277287] p 3719 N94-32608
Large-diameter InGaAs/AlGaAs vertical-cavity surface-emitting lasers with low threshold current density fabricated using a simple chemical etch process
[AD-A277733] p 3721 N94-33003
Characteristics of III-V semiconductor devices at high temperature
[NASA-TM-106574] p 3697 N94-33052

INDIUM PHOSPHIDES
The effects of amorphous layer regrowth on carbon activation in GaAs and InP
[DE94-006290] p 3899 N94-31634
Novel growth technologies for in situ formation of semiconductor quantum wire structures
[AD-A277188] p 3902 N94-32255
Novel optoelectronic devices based on combining GaAs and InP on Si
[AD-A277018] p 3693 N94-32301
High speed, strained layer, multiquantum well, GaInAsP and GaAs lasers and heterostructures
[AD-A277287] p 3719 N94-32608

INDUCTION
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher
[DE94-005244] p 3603 N94-32671

INDUCTION (MATHEMATICS)
Extensional realizability
[ML-93-18] p 3856 N94-31408

INDUSTRIAL SAFETY
Minimization of carpal tunnel syndrome
[AD-A276409] p 3795 N94-31363
Systems for the monitoring of working conditions relating to health and safety: Extensive description. Norway
[PB94-138542] p 3803 N94-31839

INDUSTRIES
Piezoelectric materials research in Europe
[AD-A276207] p 3648 N94-31059
Europe at the crossroads: The future of its satellite communications industry
[ESA-SP-1166] p 3670 N94-31182
Active matrix liquid crystal display. Industry survey results
[AD-A276415] p 3895 N94-31329
Satellite communications industry
[AD-A276685] p 3610 N94-32039
Strategies for survival in the new environmental era
[AD-A276827] p 3765 N94-32195
Sandia technology engineering and science accomplishments
[DE94-008312] p 3668 N94-32412
Biomass power industry: Assessment of key players and approaches for DOE and industry interaction
[DE94-000238] p 3761 N94-32725
LLNL casting technology
[DE94-008282] p 3669 N94-32839

INELASTIC COLLISIONS
Electron: Cluster interactions
[DE94-009089] p 3874 N94-32807
INELASTIC SCATTERING
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA
[ETN-94-96021] p 3865 N94-31534
Results from the H1 experiment at HERA
[PB94-145174] p 3868 N94-32008
Strongly anisotropic s-wave versus d-wave gap in cuprate superconductors: Evidence and theory
[DE94-007579] p 3904 N94-32746
Electron: Cluster interactions
[DE94-009089] p 3874 N94-32807
Polarized lepton-nucleon scattering
[DE94-009027] p 3875 N94-33278
INERTIAL CONFINEMENT FUSION
Measurement of ICF fuel ion temperature on Nova
[DE94-006150] p 3892 N94-32730
Fusion with highly spin polarized HD and D2
[DE94-006209] p 3876 N94-32731
INERTIAL FUSION (REACTOR)
Scenarios for multi-unit inertial fusion energy plants producing hydrogen fuel
[DE94-006614] p 3666 N94-32114
INFECTIOUS DISEASES
Noninvasive spectroscopic diagnosis of superficial ocular lesions and corneal infections
[DE94-006231] p 3797 N94-32732
INFERENCE
Completeness and decidability of the mixed style of inference with composition
[LP-93-09] p 3842 N94-31453
Weaks vs. strong readings of donkey sentences and monotonicity inference in a dynamic setting
[LP-93-10] p 3856 N94-31468
Statistical inference for coherent systems from partial information and in resampling techniques in survival analysis
[AD-A277382] p 3852 N94-32339
A simulation of uncertain reasoning on parametric databases using data-dependency derived inference nets p 3919 N94-32499
Reading: Interaction with memory
[AD-A277547] p 3801 N94-32956
INFILTRATION
Improved oxidation resistance of 3-D carbon/carbon composites
[AD-A277349] p 3625 N94-32624
INFLUENCE COEFFICIENT
Design and initial testing of a facility to measure unsteady pressures on an oscillating cascade with supersonic leading edge locus p 3569 N94-31880
INFORMATION
On a formal approach to the methodology of information planning
[MEMO-INF-93-42] p 3917 N94-31415
Control of a random walk with noisy delayed information
[CWI-BS-R9316] p 3846 N94-32108
INFORMATION DISSEMINATION
LDEF materials special investigation group's data bases p 3596 N94-31038
An innovative approach to space education p 3600 N94-31436
Information resources for US Department of Energy pollution prevention programs
[DE94-006677] p 3783 N94-31582
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 2
[NASA-CP-3249] p 3956 N94-32420
Using the National Information Infrastructure for social science, education, and informed decision making
[DE94-005442] p 3920 N94-32676
Multimedia as a desktop and classroom tool
[DE94-009118] p 3807 N94-32766
Information systems to enhance technology exchange
[DE94-007744] p 3920 N94-32808
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 5: Aerospace librarians and technical information specialists as information intermediaries: A report of phase 2 activities of the NASA/DOD Aerospace Knowledge Diffusion Research Project
[NASA-TM-109777] p 3921 N94-32829
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 6: Aerospace knowledge diffusion in the academic community: A report of phase 3 activities of the NASA/DOD Aerospace Knowledge Diffusion Research Project
[NASA-TM-109771] p 3921 N94-32830
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 10: The NASA/DOD Aerospace Knowledge Diffusion Research Project
[NASA-TM-109769] p 3921 N94-32831
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 12: The diffusion of federally funded aerospace research and development (R/D) and the information seeking behavior of US aerospace engineers and scientists
[NASA-TM-109404] p 3921 N94-32832
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 18: Scientific and Technical Information (STI) policy and the competitive position of the US aerospace industry
[NASA-TM-109782] p 3921 N94-32833
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 11: The voice of the user: How US aerospace engineers and scientists view DOD technical reports
[NASA-TM-109348] p 3921 N94-32834
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 1: The value of scientific and technical information (STI), its relationship to Research and Development (R/D), and its use by US aerospace engineers and scientists
[NASA-TM-109774] p 3922 N94-32835
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 25: The technical communications practices of British aerospace engineers and scientists: Results of the phase 4 RAeS mail survey
[NASA-TM-109098] p 3922 N94-32836
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 24: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SAE mail survey
[NASA-TM-109088] p 3922 N94-32837
Opinion polls and the US civil space program
[NASA-TM-109700] p 3914 N94-33066
INFORMATION MANAGEMENT
Acquisition information management system telecommunication site survey results
[DE94-005688] p 3915 N94-31155
DoD information systems capacity management function
[AD-A275987] p 3916 N94-31355
Detecting the erosion of hierarchic information structures
[RUU-CS-93-10] p 3916 N94-31365
On a formal approach to the methodology of information planning
[MEMO-INF-93-42] p 3917 N94-31415
Information resources for US Department of Energy pollution prevention programs

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 1: The value of scientific and technical information (STI), its relationship to Research and Development (R/D), and its use by US aerospace engineers and scientists
[NASA-TM-109774] p 3922 N94-32835
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 25: The technical communications practices of British aerospace engineers and scientists: Results of the phase 4 RAeS mail survey
[NASA-TM-109098] p 3922 N94-32836
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 24: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SAE mail survey
[NASA-TM-109088] p 3922 N94-32837

INFRARED ABSORPTION
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
Infrared and near infrared transient absorption spectroscopy of molecular free radicals
[DE94-005446] p 3632 N94-31305
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296

INFRARED ASTRONOMY
Multiwavelength search for protoplanetary disks p 3599 N94-31430
Near infrared surveys of high mass star forming regions p 3925 N94-31898
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969
High precision moving magnet chopper for variable operation conditions p 3605 N94-33307

INFRARED ASTRONOMY SATELLITE
Multiwavelength search for protoplanetary disks p 3599 N94-31430
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169

INFRARED DETECTORS
Chamber optics for testing passive remote sensing vapor detectors
[AD-A275909] p 3878 N94-31340
A 1-picosecond InGaAs photodetector for operation at 1300-1600 nm
[AD-A275959] p 3895 N94-31350
Remote infrared vapor detection of volatile organic compounds
[AD-A276982] p 3746 N94-31999
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013
Development of phase-only filters for sensor imagery
[AD-A276722] p 3880 N94-32151
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322
Synthetic vision technology demonstration. Volume 1: Executive summary
[DOT/FAA/RD-93/40-VOL-1] p 3582 N94-33076
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Synthetic vision technology demonstration. Volume 4: Appendices
[DOT/FAA/RD-93/40-VOL-4] p 3583 N94-33079
Research in the optical sciences
[AD-A278271] p 3884 N94-33140
Proceedings SPIE: Conference Digest, volume 2104
[AD-A278107] p 3884 N94-33187

INFRARED FILTERS
Wavelet transform of fixed pattern noise in focal plane arrays
[AD-A276963] p 3712 N94-32393

INFRARED IMAGERY
Development of phase-only filters for sensor imagery
[AD-A276722] p 3880 N94-32151
Dual-band infrared imaging to detect corrosion damage within airframes and concrete structures
[DE94-006047] p 3580 N94-32658

INFRARED INSTRUMENTS
A new high-speed IR camera system p 3713 N94-32459

INFRARED LASERS
New material for high average power infrared generation: OPM-DB GaAs
[AD-A276389] p 3714 N94-31358
Methods for SBS threshold reduction
[AD-A276554] p 3717 N94-31936
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649

INFRARED RADAR
Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559

INFRARED RADIATION
Infrared and near infrared transient absorption spectroscopy of molecular free radicals
[DE94-005446] p 3632 N94-31305
Free electrons as a versatile source of coherent radiation
[ETN-94-96011] p 3715 N94-31545
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013
The manifestations of energetic activity in the galactic center p 3937 N94-32028
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Wavelet transform of fixed pattern noise in focal plane arrays
[AD-A276963] p 3712 N94-32393
A noncritically phase matched femtosecond optical parametric oscillator near 3 microns
[DE94-008050] p 3720 N94-32704
Microreflectance infrared study of electron-molecular vibrational coupling and lattice softness in BEDT-TTF salts
[DE94-008490] p 3907 N94-32989
Laser and Fourier transform spectroscopy of novel propellant molecules
[AD-A277506] p 3667 N94-33013
Quantum well infrared photodetector FPA
[AD-A278010] p 3908 N94-33248

INFRARED REFLECTION
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers
[DE94-006591] p 3634 N94-32110

INFRARED SPECTRA
Infrared spectroelectrochemical study of cyanide adsorption and reactions at platinum electrodes in aqueous perchlorate electrolyte
[AD-A276402] p 3631 N94-31238
Infrared and near infrared transient absorption spectroscopy of molecular free radicals
[DE94-005446] p 3632 N94-31305
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
Structural studies of photoinduced intramolecular electron transfer in cyclopentadienylnickelnitrosyl
[DE94-008467] p 3874 N94-32876
Microreflectance infrared study of electron-molecular vibrational coupling and lattice softness in BEDT-TTF salts
[DE94-008490] p 3907 N94-32989
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054
Thermal emission measurements (5-25 microns) of Hawaiian palagonitic soils with implications for Mars p 3944 N94-33193
Mars atmospheric dust properties: A synthesis of Mariner 9, Viking, and Phobos observations p 3945 N94-33200

INFRARED SPECTROSCOPY
Infrared and near infrared transient absorption spectroscopy of molecular free radicals
[DE94-005446] p 3632 N94-31305
Combustion-related studies using weakly-bonded complexes
[DE94-006632] p 3633 N94-31493
Free electrons as a versatile source of coherent radiation
[ETN-94-96011] p 3715 N94-31545
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969
The adsorption of sulfate on gold(111) in acidic aqueous media: Adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy
[AD-A276643] p 3642 N94-31997
New molecular-based routes to binary main group metal sulfides
[AD-A277005] p 3900 N94-32003
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers
[DE94-006591] p 3634 N94-32110
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
Time-resolved IR spectroscopy, energy transfer, and state-to-state collision dynamics of atmospheric species
[AD-A277372] p 3773 N94-32338
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054
Proceedings SPIE: Conference Digest, volume 2104
[AD-A278107] p 3884 N94-33187
Aerosols scattering and near-infrared observations of the Martian surface p 3946 N94-33204
Scanning tunneling microscopy and infrared spectroscopy as combined in-situ probes of electrochemical adlayer structure: Cyanide on Pt(111)
[AD-A276715] p 3909 N94-33274

INFRARED TELESCOPES
High precision moving magnet chopper for variable operation conditions p 3605 N94-33307

INHOMOGENEITY
Spectral inhomogeneity of the bacterial light-harvesting antennae: Causes and consequences
[ETN-94-96020] p 3792 N94-31533
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565

INJURIES
THE VERTICAL p 3806 N94-32435
Controlling hazardous energy sources (lockout/tagout)
[NASA-TM-105290] p 3669 N94-32861

INLET AIRFRAME CONFIGURATIONS
Numerical simulation of combined external/internal transonic flow on the forebody/inlet of the AV-8B Harrier 2 p 3569 N94-31759
Installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119

INLET FLOW
Numerical simulation of combined external/internal transonic flow on the forebody/inlet of the AV-8B Harrier 2 p 3569 N94-31759

Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370
Inlet distortion in engines on VSTOL aircraft
[NASA-CR-195841] p 3584 N94-33035
Installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119

INLET PRESSURE
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370

INORGANIC COMPOUNDS
Modification of semiconductor surface properties with chemically bound molecular films
[AD-A276162] p 3695 N94-31081

INPUT/OUTPUT ROUTINES
A redundant disk array architecture for efficient small writes
[AD-A276645] p 3815 N94-31940

INSOLATION
Modeling the interaction between solar radiation and terrestrial surfaces p 3779 N94-30999
Solar resource: Utility load-matching assessment
[DE94-000297] p 3758 N94-31264
Users manual for SERI QC software assessing the quality of solar radiation data
[DE93-018210] p 3953 N94-31491
Concentration system performance degradation in the aftermath of Mount Pinatubo
[DE94-001879] p 3764 N94-31602
Obliquity variation in a Mars climate evolution model p 3951 N94-33236
Simultaneous laboratory measurements of CO2 and H2O adsorption on palagonite: Implications for the Martian climate and volatile reservoir p 3952 N94-33240

INSPECTION
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831
Shearographic inspection of a DeHavilland DHC-7
[AD-A276716] p 3566 N94-32157

INSTALLING
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
Gigabits to the Desktop: Installing tomorrow's networks today
[DE94-007701] p 3827 N94-32646

INSTRUCTORS
A facilitated mentoring process for engineers
[DE94-005823] p 3914 N94-32677

INSTRUMENT APPROACH
Flight technical error for category B non-precision approaches and missed approaches using non-differential GPS for course guidance
[PB94-142734] p 3576 N94-31680

INSTRUMENT COMPENSATION
NOAA-9 Earth Radiation Budget Experiment (ERBE) scanner offsets determination
[NASA-TM-109086] p 3785 N94-32737

INSTRUMENT ORIENTATION
High energy physics program at the University of Alabama
[DE94-006544] p 3875 N94-31488

INSULATORS
Anisotropic phase separation through the metal-insulator transition in amorphous Mo-Ge and Fe-Ge alloys
[DE94-007259] p 3646 N94-32795
Proceedings, Strongly Correlated Electronic Materials: The 1993 Los Alamos Symposium
[DE94-009293] p 3906 N94-32913

INTEGERS
Mixed 0-1 programming by lift-and-project in a branch-and-cut framework
[AD-A278045] p 3822 N94-33183

INTEGRAL EQUATIONS
Penetrable wedge analysis
[AD-A277219] p 3845 N94-32022

INTEGRALS
A survey of numerical cubature over triangles
[DE94-006810] p 3841 N94-31274
Finite-part integrals and the Euler-Maclaurin expansion
[DE94-006539] p 3844 N94-31665

INTEGRATED CIRCUITS
Passivation of III-V compound semiconductor based devices
[AD-A276178] p 3894 N94-31056
Study of continuous-time and mixed analog-digital operators
[TELECOM-93-E-010] p 3687 N94-31170
High-performance GaAs/AlGaAs optical phase modulators for microwave/photonic integrated circuits
[DE94-006361] p 3688 N94-31483
III-V compound semiconductor strip-loaded waveguide devices for PICs: Design for minimum crosstalk and high density
[DE94-006588] p 3897 N94-31502
Chemical vapour deposition of tungsten for the application in integrated circuits
[ISBN-9-09-005151-1] p 3641 N94-31519
Simulation of non-uniform transmission lines for weakly dispersive structures
[ISBN-0-315-86525-3] p 3690 N94-31726
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A277116] p 3900 N94-31985
The advent of failure analysis software technology
[DE94-006593] p 3892 N94-32111
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3892 N94-32112
Novel optoelectronic devices based on combining GaAs and InP on Si
[AD-A277018] p 3693 N94-32301
WOCSDICE 1993 --- 17th European Workshop on Compound Semiconductor Devices and Integrated Circuits
[AD-A276766] p 3693 N94-32307
Radiation tolerant, high speed, low power, gallium arsenide logic
[AD-A277293] p 3694 N94-32509
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649
High-performance GaAs/AlGaAs optical phase modulators for microwave photonic integrated circuits
[DE94-007376] p 3696 N94-32809
Advanced silicon technology for microwave circuits
[AD-A278039] p 3698 N94-33091
Advanced material processing for integrated-optic frequency doubling systems
[AD-A278394] p 3698 N94-33163

INTEGRATED LIBRARY SYSTEMS
Relationships between access and use in information systems: Remote access to and browsing of online catalogs p 3919 N94-32488

INTEGRATED OPTICS
High-performance GaAs/AlGaAs optical phase modulators for microwave/photonic integrated circuits
[DE94-006361] p 3688 N94-31483
III-V compound semiconductor strip-loaded waveguide devices for PICs: Design for minimum crosstalk and high density
[DE94-006588] p 3897 N94-31502
Optimization of Y junctions in integrated optics
[ISBN-0-315-86782-5] p 3879 N94-31751
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A277116] p 3900 N94-31985
Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878
Advanced material processing for integrated-optic frequency doubling systems
[AD-A278394] p 3698 N94-33163

INTEGRATORS
Towards simplicity: Noise and cooperation in the perfect integrator
[AD-A276256] p 3799 N94-31291
A brief introduction to symplectic integrators and recent results
[DE94-006225] p 3845 N94-31763

INTELSAT SATELLITES
Two-axis antenna positioning mechanism p 3805 N94-33308

INTERACTIONAL AERODYNAMICS
Experimental and numerical simulation of helicopter rotor fuselage interaction
[ONERA-NT-1993-8] p 3568 N94-31421
Six degree of freedom flight dynamic model of a Mk-82 store
[AD-A277065] p 3580 N94-32362

INTERACTIVE CONTROL
Relationships between access and use in information systems: Remote access to and browsing of online catalogs p 3919 N94-32488

INTERCALATION
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067

INTERFACES
Micromechanical analysis of the interface and basic damage modes in glass fiber/epoxy resin model composites
[ONERA-NT-1993-4] p 3618 N94-31225
Molecular dynamics computer simulations of charged metal electrode-aqueous electrolyte interfaces
[AD-A276401] p 3863 N94-31237
Characterization of interface structure in multilayers using specular x ray reflectance
[DE94-007698] p 3657 N94-32358

INTERFACIAL ENERGY
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248
Molecular interactions at metal/polyimide interfaces: A correlation with adhesion and bond durability
[AD-A276301] p 3650 N94-31297

INTERFACIAL TENSION
Numerical analysis of single-vortex/free-surface interaction
[AD-A276462] p 3701 N94-31241
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248
Boundary element analysis of three-dimensional nonlinear hydrodynamics in a reduced gravity environment p 3668 N94-32715

INTERFEROMETERS
Performance analysis of an integrated GPS/inertial attitude determination system
[NASA-CR-188289] p 3577 N94-32864

INTERFEROMETRY
Phase unwrapping problems in ISAR images
[TELECOM-93-D-008] p 3670 N94-31097
Fiberoptisk magnetfaltsensor (fiber optic magnetometer)
[PB94-148061] p 3878 N94-31584
A technique for multiplexing 3x3-coupler terminated interferometric fiber-optic sensors
[AD-A276739] p 3680 N94-32180
SAR interferometry with ERS-1 p 3755 N94-32566
Techniques and applications of SAR interferometry for ERS-1 p 3756 N94-32568
Precision and level of artefacts in the computation of digital terrain models by interferometry p 3756 N94-32571
Fields of experiments in ERS-1 SAR interferometry in Bonn and Naples p 3756 N94-32572
The processing technology and some applications of Almaz-1 data p 3756 N94-32573

INTERGALACTIC MEDIA
Study of stellar associations located in the region contained between the Magellanic Clouds
[ISBN-0-315-86692-6] p 3935 N94-31913

INTERGRANULAR CORROSION
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639

INTERLAMINAR STRESS
An approximate solution for interlaminar stresses in laminated composites p 3621 N94-31901

INTERLAYERS
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665

INTERMETALLICS
The effect of ductile phase (Nb) reinforcement morphology on the mechanical behavior of an intermetallic matrix (MoSi2) p 3615 N94-32500
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933

INTERMOLECULAR FORCES
Chemical interactions between protein molecules and polymer membrane materials
[DE94-006987] p 3651 N94-31672

INTERNAL ENERGY
Analytic properties of the OCP and ionic mixtures in the strongly coupled fluid state
[DE94-008216] p 3637 N94-32801

INTERNAL FRICTION
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209

INTERNAL PRESSURE
Composite fuselage shell structures research at NASA Langley Research Center p 3628 N94-33124
INTERNAL WAVES
Ocean acoustic propagation measurements and wave propagation in random media
[AD-A276165] p 3787 N94-31053
Laser-induced fluorescence/particle tracking system for stratified flow research
[AD-A275917] p 3701 N94-31341
Aeroacoustic sources in internal flows
[ISBN-9-03-86-0282-0] p 3860 N94-31653
Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988
INTERNATIONAL COOPERATION
AGARD membership, 1994
[AGARD-MEMB-94] p 3914 N94-31197
Evaluating success levels of mega-projects p 3599 N94-31432
Coordination of mesoscale meteorological research between ASL and European group
[AD-A276730] p 3784 N94-32162
The complementary nature of the SPOT and ERS-1 systems and their place in major international programmes p 3748 N94-32524
Information systems to enhance technology exchange
[DE94-007744] p 3920 N94-32808
Current policies of the major countries coping with the global warming problem and the energy demand and supply
[DE94-757291] p 3769 N94-32920
INTERNATIONAL LAW
Legal regime of human activities in outer space law p 3599 N94-31431
INTERNATIONAL RELATIONS
NATO contributions to European environmental security
[AD-A275918] p 3763 N94-31275
INTERNATIONAL TRADE
Prospects for the French fighter industry in a post-cold war environment: Is the future more than a mirage? p 3565 N94-31959
INTERNETS
PEM public key certificate cache server
[DE94-006404] p 3675 N94-31784
INTERPLANETARY DUST
Composition and properties of dust from Comet Halley p 3936 N94-31947
INTERPLANETARY MAGNETIC FIELDS
Numerical simulation of interplanetary dynamics p 3933 N94-31566
Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326
INTERPLANETARY MEDIUM
Numerical simulation of interplanetary dynamics p 3933 N94-31566
INTERPOLATION
The High-Frequency Benchmark propagation program
[AD-A276323] p 3672 N94-31334
Recursive analysis of matrix scattering functions
[AD-A277264] p 3845 N94-32018
On interpolating random fields using a finite number of observations
[CWI-BS-R9314] p 3847 N94-32194
Polynomial interpolation and approximation of real functions. 2: Symmetrical interpolation for the triangle
[AD-A277345] p 3848 N94-32245
A new method for calculating wing along aerodynamics to angle of attack 180 deg
[AD-A277965] p 3574 N94-33263
INTERPROCESSOR COMMUNICATION
An efficient three-dimensional Poisson solver for SIMD high-performance-computing architectures p 3823 N94-31120
Study of structures of different complexity for the communication between two processors
[ETN-94-95750] p 3674 N94-31615
Some calculations on supersymmetric graphs as communication networks
[REPT-93-72] p 3824 N94-31641
Control and reliability of optical networks in multiprocessors
[AD-A277385] p 3881 N94-32285
Communication networks for autonomous mobile robot computer architectures and distributed real-time computing p 3680 N94-32310
INTERSTELLAR GAS
Ionized gas in the halos of edge-on infrared-bright galaxies: Evidence for starburst-driven superwinds p 3936 N94-31948
A study of physical conditions, radiative transfer and shocks in the interstellar medium p 3937 N94-31963
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309
INTERSTELLAR MAGNETIC FIELDS
Dynamics of flux tubes in accretion disks p 3932 N94-31142
INTERSTELLAR MATTER
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite
[AP-31] p 3770 N94-31222
Physical chemistry of molecules and grains in space
[AD-A276037] p 3932 N94-31280
INTERSTITIALS
Tensile properties of commercially pure vanadium from room temperature to 1200 C
[DE94-006622] p 3641 N94-31581
INTERTROPICAL CONVERGENT ZONES
Dynamic climatology of West Africa p 3778 N94-30988
INVARIANCE
Multivariate spline approximation
[AD-A276034] p 3842 N94-31441
Frames and stable bases for shift-invariant subspaces of L(sub 2)(IR(sup d))
[AD-A276470] p 3843 N94-31474
Invariance of the generalized steady-state for 1-D distributed parameter systems
[REPT-93-66] p 3825 N94-31662
INVENTORY CONTROLS
Beginning the 21st century with advanced Automatic Parts Identification (API) p 3923 N94-32444
INVERSE KINEMATICS
Kinematic synthesis and analysis of a novel class of six-DOF parallel minimanipulators p 3723 N94-31568
Strategy for tracking and grabbing a moving object with the aid of a decouplable manipulator with six degrees of freedom general architecture, guided by a vision system
[ISBN-0-315-86864-3] p 3831 N94-31757
A new solution method for the inverse kinematic joint velocity calculations of redundant manipulators
[DE94-004427] p 3727 N94-32682
INVERSIONS
Photoelectron diffraction and holography: Present status and future prospects
[DE94-006298] p 3712 N94-31629
INVERTERS
Optimal planning of residential photovoltaic systems under various rate structure
[DE94-757272] p 3762 N94-32919
INVISCID FLOW
On the structure and stability of slender viscous vortices p 3700 N94-31218
On wave interactions of rotational and irrotational flows p 3700 N94-31219
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802
A study of the development and attenuation of wing-generated, vortical wakes p 3570 N94-31971
A critical evaluation of methods for imposing solid-wall boundary conditions in inviscid flow
[AD-A276959] p 3707 N94-32361
IODIDES
A new-type of long-range restructuring of ordered metal surfaces induced by lateral adsorbate interactions: Iodide on AU(110) electrodes
[AD-A276633] p 3643 N94-32060
Sensitivity of electrochemical adlayer structure to the metal crystallographic orientation: Potential-independent iodide adsorption on Au(100) in comparison with other low-index surfaces
[AD-A276714] p 3909 N94-33273
A tandem microscopic-electrochemical examination of a charge-induced surface phase sequence: Ordered Au(110) in aqueous iodide electrolytes as probed by potentiodynamic scanning tunneling microscopy
[AD-A276905] p 3875 N94-33277
IODINE COMPOUNDS
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598
ION ACCELERATORS
Control heavy ion collisions in the systems Ar-40 + Ca-40 and Si-28 + Si-28, and the nature of particle emission in fusion-evaporation reactions
[ETN-94-95749] p 3866 N94-31614
ION BEAMS
Proceedings of the 37th international symposium on electron, ion, and photon beams
[AD-A276478] p 3875 N94-31247
Deposition of DLC via intense ion beam ablation
[DE94-005583] p 3651 N94-31650
Neutral ion sources in precision manufacturing p 3875 N94-32447
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter
[DE94-007178] p 3938 N94-32638
Potential applications of fusion neutral beam facilities for advanced material processing
[DE94-009167] p 3647 N94-32851
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
Low energy ion beam assisted growth of homoepitaxial silicon films at low temperature
[AD-A278092] p 3908 N94-33039
ION CONCENTRATION
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
ION CURRENTS
Conductivity measurements of ceria-based solid electrolytes using AC impedance
[DE94-007380] p 3694 N94-32593
Characteristics of ion flow in the quiet state of the inner plasma sheet
[AD-A277451] p 3894 N94-33106
ION CYCLOTRON RADIATION
ICRF heating and current drive in TFTR supershot plasmas: Data analysis and interpretation of ICRF/edge interactions
[DE94-008586] p 3890 N94-32520
ION DENSITY (CONCENTRATION)
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
ION EMISSION
Control heavy ion collisions in the systems Ar-40 + Ca-40 and Si-28 + Si-28, and the nature of particle emission in fusion-evaporation reactions
[ETN-94-95749] p 3866 N94-31614
ION EXCHANGE MEMBRANE ELECTROLYTES
Development of silver-zinc cells of improved cycle life and energy density
[AD-A277311] p 3693 N94-32329
Polymer electrolyte fuel cells
[DE94-007558] p 3761 N94-32762
Metal ion complexation by ionizable crown ethers
[DE94-008301] p 3661 N94-32847
ION EXCHANGE RESINS
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin
[DE94-007971] p 3660 N94-32698
Metal ion complexation by ionizable crown ethers
[DE94-008301] p 3661 N94-32847
ION EXCHANGING
Metal ion complexation by ionizable crown ethers
[DE94-008301] p 3661 N94-32847
ION IMPLANTATION
Enhancement of oxidation resistance of silicon carbide by high-dose and multi-energy aluminum implantation
[DE94-006560] p 3640 N94-31314
Ion beam synthesis of IrSi3 by 1-MeV Ir ion implantation into Si(111)
[DE94-006556] p 3896 N94-31501
Engineering of damage in ion implanted silicon
[ISBN-9-09-005097-3] p 3897 N94-31521
The effects of amorphous layer regrowth on carbon activation in GaAs and InP
[DE94-006290] p 3899 N94-31634
Oriented Si and Ge nanocrystals formed in Al2O3 by ion implantation and annealing
[DE94-005593] p 3901 N94-32172
Heteroepitaxial diamond growth
[AD-A277178] p 3902 N94-32306
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843
Potential applications of fusion neutral beam facilities for advanced material processing
[DE94-009167] p 3647 N94-32851
Electrical characteristics of GaAs MESFET fabrication by ion implantation of Si or Se
[AD-A278416] p 3909 N94-33328
ION IRRADIATION
Ion-beam-driven amorphization of Ca2La8(Si4)6O2 single crystals
[DE94-006219] p 3895 N94-31307
Energy and angular distributions of secondary ions during electronic sputtering of nonconducting surfaces
[ETN-94-95756] p 3865 N94-31516
Ion-irradiation-induced densification of zirconia sol-gel thin films
[DE94-006248] p 3656 N94-32103
Intra-cascade surface recombination of point defects during ion bombardment of Ge(001)
[DE94-007740] p 3903 N94-32384
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS2 during ion bombardment
[DE94-008487] p 3871 N94-32515

Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993

ION PLATING
Frictional behavior and adhesion of Ag and Au films applied to aluminum oxide by oxygen-ion assisted Screen Cage Ion Plating (SCIP)
[NASA-TM-106522] p 3647 N94-32931

ION PROBES
The origin of neon-E: Neon-E in single interstellar silicon carbide and graphite grains p 3933 N94-31556

ION SOURCES
Neutral ion sources in precision manufacturing
p 3875 N94-32447
Potential applications of fusion neutral beam facilities for advanced material processing
[DE94-009167] p 3647 N94-32851

ION TEMPERATURE
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
Measurement of ICF fuel ion temperature on Nova
[DE94-006150] p 3892 N94-32730

ION TRAPS (INSTRUMENTATION)
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672
Performance of an ion trap inductively coupled plasma mass spectrometer
[DE94-007470] p 3713 N94-32811

IONIC COLLISIONS
Control heavy ion collisions in the systems Ar-40 + Ca-40 and Si-28 + Si-28, and the nature of particle emission in fusion-evaporation reactions
[ETN-94-95749] p 3866 N94-31614
Antiproton production in heavy ion collisions
[DE94-007552] p 3870 N94-32271
String-parton model description of relativistic heavy-ion collisions
[DE94-009164] p 3874 N94-32850

IONIC CRYSTALS
Analytic properties of the OCP and ionic mixtures in the strongly coupled fluid state
[DE94-008216] p 3637 N94-32801

IONIC DIFFUSION
Electronic and nuclear factors in intramolecular charge and excitation transfer processes
[DE94-006598] p 3870 N94-32178

IONIC REACTIONS
A model of the ion chemistry of electrified convection
p 3868 N94-31993
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757

IONIZATION
Compressible convection with ionization
p 3911 N94-31498
Analytical solutions of minimum ionization particle induced current shapes of silicon detectors and simulation of charge collection properties
[DE94-007523] p 3870 N94-32355
Ionization probes of molecular structure and chemistry
[DE94-007605] p 3872 N94-32643
Analysis of Dietz's single, rectangular pulse theory for the generation of radiation via photoelectrons
[DE94-006131] p 3681 N94-32661
Ionization EM calorimetry with accordion electrodes and liquid krypton or argon
[DE94-009082] p 3713 N94-32821

IONIZATION CROSS SECTIONS
Theory, Image Simulation, and Data Analysis of Chemical Release Experiments
[NASA-CR-194865] p 3954 N94-31101

IONIZATION POTENTIALS
A polynomial representation of the valence orbital ionization potentials
[USIP-93-06] p 3640 N94-31083
Heteroepitaxial diamond growth
[AD-A277178] p 3902 N94-32306

IONIZED GASES
Ionized gas in the halos of edge-on infrared-bright galaxies: Evidence for starburst-driven superwinds
p 3936 N94-31948

IONIZING RADIATION
Ionizing radiation effects on silicon test structures
[DE94-006060] p 3865 N94-31607

IONOGRAMS
Eurocap program-ebre station
[AD-A277044] p 3772 N94-32007

IONOSONDES
Eurocap program-ebre station
[AD-A277044] p 3772 N94-32007

IONOSPHERIC DISTURBANCES
Atmospheric effects assessment program: Ionospheric sounding
[AD-A276447] p 3770 N94-31303
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326
Lightning-induced coupling of the radiation belts to geomagnetically conjugate ionospheric regions
p 3772 N94-31773
Theoretical studies on ionospheric irregularities and ion diode performance
[AD-A277115] p 3772 N94-31984
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1990, January 1991
[AD-A276693] p 3676 N94-31998
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300
Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347

IONOSPHERIC ELECTRON DENSITY
An analysis of ionospheric dayglow from observations of the Naval Postgraduate School Middle Ultraviolet Spectrograph (MUSTANG)
[AD-A277351] p 3773 N94-32335

IONOSPHERIC HEATING
Ionospheric plasma outflow in response to transverse ion heating: Self-consistent macroscopic treatment
[NASA-CR-195820] p 3893 N94-33048

IONOSPHERIC PROPAGATION
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326
Performance statistics bulletin. High latitude metor scatter propagation, February, March, April, May 1992
[AD-A276667] p 3677 N94-32083
Performance statistics bulletin. High latitude meteor scatter propagation, November and December 1989, and January 1990
[AD-A276688] p 3680 N94-32297

IONOSPHERIC SOUNDING
Theory, Image Simulation, and Data Analysis of Chemical Release Experiments
[NASA-CR-194865] p 3954 N94-31101
Atmospheric effects assessment program: Ionospheric sounding
[AD-A276447] p 3770 N94-31303
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326
EUROCAP program
[AD-A278084] p 3776 N94-33184

IONS
Elimination of two atomic electrons by a single high energy photon
[DE94-006834] p 3864 N94-31320
Characterization of the rare earth orthophosphates and Ce-doped LaPO4 by x ray absorption spectroscopy
[DE94-006313] p 3898 N94-31630
Collective acceleration in solar flares
[DE94-006288] p 3953 N94-31632
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
Combinatorial ion sensors
[AD-A276567] p 3825 N94-32032
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757
Progress in understanding and improving x ray lasers
[DE94-006048] p 3720 N94-32794
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993
Ionospheric plasma outflow in response to transverse ion heating: Self-consistent macroscopic treatment
[NASA-CR-195820] p 3893 N94-33048

IRIDIUM COMPOUNDS
Ion beam synthesis of IrSi3 by 1-MeV Ir ion implantation into Si(111)
[DE94-006556] p 3896 N94-31501

IRON
Technology development for iron Fischer-Tropsch catalysts
[DE94-008723] p 3638 N94-32889
Thermal emission measurements (5-25 microns) of Hawaiian palagonitic soils with implications for Mars
p 3944 N94-33193
Deposition rates of oxidized iron on Mars
p 3945 N94-33198

IRON ALLOYS
Expandable pattern casting research
[DE94-004342] p 3668 N94-31604
Anisotropic phase separation through the metal-insulator transition in amorphous Mo-Ge and Fe-Ge alloys
[DE94-007259] p 3646 N94-32795
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852

IRON COMPOUNDS
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS2 during ion bombardment
[DE94-008487] p 3871 N94-32515
Proceedings of the Ad Hoc Workshop on Ceramics for Li/FeS2 batteries
[DE94-007460] p 3694 N94-32607
The relative performance of FeS2 and CoS in long-life thermal-battery applications
[DE94-006145] p 3695 N94-32663
The development of precipitated iron catalysts with improved stability
[DE94-008711] p 3638 N94-32886

IRON OXIDES
Deposition rates of oxidized iron on Mars
p 3945 N94-33198

IRRADIATION
Disk irradiation and light curves of x ray novae
p 3929 N94-31124
Analysis of beam-on-target interaction in a neutron-source test facility
[DE94-005392] p 3863 N94-31151
Hydrogen incorporation and radiation induced dynamics in metal-oxide-silicon structures: A study using nuclear reaction analysis
[ETN-94-95742] p 3898 N94-31610
Defect-solute interactions near irradiation grain boundaries
[DE94-006215] p 3641 N94-31627
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109
Electron energy dependence of amorphization in Zr3Fe
[DE94-008459] p 3906 N94-32875

ISING MODEL
Delft Ising computing engine
[PB94-148251] p 3806 N94-31587

ISOPROPYL COMPOUNDS
Tetraalkyldiarsines as potential precursors for electronic materials: Synthesis and characterization of various iso-propyl arsenic compounds
[AD-A277003] p 3900 N94-32001

ISOTOPES
AMS beyond 2000
[DE94-006666] p 3632 N94-31352
Mars atmospheric loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape
p 3947 N94-33208
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209

ISOTOPIC SPIN
Collective and quasiparticle excitations in light Pb isotopes
[ETN-94-96014] p 3865 N94-31548

ISOTROPIC TURBULENCE
Renormalization group theory of Bolgiano scaling in Boussinesq turbulence
[NASA-TM-106602] p 3710 N94-33070

ITERATION
Techniques for increasing the robustness of iterative algorithms for multi-resources location problems
[REPT-93-037] p 3809 N94-31188
On the convergence of stochastic iterative dynamic programming
[AD-A276517] p 3815 N94-31933
Varying execution discipline to increase performance
[DE94-007844] p 3819 N94-32651
ITERATIVE SOLUTION
Doubly asymptotic approximations: Theoretical and numerical analyses
[ONERA-NT-1993-7] p 3840 N94-31231
Arnoldi code for computing selected eigenvalues of sparse real unsymmetric matrices
[PB94-145182] p 3813 N94-31682
A Gauss-Seidel type solver for special convex programs, with application to frictional contact mechanics
[REPT-93-77] p 3813 N94-31694
Nonlinear analysis of springs using helical finite elements p 3859 N94-31906
On an adaptation method for dense, 2D, C-type grids
[W-9321] p 3706 N94-32045
On the error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods
[TW-93-13] p 3847 N94-32206
Numerical transport theory
[DE94-009064] p 3857 N94-32589
Adjacent-cell Preconditioners for solving optically thick neutron transport problems
[DE94-007219] p 3872 N94-32666
Preconditioned time-difference methods for advection-diffusion-reaction equations
[DE94-006472] p 3638 N94-32840

J

J INTEGRAL
Simpler J(sub Ic) test and data analysis procedures for high strength steels
[AD-A277731] p 3648 N94-33281
JAMMING
Subspace estimation without eigenvectors for adaptive beamforming
[AD-A276287] p 3671 N94-31254
Low sidelobe reflector antenna design for communications
[AD-A276079] p 3673 N94-31463
Performance metrics for low probability of intercept-communication system
[AD-A277346] p 3677 N94-32073
JET ENGINE FUELS
Advanced thermally stable jet fuels
[DE94-006760] p 3667 N94-32150
Ignition delays, heats of combustion, and reaction rates of aluminum alkyl derivatives used as ignition and combustion enhancers for supersonic combustion
[NASA-CR-189581] p 3638 N94-32868
JET ENGINES
Analysis of intermediate level maintenance following F404-GE-400 engine component life reductions
[AD-A277918] p 3585 N94-33283
JET FLOW
The small-scale topology of a 2:1 aspect-ratio elliptic jet p 3699 N94-31184
Ignition studies in nonpremixed hydrogen/air combustion
[AD-A275954] p 3632 N94-31348
Jet physics and QCD tests at the Tevatron collider
[DE94-008987] p 3871 N94-32587
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869
JET IMPINGEMENT
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388
JET MIXING FLOW
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869
Enhancement of mixing in a rectangular jet by mechanical tabs
[NASA-CR-185207] p 3709 N94-32872
JET PROPULSION
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-propulsion module propulsion module, volume 5
[AD-A276972] p 3590 N94-32397
JET STREAMS (METEOROLOGY)
Dynamics in the tropics and synoptic disturbances p 3778 N94-30990
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model
[AD-A277217] p 3783 N94-32021
JETS
Studies of jet production with the D0 detector
[DE94-008271] p 3873 N94-32780
JOINING
Joining of silicon nitrides using oxynitride glasses
[DE94-008517] p 3658 N94-32517
JOINTS (JUNCTIONS)
Shearographic inspection of a DeHavilland DHC-7
[AD-A276716] p 3566 N94-32157
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665
Pip pin reliability and design p 3605 N94-33305
JOSEPHSON JUNCTIONS
Development, characterization, and applications of high temperature superconductor nanobridge Josephson junctions
[DE94-008113] p 3903 N94-32409
Quantum fluctuations of vortices in Josephson-coupled superconductors
[DE94-007609] p 3905 N94-32747
YBCO Josephson Junction arrays
[AD-A277426] p 3908 N94-33005
High temperature superconducting Josephson junction array systems, phase 1
[AD-A277937] p 3908 N94-33246
JOURNAL BEARINGS
Simultaneous pressure measurement and high-speed photography study of cavitation in a dynamically loaded journal bearing
[NASA-TM-106456] p 3728 N94-32893
JUDGMENTS
Visual perception of 3-dimensional structure from different types of optical deformation
[AD-A278272] p 3884 N94-33141
JUNCTION DIODES
Ionizing radiation effects on silicon test structures
[DE94-006060] p 3865 N94-31607

K

K STARS
A critical examination of stellar atmosphere theory for metal-poor K-giant stars p 3927 N94-32308
K-EPSILON TURBULENCE MODEL
Finite volume discretization of the k-epsilon turbulence model in general coordinates
[REPT-93-90] p 3703 N94-31703
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU finite volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926
KALMAN FILTERS
Tracking roads in an aerial image by Kalman filtering
[TELECOM-93-D-007] p 3711 N94-31096
An adaptive Kalman filter excisor for suppressing narrowband interference
[AD-A276286] p 3671 N94-31253
Kalman filtering approach to blind equalization
[AD-A276320] p 3671 N94-31299
An investigation of airborne GPS/INS for high accuracy position and velocity determination
[DE94-006139] p 3576 N94-31306
Fault detection and isolation for the Bluebird test bed aircraft
[AD-A277979] p 3586 N94-33086
KAONS
BNL possibilities
[DE94-007179] p 3864 N94-31398
Medium energy measurements of N-N parameters
[DE94-006067] p 3869 N94-32173
Research program in particle physics
[DE94-008449] p 3871 N94-32512
KAPTON (TRADEMARK)
Space Station WP-2 application of LDEF MLI results p 3592 N94-31016
Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051
A fracture mechanics methodology for characterizing the performance of flawed polymeric dielectric materials p 3654 N94-31956
KAZAKHSTAN
Station climatic summaries: China, the former USSR, and Mongolia
[AD-A276548] p 3784 N94-32057
KERNEL FUNCTIONS
The Cameron-Martin theorem
[W-9315] p 3844 N94-31676
GKS-9X: An experimental application
[PB94-147048] p 3813 N94-31685
Varying execution discipline to increase performance
[DE94-007844] p 3819 N94-32651
KETONES
Low velocity impact damage in carbon fiber/PEEK composite laminates
[ISBN-0-315-86546-6] p 3622 N94-31909
Ligand intermediates in metal-catalyzed reactions
[DE94-008713] p 3638 N94-32887
KINEMATICS
Cometary molecules p 3935 N94-31869
High-speed path constrained manipulator operation using optimal-feedback combined controller p 3833 N94-31962
The kinematics of dense clusters of galaxies p 3937 N94-32029
Information theory for arm visuo-motor coordination p 3800 N94-32495
KINETIC ENERGY
Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model
[AD-A277217] p 3783 N94-32021
A study of near-surface and underwater explosions by computer simulations
[DE94-009038] p 3708 N94-32849
KINETIC THEORY
Solvent diffusion coefficient concentration dependence in polymer solutions
[AD-A277023] p 3655 N94-32005
KINETICS
Some perspectives on solution-phase electron-transfer processes
[AD-A276906] p 3635 N94-32216
Dynamics and control of orbiting flexible systems: A formulation with applications
[ISBN-0-315-75390-0] p 3611 N94-32502
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
KLYSTRONS
High-power microwave-tube transmitters
[DE94-005340] p 3686 N94-31150
KNOWLEDGE BASED SYSTEMS
Hierarchical fault catalog process for diagnosis of analog circuits
[ETN-94-95730] p 3689 N94-31571
KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Information acquisition from multi-agent resources; abstract
[LP-93-08] p 3917 N94-31452
LORE and reason maintenance
[REPT-93-88] p 3812 N94-31522
Hierarchical fault catalog process for diagnosis of analog circuits
[ETN-94-95730] p 3689 N94-31571
Knowledge-based commodity distribution planning p 3915 N94-32427
KNOWLEDGE REPRESENTATION
LORE and reason maintenance
[REPT-93-88] p 3812 N94-31522
An expert system architecture for heterogeneous domains: A case-study in the legal field
[ETN-94-96012] p 3830 N94-31546
Effective information modelling support
[PB94-148236] p 3917 N94-31586
KONDO EFFECT
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
KRYPTON
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
KRYPTON FLUORIDE LASERS
Time evolution and filamentation of KrF(star) laser gas discharges
[ETN-94-95758] p 3715 N94-31561

L

LABORATORIES
Solar activities at Sandia National Laboratories
[DE94-007737] p 3761 N94-32648
LLNL casting technology
[DE94-008282] p 3669 N94-32839
LABRADOR
Common property resources and low-level flying in Labrador: Flight, fight or fancy?
[ISBN-0-315-87318-3] p 3924 N94-31732
LABYRINTH SEALS
Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth
[AD-A276424] p 3722 N94-31333
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370
LAGRANGE MULTIPLIERS
Tensor gauge potentials in loop space formulation of Yang-Mills fields
[PB94-147147] p 3912 N94-31924
LAGRANGIAN FUNCTION
Budget allocation and monopolistic pricing in a multiproduct firm
[REPT-93-86] p 3924 N94-31617
Computational methods for frictional contact with applications to the Space Shuttle orbiter nose-gear tire p 3608 N94-32295
Dynamics and control of orbiting flexible systems: A formulation with applications
[ISBN-0-315-75390-0] p 3611 N94-32502
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652
Chiral symmetry and the threshold gamma(p) yields pi(sup 0)p reaction
[DE94-008117] p 3873 N94-32710
Fluid Dynamics Lagrangian Simulation Model
[AD-A277438] p 3710 N94-33009
An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine
[AD-A277516] p 3805 N94-33349
LAMINAR BOUNDARY LAYER
Results for the hybrid laminar flow control experiment conducted in the NASA Langley 8-foot transonic pressure tunnel on a 7-foot chord model
[NASA-TM-107582] p 3601 N94-32870
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111
LAMINAR FLOW
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216
Results for the hybrid laminar flow control experiment conducted in the NASA Langley 8-foot transonic pressure tunnel on a 7-foot chord model
[NASA-TM-107582] p 3601 N94-32870
LAMINATES
Vibration control and design of composite cantilevers taking into account structural uncertainties and damage p 3733 N94-31213
An efficient higher order theory for laminated composite plates and a finite element implementation p 3617 N94-31215
Reliability of multilayer copper/polyimide
[AD-A276228] p 3650 N94-31284
Inelastic deformation of metal matrix composites p 3618 N94-31285
Study of wave propagation and dynamic response of laminated composite structures
[AD-A276123] p 3619 N94-31444
Damage tolerance aspects of a full composite airplane fuselage: Requirements, modelling, predictions, experiments
[LR-728] p 3578 N94-31674
Random vibrations of composite beams and plates p 3735 N94-31777
Evaluating in-plane elastic constants of damaged carbon-epoxy laminates using a quantitative ultrasonic technique p 3621 N94-31793
Optimization of composite material failure loads
[ISBN-0-315-87214-4] p 3621 N94-31836
An approximate solution for interlaminar stresses in laminated composites p 3621 N94-31901
Theory of thick, laminated composite shallow shells p 3622 N94-31953
Nonlinear vibration analysis of laminated plates on linear and nonlinear elastic foundations p 3737 N94-32079
Computational methods for frictional contact with applications to the Space Shuttle orbiter nose-gear tire p 3608 N94-32295
Development of an advanced continuum theory for composite laminates, volume 1
[AD-A277275] p 3625 N94-32591
Development of an advanced continuum theory for composite laminates, volume 2
[AD-A277276] p 3625 N94-32592
A thermal viscoelastic analysis for thick-walled composite cylinders
[AD-A274143] p 3625 N94-32604
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665
Comparison of the compressive strengths for stitched and toughened composite systems
[NASA-TM-109108] p 3627 N94-32939
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011
Development of stitched/RTM composite primary structures p 3628 N94-33127
Tension fracture of laminates for transport fuselage. Part 1: Material screening p 3629 N94-33130
Structural integrity of intelligent materials and structures
[AD-A278397] p 3630 N94-33165
LAND ICE
A reassessment of the in-situ dielectric constant of polar firn
[AD-A276999] p 3773 N94-32154
LAND MANAGEMENT
Food security in the context of global environmental change
[DE94-007481] p 3768 N94-32812
LAND SURFACE TEMPERATURE
Numerical simulation of thermally induced near-surface flows over Martian terrain p 3949 N94-33223
LAND USE
Monitoring land cover and crop types in Denmark using ERS-1 SAR and optical satellite images p 3748 N94-32528
The contribution of satellite data in communication infrastructure projects p 3749 N94-32530
SPOT imagery for updating land cover information of 1:50,000 numerical topographic maps p 3749 N94-32532
The use of SPOT, and the contribution of ERS-1, in the assessment of urban pressure on agriculture land in Greater Tunis (Tunisia) p 3749 N94-32534
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539
Possible complementarity of SPOT/ERS in mapping land use: Study on agricultural land in Brittany (France) p 3755 N94-32563
Land cover change detection with ERS-1 data and data from other remote sensing satellites. Example: The delta of the River Ebro (Spain) p 3755 N94-32564
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea p 3755 N94-32565
LANDAU FACTOR
Diamagnetism in helium Rydberg atoms
[ETN-94-96015] p 3865 N94-31549
LANDFORMS
Geologic controls of erosion and sedimentation on Mars p 3951 N94-33232
LANDING GEAR
Load-limiting landing gear footpad energy absorption system p 3607 N94-33323
LANDING SITES
MARSNET: A European network of stations on the surface of Mars p 3945 N94-33199
Dielectric properties of Mars' surface: Proposed measurement on a Mars lander p 3951 N94-33237
LANDSLIDES
Evaluation of the potential of SAR data for mapping of landslide risks
[BRGM-93033] p 3753 N94-32552
LANGEVIN FORMULA
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652
Electron: Cluster interactions
[DE94-009089] p 3874 N94-32807
LANGMUIR-BLODGETT FILMS
Modification of semiconductor surface properties with chemically bound molecular films
[AD-A276162] p 3895 N94-31081
New developments in second-order nonlinear optical polymeric materials
[AD-A277409] p 3658 N94-32578
LANGUAGES
Resumptive quantifiers in exception sentences
[LP-93-11] p 3855 N94-31403
On the equivalence of Lambek categorial grammars and basic categorial grammars
[LP-93-07] p 3842 N94-31451
Compositionality of application oriented structuring mechanisms for algebraic specification languages with initial semantics
[ETN-94-95736] p 3812 N94-31577
Automatic translation among spoken languages p 3685 N94-32437
LANTHANUM
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
LANTHANUM COMPOUNDS
Ion-beam-driven amorphization of Ca2La8(Si4)6O2 single crystals
[DE94-006219] p 3895 N94-31307
Electron spin resonance measurements of Er(3+) and Mn(2+) in the high temperature superconductor compounds La(2-x)Sr(x)CuO(4-delta)
[ETN-94-95746] p 3898 N94-31612
Thin-film decoupling capacitors for multi-chip modules
[DE94-007743] p 3695 N94-32650
LAPLACE EQUATION
The Laplace functional and Palm measure of a quasi-Cox process which is driven by a Markov chain
[REPT-93-82] p 3851 N94-31699
LAPLACE TRANSFORMATION
A cell-cycle model revisited
[CWI-AM-R9305] p 3851 N94-32229
Monoenergetic neutral particle transport in semi-infinite media
[AD-A277155] p 3870 N94-32368
A thermal viscoelastic analysis for thick-walled composite cylinders
[AD-A274143] p 3625 N94-32604
LARGE SPACE STRUCTURES
A study of the Space Station Freedom response to the disturbance environment p 3600 N94-31434
LASER ABLATION
Pump-probe method for investigating laser ablation and optical damage threshold mechanisms in optical materials
[DE94-008291] p 3720 N94-32753
LASER ANEMOMETERS
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276463] p 3860 N94-31242
LASER APPLICATIONS
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
DOE reactor-pumped laser program
[DE94-006372] p 3715 N94-31485
Diagnostics of high-brightness short-pulse lasers and the plasmas they generate
[DE94-006165] p 3716 N94-31624
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
Laser applications in wood processing
[PB94-138567] p 3717 N94-31840
Mechanical properties of acrylate networks formed by visible laser-induced polymerization. 2. Control of the mechanical properties
[AD-A277111] p 3655 N94-31982
Mechanisms of laser induced reactions in opaque heterogeneous environments
[AD-A276642] p 3717 N94-31996
The charging effect in high-Tc superconducting thin films
[AD-A277265] p 3900 N94-32040
Photothermal laser deflection, an innovative technique to measure particles in exhausts
[AD-A277151] p 3718 N94-32366
Laser flash photolysis, EPR and Raman studies of liquids at elevated pressures
[DE94-008351] p 3718 N94-32413
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Progress in understanding and improving x ray lasers
[DE94-006048] p 3720 N94-32794
Development of a video fluorescence system for assessing burn depth
[AD-A278127] p 3798 N94-33092
Advanced release technologies program p 3607 N94-33322
LASER ARRAYS
High power diode lasers for solid-state laser pumps p 3722 N94-32448
LASER BEAMS
Laser safety manual for DREO
[AD-A276288] p 3714 N94-31255

The role of defects in laser damage of multilayer coatings
[DE94-006731] p 3714 N94-31269
Diagnostics of high-brightness short-pulse lasers and the plasmas they generate
[DE94-006165] p 3716 N94-31624
Statistics of time averaged atmospheric scintillation
[DE94-006998] p 3747 N94-32249
A historical perspective on fifteen years of laser damage thresholds at LLNL
[DE94-007930] p 3719 N94-32613
Short-pulse, high-intensity lasers at Los Alamos
[DE94-007545] p 3720 N94-32760
A miniaturized ASIC-based multichannel scaler instrument
[DE94-007222] p 3807 N94-32783
Coherent processes in atom in strong radiation fields
[AD-A278388] p 3874 N94-33144
Phase-only correction of scintillated laser beams: Downrange experimental results
[AD-A277778] p 3722 N94-33282

LASER CAVITIES
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622
Study of the dynamics of a nonlinear coupled-cavity laser system
[ISBN-0-315-86717-5] p 3716 N94-31748
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS
[DE94-009030] p 3721 N94-32848

LASER CUTTING
Laser applications in wood processing
[PB94-138567] p 3717 N94-31840
Thin EFG octagons
[DE94-006855] p 3905 N94-32764

LASER DAMAGE
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Laser safety manual for DREO
[AD-A276288] p 3714 N94-31255
The role of defects in laser damage of multilayer coatings
[DE94-006731] p 3714 N94-31269
Large-area conditioning of optics for high-power laser systems
[DE94-007028] p 3716 N94-31636
A historical perspective on fifteen years of laser damage thresholds at LLNL
[DE94-007930] p 3719 N94-32613
Pump-probe method for investigating laser ablation and optical damage threshold mechanisms in optical materials
[DE94-008291] p 3720 N94-32753

LASER DEPOSITION
Reliability of multilayer copper/polyimide
[AD-A276228] p 3650 N94-31284
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855

LASER DOPPLER VELOCIMETERS
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276483] p 3860 N94-31242
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370

LASER FUSION
Inertial fusion with ultra-powerful lasers
[DE94-007242] p 3887 N94-31400

LASER GUIDANCE
Design and early results of the sodium-layer laser guide star adaptive optics experiment at the Lawrence Livermore National Laboratory
[DE94-006653] p 3926 N94-32189

LASER INDUCED FLUORESCENCE
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
Near resonant absorption by atoms in intense fluctuating laser fields
[DE94-005873] p 3714 N94-31200
Mechanisms of laser induced reactions in opaque heterogeneous environments
[AD-A276642] p 3717 N94-31996
Optical properties of doped sol-gel silica glasses
[AD-A278094] p 3884 N94-33267

LASER MATERIALS
Transient radiation-induced absorption in the materials for a GSGG laser
[DE94-005316] p 3714 N94-31148
New material for high average power infrared generation: QPM-DB GaAs
[AD-A276389] p 3714 N94-31358
Short-pulse, high-intensity lasers at Los Alamos
[DE94-007545] p 3720 N94-32760
Repetitively pulsed Cr:LiSAF laser for lidar applications
[DE94-007546] p 3720 N94-32761

LASER MICROSCOPY
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629

LASER MODES
Transverse mode analysis of hole-coupled free-electron lasers
[ETN-94-96019] p 3715 N94-31532

LASER OUTPUTS
Near resonant absorption by atoms in intense fluctuating laser fields
[DE94-005873] p 3714 N94-31200
The role of defects in laser damage of multilayer coatings
[DE94-006731] p 3714 N94-31269
New material for high average power infrared generation: QPM-DB GaAs
[AD-A276389] p 3714 N94-31358
Diagnostics of high-brightness short-pulse lasers and the plasmas they generate
[DE94-006165] p 3716 N94-31624
Elastic modulus measurements of LDEF glasses and glass-ceramics using a speckle technique
[NASA-CR-195911] p 3653 N94-31851
Impact of observed hyperfine splitting on X-ray laser gain
[DE94-005822] p 3717 N94-32128
High conversion efficiency pumped-cavity second harmonic generation of a diode laser
[DE94-006805] p 3717 N94-32134
Ti:sapphire based ultrafast pump-probe laser source in the violet and ultraviolet
[DE94-007542] p 3718 N94-32270
High power diode lasers for solid-state laser pumps p 3722 N94-32448
Progress in understanding and improving x ray lasers
[DE94-008048] p 3720 N94-32794
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS
[DE94-009030] p 3721 N94-32848
Multifrequency, rapidly sequenced or simultaneous tunable laser
[AD-D016169] p 3721 N94-32968

LASER PLASMA INTERACTIONS
Inertial fusion with ultra-powerful lasers
[DE94-007242] p 3887 N94-31400

LASER PLASMAS
Diagnostics of high-brightness short-pulse lasers and the plasmas they generate
[DE94-006165] p 3716 N94-31624
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684
Molten metal analysis by laser produced plasmas
[DE94-007014] p 3646 N94-32782

LASER POWER BEAMING
DOE reactor-pumped laser program
[DE94-006372] p 3715 N94-31485

LASER PUMPING
Ti:sapphire based ultrafast pump-probe laser source in the violet and ultraviolet
[DE94-007542] p 3718 N94-32270
High power diode lasers for solid-state laser pumps p 3722 N94-32448
A noncritically phase matched femtosecond optical parametric oscillator near 3 microns
[DE94-008050] p 3720 N94-32704
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS
[DE94-009030] p 3721 N94-32848

LASER RANGE FINDERS
Synchronized laser scanning three dimensional acquisition system
[ISBN-0-315-86848-1] p 3879 N94-31756

LASER SPECTROSCOPY
Characterization of polymer decomposition products by laser desorption mass spectrometry p 3597 N94-31046
Stark broadening of the 2S state of hydrogen and deuterium in arc plasmas of low density
[ETN-94-95731] p 3888 N94-31572
Using laser absorption spectroscopy to monitor composition and physical properties of metal vapors
[DE94-001536] p 3716 N94-31599
Laser and Fourier transform spectroscopy of novel propellant molecules
[AD-A277506] p 3667 N94-33013

LASER STABILITY
Time evolution and filamentation of KrF(star) laser gas discharges
[ETN-94-95758] p 3715 N94-31561

LASER TARGET INTERACTIONS
Molten metal analysis by laser produced plasmas
[DE94-007014] p 3646 N94-32782
Coherent processes in atom in strong radiation fields
[AD-A278388] p 3874 N94-33144

LASER TARGETS
Inertial fusion with ultra-powerful lasers
[DE94-007242] p 3887 N94-31400
New polymer target-shell properties and characterizations
[DE94-008420] p 3890 N94-32415
Progress in understanding and improving x ray lasers
[DE94-008048] p 3720 N94-32794
Phase-only correction of scintillated laser beams: Downrange experimental results
[AD-A277778] p 3722 N94-33282

LASER WELDING
Nd-YAG laser welding of the fiber optic connector to the header shell on the 2SL actuator
[DE94-006104] p 3723 N94-31621

LASERS
High power switch design for the Nova upgrade laser (Project HERCULES: High Energy Research Concerning the Ultimate Lifetime of Experimental Switches)
[DE94-007921] p 3719 N94-32654
Comparison of coherent to incoherent detection at 2.09 micrometers using a solid state LADAR system
[AD-A277159] p 3721 N94-33102

LASING
Progress in understanding and improving x ray lasers
[DE94-008048] p 3720 N94-32794

LATCHES
Space Station Freedom solar array containment box mechanisms p 3603 N94-33292
Deployable and retractable telescoping tubular structure development p 3607 N94-33317

LATENT HEAT
The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis
[AD-A277207] p 3784 N94-32094
The influence of thermal inertia on Mars' seasonal pressure variation and the effect of the weather component p 3952 N94-33238

LATERAL CONTROL
Phase-lock roll control of inertially pointing spacecraft p 3609 N94-31470

LATTICE PARAMETERS
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
Area-interaction point processes
[CWI-BS-R9318] p 3847 N94-32197
High temperature materials technology research for advanced thermionic systems
[DE94-008444] p 3644 N94-32416

LATTICE VIBRATIONS
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209

LATTICES (MATHEMATICS)
On the independent axiomatizability of modal and intermediate logics
[ML-93-17] p 3856 N94-31407
Lattice geometrodynamics p 3857 N94-31825

LAUNCH VEHICLE CONFIGURATIONS
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100

LAUNCH VEHICLES
On-line physical parameter identification and adaptive control of a launch vehicle p 3602 N94-31891
Access to space: The Space Shuttle's evolving rolee
[AD-A276785] p 3608 N94-32190
DOD space based requirements: Increasing DOD access to space
[AD-A276874] p 3601 N94-32211
Space flight risk data collection and analysis project: Risk and reliability database
[NASA-CR-195879] p 3603 N94-32494
Space Station evolution study
[NASA-CR-193937] p 3611 N94-32898
Aerospace sponsored research
[ATR-93(8498)-1] p 3966 N94-32949
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100

LAUNCHING BASES
DOD space based requirements: Increasing DOD access to space
[AD-A276874] p 3601 N94-32211

LAVA
Evidence for ultramafic lavas on Syrtis Major p 3950 N94-33229

LAW (JURISPRUDENCE)
Standardization and intellectual property control: A reflection on the informatics case
[TELECOM-93-E-016] p 3915 N94-31172
An expert system architecture for heterogeneous domains: A case-study in the legal field
[ETN-94-96012] p 3830 N94-31546
Analysis of Navy aircraft engine and engine component warranties
[AD-A276936] p 3584 N94-32238
LAY-UP
Comparison of the compressive strengths for stitched and toughened composite systems
[NASA-TM-109108] p 3627 N94-32939
LEAD (METAL)
Mass-loaded coating for reducing the resonant frequency of a ceramic disc
[AD-D016095] p 3660 N94-32739
LEAD ALLOYS
Electrooptic crystal growth and properties
[AD-A276023] p 3896 N94-31439
Aging effects on the microstructure, surface characteristics and wettability of Cu pretinned with Sn-Pb solders
[DE94-007033] p 3641 N94-31638
LEAD ISOTOPES
Collective and quasiparticle excitations in light Pb isotopes
[ETN-94-96014] p 3865 N94-31548
LEAD ZIRCONATE TITANATES
Passive vibration damping materials: Piezoelectric ceramic composites for vibration damping applications
[AD-A276550] p 3653 N94-31935
Thin-film decoupling capacitors for multi-chip modules
[DE94-007743] p 3695 N94-32650
LEADERSHIP
Space history, space policy, and executive leadership
[NASA-TM-109787] p 3924 N94-33067
LEADING EDGES
Design and initial testing of a facility to measure unsteady pressures on an oscillating cascade with supersonic leading edge locus p 3569 N94-31680
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042
LEAF AREA INDEX
High resolution spectroscopy in agriculture: Results of the EISAC 1989 campaign p 3745 N94-31864
Quantitative analysis of woody vegetation in Soudano-Sahalian region. Textural approach (application to a Burkina Faso region) p 3757 N94-32574
LEARNING
Reminding-based learning
[AD-A277424] p 3801 N94-32997
LEARNING THEORY
Concepts and environment
[REPT-93-032] p 3829 N94-31186
LEAST SQUARES METHOD
Identification of polynomial and rational NARMAX models
[RR-483] p 3842 N94-31413
Pairwise-comparison using the logarithmic least squares method and the generalized pseudoinverse
[REPT-93-84] p 3844 N94-31701
Model identification of a reconfigurable robot manipulator
[ISBN-0-315-87109-1] p 3725 N94-31874
Hierarchical mixtures of experts and the EM algorithm
[AD-A276516] p 3814 N94-31932
Least squares approximation by G1 piecewise parametric cubes
[AD-A277978] p 3850 N94-33265
LECTURES
Index to NASA news releases and speeches, 1993
[NASA-TM-109722] p 3917 N94-31888
Space history, space policy, and executive leadership
[NASA-TM-109787] p 3924 N94-33067
LENSES
Multi-line passive fiber optic slipring
[AD-D016092] p 3863 N94-32738
LEPTONS
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions
[DE94-006315] p 3867 N94-31779
Baryogenesis from a primordial lepton asymmetry
[PB94-145166] p 3868 N94-31921
Probing lepton number violation via Majorana neutrinos at hadron supercolliders
[PB94-147055] p 3868 N94-31922
Semileptonic decays of mesons in the SO(4) model
[DE94-008108] p 3873 N94-32708
LIAPUNOV FUNCTIONS
A Hyland-Bernstein approach to the digital control of Pritchard-Salamon systems
[REPT-93-76] p 3844 N94-31693
LIBRARIES
Texture library for 3-dimensional visualization systems
[AD-A276125] p 3917 N94-31829
A high-speed linear algebra library with automatic parallelism p 3828 N94-32440
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 5: Aerospace librarians and technical information specialists as information intermediaries: A report of phase 2 activities of the NASA/DOD Aerospace Knowledge Diffusion Research Project
[NASA-TM-109777] p 3921 N94-32829
MDFF HELP library, version 2: On-line documentation for the map data formatting facility
[AD-A277763] p 3922 N94-32987
LIBRATION
Forced libration of Mercury and geodetic determination of a possible fluid core p 3774 N94-32493
LIE GROUPS
On wavelet representations of differential equations
[RR-482] p 3842 N94-31412
LIFE CYCLE COSTS
An analysis of non-integerizing the aircraft engines Cost Effectiveness Analysis Spreadsheet Model (CEAMOD version 2.0)
[AD-A276251] p 3583 N94-31290
Software reuse case study: TRILLIUM
[AD-A276108] p 3811 N94-31465
LIFE SCIENCES
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 388)
[NASA-SP-7011(388)] p 3795 N94-31414
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 389)
[NASA-SP-7011(389)] p 3797 N94-32347
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 385)
[NASA-SP-7011(385)] p 3797 N94-32348
LIFE SUPPORT SYSTEMS
Technical assessment of Mir-1 life support hardware for the international space station
[NASA-TM-108441] p 3803 N94-31380
Design of a logistics model for building and supporting a lunar station
[ILR-MITT-282(1993)] p 3803 N94-31852
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 389)
[NASA-SP-7011(389)] p 3797 N94-32347
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 385)
[NASA-SP-7011(385)] p 3797 N94-32348
Catalytic methods using molecular oxygen for treatment of PMMS and ECLSS waste streams, volume 2
[NASA-CR-190299] p 3804 N94-32697
Characterization and utilization of opiate-like hibernation factors
[AD-A278136] p 3794 N94-33098
LIFTING BODIES
Aeroelastic vibrations of lifting surfaces
[ECL-91-01] p 3585 N94-31677
LIGANDS
Silicone grease as a precursor to a pseudo crown-ether ligand: Crystal structure of (K(+)K(Me2SiO)7(+))(HIn(CH2CMe3)3(-))4)
[AD-A276343] p 3895 N94-31327
Combinatorial ion sensors
[AD-A276567] p 3825 N94-32032
A genetic algorithm based method for docking flexible molecules
[DE94-007525] p 3793 N94-32269
Laser flash photolysis, EPR and Raman studies of liquids at elevated pressures
[DE94-008351] p 3718 N94-32413
Ligand intermediates in metal-catalyzed reactions
[DE94-008713] p 3638 N94-32887
LIGHT AMPLIFIERS
Short-pulse, high-intensity lasers at Los Alamos
[DE94-007545] p 3720 N94-32760
LIGHT BEAMS
Studies of optical beam phase conjugation and electromagnetic scattering process
[AD-A278389] p 3884 N94-33145
LIGHT ELEMENTS
Strongly coupled ionic mixtures and the H/He EOS
[DE94-006391] p 3934 N94-31782
LIGHT EMISSION
Matter-radiation interactions in the atmosphere p 3776 N94-30998
LIGHT EMITTING DIODES
Temperature dependence of the exciton-exciton annihilation rate constant in poly(di-n-hexylsilane)
[DE94-005584] p 3655 N94-32102
LIGHT MODULATION
Optical and image transmission through desert atmospheres
[AD-A276022] p 3742 N94-31496
Correlation filter synthesis using neural networks
[AD-A278124] p 3836 N94-33043
LIGHT SCATTERING
Single scattering of light by ensembles of particles with various shapes
[ETN-94-96016] p 3878 N94-31550
Methods for SBS threshold reduction
[AD-A276554] p 3717 N94-31936
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering
[DE94-007300] p 3625 N94-32642
Light scattering studies of a model electrorheological fluid
[DE94-007860] p 3883 N94-32818
LIGHT SOURCES
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981
LIGHT TRANSMISSION
Near resonant absorption by atoms in intense fluctuating laser fields
[DE94-005873] p 3714 N94-31200
Optical and image transmission through desert atmospheres
[AD-A276022] p 3742 N94-31496
Optimization of Y junctions in integrated optics
[ISBN-0-315-86782-5] p 3879 N94-31751
Fast acting optical deflection
[AD-A276830] p 3879 N94-32037
Statistics of time averaged atmospheric scintillation
[DE94-006996] p 3747 N94-32249
Ocean optics, ocean imaging and optical tomography
[AD-A277010] p 3789 N94-32402
Mathematical nonlinear optics
[AD-A277320] p 3882 N94-32510
Femtosecond probe-probe transmission studies of LT-grown GaAs near the band edge
[DE94-006660] p 3904 N94-32634
Structural studies of photoinduced intramolecular electron transfer in cyclopentadienylnickelnitrosyl
[DE94-008487] p 3874 N94-32876
Strain sensing using optical fibers
[NASA-CR-195807] p 3740 N94-32940
Studies of optical beam phase conjugation and electromagnetic scattering process
[AD-A278389] p 3884 N94-33145
LIGHTNING
Lightning-induced coupling of the radiation belts to geomagnetically conjugate ionospheric regions p 3772 N94-31773
LIGNIN
Towards a detailed understanding of the structural variability in lignins: A new approach
[DE94-007449] p 3793 N94-32267
LIKELIHOOD RATIO
Area-interaction point processes
[CWI-BS-R9318] p 3847 N94-32197
LIMITS (MATHEMATICS)
On wavelet representations of differential equations
[RR-482] p 3842 N94-31412
Stirling's formula and approximations for n(factorial) and the middle ratio
[REPT-93-73] p 3843 N94-31642
Qualitative properties of two-dimensional predator-prey systems
[REPT-93-75] p 3844 N94-31644
A predator-prey model with Iviev's functional response
[REPT-93-79] p 3844 N94-31696
Kaplan-Meier estimators of interpoint distance distributions for spatial point processes
[CWI-BS-R9315] p 3846 N94-32107
Multiserver queues with impatient customers
[CWI-BS-R9319] p 3835 N94-32198
LINE SPECTRA
Line-strength gradients and kinematic profiles in elliptical galaxies p 3934 N94-31788
LINEAR ACCELERATORS
Free electrons as a versatile source of coherent radiation
[ETN-94-96011] p 3715 N94-31545
Selected applications of planar permanent magnet multipoles in FEL insertion device design
[DE94-009014] p 3721 N94-32845
LINEAR CIRCUITS
Analysis and synthesis of MOS translinear circuits
[ISBN-9-09-005495-2] p 3690 N94-31616
LINEAR POLARIZATION
High-resolution synthetic aperture radar observations of the Moon p 3676 N94-31952
Post-calibration correction for rotating-analyzer ellipsometer with optical fiber bundle detection system
[AD-A277329] p 3881 N94-32260
LINEAR PROGRAMMING
Parallel structured optimization algorithms for inverse problems
[AD-A276053] p 3811 N94-31443

Perfect 0, +/- matrices
[AD-A277387] p 3848 N94-32286
A simple model for determining photoelectron-generated radiation scaling laws
[DE94-006130] p 3761 N94-32660
Optimal planning of residential photovoltaic systems under various rate structure
[DE94-757272] p 3762 N94-32919

LINEAR QUADRATIC GAUSSIAN CONTROL
A Hyland-Bernstein approach to the digital control of Pritchard-Salamon systems
[REPT-93-76] p 3844 N94-31693

LINEAR QUADRATIC REGULATOR
Approximation theory and computational methods for the identification and control of distributed parameter systems
[AD-A277335] p 3848 N94-32244

LINEAR SYSTEMS
Structural properties of inverse linear systems
[MATHS-REPT-A-200] p 3840 N94-31156
Wavevector-frequency analysis with applications to acoustics
[AD-A276618] p 3861 N94-32125

LINEAR TRANSFORMATIONS
Line transects, covariance functions and set approximation
[CWI-BS-R9311] p 3846 N94-32084

LINEARITY
On the linearity of fast atomic oxygen effects
p 3594 N94-31027

LINEARIZATION
Modeling and control of nonlinear systems
[AD-A277377] p 3834 N94-32095

LINGUISTICS
The interpretation of free focus
[CL-93-01] p 3855 N94-31390
An exploratory study of neuro linguistic programming and communication anxiety
[AD-A277756] p 3682 N94-32986

LIOUVILLE EQUATIONS
A general stochastic Liouville theory for sequential and superexchange electron-transfer reactions involving three Marcus potential surfaces
[DE94-007695] p 3869 N94-32141

LIPID METABOLISM
Lipid metabolism in cold-exposed humans
p 3796 N94-31741

LIQUEFIED GASES
Ionization EM calorimetry with accordion electrodes and liquid krypton or argon
[DE94-009082] p 3713 N94-32821

LIQUID ALLOYS
Structural ordering in liquid K-Te alloys
[DE94-008477] p 3645 N94-32514

LIQUID COOLING
A review of microclimate cooling systems in the chemical, biological, radiological environment
[AD-A276446] p 3802 N94-31302
Heat transfer studies on a rectangular channel with offset plate fins
[AD-A277300] p 3912 N94-32043

LIQUID CRYSTALS
Active matrix liquid crystal display. Industry survey results
[AD-A276415] p 3895 N94-31329
Thermotropic liquid crystals: A variable Clo material
p 3796 N94-31739
The sol-gel-xerogel transition
[AD-A276647] p 3616 N94-32038
Mathematical nonlinear optics
[AD-A277320] p 3882 N94-32510

LIQUID FUELS
Heterogeneous catalytic process for alcohol fuels from syngas
[DE94-008729] p 3667 N94-32583

LIQUID HYDROGEN
Computational modeling of convective heat transfer to liquid hydrogen coolant p 3707 N94-32485

LIQUID INJECTION
Analysis of strong acoustic excitation on the breakup and dispersion of a liquid jet
[ONERA-NT-1993-9] p 3701 N94-31422

LIQUID METALS
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
Metal induced embrittlement
[DE94-007450] p 3640 N94-31325
Control experiments in liquid metal combustion
[AD-A276918] p 3635 N94-32234
Molten metal analysis by laser produced plasmas
[DE94-007014] p 3646 N94-32782

LIQUID PHASES
Development of a catalytic system for gasification of wet biomass
[DE94-006216] p 3759 N94-31762

LIQUID-LIQUID INTERFACES
Steady thermal convection in multiple liquid layers
p 3705 N94-31844

LIQUID-SOLID INTERFACES
Interfacial behaviour: Wettability in SiC(sub p) metal matrix composites
[ISBN-0-315-87206-3] p 3621 N94-31835
Chemical structure and kinetics at liquid/solid interfaces
[AD-A277112] p 3636 N94-32304
Time-resolved analytical methods for liquid/solid interfaces
[DE94-008352] p 3637 N94-32826

LIQUIDS
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248

LISP (PROGRAMMING LANGUAGE)
Emacs Lisp in Edwin scheme
[AD-A276721] p 3818 N94-32504
Translating an AI application from Lisp to Ada: A case study
[NASA-TM-103845] p 3820 N94-32906

LITHIUM
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023
Status of developing a multifunctional aviation grease
[AD-A276755] p 3656 N94-32184
Performance of the Sony lithium-ion rechargeable battery
[AD-A277076] p 3693 N94-32303
Proceedings of the Ad Hoc Workshop on Ceramics for Li/FeS2 batteries
[DE94-007460] p 3694 N94-32607

LITHIUM ALLOYS
Calculations of nonspherically averaged charge densities for substitutionally disordered alloys
[DE94-008293] p 3646 N94-32754

LITHIUM NIOBATES
Manufacture of light-damage resistant, planar, single mode waveguide on lithium niobate
[DSIS-94-01503] p 3879 N94-31850

LITHOGRAPHY
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622
Development, characterization, and applications of high temperature superconductor nanobridge Josephson junctions
[DE94-008113] p 3903 N94-32409

LITHOLOGY
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005958] p 3771 N94-31525

LITHOSPHERE
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus
p 3776 N94-31106
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
Origin and thermal evolution of Mars
p 3940 N94-31109
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111

LOAD CARRYING CAPACITY
Mechanics of cracking for composite material
p 3624 N94-32501

LOAD TESTS
Determining the bearing capacity of flexible airfield pavements using a heavy weight deflectometer
[ISBN-0-315-86210-6] p 3587 N94-31710
Structural testing of the technology integration box beam p 3628 N94-33125
Technology integration box beam failure study
p 3628 N94-33126

LOADS (FORCES)
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus
p 3776 N94-31106
Energy absorber for the CETA p 3604 N94-33303

LOCAL THERMODYNAMIC EQUILIBRIUM
SOLGAS refined: A computerized thermodynamic equilibrium calculation tool
[DE94-009021] p 3913 N94-32848

LOCI
Design and initial testing of a facility to measure unsteady pressures on an oscillating cascade with supersonic leading edge locus p 3569 N94-31880

LOGARITHMS
Pairwise-comparison using the logarithmic least squares method and the generalized pseudoinverse
[REPT-93-84] p 3844 N94-31701

LOGIC
Correspondence theory for extended modal logics, version 3.0
[ML-93-16] p 3856 N94-31417

LOGIC CIRCUITS
Fault coverage measurement for digital microcircuits
[AD-A276226] p 3686 N94-31066
Formal verification of systolic multipliers with the Boyer-Moore theorem prover
[RR-897-M] p 3839 N94-31082
A neuron network for image classification: From algorithm to implantation
[TELECOM-93-E-005] p 3687 N94-31168
Study of continuous-time and mixed analog-digital operators
[TELECOM-93-E-010] p 3687 N94-31170
A hierarchical approach to test generation for CMOS VLSI circuits
[ISBN-9-09-005449-9] p 3689 N94-31535
Radiation tolerant, high speed, low power, gallium arsenide logic
[AD-A277293] p 3694 N94-32509
Multiple-valued programmable logic array minimization by solution space search
[AD-A278033] p 3821 N94-33090
A diagnostic expert system for digital circuits
p 3699 N94-33340

LOGIC DESIGN
Extension of the LUSTRE language and application to circuit design: The LUSTRE V4 language and the POLLUX system
[ETN-94-95918] p 3812 N94-31543
Radiation tolerant, high speed, low power, gallium arsenide logic
[AD-A277293] p 3694 N94-32509

LOGIC PROGRAMMING
LORE and reason maintenance
[REPT-93-88] p 3812 N94-31522

LOGISTICS
The Nomad Explorer assembly assist vehicle: An architecture for rapid global extraterrestrial base infrastructure establishment p 3599 N94-31429
Knowledge-based commodity distribution planning
p 3915 N94-32427
Space Station evolution study
[NASA-CR-193937] p 3611 N94-32898
Analysis of intermediate level maintenance following F404-GE-400 engine component life reductions
[AD-A277918] p 3585 N94-33283

LOGISTICS MANAGEMENT
A study of theoretical models for managing technology change and a comparison to a radio frequency identification implementation
[AD-A276012] p 3672 N94-31385
Modular Simulator System (MSS) management guide
[AD-A277098] p 3588 N94-32014

LONG DURATION EXPOSURE FACILITY
LDEF Materials Results for Spacecraft Applications
[NASA-CP-3257] p 3591 N94-31012
The performance of thermal control coatings on LDEF and implications to future spacecraft
p 3591 N94-31013
Performance of silvered Teflon (trademark) thermal control blankets on spacecraft p 3591 N94-31014
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Space Station WP-2 application of LDEF MLI results
p 3592 N94-31016
Anodized aluminum on LDEF p 3592 N94-31017
Follow-up on the effects of the space environment on UHCRE thermal blankets p 3592 N94-31018
Modeling of LDEF contamination environment
p 3592 N94-31019
Spacecraft contamination issues from LDEF: Issues for design p 3592 N94-31020
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Atomic oxygen erosion considerations for spacecraft materials selection p 3593 N94-31022
Performance of selected polymeric materials on LDEF
p 3593 N94-31023
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF
p 3593 N94-31024
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions
p 3593 N94-31025
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
On the linearity of fast atomic oxygen effects
p 3594 N94-31027
Micrometeoroid/space debris effects on materials
p 3595 N94-31032
Thermal-vacuum response of polymer matrix composites in space p 3595 N94-31033

The impact of LDEF results on the space application of metal matrix composites p 3595 N94-31034
Low-Earth orbit effects on organic composite materials flown on LDEF p 3595 N94-31036
Summary of materials and hardware performance on LDEF p 3595 N94-31037
LDEF materials special investigation group's data bases p 3596 N94-31038
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques p 3596 N94-31041
Effects of orbital exposure on RTV during the LDEF mission p 3597 N94-31043
Spacecraft materials: Comparison between flight results obtained on LDEF and MIR p 3597 N94-31045
Characterization of polymer decomposition products by laser desorption mass spectrometry p 3597 N94-31046
Design application and development of spacecraft in LEO utilizing LDEF results p 3597 N94-31047
An overview of the on-orbit contamination of the Long Duration Exposure Facility (LDEF) p 3598 N94-31049
What LDEF means for development and testing of materials p 3598 N94-31050

LONG RANGE WEATHER FORECASTING
Thermospheric modeling accuracies using F10.7 and Ap
[AD-A277355] p 3773 N94-32337

LONG WAVE RADIATION
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553

LOOPS
Varying execution discipline to increase performance
[DE94-007844] p 3819 N94-32651

LORENTZ FORCE
Magnetohydrodynamic boundary layer control system
[AD-D016120] p 3710 N94-32958

LOW COST
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic
[DE94-006467] p 3666 N94-31827

LOW DENSITY FLOW
Simulation of low-density nozzle plumes in non-zero ambient pressures
[NASA-TM-106501] p 3615 N94-32742

LOW GRAVITY MANUFACTURING
Design, characterization, and control of the NASA three degree of freedom reaction compensation platform p 3605 N94-33304

LOW PASS FILTERS
Variable-resolution imagery for flight simulation
[AD-A276199] p 3586 N94-31058

LOW REYNOLDS NUMBER
Aerodynamic drag of droplets in turbulent flow fields
[ISBN-0-315-75827-9] p 3571 N94-32491
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU finite volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926
Backward-facing step measurements at low Reynolds number, Re(sub h)=5000
[NASA-TM-108807] p 3711 N94-33290

LOW SPEED
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071

LOW TEMPERATURE
Performance of silvered Teflon (trademark) thermal control blankets on spacecraft p 3591 N94-31014
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797
Low energy ion beam assisted growth of homoepitaxial silicon films at low temperature
[AD-A278092] p 3908 N94-33039

LOW TEMPERATURE PHYSICS
Finite element analysis of time-independent superconductivity p 3691 N94-31905

LUBRICANTS
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-007723] p 3653 N94-31917
Compatibility of refrigerants and lubricants with elastomers
[DE94-008552] p 3658 N94-32518
Perfluoropolyalkylether decomposition on catalytic aluminas
[NASA-TM-106547] p 3617 N94-33021
A comparison of the performance of solid and liquid lubricants in oscillating spacecraft ball bearings p 3606 N94-33311
The preliminary evaluation of liquid lubricants for space applications by vacuum tribometry p 3606 N94-33313

LUBRICATING OILS
Status of developing a multifunctional aviation grease
[AD-A276755] p 3656 N94-32184
Lubrication with binary mixtures: Liquid-liquid emulsion in elastohydrodynamics and metal forming p 3658 N94-32490

LUBRICATION
Lubrication with binary mixtures: Liquid-liquid emulsion in elastohydrodynamics and metal forming p 3658 N94-32490
Frictional behavior and adhesion of Ag and Au films applied to aluminum oxide by oxygen-ion assisted Screen Cage Ion Plating (SCIP)
[NASA-TM-106522] p 3647 N94-32931
Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A278133] p 3728 N94-33061

LUBRICATION SYSTEMS
Design of a high-speed reliable ball bearing p 3606 N94-33314

LUMINAIRES
An analysis of the maintenance performance measurement system for LAMPS MK 3 helicopter squadrons
[AD-A276421] p 3565 N94-31332
Evaluation for the development of taxiway lighting intensity standards
[AD-A276706] p 3588 N94-32120

LUMINESCENCE
A miniaturized ASIC-based multichannel scaler instrument
[DE94-007222] p 3807 N94-32783
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981

LUMINOSITY
Can a variable alpha induce limit cycle behavior and exponential luminosity decay in transient soft x ray sources? p 3929 N94-31129
Thermal continua of AGN accretion disks p 3931 N94-31137

LUMINOUS INTENSITY
Radiation/remote sensing: Review of the principal definitions p 3757 N94-30996
Evaluation of intensity distribution profiles for US. Army rotorcraft position lighting adapted for image intensifier operations
[AD-A276459] p 3804 N94-32171
Bioluminescence bathyphotometer
[AD-D016102] p 3790 N94-32959

LUNAR BASED EQUIPMENT
Mitigation of adverse environmental effects on lunar-based astronomical instruments p 3598 N94-31426

LUNAR BASES
The Second Annual International Space University Alumni Conference
[NASA-CP-3253] p 3598 N94-31425
Solar lunar power p 3599 N94-31427
The Nomad Explorer assembly assist vehicle: An architecture for rapid global extraterrestrial base infrastructure establishment p 3599 N94-31429
Design of a logistics model for building and supporting a lunar station
[ILR-MITT-282(1993)] p 3803 N94-31852

LUNAR DUST
Mitigation of adverse environmental effects on lunar-based astronomical instruments p 3598 N94-31426

LUNAR EXPLORATION
The Nomad Explorer assembly assist vehicle: An architecture for rapid global extraterrestrial base infrastructure establishment p 3599 N94-31429
Apollo 11 highlights
[NASA-TM-109763] p 3600 N94-31820
A multitasking behavioral control system for the Robotic All Terrain Lunar Exploration Rover (RATLER)
[DE94-007293] p 3835 N94-32787

LUNAR GEOLOGY
The Lunar Scout Program: An international program to survey the Moon from orbit for geochemistry, mineralogy, imagery, geodesy, and gravity
[NASA-TM-104791] p 3943 N94-32923

LUNAR LANDING
Apollo 11 highlights
[NASA-TM-109763] p 3600 N94-31820
Load-limiting landing gear footpad energy absorption system p 3607 N94-33323

LUNAR LOGISTICS
Design of a logistics model for building and supporting a lunar station
[ILR-MITT-282(1993)] p 3803 N94-31852

LUNAR PROGRAMS
The Lunar Scout Program: An international program to survey the Moon from orbit for geochemistry, mineralogy, imagery, geodesy, and gravity
[NASA-TM-104791] p 3943 N94-32923

LUNAR SATELLITES
The Lunar Scout Program: An international program to survey the Moon from orbit for geochemistry, mineralogy, imagery, geodesy, and gravity
[NASA-TM-104791] p 3943 N94-32923

LUNAR SPACECRAFT
Load-limiting landing gear footpad energy absorption system p 3607 N94-33323

LUNAR SURFACE
The Nomad Explorer assembly assist vehicle: An architecture for rapid global extraterrestrial base infrastructure establishment p 3599 N94-31429
High-resolution synthetic aperture radar observations of the Moon p 3676 N94-31952
Load-limiting landing gear footpad energy absorption system p 3607 N94-33323

LUNGS
Effects of combined breathing impediments on diver's respiratory performance
[AD-A277437] p 3805 N94-33084

LYMAN ALPHA RADIATION
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309

M

MACH NUMBER
Hypervelocity Tunnel 9 Mach 10/14 Calibration
[AD-A275960] p 3587 N94-31318
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042
A new method for calculating wing along aerodynamics to angle of attack 180 deg
[AD-A277965] p 3574 N94-33263

MACH-ZEHNDER INTERFEROMETERS
A technique for multiplexing 3x3-coupler terminated interferometric fiber-optic sensors
[AD-A276739] p 3880 N94-32180

MACHINE LEARNING
Report of the 'Mathematical Models for Neural Networks' course
[TELECOM-93-D-019] p 3828 N94-31100
Concepts and environment
[REPT-93-032] p 3829 N94-31186
Filtering and recognition of moving boats in radar images
[REPT-93-039] p 3671 N94-31190
A neural network methodology for engineering applications: The learning control of robotic systems
[RR-480] p 3830 N94-31500
Trajectory learning with a direct drive robotic manipulator p 3831 N94-31794
Neural network definitions of highly predictable protein secondary structure classes
[DE94-006234] p 3834 N94-32175
A differential theory of learning for efficient statistical pattern recognition
[AD-A277313] p 3800 N94-32277
Refining fuzzy logic controllers with machine learning p 3839 N94-32421
Analysis and synthesis of adaptive neural elements and assemblies
[AD-A277423] p 3836 N94-32996
Investigation of drive-reinforcement learning and application of learning to flight control
[AD-A277442] p 3801 N94-33053

MACHINE TRANSLATION
Automatic translation among spoken languages p 3685 N94-32437

MACHINING
Cost-effective ceramic machining: Summary of three-body wear experiments
[DE94-007757] p 3650 N94-31354
Neutral ion sources in precision manufacturing p 3875 N94-32447
Leveraging metal matrix composites to reduce costs in space mechanisms p 3604 N94-33301

MACROMOLECULES
Multifunctional macromolecules
[AD-A277347] p 3856 N94-32246

MAGELLANIC CLOUDS
Study of stellar associations located in the region contained between the Magellanic Clouds
[ISBN-0-315-86692-6] p 3935 N94-31913

MAGIC TEES
An investigation of a novel microstrip magic-T
[ISBN-0-315-86218-1] p 3690 N94-31711

MAGNESIUM
The magnesium chelation step in chlorophyll biosynthesis
[DE94-008727] p 3794 N94-32890

MAGNESIUM ALLOYS
Shock tube ignition and combustion of aluminum/magnesium alloy particles in oxygen at high pressure p 3631 N94-31286
MAGNESIUM ISOTOPES
Mechanisms of formation and of de-excitation in the reaction Mg-24 + C-12 yields 9 alpha at 35MeV per nucleon
[ISBN-0-315-86746-9] p 3867 N94-31749
MAGNET COILS
Structural design of the superconducting Poloidal Field coils for the Tokamak Physics Experiment
[DE94-007078] p 3887 N94-31406
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher
[DE94-005244] p 3603 N94-32671
Coaxial slow source
[DE94-008191] p 3892 N94-32800
MAGNETIC ANOMALIES
Steps toward understanding the solar dynamo
[AD-A277398] p 3953 N94-32343
Surface conforming flexible eddy current probe for scanning varying surface contours
[AD-D016173] p 3627 N94-33018
MAGNETIC DISKS
Evolution of dynamo-generated magnetic fields in accretion disks around compact and young stars p 3931 N94-31138
Nonthermal accretion disk models around neutron stars p 3931 N94-31139
A redundant disk array architecture for efficient small writes
[AD-A276645] p 3815 N94-31940
Eurocap program-ebre station
[AD-A277044] p 3772 N94-32007
MAGNETIC EFFECTS
Evolution of protoplanetary disks with dynamo magnetic fields p 3931 N94-31135
Magnetless magnetic fusion
[DE94-007114] p 3891 N94-32686
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922
MAGNETIC FIELD CONFIGURATIONS
Dynamics of flux tubes in accretion disks p 3932 N94-31142
Radiation from an aperture into an anisotropic plasma half-space p 3885 N94-31205
Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326
Magnetless magnetic fusion
[DE94-007114] p 3891 N94-32686
Stability of bootstrap current driven magnetic islands in stellarators
[DE94-009207] p 3893 N94-32912
MAGNETIC FIELD RECONNECTION
Nonthermal accretion disk models around neutron stars p 3931 N94-31139
MAGNETIC FIELDS
Laboratory and space experiments as a key to the plasma universe
[TRITA-ALP-1993-01] p 3885 N94-31088
Evolution of protoplanetary disks with dynamo magnetic fields p 3931 N94-31135
Evolution of dynamo-generated magnetic fields in accretion disks around compact and young stars p 3931 N94-31138
Toroidal pinch experiments
[DE94-005876] p 3887 N94-31558
Fiberoptisk magnetfaltsensor (fiber optic magnetometer)
[PB94-148061] p 3878 N94-31584
Collective acceleration in solar flares
[DE94-006288] p 3953 N94-31632
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916
Transport phenomena in the Earth's plasma sheet p 3772 N94-31970
Stability of bootstrap current driven magnetic islands in stellarators
[DE94-009207] p 3893 N94-32912
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
Electron acceleration system
[AD-D016143] p 3893 N94-32977
An approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension)
[NASA-CR-194902] p 3649 N94-33033
MAGNETIC FLUX
Dynamics of flux tubes in accretion disks p 3932 N94-31142
Theoretical principles for designing long stator/linear motors with iron
[ETN-94-95741] p 3688 N94-31374
Transport phenomena in the Earth's plasma sheet p 3772 N94-31970
Steps toward understanding the solar dynamo
[AD-A277398] p 3953 N94-32343
MAGNETIC LEVITATION VEHICLES
Review and status of Maglev in the United States
[DE94-006832] p 3722 N94-31319
Theoretical principles for designing long stator/linear motors with iron
[ETN-94-95741] p 3688 N94-31374
Applicable dimensioning and measure and technological examination of long stator-linear motors for magnetic high-speed railways
[ETN-94-95734] p 3689 N94-31575
On the unsteady-motion theory of magnetic forces for maglev
[DE94-007765] p 3727 N94-32778
MAGNETIC MATERIALS
Piezoelectric materials research in Europe
[AD-A276207] p 3648 N94-31059
Correlations between micromagnetic, microstructural and microchemical properties in ultrathin epitaxial magnetic structures
[AD-A277200] p 3901 N94-32092
Surface conforming flexible eddy current probe for scanning varying surface contours
[AD-D016173] p 3627 N94-33018
MAGNETIC MEASUREMENT
Element-specific magnetic hysteresis measurements, a new application of circularly polarized soft x-rays
[DE94-007122] p 3858 N94-31397
Fiberoptisk magnetfaltsensor (fiber optic magnetometer)
[PB94-148061] p 3878 N94-31584
MAGNETIC MOMENTS
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
Element-specific magnetic hysteresis measurements, a new application of circularly polarized soft x-rays
[DE94-007122] p 3858 N94-31397
Hyperon polarization and magnetic moments
[DE94-006041] p 3864 N94-31507
Hyperon polarization, crystal channeling, and E781 at Fermilab
[DE94-008224] p 3877 N94-32802
Dependence of x ray absorption magnetic circular dichroism on layer periodicity in iron-platinum multilayers
[DE94-008786] p 3647 N94-32892
MAGNETIC PERMEABILITY
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
MAGNETIC PROPERTIES
Piezoelectric materials research in Europe
[AD-A276207] p 3648 N94-31059
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
On the unsteady-motion theory of magnetic forces for maglev
[DE94-007765] p 3727 N94-32778
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
MAGNETIC RECORDING
An experimental compact Hi-Vision VCR using metal evaporated tape
[NHK-LABS-NOTE-423] p 3683 N94-33081
MAGNETIC RELAXATION
Low dispersion of the muon precession frequency in HTSC samples YBa2Cu3O(x) and EuBa2Cu3O(x)
[DE94-608388] p 3896 N94-31395
Experimental evidence for lattice effects in high temperature superconductors
[DE94-006250] p 3899 N94-31633
MAGNETIC RESONANCE
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069
MAGNETIC SPECTROSCOPY
Concept, construction and testing of a high resolution QCLAM electron spectrometer with large solid angle and high impulse acceptance for the electron accelerator S-DALINAC
[ETN-94-95755] p 3711 N94-31515
MAGNETIC STORMS
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
MAGNETIC SURVEYS
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005958] p 3771 N94-31525
MAGNETIC SUSPENSION
On the unsteady-motion theory of magnetic forces for maglev
[DE94-007765] p 3727 N94-32778
Vibration Isolation Technology (VIT) ATD project
[NASA-TM-106496] p 3567 N94-33064
MAGNETIC VARIATIONS
Magnetohydrodynamics of the Earth's core. 1: Steady, rotating magnetoconvection. 2: Magnetic Rossby waves p 3770 N94-31104
A study of angular momentum loss in binaries using the free Lagrange method p 3931 N94-31134
MAGNETIZATION
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
MAGNETOHYDRODYNAMIC FLOW
Transport suppression by shear flow generation in multihelicity resistive-g turbulence
[DE94-007108] p 3886 N94-31366
Hydrodynamics of neutron star interiors and laboratory superfluids p 3936 N94-31949
Characteristics of ion flow in the quiet state of the inner plasma sheet
[AD-A277451] p 3894 N94-33106
MAGNETOHYDRODYNAMIC GENERATORS
MHD seed recovery/regeneration, phase 2
[DE94-006772] p 3886 N94-31273
MAGNETOHYDRODYNAMIC STABILITY
Numerical method for the investigation of the magnetohydrodynamic stability of three dimensional plasma equilibria
[ETN-94-95752] p 3887 N94-31512
Toroidal pinch experiments
[DE94-005876] p 3887 N94-31558
High beta tokamak research
[DE94-006513] p 3888 N94-31664
Stability and instability criteria for magnetohydrodynamics
[PB94-148475] p 3889 N94-31772
Theoretical studies of magnetohydrodynamic equilibria and dynamics of a solar coronal loop p 3953 N94-31792
Instability heating of solid-fiber Z pinches
[DE94-007055] p 3889 N94-31809
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
Cooperative program on D3-D (FY 1993)
[DE94-008343] p 3892 N94-32820
Stability of bootstrap current driven magnetic islands in stellarators
[DE94-009207] p 3893 N94-32912
Stabilization method of A.C. arc plasma
[DE94-757268] p 3893 N94-32916
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111
MAGNETOHYDRODYNAMIC WAVES
Numerical simulation of interplanetary dynamics p 3933 N94-31566
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
MAGNETOHYDRODYNAMICS
Magnetohydrodynamics of the Earth's core. 1: Steady, rotating magnetoconvection. 2: Magnetic Rossby waves p 3770 N94-31104
Evolution of dynamo-generated magnetic fields in accretion disks around compact and young stars p 3931 N94-31138
Numerical simulation of interplanetary dynamics p 3933 N94-31566
High beta tokamak research
[DE94-006513] p 3888 N94-31664
Stability and instability criteria for magnetohydrodynamics
[PB94-148475] p 3889 N94-31772
Pulsed expansion of plasma in a magnetic thruster p 3889 N94-31776
Theoretical studies of magnetohydrodynamic equilibria and dynamics of a solar coronal loop p 3953 N94-31792
Computer modeling of active experiments in space plasmas p 3890 N94-31927

Hydrodynamics of neutron star interiors and laboratory superfluids p 3936 N94-31949
Theoretical studies on ionospheric irregularities and ion diode performance
[AD-A277115] p 3772 N94-31984
Scenarios for multi-unit inertial fusion energy plants producing hydrogen fuel
[DE94-006614] p 3666 N94-32114
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
Magnetohydrodynamic boundary layer control system
[AD-D016120] p 3710 N94-32958
An approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension)
[NASA-CR-194902] p 3849 N94-33033
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111

MAGNETOMETERS
Fiberoptisk magnetfaltsensor (fiber optic magnetometer)
[PB94-148061] p 3878 N94-31584

MAGNETOPAUSE
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111

MAGNETOPLASMADYNAMICS
Performance of a quasi-steady, multi megawatt, coaxial plasma thruster
[NASA-CR-195311] p 3616 N94-32970

MAGNETORESISTIVITY
Effect of twin boundary density on the vortex melting transition in YBa2Cu3O(7-delta) single crystals
[DE94-007684] p 3904 N94-32601

MAGNETOSHEATH
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111

MAGNETOSPHERE-IONOSPHERE COUPLING
Convection and electrodynamic signatures in the vicinity of a Sun-aligned arc: Results from the Polar Acceleration Regions and Convection Study (Polar ARCS)
p 3954 N94-31102

MAGNETOSTRICTION
Fiberoptisk magnetfaltsensor (fiber optic magnetometer)
[PB94-148061] p 3878 N94-31584

MAGNETRONS
Dependence of x ray absorption magnetic circular dichroism on layer periodicity in iron-platinum multilayers
[DE94-008786] p 3647 N94-32892

MAGNETS
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
Magnetohydrodynamic boundary layer control system
[AD-D016120] p 3710 N94-32958

MAGNONS
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916

MAIN SEQUENCE STARS
The evolutionary status of PSR 1259-63
[DE94-007094] p 3938 N94-32503

MAINTENANCE
The maintenance of operational flight program
[AD-A276363] p 3565 N94-31367
Common modeling system for digital simulation
p 3823 N94-32429
Analysis of intermediate level maintenance following F404-GE-400 engine component life reductions
[AD-A277918] p 3585 N94-33283

MAN ENVIRONMENT INTERACTIONS
Fine resolution atmospheric sulfate model driven by operational meteorological data: Comparison with observations
[DE94-002994] p 3766 N94-32691

MAN MACHINE SYSTEMS
A real-time computer control and trajectory generation environment for Trussarm
[ISBN-0-315-87060-5] p 3832 N94-31833
Adaptive control of telerobotic systems worn by humans
[AD-A276608] p 3834 N94-32036
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 389)
[NASA-SP-7011(389)] p 3797 N94-32347
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 385)
[NASA-SP-7011(385)] p 3797 N94-32348
Technology transfer of operator-in-the-loop simulation
p 3802 N94-32472

MANAGEMENT ANALYSIS
An evaluation of aircraft maintenance performance factors in the objective wing
[AD-A276010] p 3565 N94-31362
Mapping analysis and planning system for the John F. Kennedy Space Center p 3757 N94-32463

MANAGEMENT INFORMATION SYSTEMS
Initial estimates of Integrated Maintenance Information System (IMIS) costs and benefits, volume 1
[AD-A276144] p 3565 N94-31830
Application of Artificial Intelligence to the DoD Corporate Information Management (CIM) program
[AD-A276656] p 3834 N94-32061
Lifting the fog of corporate information management
[AD-A276680] p 3918 N94-32090
Modular Simulator System (MSS). Executive report
[AD-A276966] p 3588 N94-32241
Managing performance of DB2 Ad Hoc Reports
[DE94-006669] p 3920 N94-32635
Developing a personal-computer-based records retention system using Paradox(tm)
[DE94-007984] p 3819 N94-32749

MANAGEMENT METHODS
Software reuse case study: TRILLIUM
[AD-A276108] p 3811 N94-31465
Process mapping: A user-friendly tool for process improvement
[DE94-004357] p 3730 N94-31605
Budget allocation and monopolistic pricing in a multiproduct firm
[REPT-93-86] p 3924 N94-31617
Lifting the fog of corporate information management
[AD-A276680] p 3918 N94-32090
CIM in space: Corporate Information Management (CIM) implications for space-based information systems
[AD-A276882] p 3600 N94-32126
Case studies of software process improvement methods
[AD-A277289] p 3818 N94-32508
Agile total quality guidelines for enhancing teamwork and success
[DE93-019972] p 3915 N94-32678
Total Quality Management implementation guidelines
[DE94-007232] p 3915 N94-32723

MANAGEMENT PLANNING
European business confronted with the 21st century: Men, the essential risk
[ESA-SP-1167] p 3914 N94-31181
Europe at the crossroads: The future of its satellite communications industry
[ESA-SP-1166] p 3670 N94-31182
An active computer supported medium for distributed planning in enterprises
[ETN-94-95738] p 3829 N94-31372
A study of theoretical models for managing technology change and a comparison to a radio frequency identification implementation
[AD-A276012] p 3672 N94-31385
NASCOM system development plan: System description, capabilities, and plans, FY 94-2
[NASA-TM-109744] p 3674 N94-31503
Modular Simulator System (MSS) management guide
[AD-A277098] p 3588 N94-32014
NASA strategic plan
[NASA-TM-109780] p 3915 N94-32222

MANAGEMENT SYSTEMS
Model borne data management system for wind tunnel testing, phase 2
[AD-A276296] p 3587 N94-31295
An analysis of the records management process to determine the impact of automation on productivity
[AD-A275923] p 3916 N94-31344
The development and use of an evaluation mechanism for the assessment of software configuration management tools
[AD-A275961] p 3810 N94-31383
A model and algorithms for a software evolution control system
[AD-A276431] p 3811 N94-31449

MANDRELS
Diamond turning in the production of x ray optics
p 3604 N94-33298

MANEUVERABILITY
Navy Omni-Directional Vehicle (ODV) development program p 3729 N94-32451

MANGANESE
Electron spin resonance measurements of Er(3+) and Mn(2+) in the high temperature superconductor compounds La(2-x)Sr(x)CuO(4-delta)
[ETN-94-95746] p 3898 N94-31612

MANGANESE COMPOUNDS
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201

MANIFOLDS (MATHEMATICS)
On the computation of simplical approximations of implicitly defined two-dimensional manifolds
[AD-A278132] p 3849 N94-33060

MANIPULATORS
A high-performance multi-arm environment: Theoretical aspects and practical implementation
[RR-479] p 3722 N94-31379
Kinematic synthesis and analysis of a novel class of six-DOF parallel minimanipulators p 3723 N94-31568
Remote robot manipulator coupled with remote-controlled guide vehicle for soil sampling in hazardous waste sites p 3723 N94-31569
Real-time control of the Trussarm variable-geometry-truss manipulator utilizing machine vision
[ISBN-0-315-87054-0] p 3830 N94-31735
Point-contact and point-impact dynamics for multibody chains
[ISBN-0-315-87056-7] p 3734 N94-31737
Development of a robotic simulator for studying interference and contact problems
[ISBN-0-315-86705-1] p 3588 N94-31747
Application of contact mechanics for the validation of robotized operations of grasping objects subjected to static and dynamic force fields
[ISBN-0-315-86831-7] p 3725 N94-31754
Strategy for tracking and grabbing a moving object with the aid of a decouplable manipulator with six degrees of freedom general architecture, guided by a vision system
[ISBN-0-315-86864-3] p 3831 N94-31757
Trajectory learning with a direct drive robotic manipulator p 3831 N94-31794
Development of a feedforward controller for a flexible manipulator
[ISBN-0-315-86515-6] p 3832 N94-31801
A real-time computer control and trajectory generation environment for Trussarm
[ISBN-0-315-87060-5] p 3832 N94-31833
Model identification of a reconfigurable robot manipulator
[ISBN-0-315-87109-1] p 3725 N94-31874
Automatic analysis of force distribution in multi-fingered articulated hands
[ISBN-0-315-87205-5] p 3725 N94-31878
High-speed path constrained manipulator operation using optimal-feedback combined controller
p 3833 N94-31962
Control of a flexible-link robotic arm manipulating an unknown dynamic payload p 3725 N94-31973
Parallel methods for synthesizing whole-hand grasps from generalized prototypes
[AD-A276798] p 3726 N94-32166
An experimental testbed for a free-floating manipulator
[AD-A277350] p 3726 N94-32334
Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369
Applying robotics to HAZMAT p 3729 N94-32452
Technology transfer of operator-in-the-loop simulation
p 3802 N94-32472
Construction of a parallel processor for simulating manipulators and other mechanical systems
[NASA-CR-191327] p 3826 N94-32482
A new solution method for the inverse kinematic joint velocity calculations of redundant manipulators
[DE94-004427] p 3727 N94-32682
Development of an interchangeable end effector mechanism for the Ranger telerobotic vehicle
p 3604 N94-33297

MANNED SPACE FLIGHT
Atmosphere quality standards in manned space vehicles
[ESA-PSS-03-401-ISSUE-1] p 3802 N94-31224
Legal regime of human activities in outer space law
p 3599 N94-31431
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100
Load-limiting landing gear footpad energy absorption system p 3607 N94-33323

MANNED SPACECRAFT
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100

MANUALS
Laser safety manual for DREO
[AD-A276288] p 3714 N94-31255
CMS Distribution Subsystem user's guide
[DE94-005328] p 3816 N94-32146
Total Quality Management implementation guidelines
[DE94-007232] p 3915 N94-32723

MANUFACTURING
Automated solar cell assembly teamed process research
[DE94-000295] p 3759 N94-31279
The 18th annual electronics manufacturing seminar
[AD-A276038] p 3687 N94-31281
Fractional-factorial process development techniques
[DE94-005580] p 3690 N94-31593
The future of open architecture process control systems
[DE94-006163] p 3830 N94-31623
Laser applications in wood processing
[PB94-138567] p 3717 N94-31840
Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools
[DE94-006367] p 3901 N94-32104
Validation of the Environmentally Conscious Manufacturing Integrated Demonstration hardware
[DE94-003824] p 3765 N94-32144
Fiber optic chemical sensors
[AD-A277128] p 3881 N94-32380
From display and PWB to MCMs: Large panel manufacturing
[DE94-007855] p 3693 N94-32386
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424
Neutral ion sources in precision manufacturing p 3875 N94-32447
Flexible manufacturing for photonics device assembly p 3669 N94-32449
LLNL casting technology
[DE94-008282] p 3669 N94-32839
Development of thermoplastic composite aircraft structures
[NASA-CR-189593] p 3626 N94-32860
Application of a design-build-team approach to low cost and weight composite fuselage structure
[NASA-CR-4418] p 3626 N94-32863
Second NASA Advanced Composites Technology Conference
[NASA-CP-3154] p 3627 N94-33121
Design, characterization, and control of the NASA three degree of freedom reaction compensation platform p 3605 N94-33304

MANY BODY PROBLEM
Micromechanics and effective properties of particulate composites and fluid suspensions p 3703 N94-31744
Numerical simulation of quantum many-body systems
[DE94-008451] p 3912 N94-32513
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799

MANY ELECTRON EFFECTS
Numerical simulation of quantum many-body systems
[DE94-008451] p 3912 N94-32513

MAPPING
NORSMAP 1989: Norwegian remote sensing spectroscopy for mapping and monitoring or algal blooms and pollution p 3744 N94-31856
Alternatives to hierarchical techniques in stereo correlation
[AD-A276570] p 3746 N94-31938
Optics and radar: Cohabitation, rivality or happy marriage. Towards new planning tools p 3748 N94-32529
The use of ERS images for mapping p 3749 N94-32531
The use of SPOT and ERS-1 images to map the eruption of Nevado Sabancaya (Province of Arequipa, South Peru) and evaluate associated risks p 3751 N94-32546
Evaluation of the potential of SAR data for mapping of landslide risks
[BRGM-93033] p 3753 N94-32552
Use of SPOT and ERS-1 to map tropical vegetation and mangrove dynamics in Guiana p 3753 N94-32555
Statistical analysis and mapping of cotton and food crop cultivation surfaces in the west of Burkina Faso: Contribution of combined SPOT P and XS data p 3757 N94-32575

MAPS
A brief introduction to symplectic integrators and recent results
[DE94-006225] p 3845 N94-31763
Techniques and applications of SAR interferometry for ERS-1 p 3756 N94-32568
MDFF HELP library, version 2: On-line documentation for the map data formatting facility
[AD-A277763] p 3922 N94-32987
Global color views of Mars p 3948 N94-33217

MARINE ENVIRONMENTS
High resolution properties of the marine atmospheric boundary layer
[DE94-006235] p 3774 N94-32736
SEASOAR and CTD observations during a COARE surveys cruise, W9211C, 22 January - 22 February, 1993
[AD-A277925] p 3791 N94-33244

MARINE METEOROLOGY
Hydrographic service Royal Australian Navy
[AD-A277134] p 3788 N94-32066
The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis
[AD-A277207] p 3784 N94-32094
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260
Evolution of diurnal surface winds and surface currents for Monterey Bay
[AD-A277649] p 3790 N94-33057

MARINE PROPULSION
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846

MARITIME SATELLITES
An analysis of cellular telephone and INMARSAT systems for providing radio data link computer communications for US Navy vessels
[AD-A278143] p 3684 N94-33160

MARKET RESEARCH
Europe at the crossroads: The future of its satellite communications industry
[ESA-SP-1166] p 3670 N94-31182
Photovoltaics: Program overview, fiscal year 1993
[DE94-000246] p 3758 N94-31235
Current Research Information in Europe: Conference proceedings
[PB94-127933] p 3917 N94-31768
Environmental issues related to biomass: An overview
[DE94-007226] p 3767 N94-32784

MARKING
Beginning the 21st century with advanced Automatic Parts Identification (API) p 3923 N94-32444

MARKOV CHAINS
Dynamical entropy of generalized quantum Markov chains
[PB94-148483] p 3850 N94-31590
The Laplace functional and Palm measure of a quasi-Cox process which is driven by a Markov chain
[REPT-93-82] p 3851 N94-31699
Undiscounted Markov decision chains with partial information; an algorithm for computing a locally optimal periodic policy
[TW-93-10] p 3851 N94-32205
Adaptive control of nonlinear and stochastic systems
[AD-A278411] p 3839 N94-33325

MARKOV PROCESSES
Representation, prediction and identification of cyclostationary processes: A state-space approach
[REPT-93-041] p 3850 N94-31191
High-performance speech recognition using consistency modeling
[AD-A276775] p 3679 N94-32185
Area-interaction point processes
[CWI-BS-R9318] p 3847 N94-32197
Robust multisource classification method using the Markov random field methods p 3750 N94-32537
Hierarchical modeling for reliability analysis using Markov models
[NASA-CR-188288] p 3731 N94-32862

MARS (PLANET)
Origin and thermal evolution of Mars p 3940 N94-31109
Mars: Five views on what is known
[NASA-TM-109751] p 3942 N94-31805
Marsville: The cosmic village
[NASA-TM-109752] p 3913 N94-31806
Mars: Past, Present, and Future. Results from the MSATT Program, part 1
[NASA-CR-194279] p 3943 N94-33190
Depth-diameter ratios for Martian impact craters: Implications for target properties and episodes of degradation p 3943 N94-33191
Constraints on the Martian cratering rate imposed by the SNC meteorites and Vallis Marineris layered deposits p 3945 N94-33197
MARSNET: A European network of stations on the surface of Mars p 3945 N94-33199
Possible test of ancient dense Martian atmosphere p 3947 N94-33206
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209
The Northern Plains MSATT Meeting, and a call for a field-oriented successor to MSATT p 3947 N94-33210
The effect of polar caps on obliquity p 3948 N94-33213
Might it be possible to predict the onset of major Martian dust storms? p 3948 N94-33215
The distribution of Martian ground ice at other epochs p 3948 N94-33218
Polar sediment accumulation: Role of surface winds at the two poles p 3951 N94-33233
The Martian sources of the SNC meteorites (two, not one), and what can and can't be learned from the SNC meteorites p 3951 N94-33234

MARS ATMOSPHERE
Mars: Past, Present, and Future. Results from the MSATT Program, part 1
[NASA-CR-194279] p 3943 N94-33190
Stationary eddies in the Mars general circulation as simulated by the NASA-Ames GCM p 3944 N94-33192
Deposition rates of oxidized iron on Mars p 3945 N94-33198
Mars atmospheric dust properties: A synthesis of Mariner 9, Viking, and Phobos observations p 3945 N94-33200
Magmatic volatiles and the weathering of Mars p 3946 N94-33201
Aerosols scattering and near-infrared observations of the Martian surface p 3946 N94-33204
A model for the evolution of CO2 on Mars p 3946 N94-33205
Possible test of ancient dense Martian atmosphere p 3947 N94-33206
Groundbased monitoring of Martian atmospheric opacity p 3947 N94-33207
Mars atmospheric loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 3947 N94-33208
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209
How well was total ozone abundance inferred with Mariner 9 p 3947 N94-33212
Escape of Mars atmospheric carbon through time by photochemical means p 3948 N94-33214
Studies of atmospheric dust from Viking IR thermal mapper data p 3948 N94-33216
Eddy transport of water vapor in the Martian atmosphere p 3949 N94-33221
Numerical simulation of thermally induced near-surface flows over Martian terrain p 3949 N94-33223
The wavelength dependence of Martian atmospheric dust radiative properties p 3950 N94-33228
Carbonate formation on Mars: Latest experiments p 3950 N94-33231
Carbonates, surfates, phosphates, nitrates, and organic materials: Their association in a Martian meteorite p 3952 N94-33239
Simultaneous laboratory measurements of CO2 and H2O adsorption on palagonite: Implications for the Martian climate and volatile reservoir p 3952 N94-33240

MARS CRATERS
Depth-diameter ratios for Martian impact craters: Implications for target properties and episodes of degradation p 3943 N94-33191
Constraints on the Martian cratering rate imposed by the SNC meteorites and Vallis Marineris layered deposits p 3945 N94-33197
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203
Possible test of ancient dense Martian atmosphere p 3947 N94-33206

MARS ENVIRONMENT
Fiber optic chemical sensors on Mars
[DE94-005251] p 3941 N94-31145
The importance of environmental conditions in reflectance spectroscopy of laboratory analogs for Mars surface materials p 3944 N94-33195
The effect of polar caps on obliquity p 3948 N94-33213
Might it be possible to predict the onset of major Martian dust storms? p 3948 N94-33215
Controls on the CO2 seasonal cycle p 3950 N94-33227
Obliquity variation in a Mars climate evolution model p 3951 N94-33236
The influence of thermal inertia on Mars' seasonal pressure variation and the effect of the weather component p 3952 N94-33238

MARS PHOTOGRAPHS
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203

MARS PROBES
Mars: Five views on what is known
[NASA-TM-109751] p 3942 N94-31805

MARS SURFACE
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
Origin and thermal evolution of Mars p 3940 N94-31109
Mars: Five views on what is known
[NASA-TM-109751] p 3942 N94-31805

One: Microphysics of frost metamorphism: Applications to Triton and Mars. Two: A global analysis of the ozone deficit in the upper stratosphere and lower mesosphere. Three: The diabatic circulation in the stratosphere as diagnosed from Microwave Limb Sounder data
p 3942 N94-31975
Mars: Past, Present, and Future. Results from the MSATT Program, part 1
[NASA-CR-194279] p 3943 N94-33190
Depth-diameter ratios for Martian impact craters: Implications for target properties and episodes of degradation p 3943 N94-33191
Thermal studies of Martian channels and valleys using Termoskan data: New results p 3944 N94-33194
The importance of environmental conditions in reflectance spectroscopy of laboratory analogs for Mars surface materials p 3944 N94-33195
Ferric sulfate montmorillonites as Mars soil analogs
p 3944 N94-33196
Constraints on the Martian cratering rate imposed by the SNC meteorites and Vallis Marineris layered deposits p 3945 N94-33197
Deposition rates of oxidized iron on Mars
p 3945 N94-33198
MARSNET: A European network of stations on the surface of Mars p 3945 N94-33199
Magmatic volatiles and the weathering of Mars
p 3946 N94-33201
Thermal and hydraulic considerations regarding the fate of water discharged by the outflow channels to the Martian northern plains p 3946 N94-33202
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203
Aerosols scattering and near-infrared observations of the Martian surface p 3946 N94-33204
Groundbased monitoring of Martian atmospheric opacity p 3947 N94-33207
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209
The Northern Plains MSATT Meeting, and a call for a field-oriented successor to MSATT
p 3947 N94-33210
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars
p 3947 N94-33211
The effect of polar caps on obliquity
p 3948 N94-33213
Might it be possible to predict the onset of major Martian dust storms? p 3948 N94-33215
Global color views of Mars p 3948 N94-33217
The distribution of Martian ground ice at other epochs
p 3948 N94-33218
Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada
p 3948 N94-33219
Martian spectral units derived from ISM imaging spectrometer data p 3949 N94-33220
IRTM brightness temperature maps of the Martian south polar region during the polar night: The cold spots don't move p 3949 N94-33222
Numerical simulation of thermally induced near-surface flows over Martian terrain p 3949 N94-33223
Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224
The pH of Mars p 3950 N94-33225
The mineralogic evolution of the Martian surface through time: Implications from chemical reaction path modeling studies p 3950 N94-33226
Martian deltas: Morphology and distribution
p 3950 N94-33230
Geologic controls of erosion and sedimentation on Mars p 3951 N94-33232
Polar sediment accumulation: Role of surface winds at the two poles p 3951 N94-33233
The Martian sources of the SNC meteorites (two, not one), and what can and can't be learned from the SNC meteorites p 3951 N94-33234
Temporal changes in the geographic distribution, elevation, and potential origin of the Martian outflow channels p 3951 N94-33235
Obliquity variation in a Mars climate evolution model
p 3951 N94-33236
Dielectric properties of Mars' surface: Proposed measurement on a Mars lander p 3951 N94-33237
The influence of thermal inertia on Mars' seasonal pressure variation and the effect of the weather component p 3952 N94-33238
Carbonates, surfates, phosphates, nitrates, and organic materials: Their association in a Martian meteorite
p 3952 N94-33239

MARS VOLCANOES
Tectonic History of the Terrestrial Planets
[NASA-CR-195696] p 3939 N94-31105
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
Evidence for ultramafic lavas on Syrtis Major
p 3950 N94-33229

MARTENSITIC STAINLESS STEELS
Characterization of the corrosion resistance of duplex stainless steels using local current density mapping techniques
[DE94-007980] p 3646 N94-32699

MARYLAND
Focused feasibility study final field sampling plan
[AD-A277445] p 3769 N94-33105

MASS
Evolution of vaporizing pulsars p 3929 N94-31128

MASS FLOW
Disk irradiation and light curves of x ray novae
p 3929 N94-31124

MASS FLOW RATE
Disk irradiation and light curves of x ray novae
p 3929 N94-31124
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216

MASS RATIOS
A study of angular momentum loss in binaries using the free Lagrange method p 3931 N94-31134
Gravitational instabilities in protostellar disks
p 3932 N94-31140
Double-lined pre-main-sequence binaries: A test of pre-main-sequence evolutionary theory
p 3933 N94-31497

MASS SPECTRA
Imaging AMS
[DE94-006662] p 3632 N94-31349
Composition and properties of dust from Comet Halley
p 3936 N94-31947
Performance of an ion trap inductively coupled plasma mass spectrometer
[DE94-007470] p 3713 N94-32811

MASS SPECTROMETERS
Imaging AMS
[DE94-006662] p 3632 N94-31349
Performance of an ion trap inductively coupled plasma mass spectrometer
[DE94-007470] p 3713 N94-32811

MASS SPECTROSCOPY
Characterization of polymer decomposition products by laser desorption mass spectrometry
p 3597 N94-31046
Imaging AMS
[DE94-006662] p 3632 N94-31349
AMS beyond 2000
[DE94-006666] p 3632 N94-31352
Development of sample charge compensation for characterization of impurities in semiconductor materials
[AD-A277113] p 3899 N94-31983
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011
New zinc-bis(dialkylamides) potentially usable as site-selective dopants for p-type ZnSe
[AD-A276947] p 3902 N94-32218
Organic analyses of the Murchison meteorite
p 3938 N94-32489
Performance of an ion trap inductively coupled plasma mass spectrometer
[DE94-007470] p 3713 N94-32811

MASS TRANSFER
Can a variable alpha induce limit cycle behavior and exponential luminosity decay in transient soft x ray sources? p 3929 N94-31129
The prediction of convective transfer on the thermal insulation of a solid-propellant rocket motor
[ONERA-NT-1993-15] p 3614 N94-31423
Cloud studies seen from a physical chemist's perspective
[DE94-006059] p 3771 N94-31527
Numerical simulations of monsoon rainfall with the NRL/NCSU regional nested grid model
p 3782 N94-31791
Computational study of simultaneous heat and mass transfer in turbulent separated flows
p 3704 N94-31843

MASSIVE STARS
Near infrared surveys of high mass star forming regions p 3925 N94-31898

MASSIVELY PARALLEL PROCESSORS
A heterogeneous computing environment for simulating astrophysical fluid flows p 3928 N94-31119
An efficient three-dimensional Poisson solver for SIMD high-performance-computing architectures
p 3823 N94-31120
Three-dimensional radiative transfer calculations on an SIMD machine applied to accretion disks
p 3932 N94-31141
Delft Ising computing engine
[PB94-148251] p 3806 N94-31587
Some calculations on supersymmetric graphs as communication networks
[REPT-93-72] p 3824 N94-31641
Massively parallel systems design for real-time embedded applications
[AD-A277256] p 3826 N94-32323
Spacecraft On-Board Information Extraction Computer (SOBIEC) p 3808 N94-32433
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics
[DE94-006279] p 3892 N94-32838
Overview of shock physics codes for armor analysis
[DE94-008948] p 3739 N94-32842
Parallel supercomputing: Advanced methods, algorithms, and software for large-scale linear and nonlinear problems
[DE94-008446] p 3836 N94-32992

MATCHING
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069
Nearest-neighbour search in constant time: An alternative to neural networks for pattern matching applications p 3838 N94-33157

MATERIALS
Spacecraft materials: Comparison between flight results obtained on LDEF and MIR p 3597 N94-31045
Databases and demands for solar heating materials
[PB94-137494] p 3758 N94-31070

MATERIALS RECOVERY
MHD seed recovery/regeneration, phase 2
[DE94-006772] p 3686 N94-31273
Feasibility study for the recycling of nickel metal hydride electric vehicle batteries
[DE94-000268] p 3690 N94-31598

MATERIALS SCIENCE
Atomic oxygen erosion considerations for spacecraft materials selection p 3593 N94-31022
A cross-disciplinary report on the mathematical sciences applied to materials science, part 1
[AD-A276116] p 3843 N94-31529

MATERIALS TESTS
Performance of selected polymeric materials on LDEF
p 3593 N94-31023
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions
p 3593 N94-31025
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
What LDEF means for development and testing of materials p 3598 N94-31050

MATHEMATICAL LOGIC
OTTER 3.0 reference manual and guide
[DE94-007457] p 3829 N94-31315
What comes first in dynamic semantics: A compositional, non-representational account of natural language presupposition
[LP-93-15] p 3855 N94-31389
The meaning of duplicates in the relational database model
[CT-93-04] p 3918 N94-31392
Binary quantifiers and relational semantics
[LP-93-13] p 3855 N94-31404
On the independent axiomatizability of modal and intermediate logics
[ML-93-17] p 3856 N94-31407
Extensional realizability
[ML-93-18] p 3856 N94-31408
The decidability of dependency in intuitionistic propositional logic
[ML-93-20] p 3856 N94-31410
Sums and quantifiers
[LP-93-05] p 3856 N94-31411
Effective truth
[ML-93-15] p 3856 N94-31416
Information acquisition from multi-agent resources; abstract
[LP-93-08] p 3917 N94-31452
Completeness and decidability of the mixed style of inference with composition
[LP-93-09] p 3842 N94-31453
Tractable deduction in some fragments of auto-epistemic logic
[REPT-93-89] p 3844 N94-31673
An epistemic proof system for parallel processes
[TR-93-17] p 3826 N94-32291
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359

MATHEMATICAL MODELS
Model updating of vibrating systems based on measured or calculated frequency response functions
[CTH-E-93-03] p 3732 N94-31091

Report of the 'Mathematical Models for Neural Networks' course
[TELECOM-93-D-019] p 3826 N94-31100
Tectonic History of the Terrestrial Planets
[NASA-CR-195686] p 3939 N94-31105
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107
Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110
A tectonic resurfacing model for Venus p 3941 N94-31113
A Green's function approach to analysing the effects of random synaptic background activity in a model neural network
[MATHS-REPT-A-202] p 3828 N94-31157
Representation, prediction and identification of cyclostationary processes: A state-space approach
[REPT-93-041] p 3850 N94-31191
Interactive reconstruction of anatomical structures with free-form surfaces
[TELECOM-93-E-002] p 3794 N94-31195
An investigation of the spin-coating process and a model for three-dimensional regular foams p 3649 N94-31206
A comparison of predictors for first-guess wind speed errors
[AD-A276460] p 3781 N94-31239
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245
ADCIRC: An advanced three-dimensional circulation model for shelves, coasts, and estuaries. User's manual for ADCIRC-2DDI
[AD-A276150] p 3787 N94-31250
A study of theoretical models for managing technology change and a comparison to a radio frequency identification implementation
[AD-A276012] p 3672 N94-31385
An algebraic view on Rosetta
[CL-93-02] p 3841 N94-31391
Nonlinear model validation using correlation tests
[RR-463] p 3842 N94-31394
A review of sensitivity analysis techniques
[DE94-007192] p 3842 N94-31399
Identification of polynomial and rational NARMAX models
[RR-483] p 3842 N94-31413
Modeling of fracture and damage in quasibrittle materials p 3734 N94-31479
On the mechanics of stress analysis of fiber-reinforced composites p 3619 N94-31481
Fully discrete arbitrary-order schemes for a model hyperbolic conservation law
[CRANFIELD-AERO-9307] p 3843 N94-31539
A simplified Von Neumann method for linear stability analysis
[CRANFIELD-AERO-9310] p 3843 N94-31540
Two models solving the increasing energy problem of the continuous Hopfield network model
[REPT-93-87] p 3843 N94-31552
Development and implementation of a full-potential ASW method
[ETN-94-95757] p 3858 N94-31560
Numerical simulation of interplanetary dynamics p 3933 N94-31566
Evidence for a correct SiO2 voltage acceleration model
[DE94-006578] p 3690 N94-31594
Boundary-layer cumulus over land: Some observations and conceptual models
[DE93-040820] p 3781 N94-31597
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
The influence of transmutation, void swelling, and flux/spectra uncertainties on the electrical properties of copper and copper alloys
[DE94-006213] p 3641 N94-31626
Impurities and conductivity in a D-wave superconductor
[DE94-006222] p 3898 N94-31628
On the validity of the BLP model
[REPT-93-70] p 3917 N94-31640
Aeroacoustic sources in internal flows
[ISBN-9-03-86-0282-0] p 3860 N94-31653
Aperture excitation of electrically large, lossy cavities
[PB94-145711] p 3675 N94-31683
Numerical modelling of turbulence
[ISBN-0-315-86439-7] p 3703 N94-31720
Micromechanics and effective properties of particulate composites and fluid suspensions p 3703 N94-31744
Stability and instability criteria for magnetohydrodynamics
[PB94-148475] p 3889 N94-31772
Numerical simulations of monsoon rainfall with the NRL/NCSU regional nested grid model p 3782 N94-31791
A model of concurrent flow flame spread over a thin solid fuel p 3634 N94-31795
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802
Cometary molecules p 3935 N94-31869
Seasons and chaos in population dynamics p 3912 N94-31897
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Cumulus convection parameterization and numerical modelling of moist atmospheres p 3783 N94-31989
Computer modelling of cyclic deformation of high-temperature materials
[AD-A277056] p 3623 N94-32012
Minimization of computational requirements in the hybrid stress finite element method
[AD-A277120] p 3846 N94-32048
Wavevector-frequency analysis with applications to acoustics
[AD-A276618] p 3861 N94-32125
A polling system with a dormant server
[CWI-BS-R9313] p 3835 N94-32193
Area-interaction point processes
[CWI-BS-R9318] p 3847 N94-32197
Multiple inheritance via intersection types
[TR-93-18] p 3848 N94-32292
Finite element solution to the Helmholtz equation with high wave number. Part 1: The h-version of the FEM
[AD-A277396] p 3848 N94-32341
Mechanics of failure of high temperature metal matrix composites
[AD-A277397] p 3624 N94-32342
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
The p-q-r-medial axis algorithm requires only local operations
[CWI-BS-R9317] p 3849 N94-32507
Numerical simulation of quantum many-body systems
[DE94-008451] p 3912 N94-32513
Molecular Science Research Center
[DE94-007464] p 3871 N94-32605
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
Arithmetic averaging: A versatile technique for smoothing and trend removal
[DE94-005274] p 3852 N94-32673
Ethics and rationality in information-enriched decisions: A model for technical communication
[DE93-040251] p 3681 N94-32679
A new solution method for the inverse kinematic joint velocity calculations of redundant manipulators
[DE94-004427] p 3727 N94-32682
Aspects of modeling uncertainty and prediction
[DE94-007565] p 3852 N94-32744
A long-term simulation of surface fluxes and soil moisture
[DE94-006661] p 3774 N94-32772
New advances in the modeling of high-temperature superconductors
[DE94-007649] p 3905 N94-32815
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics
[DE94-008279] p 3892 N94-32838
Hierarchical modeling for reliability analysis using Markov models
[NASA-CR-188288] p 3731 N94-32862
Manual for automatic generation of finite element models of spiral bevel gears in mesh
[NASA-CR-191009] p 3728 N94-32900
A mathematical model for simulating noise suppression of lined ejectors
[NASA-TP-3425] p 3861 N94-32930
Modeling of aircraft unsteady aerodynamic characteristics. Part 1: Postulated models
[NASA-TM-109120] p 3586 N94-32951
Fluid Dynamics Lagrangian Simulation Model
[AD-A277438] p 3710 N94-33009
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069
Statistical characteristics of bistatic surface scatter and mean bistatic surface scattering strengths
[AD-A278155] p 3862 N94-33096
Real-time sensor data validation
[NASA-CR-195295] p 3616 N94-33099
Designer's unified cost model p 3627 N94-33122
A comparison of rough surface parabolic equation models
[AD-A278090] p 3791 N94-33185
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186

MATHEMATICAL PROGRAMMING
A new methodology of system parameter estimation
[MATHS-REPT-A-208] p 3808 N94-31163
A parallel implementation of the column subtraction algorithm
[AD-A275922] p 3810 N94-31343
On the computation of simplical approximations of implicitly defined two-dimensional manifolds
[AD-A278132] p 3849 N94-33060
Mixed 0-1 programming by lift-and-project in a branch-and-cut framework
[AD-A278045] p 3822 N94-33183

MATHEMATICS
A cross-disciplinary report on the mathematical sciences applied to materials science, part 1
[AD-A276116] p 3843 N94-31529
OPTIONS for systemic change in mathematics, science, and technology education: Scientist/teacher partnerships
[DE94-007472] p 3914 N94-32910

MATRICES (MATHEMATICS)
Structural properties of inverse linear systems
[MATHS-REPT-A-200] p 3840 N94-31156
Observations of the notion of minimality in the generalized state space
[MATHS-REPT-A-207] p 3840 N94-31162
Arnoldi code for computing selected eigenvalues of sparse real unsymmetric matrices
[PB94-145182] p 3813 N94-31682
Recursive analysis of matrix scattering functions
[AD-A277264] p 3845 N94-32018
Multiparameter quantum groups and multiparameter R-matrices
[CWI-AM-R9307] p 3846 N94-32106
Stability estimates for families of matrices of nonuniformly bounded order
[TW-93-14] p 3847 N94-32207
N(exp n(n-1)/2)-state R-matrix related with U(sub q)(si(n)) algebra at q(exp 2N) = 1
[DE94-608140] p 3902 N94-32247
Perfect 0, +/- matrices
[AD-A277387] p 3848 N94-32286

MATRIX MATERIALS
Characterization of polymer decomposition products by laser desorption mass spectrometry p 3597 N94-31046
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565

MATRIX THEORY
Structural properties of inverse linear systems
[MATHS-REPT-A-200] p 3840 N94-31156
Observations of the notion of minimality in the generalized state space
[MATHS-REPT-A-207] p 3840 N94-31162
Pairwise-comparison using the logarithmic least squares method and the generalized pseudoinverse
[REPT-93-84] p 3844 N94-31701
Simple Patch: A new heuristic for the product traveling salesman problem
[REPT-93-85] p 3845 N94-31702
Stability estimates for families of matrices of nonuniformly bounded order
[TW-93-14] p 3847 N94-32207
Perfect 0, +/- matrices
[AD-A277387] p 3848 N94-32286

MAXIMA
Stability estimates for families of matrices of nonuniformly bounded order
[TW-93-14] p 3847 N94-32207

MAXIMUM ENTROPY METHOD
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698

MAXIMUM LIKELIHOOD ESTIMATES
Hierarchical mixtures of experts and the EM algorithm
[AD-A276516] p 3814 N94-31932
An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine
[AD-A277516] p 3805 N94-33349

MAXIMUM USABLE FREQUENCY
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326

MAXWELL EQUATION
MOM3D method of moments code theory manual
[NASA-CR-189594] p 3682 N94-32897

MAXWELL-BOLTZMANN DENSITY FUNCTION
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF
p 3593 N94-31024
MCDONNELL DOUGLAS AIRCRAFT
Aircraft incident report: In-flight turbulence encounter and loss of portions of the elevators, China Airlines Flight CI-012, McDonnell Douglas MD-11-P, Taiwan Registration B-150 about 20 miles east of Japan, 7 December 1992
[PB94-910403] p 3576 N94-32938
MEAN SQUARE VALUES
The generalized multi delay adaptive filter: Structure and convergence analysis
[TELECOM-93-D-004] p 3808 N94-31094
MEASURE AND INTEGRATION
A note on cocycles in a semidirect product
[REPT-93-65] p 3851 N94-31661
MEASURING INSTRUMENTS
Fiber optic chemical sensors on Mars
[DE94-005251] p 3941 N94-31145
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
Microwave dielectric behavior of soils. Report 2: A unique coaxial measurement apparatus
[AD-A275982] p 3771 N94-31353
Continuous measurement of aircraft wing icing
p 3576 N94-32454
Advanced high frequency partial discharge measuring system
[NASA-CR-195240] p 3697 N94-33044
Proceedings SPIE: Conference Digest, volume 2104
[AD-A278107] p 3884 N94-33187
MECHANICAL MEASUREMENT
Fluid mechanical measurements within the bottom boundary layer over the Northern California continental shelf during stress
[AD-A277916] p 3791 N94-33243
MECHANICAL PROPERTIES
Databases and demands for solar heating materials
[PB94-137494] p 3758 N94-31070
Performance predictions for composite materials
[AD-A276451] p 3618 N94-31261
Contributions to the validation of the CJS model for granular materials
[ECL-92-56] p 3733 N94-31376
On the constitutive response of transversely loaded fiber composites with compliant interphases
p 3619 N94-31555
An experimental and analytical investigation of a threaded fastener
[VTT-JULK-786] p 3724 N94-31654
Powder metallurgical processing of fibre reinforced aluminium composites
[PB94-148285] p 3620 N94-31688
Passive vibration damping materials: Piezoelectric ceramic composites for vibration damping applications
[AD-A276550] p 3653 N94-31935
Mechanical properties of acrylate networks formed by visible laser-induced polymerization. 2. Control of the mechanical properties
[AD-A277111] p 3655 N94-31982
Recent advances and developments in refractory alloys
[DE94-007929] p 3644 N94-32374
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering
[DE94-007300] p 3625 N94-32642
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852
Acoustic window
[AD-D016171] p 3862 N94-33017
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029
MEDICAL EQUIPMENT
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
Technical evaluation of the UH-60Q: Medical oxygen system
[AD-A276983] p 3579 N94-32242
MEDICAL PERSONNEL
Technical evaluation of the UH-60Q: Aircraft in typical aeromedical evacuation missions
[AD-A276944] p 3586 N94-32217
Medical problems in high mountain environments. A handbook for medical officers
[AD-A278095] p 3798 N94-33268
MEDICAL SCIENCE
Virtual reality in medical education and assessment
p 3798 N94-32471
MEDICAL SERVICES
Technical evaluation of the UH-60Q: Aircraft in typical aeromedical evacuation missions
[AD-A276944] p 3586 N94-32217
MEDITERRANEAN SEA
Some aspects of the drought in North Africa and in the Mediterranean basin p 3778 N94-30989
The climate of the Mediterranean basin: Its sensitivity to global change p 3778 N94-30993
The ocean-atmosphere interactions in the Mediterranean Sea p 3779 N94-30995
MELT SPINNING
Microstructures and mechanical properties of Al3Ti-based alloys: Analysis in single phase and multiphase systems
[ONERA-NT-1993-6] p 3640 N94-31420
MELTING
Effect of twin boundary density on the vortex melting transition in YBa2Cu3O(7-delta) single crystals
[DE94-007684] p 3904 N94-32601
Snowmelt forecasting. Further cold regions development of operational hydrological forecasting, volume 2
[AD-A278123] p 3757 N94-33269
MELTING POINTS
The ferroelectric behavior of odd-numbered nylons
[AD-A278126] p 3663 N94-33058
MEMORY
Effects of methamphetamine and fatigue on long- and short-term memory
[AD-A276452] p 3799 N94-32187
Reading: Interaction with memory
[AD-A277547] p 3801 N94-32956
Analysis and synthesis of adaptive neural elements and assemblies
[AD-A277423] p 3836 N94-32996
Reminding-based learning
[AD-A277424] p 3801 N94-32997
MEMORY (COMPUTERS)
A comparison of distributed memory and virtual shared memory parallel programming models
[DE94-005473] p 3825 N94-31663
Compiler techniques for managing data motion
[AD-A276514] p 3918 N94-31930
Interpreter composition issues in the formal verification of a processor-memory module
[NASA-CR-4594] p 3820 N94-32775
Toroidal computer memory for serial and parallel processors
[AD-D016144] p 3807 N94-32978
MENISCI
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
MERCURY (METAL)
Processable, chemical routes to binary metal sulfides
[AD-A277006] p 3642 N94-32004
MERCURY (PLANET)
Forced libration of Mercury and geodetic determination of a possible fluid core p 3774 N94-32493
MERCURY CADMIUM TELLURIDES
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
IR materials producibility
[AD-A277028] p 3879 N94-32006
MERCURY COMPOUNDS
High T(sub c) superconductor tunnel junctions for photon detectors
[DE94-007686] p 3904 N94-32602
MESOMETEOROLOGY
Coordination of mesoscale meteorological research between ASL and European group
[AD-A276730] p 3784 N94-32162
Use of cloud observations and mesoscale meteorology models to evaluate and improve cloud parameterizations
[DE94-003610] p 3785 N94-32717
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
MESONS
Study of B(0) - bar-B(0) mixing in D0
[DE94-006000] p 3897 N94-31506
F0-975, A0-980 as eye-witnesses of confinement
[PB94-147105] p 3868 N94-31923
Semileptonic decays of mesons in the SO(4) model
[DE94-008108] p 3873 N94-32708
MESOSCALE PHENOMENA
Coordination of mesoscale meteorological research between ASL and European group
[AD-A276730] p 3784 N94-32162
Proceedings of the Ninth Annual Pacific Climate (PACLIM) Workshop
[DE94-003024] p 3766 N94-32693
Use of cloud observations and mesoscale meteorology models to evaluate and improve cloud parameterizations
[DE94-003610] p 3785 N94-32717
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045
MESOSPHERE
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite
[AP-31] p 3770 N94-31222
One: Microphysics of frost metamorphism: Applications to Triton and Mars. Two: A global analysis of the ozone deficit in the upper stratosphere and lower mesosphere. Three: The diabatic circulation in the stratosphere as diagnosed from Microwave Limb Sounder data
p 3942 N94-31975
Radar scattering from the summer polar mesosphere: Theory and observations p 3772 N94-32077
MESSAGE PROCESSING
Analysis of the effect of routing strategies for parallel implementations of a selected avionics application
[AD-A276069] p 3581 N94-31458
MICA, a facility to achieve portability for message-passing and dynamic memory management in FORTRAN
[DE94-006692] p 3807 N94-32147
MESSAGES
PEM public key certificate cache server
[DE94-006404] p 3675 N94-31784
METABOLISM
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A277324] p 3793 N94-32622
Numerical model of the thermal behavior of an extremity in a cold environment including counter-current heat exchange between the blood vessels
[AD-A278099] p 3798 N94-33040
METAL AIR BATTERIES
Promising future energy storage systems: Nanomaterial based systems, Zn-air, and electromechanical batteries
[DE94-007443] p 3692 N94-32136
Overview of Sandia's electric vehicle battery program
[DE94-008944] p 3696 N94-32806
METAL BONDING
Joining of alumina by vacuum brazing
[VTT-TIED-1495] p 3724 N94-31656
Soft x ray photoelectron spectroscopy study of the interaction of Cr with MoS2(0001)
[AD-A276916] p 3635 N94-32233
Liquid-assisted diffusion bonding of NiAl
[DE94-008687] p 3645 N94-32522
A review of weldment failure modes and weldability testing methods
[AD-A278096] p 3729 N94-33251
METAL CLUSTERS
Theoretical studies of zirconium and carbon clusters with molecular dynamics simulations
[DE94-005276] p 3862 N94-31146
Metal clusters: Dynamics and structure
[AD-A276842] p 3643 N94-32091
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797
METAL COATINGS
Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051
Robotic weld overlay coatings for erosion control
[DE94-008004] p 3658 N94-32408
METAL COMBUSTION
Shock tube ignition and combustion of aluminum/magnesium alloy particles in oxygen at high pressure p 3631 N94-31286
Control experiments in liquid metal combustion
[AD-A276918] p 3635 N94-32234
METAL CRYSTALS
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825
METAL FATIGUE
Multiple-site damage in aircraft fuselage structures
[LR-729] p 3578 N94-31675
Thermal-mechanical fatigue crack growth in aircraft engine materials
[ISBN-0-315-86543-1] p 3734 N94-31707

Acoustic emission from crack growth in 7050 aluminum and 7075 aluminum as a function of temperature and heat treatment
[DREP-CRS-93-15] p 3642 N94-31871
Creep-fatigue criteria and inelastic behavior of modified 9Cr-1Mo steel at elevated temperatures
[DE94-007915] p 3642 N94-31918
Fracture micromechanics of continuous fiber and textile reinforced metal and ceramic matrix composites
[AD-A277434] p 3627 N94-33008

METAL FILMS
Preliminary results from the CONCAP-2-01 and EIOM-3 experiments on STS-46 p 3596 N94-31042
Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Reliability of multilayer copper/polyimide
[AD-A276228] p 3650 N94-31284
Computerized Ultrasonic Testing System (CUTS) for in-process thickness determination
p 3662 N94-32456
Anisotropic phase separation through the metal-insulator transition in amorphous Mo-Ge and Fe-Ge alloys
[DE94-007259] p 3646 N94-32795

METAL FOAMS
Indentability of conventional and negative Poisson's ratio foams p 3629 N94-33131

METAL HYDRIDES
Feasibility study for the recycling of nickel metal hydride electric vehicle batteries
[DE94-000268] p 3690 N94-31598
Metal hydrides in hydrogen energy systems
[VTT-TIED-1407] p 3759 N94-31655
Metal hydride heat pump engineering demonstration and evaluation model
[NASA-CR-188286] p 3669 N94-32857
Development of nickel and metal hydride secondary battery
[DE94-757270] p 3697 N94-32917

METAL IONS
Enhancement of oxidation resistance of silicon carbide by high-dose and multi-energy aluminum implantation
[DE94-006560] p 3640 N94-31314
Performance of the Sony lithium-ion rechargeable battery
[AD-A277076] p 3693 N94-32303
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649
Performance of an ion trap inductively coupled plasma mass spectrometer
[DE94-007470] p 3713 N94-32811
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843
Metal ion complexation by ionizable crown ethers
[DE94-008301] p 3661 N94-32847
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
Rare Earth Doped Semiconductors and Materials Research Society Symposium Proceedings, Volume 301
[AD-A277517] p 3908 N94-33055

METAL JOINTS
Feasibility study of cold expansion processes modelling
[DSIS-94-01186] p 3735 N94-31849

METAL MATRIX COMPOSITES
The impact of LDEF results on the space application of metal matrix composites p 3595 N94-31034
Inelastic deformation of metal matrix composites
p 3618 N94-31285
Development and characterization of intermediary layers allowing the bond between a metal alloy and a plasma sprayed ceramic
[ECL-91-39] p 3619 N94-31377
Powder metallurgical processing of fibre reinforced aluminium composites
[PB94-148285] p 3620 N94-31688
Characterization and growth mechanisms of the MgAl2O4 phase in Al2O3-reinforced Al-Mg composites
[ISBN-0-315-86531-8] p 3620 N94-31706
Interfacial behaviour: Wettability in SiC(sub p) metal matrix composites
[ISBN-0-315-87206-3] p 3621 N94-31835
Mechanics of failure of high temperature metal matrix composites
[AD-A277397] p 3624 N94-32342
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665
METCAN demonstration manual, version 1.0
[NASA-TM-105607] p 3626 N94-32858
Fracture micromechanics of continuous fiber and textile reinforced metal and ceramic matrix composites
[AD-A277434] p 3627 N94-33008
Briefing and review meeting implementation of the military handbook 17 for polymer matrix and metal matrix composites
[AD-A277446] p 3663 N94-33010
On the mechanics of microballoon-reinforced metal matrix composites
[AD-A277928] p 3630 N94-33178
Leveraging metal matrix composites to reduce costs in space mechanisms p 3604 N94-33301

METAL OXIDE SEMICONDUCTORS
Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
An extended approach to oxidations and nitridations of Si and Ge(x)Si(1-x) materials
[AD-A276056] p 3631 N94-31282
Hydrogen incorporation and radiation induced dynamics in metal-oxide-silicon structures: A study using nuclear reaction analysis
[ETN-94-95742] p 3898 N94-31610
Analysis and synthesis of MOS translinear circuits
[ISBN-9-09-005495-2] p 3690 N94-31616
Temperature dependence of single-event burnout in n-channel power MOSFET's
[AD-A277921] p 3698 N94-33177

METAL OXIDES
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Experimental investigations and molecular dynamics simulations of radiation induced surface damage
[AD-A277323] p 3871 N94-32621

METAL PARTICLES
Oxidation resistant copper
[AD-D016099] p 3696 N94-32721

METAL PLATES
Effect of vibratory stress relief during welding of thick stainless steel plate
[DE94-006557] p 3733 N94-31312

METAL POWDER
The new Metals and Alloys Indexes, search manual: A phase diagram research tool
[DE94-005371] p 3643 N94-32098
On the formation of muon- and zeta-phases in Ag-Al system by mechanical alloying
[DE94-007125] p 3645 N94-32636
Development of nickel and metal hydride secondary battery
[DE94-757270] p 3697 N94-32917

METAL PROPELLANTS
Shock tube ignition and combustion of aluminum/magnesium alloy particles in oxygen at high pressure p 3631 N94-31286

METAL SURFACES
Interaction of water with metal surfaces
[AD-A276280] p 3632 N94-31293
Fiber optic sensors for the detection of surface acoustic waves on metals
[ISBN-0-315-87055-9] p 3878 N94-31736
A new-type of long-range restructuring of ordered metal surfaces induced by lateral adsorbate interactions: Iodide on AU(110) electrodes
[AD-A276633] p 3643 N94-32060
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
Molten metal analysis by laser produced plasmas
[DE94-007014] p 3646 N94-32782
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797
Method and apparatus for inhibiting the disbonding of a paint from metal surfaces
[AD-D016106] p 3663 N94-32960

METAL VAPORS
Using laser absorption spectroscopy to monitor composition and physical properties of metal vapors
[DE94-001530] p 3716 N94-31599
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843

METAL WORKING
Lubrication with binary mixtures: Liquid-liquid emulsion in elastohydrodynamics and metal forming
p 3658 N94-32490

METAL-GAS SYSTEMS
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209

METAL-METAL BONDING
Small cylindrical adhesive bonds
[PB94-148210] p 3651 N94-31585
Metal clusters: Dynamics and structure
[AD-A276842] p 3643 N94-32091

METALLICITY
Line-strength gradients and kinematic profiles in elliptical galaxies p 3934 N94-31788
The role of galaxy type and environment in determining the properties of globular cluster systems
[ISBN-0-315-76447-3] p 3939 N94-33112

METALLIZING
Research on high reliability refractory ohmic contacts for GaAs FETs and MODFETs
[AD-A276848] p 3697 N94-33034

METALLOGRAPHY
Nd-YAG laser welding of the fiber optic connector to the header shell on the 2SL actuator
[DE94-006104] p 3 N94-31621

METALORGANIC CHEMICAL VAPOR DEPOSITION
GaAs/GaN strained layer superlattice materials for high temperature transistors, phase 1
[AD-A276115] p 3897 N94-31528
Novel growth technologies for in situ formation of semiconductor quantum wire structures
[AD-A277188] p 3902 N94-32255

METALS
Metal induced embrittlement
[DE94-007450] p 3640 N94-31325
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657
New molecular-based routes to binary main group metal sulfides
[AD-A277005] p 3900 N94-32003
The new Metals and Alloys Indexes, search manual: A phase diagram research tool
[DE94-005371] p 3643 N94-32098
Experimental measurement of dynamic failure and fragmentation properties of metals
[DE94-007377] p 3737 N94-32135
Characterization of nanoparticles and nanophase materials
[DE94-008348] p 3907 N94-32990
Ceramic and metal composite circuit-board-level technology for application specific electronic modules (ASEM)
[AD-A277961] p 3630 N94-33180

METASTABLE STATE
Production and detection of metastable atomic oxygen
[ISBN-0-315-87364-7] p 3868 N94-31915
NN-interaction in (1)S0-state: Virtual level or dibaryon resonance?
[DE94-606492] p 3869 N94-32097
Amorphous/crystalline structure and phase transformations in metastable semiconducting Ge(1-x)Sn(x)
[DE94-006659] p 3901 N94-32115
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296
Structural studies of photoinduced intramolecular electron transfer in cyclopentadienylnickelnitrosyl
[DE94-008467] p 3874 N94-32876

METEOR TRAILS
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1990, January 1991
[AD-A276693] p 3676 N94-31998
Performance statistics bulletin. High latitude metor scatter propagation, February, March, April, May 1992
[AD-A276667] p 3677 N94-32083
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation, November and December 1989, and January 1990
[AD-A276688] p 3680 N94-32297
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300

Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347

METEORITE CRATERS
Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112
Biospheric effects of a large extraterrestrial impact: Case study of the Cretaceous/Tertiary boundary crater
[NASA-CR-195827] p 3942 N94-32740
Constraints on the Martian cratering rate imposed by the SNC meteorites and Vallis Marineris layered deposits p 3945 N94-33197
Possible test of ancient dense Martian atmosphere p 3947 N94-33206
Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada p 3948 N94-33219

METEORITES
Constraints on the Martian cratering rate imposed by the SNC meteorites and Vallis Marineris layered deposits p 3945 N94-33197
Carbonates, surfates, phosphates, nitrates, and organic materials: Their association in a Martian meteorite p 3952 N94-33239

METEORITIC COMPOSITION
The origin of neon-E: Neon-E in single interstellar silicon carbide and graphite grains p 3933 N94-31556
Organic analyses of the Murchison meteorite p 3938 N94-32489
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209

METEORITIC DAMAGE
Morphology correlation of craters formed by hypervelocity impacts p 3594 N94-31031
Biospheric effects of a large extraterrestrial impact: Case study of the Cretaceous/Tertiary boundary crater
[NASA-CR-195827] p 3942 N94-32740

METEOROID SHOWERS
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1990, January 1991
[AD-A276693] p 3676 N94-31998
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300
Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347

METEOROIDS
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1990, January 1991
[AD-A276693] p 3676 N94-31998
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300
Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347

METEOROLOGICAL INSTRUMENTS
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
Low power, constant-flow air pump systems
[DE94-007463] p 3727 N94-32758

METEOROLOGICAL PARAMETERS
A comparison of predictors for first-guess wind speed errors
[AD-A276460] p 3781 N94-31239
Station climatic summaries: China, the former USSR, and Mongolia
[AD-A276548] p 3784 N94-32057
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153
Recurvature dynamics of a typhoon
[AD-A276792] p 3784 N94-32164
Fine resolution atmospheric sulfate model driven by operational meteorological data: Comparison with observations
[DE94-002994] p 3766 N94-32691
Proceedings of the Ninth Annual Pacific Climate (PACLIM) Workshop
[DE94-003024] p 3766 N94-32693
Use of cloud observations and mesoscale meteorology models to evaluate and improve cloud parameterizations
[DE94-003610] p 3785 N94-32717
Mexico City ozone concentrations as a function of readily-available meteorological parameters
[DE94-007576] p 3768 N94-32814

METEOROLOGICAL RADAR
Radar measurements p 3685 N94-31002
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
Radar rainfall measurements from space p 3782 N94-31889
Gyrotrons and free electron lasers for atmospheric sensing
[AD-A277281] p 3718 N94-32406
An integrated cloud observation and modeling investigation in support of the ARM program
[DE94-003160] p 3785 N94-32716

METEOROLOGICAL SATELLITES
The use of meteorological satellite data for studying tropical atmospheric phenomena p 3779 N94-31000
Satellite direct readout: Opportunities for science education
[AD-A276257] p 3609 N94-31292
Use of Air Force cloud cover data to evaluate and improve cloud forecasts and parameterizations in mesocale meteorological models
[AD-A277384] p 3784 N94-32054

METEOROLOGY
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
Regional sources of error growth in the National Meteorological Center's medium-range forecast model p 3781 N94-31554
Use of Air Force cloud cover data to evaluate and improve cloud forecasts and parameterizations in mesocale meteorological models
[AD-A277384] p 3784 N94-32054
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153
Proceedings of the Ninth Annual Pacific Climate (PACLIM) Workshop
[DE94-003024] p 3766 N94-32693
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
Performance of a new wind updating system for a prognostic meteorological model in the environs of Mexico City
[DE94-006243] p 3786 N94-32937
Operations summary for the convection and moisture experiment (CAMEX)
[NASA-TM-108445] p 3786 N94-33004

METHAMPHETAMINE
Effects of methamphetamine and fatigue on long- and short-term memory
[AD-A276452] p 3799 N94-32187

METHANE
Feasibility study to evaluate plasma quench process for natural gas conversion applications
[DE94-000086] p 3758 N94-31234
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE94-006759] p 3759 N94-31272
Volatiles combustion in fluidized beds
[DE94-008382] p 3636 N94-32414
Methyl chloride by way of oxyhydrochlorination of methane
[DE94-009129] p 3637 N94-32767
Direct aromatization of methane
[DE94-008719] p 3638 N94-32888
A correlated k-distribution model of the heating rates for atmospheric mixtures of H2O, CO2, O3, CH4, and N2O in the 0-2500 cm(exp -1) wave number region at altitudes between 0 and 60 km
[DE94-005136] p 3775 N94-32895

METHOD OF MOMENTS
Electromagnetic scattering through loaded aperture panels with nonzero contact impedance
[ONERA-NT-1993-2] p 3673 N94-31418
MOM3D method of moments code theory manual
[NASA-CR-189594] p 3682 N94-32897

METHYL ALCOHOL
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE94-006759] p 3759 N94-31272
Novel approaches to the production of higher alcohols from synthesis gas
[DE94-006770] p 3666 N94-32132
High octane ethers from synthesis gas-derived alcohols
[DE94-006774] p 3667 N94-32133

METHYL CHLORIDE
Methyl chloride by way of oxyhydrochlorination of methane
[DE94-009129] p 3637 N94-32767

METHYL COMPOUNDS
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
Solvent diffusion coefficient concentration dependence in polymer solutions
[AD-A277023] p 3655 N94-32005
Microstructure of copolymers containing disperse red 1 and methyl methacrylate
[AD-A277140] p 3660 N94-32722
Conversion of polymers of methyl- and vinylsilane to Si-C ceramics
[NASA-TM-106554] p 3662 N94-32945

METRIC SPACE
Line transects, covariance functions and set approximation
[CWI-BS-R9311] p 3846 N94-32084
The p-q-r-medial axis algorithm requires only local operations
[CWI-BS-R9317] p 3849 N94-32507

METROLOGY
Application of the modified voltage-dividing potentiometer to overlay metrology in a CMOS/bulk process
[DE94-007937] p 3695 N94-32700

MEXICO
Performance of a new wind updating system for a prognostic meteorological model in the environs of Mexico City
[DE94-006243] p 3786 N94-32937

MICHELSON INTERFEROMETERS
Fiber optic sensors for the detection of surface acoustic waves on metals
[ISBN-0-315-87055-9] p 3878 N94-31736
Coastal boundary layer and refractivity measurements using the ground-based high resolution interferometer sounder (GB-HIS)
[AD-A277980] p 3683 N94-33159
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312

MICROANALYSIS
Correlations between micromagnetic, microstructural and microchemical properties in ultrathin epitaxial magnetic structures
[AD-A277200] p 3901 N94-32092
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781

MICROBALANCES
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010

MICROBALLOONS
On the mechanics of microballoon-reinforced metal matrix composites
[AD-A277928] p 3630 N94-33178

MICROCOMPUTERS
Design and Monte Carlo analysis of an unmanned aerial vehicle
[AD-A277648] p 3580 N94-33056

MICROCRYSTALS
Oriented Si and Ge nanocrystals formed in Al2O3 by ion implantation and annealing
[DE94-005593] p 3901 N94-32172

MICROELECTRONICS
Fault coverage measurement for digital microcircuits
[AD-A276226] p 3686 N94-31066
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928
Sandia technology engineering and science accomplishments
[DE94-008312] p 3668 N94-32412
Aerospace sponsored research
[ATR-93(8498)-1] p 3966 N94-32949

Silicon-Based Optoelectronic Materials Symposium and Materials Research Society Proceedings, volume 298
[AD-A277518] p 3662 N94-32952
The impact of ASIC devices on the SEU vulnerability of space-borne computers
[AD-A278134] p 3808 N94-33252

MICROGRAVITY
Space acceleration measurement system
[NASA-TM-109754] p 3913 N94-31807
Steady thermal convection in multiple liquid layers p 3705 N94-31844
Solid surface
[NASA-TM-109746] p 3634 N94-31883
Defying gravity
[NASA-TM-109747] p 3667 N94-31884
An experimental study of void formation during aluminum solidification in reduced gravity p 3667 N94-31944
Boundary element analysis of three-dimensional nonlinear hydrodynamics in a reduced gravity environment p 3668 N94-32715
Vibration Isolation Technology (VIT) ATD project
[NASA-TM-106496] p 3567 N94-33064
Design, characterization, and control of the NASA three degree of freedom reaction compensation platform p 3605 N94-33304

MICROGRAVITY APPLICATIONS
Vibration Isolation Technology (VIT) ATD project
[NASA-TM-106496] p 3567 N94-33064
Design, characterization, and control of the NASA three degree of freedom reaction compensation platform p 3605 N94-33304

MICROHARDNESS
Robotic weld overlay coatings for erosion control
[DE94-008004] p 3658 N94-32408

MICROMACHINING
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928

MICROMECHANICS
Micromechanical analysis of the interface and basic damage modes in glass fiber/epoxy resin model composites
[ONERA-NT-1993-4] p 3618 N94-31225
Unidirectional composites compressive behaviour: Test methods and micromechanical approach
[ONERA-NT-1993-10] p 3618 N94-31232
Inelastic deformation of metal matrix composites p 3618 N94-31285
On the constitutive response of transversely loaded fiber composites with compliant interphases p 3619 N94-31555
Micromechanics and effective properties of particulate composites and fluid suspensions p 3703 N94-31744
Toughening mechanisms in fiber-reinforced ceramic-matrix composites p 3622 N94-31943
Fracture mechanics and micromechanisms in fiber-reinforced composites p 3622 N94-31986
Finite element analysis of damage in fibrous composites using a micromechanical model
[AD-A277226] p 3623 N94-32024
Mechanics of the single fiber pullout problem with several interface conditions p 3623 N94-32078
New micro- and macroscopic models of contact and friction
[AD-A277240] p 3726 N94-32320
Development of an advanced continuum theory for composite laminates, volume 1
[AD-A277275] p 3625 N94-32591
Development of an advanced continuum theory for composite laminates, volume 2
[AD-A277276] p 3625 N94-32592
Fracture micromechanics of continuous fiber and textile reinforced metal and ceramic matrix composites
[AD-A277434] p 3627 N94-33008
Nonlocal theory for fracturing of quasibrittle materials
[AD-A278283] p 3740 N94-33143

MICROMETEOROIDS
Space Station WP-2 application of LDEF MLI results p 3592 N94-31016
Morphology correlation of craters formed by hypervelocity impacts p 3594 N94-31031
Micrometeoroid/space debris effects on materials p 3595 N94-31032

MICROPARTICLES
Space hypervelocity microparticle impact damage in polymer matrix composites
[ISBN-0-315-87057-5] p 3652 N94-31692
Stabilized alumina/ethanol colloidal dispersion for seeding high temperature air flows
[NASA-TM-106591] p 3713 N94-32983
Counting particles emitted by stratospheric aircraft and measuring size of particles emitted by stratospheric aircraft
[NASA-CR-195908] p 3769 N94-33170

MICROPHONES
A silicon condenser microphone: Modelling and electronic circuitry
[ISBN-9-09-005279-8] p 3688 N94-31517
A silicon condenser microphone: Materials and technology
[ISBN-9-09-005899-0] p 3688 N94-31518

MICROPROCESSORS
Interpreter composition issues in the formal verification of a processor-memory module
[NASA-CR-4594] p 3820 N94-32775

MICROSCOPES
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Simplified ultra-high resolution optic for soft x ray imaging
[AD-A278424] p 3885 N94-33331

MICROSCOPY
Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051
New and emerging techniques for imaging surfaces
[AD-A276497] p 3878 N94-31262
Differential phase acoustic microscope for micro-NDE
[NASA-CR-189617] p 3731 N94-32481

MICROSEISMS
Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise)
[AD-A277009] p 3789 N94-32401

MICROSTRIP ANTENNAS
The development of active integrated antennas and a design methodology
[ISBN-0-315-86119-3] p 3675 N94-31708
Proceedings of the 1993 Antenna Applications Symposium, volume 1
[AD-A277202] p 3676 N94-32049
Proceedings of the 1993 Antenna Applications Symposium, volume 2
[AD-A277203] p 3677 N94-32050
Microwave sensor for ice detection p 3583 N94-32457
COVICS: A covert video communications system
[DE94-007568] p 3682 N94-32745
Reconfigurable Array of Radiating Elements (RARE) controlled by light
[NASA-CR-195828] p 3884 N94-33073
The 20 GHz circularly polarized, high temperature superconducting microstrip antenna array
[NASA-CR-195097] p 3683 N94-33083

MICROSTRIP DEVICES
An investigation of a novel microstrip magic-T
[ISBN-0-315-86218-1] p 3690 N94-31711

MICROSTRIP TRANSMISSION LINES
Simulation of non-uniform transmission lines for weakly dispersive structures
[ISBN-0-315-86525-3] p 3690 N94-31726
Theoretical and experimental study of microstrip-to-slot line uniplanar transition
[NASA-TM-106566] p 3696 N94-32905
Reconfigurable Array of Radiating Elements (RARE) controlled by light
[NASA-CR-195828] p 3884 N94-33073

MICROSTRUCTURE
Microstructures and mechanical properties of Al3Ti-based alloys: Analysis in single phase and multiphase systems
[ONERA-NT-1993-6] p 3640 N94-31420
Structure and dynamics of microemulsions in bulk, at interfaces, and in confined geometries
[DE94-006043] p 3633 N94-31526
Aging effects on the microstructure, surface characteristics and wettability of Cu pretinned with Sn-Pb solders
[DE94-007033] p 3641 N94-31638
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666
High-temperature deformation and fracture toughness of duplex ceramic microstructures p 3653 N94-31945
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023
Work hardening behavior in aluminum alloy 2090
[DE94-007036] p 3643 N94-32064
Correlations between micromagnetic, microstructural and microchemical properties in ultrathin epitaxial magnetic structures
[AD-A277200] p 3901 N94-32092
Robotic weld overlay coatings for erosion control
[DE94-008004] p 3658 N94-32408
Mechanical properties of vacuum-sintered yttria ceramics
[DE94-008138] p 3659 N94-32617
Microstructure of copolymers containing disperse red 1 and methyl methacrylate
[AD-A277140] p 3660 N94-32722
Microanalytical study of defect formation in thin bismuth strontium calcium copper oxide films
[DE94-008217] p 3661 N94-32751
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779
NMR characterization of shocked quartz
[DE94-007733] p 3774 N94-32816
Light scattering studies of a model electrorheological fluid
[DE94-007860] p 3883 N94-32818
Phase behavior, structure, and properties of model block polymers
[AD-A277530] p 3662 N94-32954
Characterization of nanoparticles and nanophase materials
[DE94-008348] p 3907 N94-32990
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029
Fine and microstructure observations at Fieberlin g Guyot R/V new horizon cruise report
[AD-A277917] p 3791 N94-33109
Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992
[AD-A277935] p 3791 N94-33245
The path for long range conduction in high J(sub c) TlBa2Ca2Cu3O(8+x) spray-pyrolyzed deposits
[DE94-007211] p 3909 N94-33271
Microstructures and epitaxy in oxide superconductor thin films and devices
[AD-A278427] p 3910 N94-33332

MICROWAVE AMPLIFIERS
Design of a high power x-band magnicon amplifier
[AD-A277001] p 3692 N94-32199

MICROWAVE ANTENNAS
The development of active integrated antennas and a design methodology
[ISBN-0-315-86119-3] p 3675 N94-31708
SATCOM feasibility study for search and rescue aircraft
[DSIS-94-01083] p 3575 N94-31902
Reconfigurable Array of Radiating Elements (RARE) controlled by light
[NASA-CR-195828] p 3884 N94-33073
The 20 GHz circularly polarized, high temperature superconducting microstrip antenna array
[NASA-CR-195097] p 3683 N94-33083
Two-axis antenna positioning mechanism p 3605 N94-33308

MICROWAVE CIRCUITS
Microwave dielectric behavior of soils. Report 3: Measurement and modeling
[AD-A276060] p 3771 N94-31457
High-performance GaAs/AlGaAs optical phase modulators for microwave/photonic integrated circuits
[DE94-006361] p 3688 N94-31483
High performance YBCO films
[AD-A276493] p 3897 N94-31531
Simulation of non-uniform transmission lines for weakly dispersive structures
[ISBN-0-315-86525-3] p 3690 N94-31726
Design of a high power x-band magnicon amplifier
[AD-A277001] p 3692 N94-32199
High-performance GaAs/AlGaAs optical phase modulators for microwave photonic integrated circuits
[DE94-007376] p 3696 N94-32809
YBCO Josephson Junction arrays
[AD-A277426] p 3908 N94-33005
Advanced silicon technology for microwave circuits
[AD-A278039] p 3698 N94-33091

MICROWAVE COUPLING
An investigation of a novel microstrip magic-T
[ISBN-0-315-86218-1] p 3690 N94-31711

MICROWAVE EMISSION
High sensitivity and resolution decimetric spectroscope: Preliminary analysis of solar bursts
[INPE-5537-TDI/525] p 3954 N94-33080

MICROWAVE EQUIPMENT
Simulation of non-uniform transmission lines for weakly dispersive structures
[ISBN-0-315-86525-3] p 3690 N94-31726
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908
Division of Microwave Technology
[PB94-148079] p 3676 N94-31925
Estimation and analysis of climate-scale rainfall over the Tropical Pacific p 3783 N94-32030
Proceedings SPIE: Conference Digest, volume 2104
[AD-A278107] p 3884 N94-33187

MICROWAVE FREQUENCIES
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
Processing and characterization of functionally gradient ceramic materials
[AD-A277154] p 3657 N94-32367
MICROWAVE IMAGERY
Estimation and analysis of climate-scale rainfall over the Tropical Pacific p 3783 N94-32030
MICROWAVE OSCILLATORS
Repetitively pulsed backward-wave oscillator investigations
[AD-A278281] p 3698 N94-33142
Optically switched submillimeter-wave oscillator
[AD-A278014] p 3698 N94-33249
MICROWAVE RADIOMETERS
An integrated cloud observation and modeling investigation in support of the ARM program
[DE94-003160] p 3785 N94-32716
Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759
MICROWAVE SENSORS
Radar rainfall measurements from space
p 3782 N94-31889
Microwave sensor for ice detection
p 3583 N94-32457
Application of ERS-1 SAR data for hydrological studies p 3754 N94-32558
Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559
MICROWAVE SPECTRA
Cometary molecules p 3935 N94-31869
MICROWAVE TUBES
High-power microwave-tube transmitters
[DE94-005340] p 3686 N94-31150
MICROWAVES
Microwave dielectric behavior of soils. Report 1: Summary of related research and applications
[AD-A275980] p 3771 N94-31351
Microwave dielectric behavior of soils. Report 2: A unique coaxial measurement apparatus
[AD-A275982] p 3771 N94-31353
Two-gigawatt burst-mode operation of the Intense Microwave Prototype (IMP) Free-Electron Laser (FEL) for the Microwave Tokamak Experiment (MTX)
[DE94-006613] p 3715 N94-31580
Structure estimation of phase objects from the diffraction near field: Microwave and model calculations
[ETN-94-95737] p 3674 N94-31608
High peak power microwaves: A health hazard
[AD-A277168] p 3681 N94-32576
Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759
MID-OCEAN RIDGES
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981
MILITARY AIRCRAFT
Unmanned Air Vehicle/Remotely Piloted Vehicle analysis for lethal UAV/RPV
[AD-A276052] p 3578 N94-31442
Aircraft weight prediction capability. Volume 1: Weight study and results
[AD-A277206] p 3579 N94-32062
A comparison of military and commercial aircraft development
[AD-A276830] p 3575 N94-32168
MILITARY HELICOPTERS
An analysis of the maintenance performance measurement system for LAMPS MK 3 helicopter squadrons
[AD-A276421] p 3565 N94-31332
Army scout/reconnaissance helicopters versus unmanned aerial vehicles
[AD-A276902] p 3579 N94-32232
Estimating the impact of crashworthiness standards on mortality and morbidity events in the US Army rotary-wing aircraft mishaps
[AD-A277121] p 3575 N94-32363
MILITARY OPERATIONS
Coordination of mesoscale meteorological research between ASL and European group
[AD-A276730] p 3784 N94-32162
DOD space based requirements: Increasing DOD access to space
[AD-A276874] p 3601 N94-32211
Medical problems in high mountain environments. A handbook for medical officers
[AD-A278095] p 3798 N94-33268
Proceedings of the Symposium/Workshop on Applications of Expert Systems in DND
[DSIS-93-00343] p 3853 N94-33335
Management of uncertainty in knowledge-based systems: A military perspective p 3854 N94-33341
MILITARY SPACECRAFT
CIM in space: Corporate Information Management (CIM) implications for space-based information systems
[AD-A276882] p 3600 N94-32126
MILITARY TECHNOLOGY
Automated detection of ship tracks in multispectral satellite data
[AD-A276697] p 3746 N94-32119
Common modeling system for digital simulation
p 3823 N94-32429
Interagency Advanced Power Group: Steering Group meeting minutes
[DE94-007951] p 3761 N94-32701
MILK
Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056
MILKY WAY GALAXY
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309
MILLIMETER WAVES
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831
Optical processing of MMW for agile beamsteering and beamforming
[AD-A277161] p 3880 N94-32068
Fusion applications of high power millimeter wave sources
[DE94-007374] p 3718 N94-32202
YBCO Josephson Junction arrays
[AD-A277426] p 3908 N94-33005
Synthetic vision technology demonstration. Volume 1: Executive summary
[DOT/FAA/RD-93/40-VOL-1] p 3582 N94-33076
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Synthetic vision technology demonstration. Volume 4: Appendices
[DOT/FAA/RD-93/40-VOL-4] p 3583 N94-33079
Proceedings SPIE: Conference Digest, volume 2104
[AD-A278107] p 3884 N94-33187
High temperature superconducting Josephson junction array systems, phase 1
[AD-A277937] p 3908 N94-33246
MIMD (COMPUTERS)
Studies of an optical multi-processor interconnect
[AD-A277093] p 3881 N94-32392
MIMO (CONTROL SYSTEMS)
Antiwindup analysis and design approaches for MIMO systems
[NASA-CR-195304] p 3584 N94-32075
Control strategies for systems with limited actuators
[NASA-CR-195307] p 3727 N94-32741
MINERAL DEPOSITS
Thermal emission measurements (5-25 microns) of Hawaiian palagonitic soils with implications for Mars
p 3944 N94-33193
Deposition rates of oxidized iron on Mars
p 3945 N94-33198
Aerosols scattering and near-infrared observations of the Martian surface p 3946 N94-33204
MINERALOGY
Possibilities of GER data for soil surface characteristics in the Almaden area p 3744 N94-31859
Magmatic volatiles and the weathering of Mars
p 3946 N94-33201
Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada
p 3948 N94-33219
The mineralogic evolution of the Martian surface through time: Implications from chemical reaction path modeling studies p 3950 N94-33226
Evidence for ultramafic lavas on Syrtis Major
p 3950 N94-33229
MINERALS
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
The mineralogic evolution of the Martian surface through time: Implications from chemical reaction path modeling studies p 3950 N94-33226
MINES (EXCAVATIONS)
Emissions of greenhouse gases from the use of transportation fuels and electricity
[DE94-006166] p 3765 N94-31625
MINIATURIZATION
A miniaturized ASIC-based multichannel scaler instrument
[DE94-007222] p 3807 N94-32783
The ALEXIS mission recovery
[DE94-007549] p 3611 N94-32813
MINIMA
On the minimum of independent geometrically distributed random variables
[NASA-CR-194883] p 3821 N94-33075
MINORITY CARRIERS
Passivation of III-V compound semiconductor based devices
[AD-A276178] p 3894 N94-31056
Experimental and theoretical studies of hydrogenated amorphous semiconductor alloys and superlattices
[AD-A276159] p 3686 N94-31079
MIR SPACE STATION
Spacecraft materials: Comparison between flight results obtained on LDEF and MIR p 3597 N94-31045
Technical assessment of Mir-1 life support hardware for the international space station
[NASA-TM-108441] p 3803 N94-31380
MIRRORS
Degradation of optical components in space
p 3594 N94-31029
Automatic resonator alignment and power stabilization of high power C02 lasers
[ISBN-0-315-77217-4] p 3714 N94-31472
Fast acting optical deflection
[AD-A276630] p 3879 N94-32037
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Neutral ion sources in precision manufacturing
p 3875 N94-32447
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Multi-line passive fiber optic slipring
[AD-D016092] p 3883 N94-32738
Operational experience and evaluation of a dual-element stretched-membrane heliostat
[DE94-008827] p 3763 N94-32965
Diamond turning in the production of x ray optics
p 3604 N94-33298
MIS (SEMICONDUCTORS)
Passivation of III-V compound semiconductor based devices
[AD-A276178] p 3894 N94-31056
MISSILE DEFENSE
Optical processing of MMW for agile beamsteering and beamforming
[AD-A277161] p 3880 N94-32068
MISSILE VIBRATION
Aeroelastic vibrations of lifting surfaces
[ECL-91-01] p 3585 N94-31677
MISSILES
Exposure assessment of JAVELIN missile combustion products
[AD-A278128] p 3616 N94-33059
MISSION PLANNING
NASA strategic plan
[NASA-TM-109780] p 3915 N94-32222
Forced libration of Mercury and geodetic determination of a possible fluid core p 3774 N94-32493
The Lunar Scout Program: An international program to survey the Moon from orbit for geochemistry, mineralogy, imagery, geodesy, and gravity
[NASA-TM-104791] p 3943 N94-32923
MARSNET: A European network of stations on the surface of Mars p 3945 N94-33199
Scheduling fighter missions using an expert system with an operations research module p 3853 N94-33337
MISSISSIPPI
Remote sensing and the Mississippi high accuracy reference network p 3758 N94-32466
MIXING
Competition between crystallization and mixing/demixing in polymer mixture
[ETN-94-95753] p 3651 N94-31513
MIXING LENGTH FLOW THEORY
Modification of the MML turbulence model for adverse pressure gradient flows
[NASA-TM-106544] p 3709 N94-32947
MIXTURES
Studies in physico-chemical hydrodynamics of extended systems
[DE94-006752] p 3706 N94-32149
MOBILE COMMUNICATION SYSTEMS
Fast autodidactic adaptive equalization algorithms
[TELECOM-93-E-018] p 3670 N94-31174
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
Channel and terminal description of the ACTS mobile terminal p 3599 N94-31428

Multisatellite constellation configuration selection for multiregional highly elliptical orbit constellations
p 3600 N94-31437
A multichannel architecture for Naval Task Force Communication
[AD-A276230] p 3673 N94-31446

MOBILITY
Studying transient mobility and energy loss using scanning tunneling microscopy
[AD-A278292] p 3877 N94-31256

MODEL REFERENCE ADAPTIVE CONTROL
High-speed path constrained manipulator operation using optimal-feedback combined controller
p 3833 N94-31962

MODELS
On a formal approach to the methodology of information planning
[MEMO-INF-93-42] p 3917 N94-31415

MODULARITY
Modular Simulator System (MSS). Engineering design guide
[AD-A276967] p 3589 N94-32394

MODULATION
Modulation and coding for the Gaussian channel, possibly affected by fluctuations
[TELECOM-93-E-009] p 3840 N94-31169
A simple model for determining photoelectron-generated radiation scaling laws
[DE94-006130] p 3761 N94-32660
Long distance transmission of 15 Gb/s digital using subcarrier multiplexing and external modulation
[DE94-008298] p 3682 N94-32756
Automatic modulation recognition
p 3686 N94-33153

MODULATION TRANSFER FUNCTION
Optical and image transmission through desert atmospheres
[AD-A276022] p 3742 N94-31496

MODULATORS
High-performance GaAs/AlGaAs optical phase modulators for microwave/photonic integrated circuits
[DE94-006361] p 3688 N94-31483
Fiber optic continuous true time-delay modulator
[AD-D016098] p 3883 N94-32720
High-performance GaAs/AlGaAs optical phase modulators for microwave photonic integrated circuits
[DE94-007376] p 3696 N94-32809

MODULES
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-flight station module, volume 2
[AD-A276969] p 3588 N94-32313
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE94-000298] p 3695 N94-32680

MODULUS OF ELASTICITY
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065
Considering ties elasticities in high frequency rail dynamics
[ILR-MITT-281(1993)] p 3733 N94-31375
Elastic modulus measurements of LDEF glasses and glass-ceramics using a speckle technique
[NASA-CR-195911] p 3653 N94-31851
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632

MOISTURE
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649

MOISTURE CONTENT
Recurvature dynamics of a typhoon
[AD-A276792] p 3784 N94-32164
Effects of interphases on the mechanical, thermal and hygromechanical response of fiber-reinforced composites p 3624 N94-32496
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
The importance of environmental conditions in reflectance spectroscopy of laboratory analogs for Mars surface materials p 3944 N94-33195

MOLECULAR BEAM EPITAXY
Growth and characterization of III-V semiconductors with rare earth impurities for optoelectronic devices
[AD-A276021] p 3896 N94-31455
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622
High speed, strained layer, multiquantum well, GaInAsP and GaAs lasers and heterostructures
[AD-A277287] p 3719 N94-32608
Compositions and chemical bonding in ceramics by quantitative electron energy-loss spectrometry
[DE94-007208] p 3659 N94-32640
Research in the optical sciences
[AD-A278271] p 3884 N94-33140

MOLECULAR BEAMS
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797

MOLECULAR BIOLOGY
Neural network definitions of highly predictable protein secondary structure classes
[DE94-006234] p 3834 N94-32175
Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250

MOLECULAR CLOUDS
Circumstellar material around young stars in Orion
p 3930 N94-31133
Theory of protostellar accretion disks
p 3931 N94-31136
Evolution of dynamo-generated magnetic fields in accretion disks around compact and young stars
p 3931 N94-31138
CO observations in external galaxies and gas mass determination p 3925 N94-31790
A study of physical conditions, radiative transfer and shocks in the interstellar medium p 3937 N94-31963

MOLECULAR CLUSTERS
Molecular Science Research Center
[DE94-007464] p 3871 N94-32605

MOLECULAR COLLISIONS
Theoretical studies of zirconium and carbon clusters with molecular dynamics simulations
[DE94-005276] p 3862 N94-31146
Spectroscopic study of the molecular collisions (hydrogen-nitrogen and hydrogen-oxygen) at energies of several MeV
[ISBN-0-315-86794-9] p 3867 N94-31753
Analysis of forward and inverse problems in chemical dynamics and spectroscopy
[DE94-007607] p 3635 N94-32140
Time-resolved IR spectroscopy, energy transfer, and state-to-state collision dynamics of atmospheric species
[AD-A277372] p 3773 N94-32338
Energy transfer properties and mechanisms
[DE94-007403] p 3636 N94-32594

MOLECULAR DYNAMICS
Theoretical studies of zirconium and carbon clusters with molecular dynamics simulations
[DE94-005276] p 3862 N94-31146
Molecular dynamics computer simulations of charged metal electrode-aqueous electrolyte interfaces
[AD-A276401] p 3863 N94-31237
The threshold energy for defect production in SiC: A molecular dynamic study
[DE94-007123] p 3896 N94-31499
Modern integral equation techniques for quantum reactive scattering theory
[DE94-007039] p 3857 N94-31639
Atomic and molecular data needs for fusion
[DE94-006555] p 3870 N94-32177
Chemical structure and kinetics at liquid/solid interfaces
[AD-A277112] p 3636 N94-32304
Point defect production, geometry, and stability in silicon: A molecular dynamics simulation study
[DE94-008292] p 3903 N94-32411
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598
Chemisorbed-molecule potential-energy surfaces and electronically-stimulated processes
[DE94-007932] p 3719 N94-32603
Experimental investigations and molecular dynamics simulations of radiation induced surface damage
[AD-A277323] p 3871 N94-32621
Molecular interactions in dilute supercritical mixtures: Molecular dynamics investigation
[DE94-007610] p 3872 N94-32644
Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351

MOLECULAR EXCITATION
Cometary molecules p 3935 N94-31869
Electronic and nuclear factors in intramolecular charge and excitation transfer processes
[DE94-006598] p 3870 N94-32178
Energy transfer properties and mechanisms
[DE94-007403] p 3636 N94-32594

MOLECULAR GASES
CO observations in external galaxies and gas mass determination p 3925 N94-31790
The manifestations of energetic activity in the galactic center p 3937 N94-32028

MOLECULAR INTERACTIONS
Molecular interactions at metal/polyimide interfaces: A correlation with adhesion and bond durability
[AD-A276301] p 3650 N94-31297
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
The 14th Annual West Coast Theoretical Chemistry/Statistical Mechanics Conference
[AD-A276942] p 3656 N94-32239
Molecular interactions in dilute supercritical mixtures: Molecular dynamics investigation
[DE94-007610] p 3872 N94-32644
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757
Implementation of a vibrationally linked chemical reaction model for DSMC
[NASA-TM-109109] p 3710 N94-33020
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351

MOLECULAR RELAXATION
Vibrational energy transfer of diatomic gases in hypersonic expanding flows p 3570 N94-31958
Implementation of a vibrationally linked chemical reaction model for DSMC
[NASA-TM-109109] p 3710 N94-33020

MOLECULAR ROTATION
Collective and quasiparticle excitations in light Pb isotopes
[ETN-94-96014] p 3865 N94-31548

MOLECULAR SPECTRA
Summary of some data processing routines in the molecular physics group of Stockholm University
[USIP-93-05] p 3808 N94-31087

MOLECULAR SPECTROSCOPY
Summary of some data processing routines in the molecular physics group of Stockholm University
[USIP-93-05] p 3808 N94-31087
Laser and Fourier transform spectroscopy of novel propellant molecules
[AD-A277506] p 3667 N94-33013
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351

MOLECULAR STRUCTURE
Summary of some data processing routines in the molecular physics group of Stockholm University
[USIP-93-05] p 3808 N94-31087
Theoretical studies of zirconium and carbon clusters with molecular dynamics simulations
[DE94-005276] p 3862 N94-31146
Analytical applications of scanning tunneling microscopy
[AD-A276066] p 3711 N94-31283
Infrared and near infrared transient absorption spectroscopy of molecular free radicals
[DE94-005446] p 3632 N94-31305
Collective and quasiparticle excitations in light Pb isotopes
[ETN-94-96014] p 3865 N94-31548
Double rotation NMR studies of zeolites and aluminophosphate molecular sieves
[DE94-007032] p 3866 N94-31637
Chemical interactions between protein molecules and polymer membrane materials
[DE94-006987] p 3651 N94-31672
Recent developments in polymeric charge transfer complexes
[AD-A277108] p 3654 N94-31979
New molecular-based routes to binary main group metal sulfides
[AD-A277005] p 3900 N94-32003
Neural network definitions of highly predictable protein secondary structure classes
[DE94-006234] p 3834 N94-32175
Towards a detailed understanding of the structural variability in lignins: A new approach
[DE94-007449] p 3793 N94-32267
Chemical structure and kinetics at liquid/solid interfaces
[AD-A277112] p 3636 N94-32304
Molecular Science Research Center
[DE94-007464] p 3871 N94-32605
Nonlinear optical polymers derived from organic/inorganic composites
[AD-A277408] p 3659 N94-32610
Ionization probes of molecular structure and chemistry
[DE94-007605] p 3872 N94-32643

MOLECULAR WEIGHT
Method and apparatus for inhibiting the disbonding of a paint from metal surfaces
[AD-D016106] p 3663 N94-32960

MOLECULES
Modification of semiconductor surface properties with chemically bound molecular films
[AD-A276162] p 3895 N94-31081
Physical chemistry of molecules and grains in space
[AD-A276037] p 3932 N94-31280
Positron-molecule interactions
[AD-A276542] p 3869 N94-32082
A genetic algorithm based method for docking flexible molecules
[DE94-007525] p 3793 N94-32269
MOLTEN SALT ELECTROLYTES
Room temperature molten salts for advanced energy conversion and storage
[AD-A277777] p 3763 N94-33015
MOLTEN SALTS
Room temperature molten salts for advanced energy conversion and storage
[AD-A277777] p 3763 N94-33015
MOLYBDENUM ALLOYS
Creep-fatigue criteria and inelastic behavior of modified 9Cr-1Mo steel at elevated temperatures
[DE94-007915] p 3642 N94-31918
MOLYBDENUM COMPOUNDS
Novel approaches to the production of higher alcohols from synthesis gas
[DE94-006770] p 3666 N94-32132
The effect of ductile phase (Nb) reinforcement morphology on the mechanical behavior of an intermetallic matrix (MoSi2) p 3615 N94-32500
MOLYBDENUM DISULFIDES
Soft x ray photoelectron spectroscopy study of the interaction of Cr with MoS2(0001)
[AD-A276916] p 3635 N94-32233
Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A278133] p 3728 N94-33061
MOLYBDENUM SULFIDES
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312
MOMENTS OF INERTIA
Forced libration of Mercury and geodetic determination of a possible fluid core p 3774 N94-32493
MOMENTUM
Gas dynamics for accretion disk simulations p 3932 N94-31144
MOMENTUM TRANSFER
The dynamical settling of warped disks and angular momentum transport in galaxies p 3928 N94-31121
Theory of protostellar accretion disks p 3931 N94-31136
A fully two-dimensional, non-oscillatory advection scheme for momentum and scalar transport equations
[DM-66] p 3700 N94-31221
MONATOMIC GASES
The stellar and gaseous content of massive low surface brightness disk galaxies p 3933 N94-31495
MONAURAL SIGNALS
Modelling the late part of room impulse responses using adaptive filtering: On the recreation of reality
[CTH-E-93-01] p 3859 N94-31076
MONGOLIA
Station climatic summaries: China, the former USSR, and Mongolia
[AD-A276548] p 3784 N94-32057
MONITORS
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010
Continuous measurement of aging response in aluminum alloys by eddy current methods
[AD-A277233] p 3644 N94-32371
MONOMERS
Isomeric poly(benzophenone)s: Synthesis of highly crystalline poly (4, 4 foot-benzophenone) and amorphous poly (2, 5-benzophenone), a soluble poly (p-phenylene) derivative
[AD-A277261] p 3655 N94-32017
Recovery of carboxylic acids at pH greater than pKa
[DE94-007030] p 3636 N94-32376
Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082
MONOPOLE ANTENNAS
Time domain spectroscopy for studying a monopole antenna immersed in a plasma
[ISBN-0-315-86526-1] p 3888 N94-31727
MONSOONS
Numerical simulations of monsoon rainfall with the NRL/NCSU regional nested grid model p 3782 N94-31791
Forecasters handbook for the Philippine Islands and surrounding waters
[AD-A277993] p 3787 N94-33089
MONTE CARLO METHOD
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems
[DE94-007250] p 3609 N94-31382
Mixture model simulating reactive turbulent flows: Testing of Eulerian-Lagrangian probabilistic models
[ONERA-NT-1993-13] p 3702 N94-31477
Diagonal band probability distributions
[REPT-93-80] p 3851 N94-31697
Cometary molecules p 3935 N94-31869
ITS version 3.0: Powerful, user-friendly software for radiation modelling
[DE94-006607] p 3678 N94-32113
A comparison between two Monte Carlo codes on determination of transient chemical yields
[DE94-007224] p 3636 N94-32251
An algorithm for probabilistic, totally-ordered temporal projection
[AD-A277341] p 3817 N94-32257
Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326
Parallel Monte Carlo reactor neutronics
[DE94-007642] p 3826 N94-32357
Parallel particle simulations of low-density fluid flows
[DE94-007858] p 3707 N94-32373
Numerical simulation of quantum many-body systems
[DE94-008451] p 3912 N94-32513
Characterization of atomic and molecular impurity sources and transport at the tokamak edge
[DE94-007212] p 3891 N94-32619
Complete model description of an electron beam using ACCEPT Monte Carlo simulation code
[DE94-007063] p 3872 N94-32628
Implementation and display of Computer Aided Design (CAD) models in Monte Carlo radiation transport and shielding applications
[DE94-007221] p 3819 N94-32641
Simulation of low-density nozzle plumes in non-zero ambient pressures
[NASA-TM-106501] p 3615 N94-32742
Studies of jet production with the D0 detector
[DE94-008271] p 3873 N94-32780
Analytic properties of the OCP and ionic mixtures in the strongly coupled fluid state
[DE94-008216] p 3637 N94-32801
Implementation of a vibrationally linked chemical reaction model for DSMC
[NASA-TM-109109] p 3710 N94-33020
Design and Monte Carlo analysis of an unmanned aerial vehicle
[AD-A277648] p 3580 N94-33056
Simulation of CO2 release at 800 km altitude
[AD-A276692] p 3776 N94-33272
MONTEREY BAY (CA)
Evolution of diurnal surface winds and surface currents for Monterey Bay
[AD-A277649] p 3790 N94-33057
MONTMORILLONITE
Ferric sulfate montmorillonites as Mars soil analogs p 3944 N94-33196
Mars atmospheric dust properties: A synthesis of Mariner 9, Viking, and Phobos observations p 3945 N94-33200
MOON
Apollo 11 highlights
[NASA-TM-109763] p 3600 N94-31820
MORPHOLOGY
Morphological directional coding of images
[ISBN-0-315-86336-6] p 3814 N94-31715
The p-q-r-medial axis algorithm requires only local operations
[CWI-BS-R9317] p 3849 N94-32507
Martian deltas: Morphology and distribution p 3950 N94-33230
MORTALITY
Estimating the impact of crashworthiness standards on mortality and morbidity events in the US Army rotary-wing aircraft mishaps
[AD-A277121] p 3575 N94-32363
MOSAICS
Global color views of Mars p 3948 N94-33217
MOTION PERCEPTION
Sensory sensitivities and discriminations and their roles in aviation
[AD-A277312] p 3800 N94-32276
MOTION SICKNESS
Autogenic-feedback training as a treatment for airsickness in high-performance military aircraft: Two case studies
[NASA-TM-108810] p 3801 N94-33068
MOUNTAINS
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153
Medical problems in high mountain environments. A handbook for medical officers
[AD-A278095] p 3798 N94-33268
MOUNTING
An analytical study of the vibration of beams fitted with neutralizers. Part 2: Assessment of the effects of mounting configurations
[ISVR-TR-225-PT-2] p 3740 N94-32982
MOVING TARGET INDICATORS
Some neural computing approaches to target tracking p 3837 N94-33151
MSAT
SATCOM feasibility study for search and rescue aircraft
[DSIS-94-01083] p 3575 N94-31902
MSAT boom joint testing and load absorber design p 3606 N94-33315
Special test equipment and fixturing for MSAT reflector assembly alignment p 3606 N94-33316
MULLITES
Enhancement of oxidation resistance of silicon carbide by high-dose and multi-energy aluminum implantation
[DE94-006560] p 3640 N94-31314
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029
MULTIBEAM ANTENNAS
Proceedings of the 1993 Antenna Applications Symposium, volume 1
[AD-A277202] p 3676 N94-32049
Proceedings of the 1993 Antenna Applications Symposium, volume 2
[AD-A277203] p 3677 N94-32050
MULTICHANNEL COMMUNICATION
A multichannel architecture for Naval Task Force Communication
[AD-A276230] p 3673 N94-31446
Passive, multi-channel fiber optic rotary joint assembly
[AD-D016116] p 3682 N94-32626
Long distance transmission of 15 Gb/s digital using subcarrier multiplexing and external modulation
[DE94-008298] p 3682 N94-32756
MULTIGRID METHODS
Prediction of transonic potential flow with slipstreams around configurations
[FFA-TN-1992-15] p 3568 N94-31220
Development and application of a multimesh auto-adaptive finite element method for the calculation of an electric arc plasma
[ECL-89-03] p 3886 N94-31378
Solution of the incompressible Navier-Stokes equations in general coordinates by Krylov subspace and multigrid methods
[REPT-93-64] p 3703 N94-31660
Numerical simulation of combined external/internal transonic flow on the forebody/inlet of the AV-8B Harrier 2 p 3569 N94-31759
Multigrid diagonal implicit solutions for compressible turbulent flows and their evaluation p 3705 N94-31941
MULTILAYER INSULATION
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Space Station WP-2 application of LDEF MLI results p 3592 N94-31016
MULTIMEDIA
Developing the Multimedia User Interface Component (MUSIC) for the Icarus Presentation System (IPS)
[AD-A276341] p 3810 N94-31335
The vision machines
[NASA-TM-109757] p 3806 N94-31816
Problems in survivable multi-media networks
[AD-A277370] p 3825 N94-32052
An information system organized as stratified hypermedia
[TR-93-12] p 3918 N94-32289
Literacity: A multimedia adult literacy package combining NASA technology, recursive ID theory, and authentic instruction theory p 3924 N94-32462
Voice and video transmission using XTP and FDDI p 3685 N94-32468
Long distance transmission of 15 Gb/s digital using subcarrier multiplexing and external modulation
[DE94-008298] p 3682 N94-32756
Multimedia as a desktop and classroom tool
[DE94-009118] p 3807 N94-32766
MADE: A Multiple Application Development Environment
[CWI-CS-R9360] p 3822 N94-33097

MULTIPATH TRANSMISSION
Direct-sequence spread-spectrum performance in a multipath fading environment
[AD-A276060] p 3673 N94-31464
The effects of a multipath channel and interference on coherent M-PSK digital communication systems
[AD-A278158] p 3684 N94-33254
MULTIPHASE FLOW
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-008261] p 3707 N94-32410
MULTIPLE ACCESS
Hubless satellite communications networks
p 3600 N94-31433
Applied harmonic analysis
[AD-A278384] p 3685 N94-33353
MULTIPLEXING
A technique for multiplexing 3x3-coupler terminated interferometric fiber-optic sensors
[AD-A276739] p 3880 N94-32180
MULTIPLICATION
A new tool for signal processing
[AD-A278385] p 3685 N94-33354
MULTIPLIERS
Formal verification of systolic multipliers with the Boyer-Moore theorem prover
[RR-897-M] p 3839 N94-31082
MULTIPOLES
General-relativistic celestial mechanics. 4: Theory of satellite motion
[PB94-147782] p 3601 N94-31769
Selected applications of planar permanent magnet multipoles in FEL insertion device design
[DE94-009014] p 3721 N94-32845
RHIC chromatic correction system
[DE94-008532] p 3883 N94-32994
MULTIPROCESSING (COMPUTERS)
Scheduling techniques for multiple processor systems in real-time environments
[AD-A276149] p 3824 N94-31249
List ranking and list scan on the CRAY C-90
[AD-A276411] p 3824 N94-31259
DOME: Dynamic optimization on multiprocessor engines, a statistical approach p 3807 N94-31972
VME rollback hardware for time warp multiprocessor systems
[NASA-CR-191796] p 3826 N94-32483
Development of a low-latency scalar communication routine on message-passing architectures
[DE94-007061] p 3827 N94-32683
Investigation of modularly configured attached processors with intelligent memories
[AD-A278418] p 3839 N94-33330
MULTISENSOR APPLICATIONS
Automatic extraction of cartographic objects by fusion of data extracted from satellite images
[TELECOM-93-E-001] p 3742 N94-31165
Chamber optics for testing passive remote sensing vapor detectors
[AD-A275909] p 3878 N94-31340
MULTISPECTRAL BAND SCANNERS
Analysis of GER imaging spectrometry data for the identification of soil and vegetation parameters in land degradation studies p 3744 N94-31857
Possibilities of GER data for soil surface characteristics in the Almaden area p 3744 N94-31859
The effects of vegetation on the ability to map soils using GERIS data p 3744 N94-31860
Extraction of forests stand age parameters from airborne imaging spectroscopy data p 3745 N94-31867
Remote sensing for hurricane Andrew impact assessment p 3758 N94-32464
MULTISPECTRAL PHOTOGRAPHY
Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536
Earth observational research using multistage EOS-like data
[NASA-CR-195833] p 3757 N94-33019
MULTIVARIABLE CONTROL
A direct digital design for a multichannel structural test system using the characteristic locus method
[MATHS-REPT-A-206] p 3828 N94-31161
MULTIVARIATE STATISTICAL ANALYSIS
A radial basis function approach to financial time series analysis
[AD-A276408] p 3924 N94-31361
Multivariate spline approximation
[AD-A276034] p 3842 N94-31441
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698
MUON SPIN ROTATION
Low dispersion of the muon precession frequency in HTSC samples YBa2Cu3O(x) and EuBa2Cu3O(x)
[DE94-608386] p 3896 N94-31395
MUONS
Low dispersion of the muon precession frequency in HTSC samples YBa2Cu3O(x) and EuBa2Cu3O(x)
[DE94-608388] p 3896 N94-31395
Proceedings of the International Workshop on Low Energy Muon Science: LEMS 1993
[DE94-006495] p 3874 N94-32804
Ionization EM calorimetry with accordion electrodes and liquid krypton or argon
[DE94-009082] p 3713 N94-32821
MURCHISON METEORITE
Organic analyses of the Murchison meteorite
p 3938 N94-32489
MUSCLES
Muscle disuse through tail-suspension: Etiology and therapeutics p 3796 N94-31746
MUSCULOSKELETAL SYSTEM
Isolating strain parameters correlated to skeletal adaptation p 3797 N94-31960
MYOELECTRICITY
Application of dexterous space robotics technology to myoelectric prostheses p 3729 N94-32450

N

NAKHLITES
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209
The Martian sources of the SNC meteorites (two, not one), and what can and can't be learned from the SNC meteorites p 3951 N94-33234
NARROWBAND
COVICS: A covert video communications system
[DE94-007568] p 3682 N94-32745
NASA PROGRAMS
Global change research and NASA's Earth Observing System
[PB94-126992] p 3741 N94-31068
NASCOM system development plan: System description, capabilities, and plans, FY 94-2
[NASA-TM-109744] p 3674 N94-31503

[NASA-TM-109787] p 3924 N94-33067
NASA SPACE PROGRAMS
NASA's space platform technology program and planning p 3597 N94-31044
MSFC orbital spacecraft development emphases for this decade p 3598 N94-31048
Chronology of KSC and KSC related events for 1993
[NASA-TM-109196] p 3966 N94-33072
NASCOM NETWORK
NASCOM system development plan: System description, capabilities, and plans, FY 94-2
[NASA-TM-109744] p 3674 N94-31503
NASTRAN
QUAD4 seminar
[AD-A277366] p 3818 N94-32330
NATIONAL AEROSPACE PLANE PROGRAM
Hypervelocity Tunnel 9 Mach 10/14 Calibration
[AD-A275960] p 3587 N94-31318
High temperature NASP engine seal development
[NASA-TM-109750] p 3725 N94-31804
Futurepath 3
[NASA-TM-109762] p 3735 N94-31819
The National Aerospace Plane (NASP): Development issues for the follow-on vehicle
[AD-A278417] p 3581 N94-33329
NATIONAL AIRSPACE SYSTEM
Civil tiltrotor market penetration: Effects on Northeast corridor airport delay
[AD-A277534] p 3576 N94-32955
NATIONAL AVIATION SYSTEM
FAA aviation forecasts, fiscal years 1994-2005
[AD-A277808] p 3566 N94-33016
NATURAL GAS
Feasibility study to evaluate plasma quench process for natural gas conversion applications
[DE94-000086] p 3758 N94-31234
Economic feasibility analysis of distributed electric power generation based upon the natural gas fired fuel cell
[DE94-005795] p 3759 N94-31487
Gas hydrate detection and mapping on the US east coast
[DE94-005959] p 3742 N94-31504
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005958] p 3771 N94-31525
Emissions of greenhouse gases from the use of transportation fuels and electricity
[DE94-006166] p 3765 N94-31625
NATURAL LANGUAGE (COMPUTERS)
What comes first in dynamic semantics: A compositional, non-representational account of natural language presupposition
[LP-93-15] p 3855 N94-31389
Methods for parallelizing search paths in phrasing
[AD-A276876] p 3817 N94-32212
High-speed data search p 3923 N94-32441
Finding all periods and initial palindromes of a string in parallel
[AD-B175069] p 3827 N94-33002
NATURAL LANGUAGE PROCESSING
Updates in dynamic semantics
[LP-93-06] p 3856 N94-31450
Weaks vs. strong readings of donkey sentences and monotonicity inference in a dynamic setting
[LP-93-10] p 3856 N94-31468
Finding all periods and initial palindromes of a string in parallel
[AD-B175069] p 3827 N94-33002
NAUTICAL CHARTS
MDFF HELP library, version 2: On-line documentation for the map data formatting facility
[AD-A277763] p 3922 N94-32987
NAVIER-STOKES EQUATION
CFD-based drag prediction: State-of-the-art, theory, prospects
[AD-B179297] p 3567 N94-31180
A priori tests of large eddy simulation of the compressible plane mixing layer
[MEMO-1152] p 3699 N94-31185
A solution adaptive structured-unstructured grid procedure for unsteady flows p 3700 N94-31217
On the structure and stability of slender viscous vortices p 3700 N94-31218
Solution of the incompressible Navier-Stokes equations in general coordinates by Krylov subspace and multigrid methods
[REPT-93-64] p 3703 N94-31660
Cell-vertex discretisation of the driven cavity flow without artificial diffusion
[W-9317] p 3703 N94-31689
Simulations of the creation and motion of vortex rings
[W-9319] p 3703 N94-31691
Finite volume discretization of the k-epsilon turbulence model in general coordinates
[REPT-93-90] p 3703 N94-31703
Finite element numerical simulation of turbulent flows
[ISBN-0-315-86416-8] p 3703 N94-31717
Numerical modelling of turbulence
[ISBN-0-315-86439-7] p 3703 N94-31720
Finite element vorticity-based methods for the solution of the incompressible and compressible Navier-Stokes equations
[ISBN-0-315-87265-9] p 3703 N94-31730
Multigrid diagonal implicit solutions for compressible turbulent flows and their evaluation
p 3705 N94-31941
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
Additive turbulent decomposition of the incompressible and compressible Navier-Stokes equations
[AD-A277321] p 3708 N94-32511
Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 2: User's guide
[NASA-CR-191352] p 3637 N94-32694
Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 1: Theory and validation
[NASA-CR-191351] p 3637 N94-32696

Study of dynamic stall phenomenon and its control using vorticity, stream function and circulation form of the unsteady Navier-Stokes equations p 3572 N94-32714
Modification of the MML turbulence model for adverse pressure gradient flows
[NASA-TM-106544] p 3709 N94-32947
Use of Navier-Stokes methods for the calculation of high-speed nozzle flow fields
[NASA-TM-106551] p 3573 N94-32984
A study of weak solutions and their regularizations by numerical methods
[AD-A277453] p 3850 N94-33175

NAVIGATION
Hydrographic service Royal Australian Navy
[AD-A277134] p 3788 N94-32066

NAVIGATION AIDS
Hydrographic service Royal Australian Navy
[AD-A277134] p 3788 N94-32066

NAVY
Procedures for computing site seismicity
[AD-A277666] p 3775 N94-33028

NEAR FIELDS
Formulation of time-domain planar near-field measurements without probe correction
[AD-A276380] p 3672 N94-31371
Structure estimation of phase objects from the diffraction near field: Microwave and model calculations
[ETN-94-95737] p 3674 N94-31608

NEAR INFRARED RADIATION
Infrared and near infrared transient absorption spectroscopy of molecular free radicals
[DE94-005446] p 3632 N94-31305
Near infrared surveys of high mass star forming regions p 3925 N94-31898
Aerosols scattering and near-infrared observations of the Martian surface p 3946 N94-33204

NEBULAE
Convective solar nebula p 3930 N94-31130

NEEDLE BEARINGS
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312

NEODYMIUM
Ion-beam-driven amorphization of Ca2La8(Si4)6O2 single crystals
[DE94-006219] p 3895 N94-31307

NEODYMIUM LASERS
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency conversion
[AD-A276126] p 3714 N94-31278
High average power pulsed phase conjugate laser with birefringence correction
[DE94-006049] p 3719 N94-32659

NEON
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598

NEON ISOTOPES
The origin of neon-E: Neon-E in single interstellar silicon carbide and graphite grains p 3933 N94-31556

NEPTUNE (PLANET)
Plasma and radio waves from Neptune: Source mechanisms and propagation
[NASA-CR-195877] p 3943 N94-33103

NETWORK ANALYSIS
A Green's function approach to analysing the effects of random synaptic background activity in a model neural network
[MATHS-REPT-A-202] p 3828 N94-31157
Some calculations on supersymmetric graphs as communication networks
[REPT-93-72] p 3824 N94-31641
Analysis and design of a formal neural network for filtering a dynamic signal
[ISBN-0-315-86932-1] p 3832 N94-31873
Multicast communication with guaranteed quality of service
[AD-A277650] p 3682 N94-33025
Assessing the vulnerability of multi-commodity networks with failing components
[AD-A278434] p 3684 N94-33334

NETWORK CONTROL
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
The use of service limits for efficient operation of multi-station single-medium communication systems
[CWI-BS-R9312] p 3677 N94-32085
Undiscounted Markov decision chains with partial information; an algorithm for computing a locally optimal periodic policy
[TW-93-10] p 3851 N94-32205
Discrete-event-dynamic-system-based approaches for scheduling transmissions in multihop packet radio networks
[AD-A276566] p 3679 N94-32230
Voice and video transmission using XTP and FDDI p 3685 N94-32468
Use and administration of UNIX (tm) systems p 3821 N94-33051

NEUMANN PROBLEM
A simplified Von Neumann method for linear stability analysis
[CRANFIELD-AERO-9310] p 3843 N94-31540
Finite volume discretization of the k-epsilon turbulence model in general coordinates
[REPT-93-90] p 3703 N94-31703

NEURAL NETS
Machinery monitoring and diagnostics using pseudo Wigner-Ville distribution and backpropagation neural network
[AD-A276219] p 3828 N94-31064
Report of the 'Mathematical Models for Neural Networks' course
[TELECOM-93-D-019] p 3828 N94-31100
A Green's function approach to analysing the effects of random synaptic background activity in a model neural network
[MATHS-REPT-A-202] p 3828 N94-31157
A neuron network for image classification: From algorithm to implantation
[TELECOM-93-E-005] p 3687 N94-31168
Filtering and recognition of moving boats in radar images
[REPT-93-039] p 3671 N94-31190
ART: Adaptive Resonance Theory
[TELECOM-93-D-020] p 3829 N94-31193
Smart environmental monitor based on neural networks and multi-spectral pattern recognition
[AD-A276445] p 3829 N94-31301
A neural network methodology for engineering applications: The learning control of robotic systems
[RR-480] p 3830 N94-31500
Two models solving the increasing energy problem of the continuous Hopfield network model
[REPT-93-87] p 3843 N94-31552
A neural network model for the visual perception of the depth of a scene from stereoscopy and shading
[ISBN-0-315-86753-1] p 3831 N94-31750
The vision machines
[NASA-TM-109757] p 3806 N94-31816
Universal approximation in p-mean by neural networks
[W-9320] p 3832 N94-31821
Analysis and design of a formal neural network for filtering a dynamic signal
[ISBN-0-315-86932-1] p 3832 N94-31873
Hierarchical mixtures of experts and the EM algorithm
[AD-A276516] p 3814 N94-31932
Neural networks for model-based recognition
[AD-A277375] p 3834 N94-32053
Exploring phase space concepts in the forecasting of time series with artificial neural networks
[DE94-005810] p 3834 N94-32127
On the relationship between generalization error, hypothesis complexity, and sample complexity for radial basis functions
[AD-A276802] p 3851 N94-32142
Neural network definitions of highly predictable protein secondary structure classes
[DE94-006234] p 3834 N94-32175
Undergraduate robotics projects in support of research on neural networks
[AD-A277331] p 3835 N94-32281
Neural models of spatial orientation in novel environments
[AD-A277383] p 3835 N94-32340
Fuzzy-neural control of an aircraft tracking camera platform p 3839 N94-32423
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424
Neural network wavelet technology: A frontier of automation p 3839 N94-32425
Analysis and synthesis of adaptive neural elements and assembles
[AD-A277423] p 3836 N94-32996
Proceedings of the NIPS 1993 Postconference Workshop on Pulling It All Together: Methods for Combining Neural Networks
[AD-A277507] p 3836 N94-33014
Correlation filter synthesis using neural networks
[AD-A278124] p 3836 N94-33043
CRAD Signal and Information Processing Working Group Workshop on Neural networks, volume 1
[DREA-TC-93-305-VOL-1] p 3836 N94-33149
The application of a radial basis function neural network for radar tracking over the sea p 3686 N94-33150
Some neural computing approaches to target tracking p 3837 N94-33151
Neural networks applied to the phonemic segmentation of speech p 3686 N94-33152
Automatic modulation recognition p 3686 N94-33153
Multi-sensor data fusion for target acquisition p 3837 N94-33154
Periodic and chaotic signal generation in a recursive artificial neural network p 3686 N94-33155
Modular neural network architectures p 3838 N94-33156
Nearest-neighbour search in constant time: An alternative to neural networks for pattern matching applications p 3838 N94-33157
Numerical optimization techniques in neural network training p 3838 N94-33158
A neural network application to search and rescue satellite aided tracking (SARSAT) p 3613 N94-33345

NEUROLOGY
Visual neural development and chromatic aberration
[AD-A277402] p 3800 N94-32345

NEURONS
Towards simplicity: Noise and cooperation in the perfect integrator
[AD-A276256] p 3799 N94-31291
Two models solving the increasing energy problem of the continuous Hopfield network model
[REPT-93-87] p 3843 N94-31552
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A277324] p 3793 N94-32622
Models of the neuronal mechanisms of target localization of the barn owl
[AD-A277332] p 3797 N94-32623
Analysis and synthesis of adaptive neural elements and assembles
[AD-A277423] p 3836 N94-32996
Neostriatal neuronal activity and behavior
[AD-A278429] p 3802 N94-33333

NEUROPHYSIOLOGY
Models of the neuronal mechanisms of target localization of the barn owl
[AD-A277332] p 3797 N94-32623
Analysis and synthesis of adaptive neural elements and assembles
[AD-A277423] p 3836 N94-32996
Neostriatal neuronal activity and behavior
[AD-A278429] p 3802 N94-33333

NEUROTRANSMITTERS
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A277324] p 3793 N94-32622

NEUTRAL ATOMS
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360

NEUTRAL BEAMS
Experimental survey of the L-H transition conditions in the D3-D tokamak
[DE94-007428] p 3891 N94-32595

NEUTRAL GASES
The manifestations of energetic activity in the galactic center p 3937 N94-32028

NEUTRAL PARTICLES
Monoenergetic neutral particle transport in semi-infinite media
[AD-A277155] p 3870 N94-32368

NEUTRALIZERS
An analytical study of the vibration of beams fitted with neutralizers. Part 2: Assessment of the effects of mounting configurations
[ISVR-TR-225-PT-2] p 3740 N94-32982

NEUTRINOS
Probing lepton number violation via Majorana neutrinos at hadron supercolliders
[PB94-147055] p 3868 N94-31922
Convection in Type 2 supernovae
[DE94-009373] p 3938 N94-32914

NEUTRON ABSORBERS
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109

NEUTRON COUNTERS
Neutron measurements at the commercial aircraft altitudes
[ISBN-0-315-86201-7] p 3955 N94-31709
Resistivity measurements on the neutron irradiated detector grade silicon materials
[DE94-009083] p 3906 N94-32822

NEUTRON DIFFRACTION
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649
Structural ordering in liquid K-Te alloys
[DE94-008477] p 3645 N94-32514
Extended-range order in glasses
[DE94-008135] p 3661 N94-32798

NEUTRON EMISSION
Control heavy ion collisions in the systems Ar-40 + Ca-40 and Si-28 + Si-28, and the nature of particle emission in fusion-evaporation reactions
[ETN-94-95749] p 3886 N94-31614
NEUTRON IRRADIATION
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666
Defect cascades produced by neutron irradiation in YBa2Cu3O(7-delta) superconductors
[DE94-007700] p 3903 N94-32372
Resistivity measurements on the neutron irradiated detector grade silicon materials
[DE94-009083] p 3906 N94-32822
NEUTRON RADIOGRAPHY
Practical neutron training course: Course notes
[PB94-145158] p 3867 N94-31681
NEUTRON SCATTERING
Structure and dynamics of microemulsions in bulk, at interfaces, and in confined geometries
[DE94-006043] p 3633 N94-31526
Practical neutron training course: Course notes
[PB94-145158] p 3867 N94-31681
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering
[DE94-007300] p 3625 N94-32642
Strongly anisotropic s-wave versus d-wave gap in cuprate superconductors: Evidence and theory
[DE94-007579] p 3904 N94-32746
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
NEUTRON SOURCES
Analysis of beam-on-target interaction in a neutron-source test facility
[DE94-005392] p 3863 N94-31151
NEUTRON STARS
Nonthermal accretion disk models around neutron stars p 3931 N94-31139
Reactive flows in compact objects p 3934 N94-31567
Structure and stability of spherical accretion flows onto compact objects p 3935 N94-31946
Hydrodynamics of neutron star interiors and laboratory superfluids p 3936 N94-31949
NEUTRONS
Neutron measurements at the commercial aircraft altitudes
[ISBN-0-315-86201-7] p 3955 N94-31709
NN-interaction in (1)S0-state: Virtual level or dibaryon resonance?
[DE94-606492] p 3869 N94-32097
Parallel Monte Carlo reactor neutronics
[DE94-007642] p 3826 N94-32357
Adjacent-cell Preconditioners for solving optically thick neutron transport problems
[DE94-007219] p 3872 N94-32666
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993
Spin-structure function of the neutron He-3: SLAC results
[DE94-008927] p 3875 N94-33189
NEWS
Index to NASA news releases and speeches, 1993
[NASA-TM-109722] p 3917 N94-31888
NEWTON METHODS
Lattice geometrodynamics p 3857 N94-31825
On the error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods
[TW-93-13] p 3847 N94-32206
NICKEL
Interface controlled amorphization of crystalline Ni/Ti multilayers
[DE94-008685] p 3906 N94-32884
NICKEL ALLOYS
Transmissibility of nickel-titanium shape memory alloy springs
[AD-A276055] p 3640 N94-31456
Thermal-mechanical fatigue crack growth in aircraft engine materials
[ISBN-0-315-86543-1] p 3734 N94-31707
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047
Liquid-assisted diffusion bonding of NiAl
[DE94-008667] p 3645 N94-32522
Boron and hydrogen in Ni3Al. Part 2: Mechanical testing of bicrystals
[DE94-007441] p 3904 N94-32606
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852
NICKEL CADMIUM BATTERIES
The 1988 Goddard Space Flight Center Battery Workshop
[NASA-CP-3237] p 3758 N94-31233
NICKEL COMPOUNDS
Development of nickel and metal hydride secondary battery
[DE94-757270] p 3697 N94-32917
NICKEL HYDROGEN BATTERIES
The 1988 Goddard Space Flight Center Battery Workshop
[NASA-CP-3237] p 3758 N94-31233
Development of nickel and metal hydride secondary battery
[DE94-757270] p 3697 N94-32917
NIGER
Monitoring landsurface characteristics in Niger using complementary SPOT and ERS-1 SAR data p 3754 N94-32560
NIGHT VISION
Night vision camcorder system
[AD-A277004] p 3712 N94-32002
Assessment of interior modifications in C-130 and C-141 aircraft for night vision goggle operations
[AD-A276843] p 3582 N94-32223
Methods for measuring characteristics of night vision goggles
[AD-A277046] p 3804 N94-32302
An evaluation framework for designing a night vision, computer-based trainer
[AD-A278005] p 3590 N94-33139
NIOBATES
Electrooptic crystal growth and properties
[AD-A276023] p 3896 N94-31439
On the nature of striae in strontium barium niobate
[DE94-006486] p 3901 N94-32176
NIOBIUM
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
Characterization of interface structure in multilayers using specular x ray reflectance
[DE94-007698] p 3657 N94-32358
NITRAMINE PROPELLANTS
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124
NITRATE ESTERS
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124
NITRATES
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894
Carbonates, surfates, phosphates, nitrates, and organic materials: Their association in a Martian meteorite p 3952 N94-33239
NITRIC OXIDE
Fuel property effects on engine combustion processes
[DE94-005529] p 3631 N94-31153
NITRIDES
Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Cost-effective ceramic machining: Summary of three-body wear experiments
[DE94-007757] p 3650 N94-31354
NITROGEN
Spectroscopic study of the molecular collisions (hydrogen-nitrogen and hydrogen-oxygen) at energies of several MeV
[ISBN-0-315-86794-9] p 3867 N94-31753
Vibrational energy transfer of diatomic gases in hypersonic expanding flows p 3570 N94-31958
Simulation of low-density nozzle plumes in non-zero ambient pressures
[NASA-TM-106501] p 3615 N94-32742
NITROGEN ATOMS
Enhanced thermal capacity aerogels summary report, FY 1993
[DE94-008888] p 3639 N94-33260
NITROGEN OXIDES
Identification of research relating to the critical loads concept and its potential application to the regulation of acidic deposition
[DE94-008234] p 3767 N94-32752
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894
A correlated k-distribution model of the heating rates for atmospheric mixtures of H2O, CO2, O3, CH4, and N2O in the 0-2500 cm(exp -1) wave number region at altitudes between 0 and 60 km
[DE94-005136] p 3775 N94-32895
NITROGUANIDINE
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124
NITROUS OXIDES
A correlated k-distribution model of the heating rates for atmospheric mixtures of H2O, CO2, O3, CH4, and N2O in the 0-2500 cm(exp -1) wave number region at altitudes between 0 and 60 km
[DE94-005136] p 3775 N94-32895
NOAA SATELLITES
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553
NOISE (SOUND)
An investigation of acoustic noise requirements for the Space Station centrifuge facility
[NASA-TM-108811] p 3805 N94-32936
NOISE INTENSITY
Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Investigation of sonic boom for the Space Shuttle: Low cross-range orbiter
[NASA-TM-108237] p 3860 N94-31337
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846
NOISE MEASUREMENT
Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise)
[AD-A277009] p 3789 N94-32401
NOISE POLLUTION
Common property resources and low-level flying in Labrador: Flight, fight or fancy?
[ISBN-0-315-87318-3] p 3924 N94-31732
NOISE PREDICTION
Scattering of a random acoustic field by an infinite cylinder: Application to the modelization of the acoustic environment of the 'Ariane 5' launcher scale-model using experimental data
[ONERA-NT-1993-11] p 3860 N94-31226
NOISE PROPAGATION
Reciprocity-based experimental determination of dynamic forces and moments: A feasibility study
[NASA-CR-194905] p 3862 N94-33023
NOISE REDUCTION
An adaptive Kalman filter excisor for suppressing narrowband interference
[AD-A276286] p 3671 N94-31253
Mitigation of adverse environmental effects on lunar-based astronomical instruments p 3598 N94-31426
A silicon condenser microphone: Modelling and electronic circuitry
[ISBN-9-09-005279-8] p 3688 N94-31517
A silicon condenser microphone: Materials and technology
[ISBN-9-09-005899-0] p 3688 N94-31518
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images p 3750 N94-32535
A mathematical model for simulating noise suppression of lined ejectors
[NASA-TP-3425] p 3861 N94-32930
An investigation of acoustic noise requirements for the Space Station centrifuge facility
[NASA-TM-108811] p 3805 N94-32936
Noise cancellation for CELP voice encoders in an F/A-18 noise environment
[AD-A277652] p 3683 N94-33026
NONDESTRUCTIVE TESTS
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065
Naval Surface Warfare Center Dahlgren Division Technical Digest: Advanced materials technology
[AD-A276448] p 3668 N94-31364
Determining the bearing capacity of flexible airfield pavements using a heavy weight deflectometer
[ISBN-0-315-86210-6] p 3587 N94-31710
Ultrasonic characterization of damage in a simulated CF-18 composite structure
[DREP-LN-93-26] p 3730 N94-31872
Location of impact damage sites in composite aircraft structures, task 3.4.1
[DSIS-94-01590] p 3621 N94-31892

Benchmarking of the state-of-the-art in nondestructive testing/evaluation for applicability in the Composite Armored Vehicle (CAV) Advanced Technology Demonstrator (ATD) program, phase 1
[AD-A276660] p 3730 N94-32088

Shearographic inspection of a DeHavilland DHC-7
[AD-A276716] p 3566 N94-32157

A versatile nondestructive evaluation imaging workstation p 3732 N94-32458

Differential phase acoustic microscope for micro-NDE
[NASA-CR-189617] p 3731 N94-32481

Dual-band infrared imaging to detect corrosion damage within airframes and concrete structures
[DE94-006047] p 3580 N94-32658

PSIDD: A Post-Scan Interactive Data Display system for ultrasonic scans
[NASA-TM-4545] p 3732 N94-33038

NONEQUILIBRIUM FLOW

Response of wall turbulence to high frequency streamwise and spanwise oscillations p 3700 N94-31211

NONHOLONOMIC EQUATIONS

Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369

NONINTRUSIVE MEASUREMENT

Photopyroelectric spectroscopy as a non-intrusive technique for the determination of the optical absorption spectra of multiple quantum well samples
[ISBN-0-315-87164-4] p 3833 N94-31875

Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370

Scalar imaging velocimetry studies of turbulent flow structure and dynamics
[AD-A278395] p 3710 N94-33164

NONISOTHERMAL PROCESSES

Chemical vapour deposition of tungsten for the application in integrated circuits
[ISBN-9-09-005151-1] p 3641 N94-31519

NONLINEAR EQUATIONS

On wavelet representations of differential equations
[RR-482] p 3842 N94-31412

The finite element method with asymptotic self-similar solutions p 3736 N94-31904

Design and Monte Carlo analysis of an unmanned aerial vehicle
[AD-A277648] p 3580 N94-33056

NONLINEAR FILTERS

Linearly separable stack-like architecture for the design of weighted order statistic filters with application in image processing
[ISBN-0-315-87284-5] p 3675 N94-31731

NONLINEAR OPTICS

New material for high average power infrared generation: QPM-DB GaAs
[AD-A276389] p 3714 N94-31358

Compatibility studies of some azo polymer blends
[AD-A277141] p 3657 N94-32365

Mathematical nonlinear optics
[AD-A277320] p 3882 N94-32510

New developments in second-order nonlinear optical polymeric materials
[AD-A277409] p 3658 N94-32578

Stable second-order nonlinear optical materials based on interpenetrating polymer networks
[AD-A277410] p 3658 N94-32579

Nonlinear optical polymers derived from organic/inorganic composites
[AD-A277408] p 3659 N94-32610

Nonlinear optical properties of rigid-rod polymers
[NASA-CR-191349] p 3882 N94-32702

Low loss second-order nonlinear optical polymers based on all organic sol-gel materials
[AD-A277482] p 3663 N94-32985

A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054

Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082

Research in the optical sciences
[AD-A278271] p 3884 N94-33140

Studies of optical beam phase conjugation and electromagnetic scattering process
[AD-A278389] p 3884 N94-33145

Advanced material processing for integrated-optic frequency doubling systems
[AD-A278394] p 3698 N94-33163

Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250

Optical properties of doped sol-gel silica glasses
[AD-A276094] p 3884 N94-33267

Second-order nonlinear optical polymers: From fundamentals to applications
[AD-A277514] p 3664 N94-33348

NONLINEAR PROGRAMMING

Optimal reactive power dispatch of power systems using nonlinear programming
[MATHS-REPT-A-209] p 3808 N94-31164

Parallel structured optimization algorithms for inverse problems
[AD-A276053] p 3811 N94-31443

A Gauss-Seidel type solver for special convex programs, with application to frictional contact mechanics
[REPT-93-77] p 3813 N94-31694

OPT++: An object-oriented class library for nonlinear optimization
[DE94-008890] p 3818 N94-32584

NONLINEAR SYSTEMS

A radial basis function approach to financial time series analysis
[AD-A276408] p 3924 N94-31361

Nonlinear model validation using correlation tests
[RR-463] p 3842 N94-31394

On wavelet representations of differential equations
[RR-482] p 3842 N94-31412

Adaptive nonlinear control of spacecraft p 3609 N94-31564

Chaotic attitude motion of satellites in the central gravitational field
[ISBN-0-315-78768-6] p 3610 N94-31723

Asymptotic behavior of dynamic systems p 3911 N94-31894

Structural stability and bifurcations p 3911 N94-31895

Deterministic chaos p 3912 N94-31896

Modeling and control of nonlinear systems
[AD-A277377] p 3834 N94-32095

Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664

Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 1: Theory and validation
[NASA-CR-191351] p 3637 N94-32696

State-space self-tuner for on-line adaptive control
[NASA-CR-195836] p 3835 N94-32943

RHIC chromatic correction system
[DE94-008532] p 3883 N94-32994

Investigation of drive-reinforcement learning and application of learning to flight control
[AD-A277442] p 3801 N94-33053

On the computation of simplical approximations of implicitly defined two-dimensional manifolds
[AD-A278132] p 3849 N94-33060

Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250

Adaptive control of nonlinear and stochastic systems
[AD-A278411] p 3839 N94-33325

NONLINEARITY

Nonlinear calculations of the time evolution of black hole accretion disks p 3929 N94-31127

Taming chaotic circuits p 3910 N94-31289

Towards simplicity: Noise and cooperation in the perfect integrator
[AD-A276256] p 3799 N94-31291

Nonlinearity as an origin of nonuniqueness in solution of Hartree's equation
[DE94-006538] p 3841 N94-31311

On the relationship between generalization error, hypothesis complexity, and sample complexity for radial basis functions
[AD-A276802] p 3851 N94-32142

Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 2: User's guide
[NASA-CR-191352] p 3637 N94-32694

Parallel supercomputing: Advanced methods, algorithms, and software for large-scale linear and nonlinear problems
[DE94-008446] p 3836 N94-32992

A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054

Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082

NONOSCILLATORY ACTION

A fully two-dimensional, non-oscillatory advection scheme for momentum and scalar transport equations
[DM-66] p 3700 N94-31221

NONPARAMETRIC STATISTICS

Stochastic models in reliability theory
[AD-A277529] p 3731 N94-32953

NONRESONANCE

Particle-In-Cell (PIC) code simulation results and comparison with theory scaling laws for photoelectron-generated radiation
[DE94-006132] p 3695 N94-32662

NONUNIFORM FLOW

Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth
[AD-A276424] p 3722 N94-31333

Additional capabilities of the unified waves model
[AD-A276114] p 3702 N94-31467

Inlet distortion in engines on VSTOL aircraft
[NASA-CR-195841] p 3584 N94-33035

NONUNIFORMITY

Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846

Effect of surface forces on the rheology of particle-liquid systems and the consolidation of ceramic powders
[AD-A277092] p 3657 N94-32391

NORMALIZING (STATISTICS)

Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539

NORMS

Triangular norms and conorms: A general tool for generating fuzzy mathematical morphologies
[TELECOM-93-D-001] p 3839 N94-31092

NORTH ATLANTIC TREATY ORGANIZATION (NATO)

AGARD highlights 94/1, April 1994
[AGARD-HIGHLIGHTS-94/1] p 3956 N94-31196

AGARD membership, 1994
[AGARD-MEMB-94] p 3914 N94-31197

NATO contributions to European environmental security
[AD-A275918] p 3763 N94-31275

NOSE CONES

Tip effects on the vortex wake of an axisymmetric body at angle of attack p 3570 N94-31907

Calibration and validation studies in the LENS facility
[AD-A278403] p 3591 N94-33167

NOSE WHEELS

Computational methods for frictional contact with applications to the Space Shuttle orbiter nose-gear tire p 3608 N94-32295

NOTCH SENSITIVITY

Tension fracture of laminates for transport fuselage. Part 1: Material screening p 3629 N94-33130

NOVAE

Disk instability and the spectral evolution of the 1992 outburst of the intermediate polar GK Persei p 3928 N94-31123

Disk irradiation and light curves of x ray novae p 3929 N94-31124

Observational constraints on black hole accretion disks p 3929 N94-31126

Can a variable alpha induce limit cycle behavior and exponential luminosity decay in transient soft x ray sources? p 3929 N94-31129

The physics of black hole x ray novae p 3932 N94-31143

NOZZLE DESIGN

Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867

Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869

Enhancement of mixing in a rectangular jet by mechanical tabs
[NASA-CR-185207] p 3709 N94-32872

NOZZLE FLOW

The small-scale topology of a 2:1 aspect-ratio elliptic jet p 3699 N94-31184

Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882

Simulation of low-density nozzle plumes in non-zero ambient pressures
[NASA-TM-106501] p 3615 N94-32742

Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867

Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869

Enhancement of mixing in a rectangular jet by mechanical tabs
[NASA-CR-185207] p 3709 N94-32872

Use of Navier-Stokes methods for the calculation of high-speed nozzle flow fields
[NASA-TM-106551] p 3573 N94-32984

NOZZLE GEOMETRY

Control experiments in liquid metal combustion
[AD-A276918] p 3635 N94-32234

NOZZLE INSERTS
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869
NOZZLE WALLS
Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882
NUCLEAR ASTROPHYSICS
Reactive flows in compact objects
p 3934 N94-31567
NUCLEAR BINDING ENERGY
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
Nonthermal accretion disk models around neutron stars p 3931 N94-31139
IR materials producibility
[AD-A277028] p 3879 N94-32006
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672
NUCLEAR ELECTRIC POWER GENERATION
Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814
NUCLEAR ELECTRIC PROPULSION
Utilizing a Russian space nuclear reactor for a United States space mission: Flight qualification issues
[DE94-004674] p 3613 N94-31265
Integrated safety program for the Nuclear Electric Propulsion Space Test Program
[DE94-004670] p 3615 N94-32669
NUCLEAR FUELS
The development of CVR coatings for PBR fuels
[DE94-004233] p 3875 N94-31480
NUCLEAR FUSION
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Mechanisms of formation and of de-excitation in the reaction Mg-24 + C-12 yields 9 alpha at 35MeV per nucleon
[ISBN-0-315-86746-9] p 3867 N94-31749
Atomic and molecular data needs for fusion
[DE94-006555] p 3870 N94-32177
Fusion applications of high power millimeter wave sources
[DE94-007374] p 3718 N94-32202
Magnetless magnetic fusion
[DE94-007114] p 3891 N94-32686
Convection in Type 2 supernovae
[DE94-009373] p 3938 N94-32914
NUCLEAR HEAT
Development of lightweight radiators for lunar based power systems
[NASA-TM-106604] p 3726 N94-32272
NUCLEAR INTERACTIONS
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter
[DE94-007178] p 3938 N94-32638
NUCLEAR MAGNETIC RESONANCE
New molecular-based routes to binary main group metal sulfides
[AD-A277005] p 3900 N94-32003
NMR studies of organic thin films
[AD-A276953] p 3656 N94-32221
Advances and applications of dynamic-angle spinning nuclear magnetic resonance
[DE94-007031] p 3870 N94-32250
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3657 N94-32364
Strongly anisotropic s-wave versus d-wave gap in cuprate superconductors: Evidence and theory
[DE94-007579] p 3904 N94-32746
NMR characterization of shocked quartz
[DE94-007733] p 3774 N94-32816
A quest for a new superconducting state
[DE94-008439] p 3908 N94-32991
NUCLEAR MODELS
Influence of long-range correlations on the spectral functions and response of 48Ca and 90Zr
[ETN-94-96017] p 3865 N94-31537
NUCLEAR PHYSICS
Nuclear physics and astrophysics
[DE94-007168] p 3939 N94-33147
NUCLEAR POTENTIAL
Development and implementation of a full-potential ASW method
[ETN-94-95757] p 3858 N94-31560
NUCLEAR PROPULSION
Summary of particle bed reactor designs for the Space Nuclear Thermal Propulsion Program
[DE94-007434] p 3615 N94-32266
NUCLEAR PUMPED LASERS
DOE reactor-pumped laser program
[DE94-006372] p 3715 N94-31485
NUCLEAR REACTIONS
Reactive flows in compact objects
p 3934 N94-31567
Hydrogen incorporation and radiation induced dynamics in metal-oxide-silicon structures: A study using nuclear reaction analysis
[ETN-94-95742] p 3898 N94-31610
NUCLEAR REACTORS
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639
Integrated safety program for the Nuclear Electric Propulsion Space Test Program
[DE94-004670] p 3615 N94-32669
Reactor pressure vessel structural integrity research in the US Nuclear Regulatory Commission HSST and HSSI Programs
[DE94-006550] p 3739 N94-32771
NUCLEAR SCATTERING
The 14th Annual West Coast Theoretical Chemistry/Statistical Mechanics Conference
[AD-A276942] p 3656 N94-32239
NUCLEAR WEAPONS
The relative performance of FeS2 and CoS in long-life thermal-battery applications
[DE94-006145] p 3695 N94-32663
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667
NUCLEATION
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
Characterization and growth mechanisms of the MgAl2O4 phase in Al2O3-reinforced Al-Mg composites
[ISBN-0-315-86531-8] p 3620 N94-31706
A parameterization of cloud droplet nucleation
[DE94-007469] p 3785 N94-32268
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
Interface controlled amorphization of crystalline Ni/Ti multilayers
[DE94-006685] p 3906 N94-32884
NUCLEI (CYTOLOGY)
Stress-induced enhancement of the startle reflex
[AD-A278414] p 3802 N94-33327
NUCLEON-NUCLEON INTERACTIONS
The Nijmegen hyperon-nucleon potentials
[DE94-007557] p 3869 N94-32139
Medium energy measurements of N-N parameters
[DE94-006067] p 3869 N94-32173
NUCLEONS
The form factors of the nucleons
[DE94-007096] p 3872 N94-32630
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter
[DE94-007178] p 3938 N94-32638
Polarized lepton-nucleon scattering
[DE94-009027] p 3875 N94-33278
NUMERICAL ANALYSIS
Numerical detection and continuation of codimension-two homoclinic bifurcations
[CWI-AM-R9308] p 3847 N94-32191
Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 2: User's guide
[NASA-CR-191352] p 3637 N94-32694
NUMERICAL CONTROL
ControlShell: A real-time software framework
[AD-A276481] p 3811 N94-31475
The future of open architecture process control systems
[DE94-006163] p 3830 N94-31623
Digital state-feedback H(infinity) control of Pritchard-Salamon systems: A Popov function approach
[REPT-93-69] p 3830 N94-31647
Quench detection and instrumentation for the Tokamak Physics Experiment magnets
[DE94-006656] p 3888 N94-31667
Real-time control and application to robotics: Hardware and software architectures
[ISBN-0-315-87192-X] p 3833 N94-31876
Evolving software reengineering technology for the emerging innovative-competitive era
p 3823 N94-32439
NUMERICAL INTEGRATION
Finite-part integrals and the Euler-Maclaurin expansion
[DE94-006539] p 3844 N94-31665
NUMERICAL STABILITY
A simplified Von Neumann method for linear stability analysis
[CRANFIELD-AERO-9310] p 3843 N94-31540
A stability estimate based on numerical ranges with application to a spectral discretization of a convection-diffusion equation
[TW-93-12] p 3847 N94-32200
Stability estimates for families of matrices of nonuniformly bounded order
[TW-93-14] p 3847 N94-32207
Eta percent-superconvergence in the interior of locally refined meshes of quadrilaterals: Superconvergence of the gradient in finite element solutions of Laplace's and Poisson's equations
[AD-A277242] p 3848 N94-32331
Finite element solution to the Helmholtz equation with high wave number. Part 1: The h-version of the FEM
[AD-A277396] p 3848 N94-32341
Preconditioned time-difference methods for advection-diffusion-reaction equations
[DE94-006472] p 3638 N94-32840
NUMERICAL WEATHER FORECASTING
A comparison of predictors for first-guess wind speed errors
[AD-A276460] p 3781 N94-31239
Regional sources of error growth in the National Meteorological Center's medium-range forecast model
p 3781 N94-31554
Numerical simulations of monsoon rainfall with the NRL/NCSU regional nested grid model
p 3782 N94-31791
Recurvature dynamics of a typhoon
[AD-A276792] p 3784 N94-32164
Tropical cyclone forecasters reference guide. 5: Numerical track forecast guidance
[AD-A277318] p 3785 N94-32278
NUTATION
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802
NUTATION DAMPERS
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802
NUTRITION
Food security in the context of global environmental change
[DE94-007481] p 3768 N94-32812
NUTS (FASTENERS)
An experimental and analytical investigation of a threaded fastener
[VTT-JULK-786] p 3724 N94-31654
NYLON (TRADEMARK)
The ferroelectric behavior of odd-numbered nylons
[AD-A278126] p 3663 N94-33058
Electric field-induced changes in odd-numbered nylons
[AD-A278003] p 3664 N94-33138

O

OBJECT-ORIENTED PROGRAMMING
A generic model for data acquisition: Connectionist methods of information processing
[TELECOM-93-E-003] p 3730 N94-31166
Design patterns mixing genericity and inheritance in the development of reusable components
[REPT-93-021] p 3808 N94-31178
A finite state machine model for object oriented systems
[REPT-93-040] p 3809 N94-31212
Real time simulation model for designing converter regulation
[ETN-94-95735] p 3689 N94-31576
Report on implementing part relationships using VML metaclasses
[PB94-147485] p 3813 N94-31686
EVORM: A conceptual modelling technique for evolving application domains
[TR-93-16] p 3918 N94-32290
Multiple inheritance via intersection types
[TR-93-18] p 3848 N94-32292
CONFIG: Integrated engineering of systems and their operation p 3823 N94-32432
OPT++: An object-oriented class library for nonlinear optimization
[DE94-008890] p 3818 N94-32584
A framework for developing and managing reusable avionics software
[AD-A276846] p 3582 N94-32909
OBLIQUENESS
The effect of polar caps on obliquity
p 3948 N94-33213
OBSERVATION
Aircraft weight prediction capability. Volume 1: Weight study and results
[AD-A277206] p 3579 N94-32062
OBSTACLE AVOIDANCE
Safe navigation and active vision for autonomous vehicles: A purposive and direct solution
p 3832 N94-31842

Tripping over obstacles: Biomechanical analyses of how young and old try to avoid it p 3803 N94-31954

OCCLUSION

Incompressible viscous flow in tubes with occlusions [ISBN-0-315-75467-2] p 3704 N94-31778

OCCUPATIONAL DISEASES

Minimization of carpal tunnel syndrome [AD-A276409] p 3795 N94-31363

OCEAN BOTTOM

Multi-scale studies of seafloor topography [AD-A277008] p 3789 N94-32400

Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise) [AD-A277009] p 3789 N94-32401

Light in Thermal Environments (LITE) Workshop [NASA-CR-195851] p 3790 N94-32981

Quantitative modeling of bottom morphology and subbottom properties [AD-A278142] p 3790 N94-33062

OCEAN CURRENTS

General ocean circulation p 3777 N94-30984

Low frequency variability observed in the tropical Atlantic Ocean p 3778 N94-30991

The effect of westerly wind bursts on a tropical ocean general circulation model [AD-A276423] p 3788 N94-31448

Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988

Three dimensional vorticity field in the California current system [AD-A276951] p 3788 N94-32220

Estimating subpycnocline density fluctuations in the California current region from upper ocean observations [AD-A277278] p 3789 N94-32325

Deep water studies of CTD data [AD-A277741] p 3791 N94-33176

Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992 [AD-A277935] p 3791 N94-33245

OCEAN DATA ACQUISITIONS SYSTEMS

Profiling ALACE instruments [AD-A277246] p 3789 N94-32321

Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise) [AD-A277009] p 3789 N94-32401

SEASOAR and CTD observations during a COARE surveys cruise, W9211C, 22 January - 22 February, 1993 [AD-A277925] p 3791 N94-33244

OCEAN DYNAMICS

General ocean circulation p 3777 N94-30984

Low frequence variability of the ocean atmosphere coupled system p 3777 N94-30986

The effect of westerly wind bursts on a tropical ocean general circulation model [AD-A276423] p 3788 N94-31448

Validation support of the ERIM ocean model [AD-A277364] p 3788 N94-32284

ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States [AD-A277306] p 3789 N94-32327

OCEAN MODELS

Subtropical Climates and Their Evolution: From Space-Based Observation to Modelling [ISBN-2-85-428333-3] p 3776 N94-30981

General ocean circulation p 3777 N94-30984

Climatologic flux in tropical ocean p 3777 N94-30985

The effect of westerly wind bursts on a tropical ocean general circulation model [AD-A276423] p 3788 N94-31448

The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis [AD-A277207] p 3784 N94-32094

Validation support of the ERIM ocean model [AD-A277364] p 3788 N94-32284

Ocean variability and its influence on the detectability of greenhouse warming signals [DE94-008670] p 3790 N94-32881

Quantitative modeling of bottom morphology and subbottom properties [AD-A278142] p 3790 N94-33062

OCEAN SURFACE

The effects of altimeter sampling characteristics: Some Geosat examples [AD-A276899] p 3747 N94-32214

Validation support of the ERIM ocean model [AD-A277364] p 3788 N94-32284

Almaz marine applications p 3751 N94-32544

A comparison of rough surface parabolic equation models [AD-A278090] p 3791 N94-33185

An approximate model for vertical polarization and surface roughness using the parabolic equation [AD-A278091] p 3684 N94-33186

OCEAN TEMPERATURE

Profiling ALACE instruments [AD-A277246] p 3789 N94-32321

OCEANOGRAPHIC PARAMETERS

Application of radon transformation for improved analysis of sparsely sampled data: A feasibility study [PB94-147535] p 3741 N94-31075

Hydrographic service Royal Australian Navy [AD-A277134] p 3788 N94-32066

The effects of altimeter sampling characteristics: Some Geosat examples [AD-A276899] p 3747 N94-32214

Ocean variability and its influence on the detectability of greenhouse warming signals [DE94-008670] p 3790 N94-32881

Forecasters handbook for the Philippine Islands and surrounding waters [AD-A277993] p 3787 N94-33089

SEASOAR and CTD observations during a COARE surveys cruise, W9211C, 22 January - 22 February, 1993 [AD-A277925] p 3791 N94-33244

OCEANOGRAPHY

Ocean acoustic propagation measurements and wave propagation in random media [AD-A276165] p 3787 N94-31053

Evaluating success levels of mega-projects p 3599 N94-31432

The effects of altimeter sampling characteristics: Some Geosat examples [AD-A276899] p 3747 N94-32214

Almaz marine applications p 3751 N94-32544

Forecasters handbook for the Philippine Islands and surrounding waters [AD-A277993] p 3787 N94-33089

Fluid mechanical measurements within the bottom boundary layer over the Northern California continental shelf during stress [AD-A277916] p 3791 N94-33243

OCEANS

Ocean acoustic propagation measurements and wave propagation in random media [AD-A276165] p 3787 N94-31053

Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988

OHMIC DISSIPATION

Time-resolved analytical methods for liquid/solid interfaces [DE94-008352] p 3637 N94-32826

OIL SLICKS

Ship traffic monitoring and oil spill detection using the ERS-1 SAR p 3751 N94-32542

OLIGOMERS

Conjugated polymer fluorescence: Interplay of correlations and alternation [DE94-005587] p 3660 N94-32729

ON-LINE SYSTEMS

Hierarchical mixtures of experts and the EM algorithm [AD-A276516] p 3814 N94-31932

A redundant disk array architecture for efficient small writes [AD-A276645] p 3815 N94-31940

Moving BASISplus and TECHLIBplus from VAX/VMS to UNIX [DE94-004696] p 3826 N94-32248

A hypertext system that learns from user feedback p 3923 N94-32428

Relationships between access and use in information systems: Remote access to and browsing of online catalogs p 3919 N94-32488

State-space self-tuner for on-line adaptive control [NASA-CR-195836] p 3835 N94-32943

MDFF HELP library, version 2: On-line documentation for the map data formatting facility [AD-A277763] p 3922 N94-32987

ONBOARD DATA PROCESSING

Error analysis of real-time and post-processed orbit determination for the Geosat Follow-On altimetric satellite using GPS tracking p 3576 N94-31845

Aerospace software engineering for advanced systems architectures [AD-A277101] p 3581 N94-31977

Aerospace sponsored research [ATR-93(8498)-1] p 3966 N94-32949

Data processing algorithms for on-board satellite event analysis [AD-A278406] p 3838 N94-33168

ONTARIO

The basement fracture pattern of southern Ontario: A tectonic interpretation based on Landsat TM imagery, airphotos and field data [ISBN-0-315-87086-9] p 3772 N94-31834

OPACITY

Groundbased monitoring of Martian atmospheric opacity p 3947 N94-33207

OPERATING SYSTEMS (COMPUTERS)

Adaptive operating systems concepts [ETN-94-95754] p 3830 N94-31514

Moving BASISplus and TECHLIBplus from VAX/VMS to UNIX [DE94-004696] p 3826 N94-32248

OPERATING TEMPERATURE

Performance of silvered Teflon (trademark) thermal control blankets on spacecraft p 3591 N94-31014

OPERATIONAL AMPLIFIERS

VLSI implementation of stray insensitive switched capacitor composite operational amplifiers [AD-A276461] p 3687 N94-31240

OPERATIONS RESEARCH

Mathematical research in materials science opportunities and perspectives, part 2 [AD-A276298] p 3852 N94-31296

A cross-disciplinary report on the mathematical sciences applied to materials science, part 1 [AD-A276116] p 3843 N94-31529

OPERATOR PERFORMANCE

Use of a pitch adjustable foot restraint system: Operator strength capability and load requirements [NASA-TP-3477] p 3805 N94-33050

OPERATORS (MATHEMATICS)

A cell-cycle model revisited [CWI-AM-R9305] p 3851 N94-32229

Conference on operator, wavelet and control theory [AD-A277429] p 3838 N94-33174

OPERATORS (PERSONNEL)

Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-instructor/operator station module, volume 12 [AD-A276979] p 3589 N94-32318

OPTICAL COMMUNICATION

Advanced optical fiber communication systems [AD-A276416] p 3878 N94-31330

Pulse-splitting and AM-FM conversion in a nonlinear dispersive medium [AD-A277041] p 3861 N94-32262

Control and reliability of optical networks in multiprocessors [AD-A277385] p 3881 N94-32285

Passive, multi-channel fiber optic rotary joint assembly [AD-D016116] p 3882 N94-32626

Multi-line passive fiber optic slipring [AD-D016092] p 3883 N94-32738

Long distance transmission of 15 Gb/s digital using subcarrier multiplexing and external modulation [DE94-008298] p 3682 N94-32756

Pointing and tracking space mechanism for laser communication p 3606 N94-33310

OPTICAL COMPUTERS

Control and reliability of optical networks in multiprocessors [AD-A277385] p 3881 N94-32285

OPTICAL CONTROL

Reconfigurable Array of Radiating Elements (RARE) controlled by light [NASA-CR-195828] p 3884 N94-33073

OPTICAL CORRECTION PROCEDURE

High average power pulsed phase conjugate laser with birefringence correction [DE94-006049] p 3719 N94-32659

Phase-only correction of scintillated laser beams: Downrange experimental results [AD-A277778] p 3722 N94-33282

OPTICAL CORRELATORS

Development of phase-only filters for sensor imagery [AD-A276722] p 3880 N94-32151

Correlation filter synthesis using neural networks [AD-A278124] p 3836 N94-33043

A novel optoelectronic system for distortion-invariant ATR [AD-A277985] p 3884 N94-33087

OPTICAL COUNTERMEASURES

Atmospheric propagation effects through natural and man-made obscurants for visible to MM-wave radiation [AD-A276919] p 3679 N94-32235

OPTICAL COUPLING

Study of the dynamics of a nonlinear coupled-cavity laser system [ISBN-0-315-86717-5] p 3716 N94-31748

Optimization of Y junctions in integrated optics [ISBN-0-315-86782-5] p 3879 N94-31751

OPTICAL DATA PROCESSING

Correlation filter synthesis using neural networks [AD-A278124] p 3836 N94-33043

Design of free space interconnected signal processor [AD-A278129] p 3683 N94-33093

OPTICAL DATA STORAGE MATERIALS
Azo polymers for reversible optical storage. 4. Cooperative motion of rigid groups in semicrystalline polymers
[AD-A277107] p 3654 N94-31978
Reversible optical storage in azo polymers
[AD-A277109] p 3654 N94-31980
OPTICAL EQUIPMENT
Degradation of optical components in space
p 3594 N94-31029
Mitigation of adverse environmental effects on lunar-based astronomical instruments
p 3598 N94-31426
Neutral ion sources in precision manufacturing
p 3875 N94-32447
Proceedings SPIE: Conference Digest, volume 2104
[AD-A278107] p 3884 N94-33187
OPTICAL FIBERS
An axial approach to detection in capillary electrophoresis
[DE94-005556] p 3631 N94-31154
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330
Nd-YAG laser welding of the fiber optic connector to the header shell on the 2SL actuator
[DE94-006104] p 3723 N94-31621
Post-calibration correction for rotating-analyzer ellipsometer with optical fiber bundle detection system
[AD-A277329] p 3881 N94-32280
Studies of an optical multi-processor interconnect
[AD-A277093] p 3881 N94-32392
Flexible manufacturing for photonics device assembly
p 3669 N94-32449
Passive, multi-channel fiber optic rotary joint assembly
[AD-D016116] p 3882 N94-32626
Torque-balanced extendable fiber optic cable
[AD-D016097] p 3882 N94-32719
Fiber optic continuous true time-delay modulator
[AD-D016098] p 3883 N94-32720
Multi-line passive fiber optic slipring
[AD-D016092] p 3883 N94-32738
Strain sensing using optical fibers
[NASA-CR-195807] p 3740 N94-32940
OPTICAL FILTERS
Degradation of optical components in space
p 3594 N94-31029
Development of phase-only filters for sensor imagery
[AD-A276722] p 3880 N94-32151
Correlation filter synthesis using neural networks
[AD-A278124] p 3836 N94-33043
Analysis and design of a high speed, wide range stepwise tunable optical filter/amplifier
[PB94-149572] p 3698 N94-33169
OPTICAL FLOW (IMAGE ANALYSIS)
Safe navigation and active vision for autonomous vehicles: A purposive and direct solution
p 3832 N94-31842
Neural models of spatial orientation in novel environments
[AD-A277383] p 3835 N94-32340
OPTICAL MATERIALS
Transient radiation-induced absorption in the materials for a GSGG laser
[DE94-005316] p 3714 N94-31148
New material for high average power infrared generation: QPM-DB GaAs
[AD-A276389] p 3714 N94-31358
Large-area conditioning of optics for high-power laser systems
[DE94-007028] p 3716 N94-31636
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013
The sol-gel-xerogel transition
[AD-A276647] p 3616 N94-32038
Multifunctional macromolecules
[AD-A277347] p 3656 N94-32246
Sol-gel coatings for high power laser optics: Past, present, and future
[DE94-007240] p 3718 N94-32252
New developments in second-order nonlinear optical polymeric materials
[AD-A277409] p 3658 N94-32578
Stable second-order nonlinear optical materials based on interpenetrating polymer networks
[AD-A277410] p 3658 N94-32579
Nonlinear optical polymers derived from organic/inorganic composites
[AD-A277408] p 3659 N94-32610
A historical perspective on fifteen years of laser damage thresholds at LLNL
[DE94-007930] p 3719 N94-32613
Nonlinear optical properties of rigid-rod polymers
[NASA-CR-191349] p 3882 N94-32702
Pump-probe method for investigating laser ablation and optical damage threshold mechanisms in optical materials
[DE94-008291] p 3720 N94-32753
Silicon-Based Optoelectronic Materials Symposium and Materials Research Society Proceedings, volume 298
[AD-A277518] p 3662 N94-32952
Low loss second-order nonlinear optical polymers based on all organic sol-gel materials
[AD-A277482] p 3663 N94-32985
Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082
Research in the optical sciences
[AD-A278271] p 3884 N94-33140
Development of materials for spectral hole burning applications
[AD-A278408] p 3909 N94-33324
OPTICAL MEASUREMENT
Fiber optic chemical sensors on Mars
[DE94-005251] p 3941 N94-31145
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 2
[AD-A276629] p 3861 N94-32059
Methods for measuring characteristics of night vision goggles
[AD-A277046] p 3804 N94-32302
Photothermal laser deflection, an innovative technique to measure particles in exhausts
[AD-A277151] p 3718 N94-32366
Calibration and validation studies in the LENS facility
[AD-A278403] p 3591 N94-33167
OPTICAL MEASURING INSTRUMENTS
Space equipment for Earth observations
p 3613 N94-30997
Correlation filter synthesis using neural networks
[AD-A278124] p 3836 N94-33043
Design, development, and testing of a lightweight optical sensor cover system p 3604 N94-33302
OPTICAL MEMORY (DATA STORAGE)
Azo polymers for reversible optical storage. 4. Cooperative motion of rigid groups in semicrystalline polymers
[AD-A277107] p 3654 N94-31978
Reversible optical storage in azo polymers
[AD-A277109] p 3654 N94-31980
High frequency active auroral research program (HAARP) imager
[AD-A277469] p 3775 N94-32999
OPTICAL MICROSCOPES
The conoscopic microscope
[TELECOM-93-E-017] p 3877 N94-31173
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3692 N94-32112
OPTICAL PATHS
A technique for multiplexing 3x3-coupler terminated interferometric fiber-optic sensors
[AD-A276739] p 3880 N94-32180
Phase-only correction of scintillated laser beams: Downrange experimental results
[AD-A277778] p 3722 N94-33282
OPTICAL POLARIZATION
Multiple scattering of polarized radiation in planetary atmospheres
[ETN-94-96018] p 3674 N94-31551
OPTICAL PROPERTIES
Matter-radiation interactions in the atmosphere
p 3776 N94-30998
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Treatment of cloud radiative effects in general circulation models
[DE94-001864] p 3764 N94-31600
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Compatibility studies of some azo polymer blends
[AD-A277141] p 3657 N94-32365
Nonlinear optical properties of rigid-rod polymers
[NASA-CR-191349] p 3882 N94-32702
Short-pulse, high-intensity lasers at Los Alamos
[DE94-007545] p 3720 N94-32760
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
Optical properties of doped sol-gel silica glasses
[AD-A278094] p 3884 N94-33267
OPTICAL PUMPING
High conversion efficiency pumped-cavity second harmonic generation of a diode laser
[DE94-006805] p 3717 N94-32134
Repetitively pulsed Cr:LiSAF laser for lidar applcations
[DE94-007546] p 3720 N94-32761
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS
[DE94-009030] p 3721 N94-32848
OPTICAL RADAR
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
Wind-speed measurements with a scanning elastic-backscatter lidar
[DE94-004974] p 3785 N94-32726
High resolution properties of the marine atmospheric boundary layer
[DE94-006235] p 3774 N94-32736
Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759
Repetitively pulsed Cr:LiSAF laser for lidar applcations
[DE94-007546] p 3720 N94-32761
Comparison of coherent to incoherent detection at 2.09 micrometers using a solid state LADAR system
[AD-A277159] p 3721 N94-33102
OPTICAL REFLECTION
Estimation of visible and near-infrared reflectivity for Peyto Glacier Basin using satellite data
[ISBN-0-315-87039-7] p 3743 N94-31733
OPTICAL RESONANCE
Near resonant absorption by atoms in intense fluctuating laser fields
[DE94-005873] p 3714 N94-31200
OPTICAL RESONATORS
Automatic resonator alignment and power stabilization of high power C02 lasers
[ISBN-0-315-77217-4] p 3714 N94-31472
Multifrequency, rapidly sequenced or simultaneous tunable laser
[AD-D016169] p 3721 N94-32968
OPTICAL SCANNERS
Synchronized laser scanning three dimensional acquisition system
[ISBN-0-315-86848-1] p 3879 N94-31756
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3692 N94-32112
A scanning defect mapping system for semiconductor characterization p 3885 N94-32446
OPTICAL SWITCHING
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330
Reconfigurable optical switches with monolithic electrical-to-optical interfaces
[DE94-007745] p 3881 N94-32385
Mathematical nonlinear optics
[AD-A277320] p 3882 N94-32510
Fiber optic continuous true time-delay modulator
[AD-D016098] p 3883 N94-32720
Design of free space interconnected signal processor
[AD-A278129] p 3683 N94-33093
Research in the optical sciences
[AD-A278271] p 3884 N94-33140
Optically switched submillimeter-wave oscillator
[AD-A278014] p 3698 N94-33249
OPTICAL THICKNESS
Matter-radiation interactions in the atmosphere
p 3776 N94-30998
Time-dependent behavior of Mount Pinatubo aerosol
[DE94-001877] p 3764 N94-31601
Evaluation of sulfate aerosol optical depths over the North Atlantic and comparison with satellite observations
[DE94-005457] p 3746 N94-32100
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Adjacent-cell Preconditioners for solving optically thick neutron transport problems
[DE94-007219] p 3872 N94-32666
The wavelength dependence of Martian atmospheric dust radiative properties p 3950 N94-33228
OPTICAL TRACKING
Digit-Eyes: Vision-based human hand tracking
[NASA-CR-195913] p 3803 N94-31447
Strategy for tracking and grabbing a moving object with the aid of a decouplable manipulator with six degrees of freedom general architecture, guided by a vision system
[ISBN-0-315-06864-3] p 3831 N94-31757
Optical processing of MMW for agile beamsteering and beamforming
[AD-A277161] p 3880 N94-32068

Correlation filter synthesis using neural networks
[AD-A278124] p 3836 N94-33043
A novel optoelectronic system for distortion-invariant ATR
[AD-A277985] p 3884 N94-33087

OPTICAL TRANSFER FUNCTION
The conoscopic microscope
[TELECOM-93-E-017] p 3877 N94-31173

OPTICAL WAVEGUIDES
III-V compound semiconductor strip-loaded waveguide devices for PICs: Design for minimum crosstalk and high density
[DE94-006588] p 3897 N94-31502
Optimization of Y junctions in integrated optics
[ISBN-0-315-86782-5] p 3879 N94-31751
Low loss second-order nonlinear optical polymers based on all organic sol-gel materials
[AD-A277482] p 3663 N94-32985
Advanced material processing for integrated-optic frequency doubling systems
[AD-A278394] p 3698 N94-33163

OPTIMAL CONTROL
Feasibility and stability results for constrained stable generalized predictive control
[MATHS-REPT-A-203] p 3828 N94-31158
Optimal reactive power dispatch of power systems using nonlinear programming
[MATHS-REPT-A-209] p 3808 N94-31164
Vibration control and design of composite cantilevers taking into account structural uncertainties and damage p 3733 N94-31213
Motion and force control of coordinated robots
[ISBN-0-315-86323-4] p 3724 N94-31714
Control of a random walk with noisy delayed information
[CWI-BS-R9316] p 3846 N94-32108
Undiscounted Markov decision chains with partial information; an algorithm for computing a locally optimal periodic policy
[TW-93-10] p 3851 N94-32205
Investigation of drive-reinforcement learning and application of learning to flight control
[AD-A277442] p 3801 N94-33053

OPTIMIZATION
On the use of genetic algorithms to solve the time-table problem
[REPT-90-060-REV] p 3829 N94-31176
The ant system: An autocatalytic optimizing process
[REPT-91-016-REV] p 3824 N94-31177
Techniques for increasing the robustness of iterative algorithms for multi-resources location problems
[REPT-93-037] p 3809 N94-31188
A worst-case analysis of an approximate algorithm for finding the minimum hamiltonian cycle on paths
[REPT-93-042] p 3809 N94-31192
Two models solving the increasing energy problem of the continuous Hopfield network model
[REPT-93-87] p 3843 N94-31552
Optimization of the forming parameters of PEEK/carbon fiber composite
[ISBN-0-315-86410-9] p 3620 N94-31716
Multidisciplinary optimization of high-speed civil transport configurations using variable-complexity modeling p 3578 N94-31881
Principal component analysis with missing data and its application to object modeling
[AD-A276644] p 3845 N94-31939
Minimization of computational requirements in the hybrid stress finite element method
[AD-A277120] p 3846 N94-32048
Experiences with EDO: An Evolutionary Database Optimizer
[TR-93-23] p 3918 N94-32105
Mesh optimization
[AD-A277644] p 3820 N94-32972
Local design optimization for composite transport fuselage crown panels p 3629 N94-33132
Numerical optimization techniques in neural network training p 3838 N94-33158
Mixed 0-1 programming by lift-and-project in a branch-and-cut framework
[AD-A278045] p 3822 N94-33183

OPTOELECTRONIC DEVICES
Growth and characterization of III-V semiconductors with rare earth impurities for optoelectronic devices
[AD-A276021] p 3896 N94-31455
High-performance GaAs/AlGaAs optical phase modulators for microwave/photonic integrated circuits
[DE94-006361] p 3688 N94-31483
III-V compound semiconductor strip-loaded waveguide devices for PICs: Design for minimum crosstalk and high density
[DE94-006588] p 3897 N94-31502
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A277116] p 3900 N94-31985
Novel optoelectronic devices based on combining GaAs and InP on Si
[AD-A277018] p 3693 N94-32301
WOCSDICE 1993 --- 17th European Workshop on Compound Semiconductor Devices and Integrated Circuits
[AD-A276766] p 3693 N94-32307
Flexible manufacturing for photonics device assembly p 3669 N94-32449
Automated fiber pigtailing technology
[DE94-007072] p 3695 N94-32688
Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878
Silicon-Based Optoelectronic Materials Symposium and Materials Research Society Proceedings, volume 298
[AD-A277518] p 3662 N94-32952
Large-diameter InGaAs/AlGaAs vertical-cavity surface-emitting lasers with low threshold current density fabricated using a simple chemical etch process
[AD-A277733] p 3721 N94-33003
A novel optoelectronic system for distortion-invariant ATR
[AD-A277985] p 3884 N94-33087
Advanced material processing for integrated-optic frequency doubling systems
[AD-A278394] p 3698 N94-33163

ORBIT CALCULATION
Air Force Space Command satellite orbit predictor using parallel virtual machines
[AD-A276316] p 3601 N94-31298
Multisatellite constellation configuration selection for multiregional highly elliptical orbit constellations p 3600 N94-31437
Possible improvements of satellite ephemeris programs used in geodesy
[PB94-148681] p 3743 N94-31592
Testing for preferred-frame effects in gravity with artificial Earth satellites
[PB94-148459] p 3610 N94-31771
Semianalytic Satellite Theory (SST): Mathematical algorithms
[AD-A276836] p 3610 N94-32208

ORBIT TRANSFER VEHICLES
Computational radiative heat transfer in homogeneous and nonhomogeneous nonscattering media p 3702 N94-31563
The 7.5K lbf thrust engine preliminary design for Orbit Transfer Vehicle
[NASA-CR-189175] p 3614 N94-31618
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802

ORBITAL MANEUVERS
The influence of the deorbit-burn manoeuvre on the footprint of a re-entry capsule
[LR-727] p 3609 N94-31705

ORBITAL MECHANICS
Testing for preferred-frame effects in gravity with artificial Earth satellites
[PB94-148459] p 3610 N94-31771

ORBITAL POSITION ESTIMATION
Air Force Space Command satellite orbit predictor using parallel virtual machines
[AD-A276316] p 3601 N94-31298
Possible improvements of satellite ephemeris programs used in geodesy
[PB94-148681] p 3743 N94-31592
Error analysis of real-time and post-processed orbit determination for the Geosat Follow-On altimetric satellite using GPS tracking p 3576 N94-31845
Thermospheric modeling accuracies using F10.7 and Ap
[AD-A277355] p 3773 N94-32337
Aerospace sponsored research
[ATR-93(8498)-1] p 3966 N94-32949

ORBITAL WORKERS
Use of a pitch adjustable foot restraint system: Operator strength capability and load requirements
[NASA-TP-3477] p 3805 N94-33050

ORBITS
Numerical detection and continuation of codimension-two homoclinic bifurcations
[CWI-AM-R9308] p 3847 N94-32191

ORDER-DISORDER TRANSFORMATIONS
Experimental and theoretical studies of hydrogenated amorphous semiconductor alloys and superlattices
[AD-A276159] p 3686 N94-31079
Reversible optical storage in azo polymers
[AD-A277109] p 3654 N94-31980
Calculations of nonspherically averaged charge densities for substitutionally disordered alloys
[DE94-008293] p 3646 N94-32754
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
Interface controlled amorphization of crystalline Ni/Ti multilayers
[DE94-008685] p 3906 N94-32884
Phase behavior, structure, and properties of model block polymers
[AD-A277530] p 3662 N94-32954

ORDNANCE
Advanced release technologies program p 3607 N94-33322

ORGANIC ALUMINUM COMPOUNDS
Ignition delays, heats of combustion, and reaction rates of aluminum alkyl derivatives used as ignition and combustion enhancers for supersonic combustion
[NASA-CR-189581] p 3638 N94-32868

ORGANIC CHEMISTRY
The intramolecular cyclization of bis-2,5-dimethylene-2,5-dihydrofurans and bis-2,5-dimethylene-2,5-dihydrothiophenes: An approach to macrocycles
[DE94-007060] p 3657 N94-32377
Organic analyses of the Murchison meteorite p 3938 N94-32489

ORGANIC COMPOUNDS
Remote infrared vapor detection of volatile organic compounds
[AD-A276982] p 3746 N94-31999
The sol-gel-xerogel transition
[AD-A276647] p 3616 N94-32038

ORGANIC MATERIALS
Low-Earth orbit effects on organic composite materials flown on LDEF p 3595 N94-31036
A compatibility study of FEFO with various containment materials
[DE94-005753] p 3649 N94-31198
NMR studies of organic thin films
[AD-A276953] p 3656 N94-32221
Development and application of photosensitive device systems to studies of biological and organic materials
[DE94-008503] p 3793 N94-32516

ORGANIC PEROXIDES
Formation of gas-phase peroxides in a rural atmosphere: An interpretation of the recent SOS/SERON field results
[DE94-002995] p 3766 N94-32692

ORGANIC SUPERCONDUCTORS
Microreflectance infrared study of electron-molecular vibrational coupling and lattice softness in BEDT-TTF salts
[DE94-008490] p 3907 N94-32989

ORGANISMS
Light utilization and photoinhibition of photosynthesis in marine phytoplankton
[DE94-005505] p 3794 N94-32896
Bioluminescence bathyphotometer
[AD-D016102] p 3790 N94-32959

ORGANIZATIONS
Piezoelectric materials research in Europe
[AD-A276207] p 3648 N94-31059
A redundant disk array architecture for efficient small writes
[AD-A276645] p 3815 N94-31940
Untying the gordian data knot. A paper on Information Engineering (IE) and Corporate Information Management (CIM)
[AD-A276662] p 3918 N94-32210

ORGANOMETALLIC COMPOUNDS
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
Silicone grease as a precursor to a pseudo crown-ether ligand: Crystal structure of (K(+)K(Me2SiO)7(+))(HIn(CH2CMe3)3(-))4)
[AD-A276343] p 3895 N94-31327
Tetraalkyldiarsines as potential precursors for electronic materials: Synthesis and characterization of various iso-propyl arsenic compounds
[AD-A277003] p 3900 N94-32001
Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools
[DE94-006367] p 3901 N94-32104
New zinc-bis(dialkylamides) potentially usable as site-selective dopants for p-type ZnSe
[AD-A276947] p 3902 N94-32218

ORION CONSTELLATION
Theory of protostellar accretion disks p 3931 N94-31136

ORION NEBULA
Circumstellar material around young stars in Orion p 3930 N94-31133

ORTHOGONAL FUNCTIONS
Estimating subpycnocline density fluctuations in the California current region from upper ocean observations
[AD-A277278] p 3789 N94-32325

ORTHOGONALITY
Subspace estimation without eigenvectors for adaptive beamforming
[AD-A276287] p 3671 N94-31254

Combinatory reduction systems: Introduction and survey
[CWI-CS-R9362] p 3849 N94-32349

ORTHONORMAL FUNCTIONS

On interpolating random fields using a finite number of observations
[CWI-BS-R9314] p 3847 N94-32194
On constructing multi-variate orthonormal polynomials associated with spectral distribution functions
[CWI-BS-R9310] p 3851 N94-32225

ORTHOTROPISM

Mechanics of cracking for composite material p 3624 N94-32501

OSCILLATING FLOW

Response of wall turbulence to high frequency streamwise and spanwise oscillations p 3700 N94-31211
Design and initial testing of a facility to measure unsteady pressures on an oscillating cascade with supersonic leading edge locus p 3569 N94-31880
Oscillating-flow loss test results in rectangular heat exchanger passages
[NASA-CR-185297] p 3615 N94-32792
Flutter analysis of a supersonic cascade in time domain using an ADI Euler solver
[NASA-TM-105625] p 3739 N94-32883

OSCILLATIONS

Observational constraints on black hole accretion disks p 3929 N94-31126
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245
Considering ties elasticities in high frequency rail dynamics
[ILR-MITT-281(1993)] p 3733 N94-31375
Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A276133] p 3728 N94-33061
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108

OSCILLOGRAPHS

A 10 GHz bandwidth, single transient, digitized oscilloscope with 20 GHz capability
[DE94-005400] p 3713 N94-32728

OSCILLOSCOPES

A 10 GHz bandwidth, single transient, digitized oscilloscope with 20 GHz capability
[DE94-005400] p 3713 N94-32728

OSTWALD RIPENING

Experimental studies on the effect of coherency strains on coarsening kinetics: Current status and future outlook
[DE94-008480] p 3647 N94-32964

OUTGASSING

Thermal-vacuum response of polymer matrix composites in space p 3595 N94-31033
Origin and thermal evolution of Mars p 3940 N94-31109
Operation of D3-D with all-graphite walls
[DE94-004858] p 3886 N94-31304

OVERPRESSURE

Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Investigation of sonic boom for the Space Shuttle: Low cross-range orbiter
[NASA-TM-108237] p 3860 N94-31337

OVERVOLTAGE

The zinc electrode: Reactions and mechanisms
[DE94-007977] p 3691 N94-31919

OXAZOLE

Characterization of thermally stable dye-doped polyimide based electrooptic materials
[DE94-005309] p 3882 N94-32674

OXIDASE

Electrical communication between glucose oxidase and electrodes based on poly(vinylimidazole) complex of Os(bpy)2Cl2
[AD-A276585] p 3635 N94-32231

OXIDATION

Space environmental effects on polymer composites: Research needs and opportunities p 3595 N94-31035
Fuel property effects on engine combustion processes
[DE94-005529] p 3631 N94-31153
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE94-006759] p 3759 N94-31272
An extended approach to oxidations and nitridations of Si and Ge(x)Si(1-x) materials
[AD-A276056] p 3631 N94-31282
Effects of oxidation and creep damage mechanisms on creep behavior in HIPed silicon nitrides
[DE94-006559] p 3618 N94-31313
Si/SiO2 interface studies by immersion ellipsometry
[AD-A277277] p 3881 N94-32324
Carbon cycle modeling calculations for the IPCC
[DE94-004332] p 3765 N94-32354
Catalytic methods using molecular oxygen for treatment of PMMS and ECLSS waste streams, volume 2
[NASA-CR-190299] p 3804 N94-32697
Oxidation resistant copper
[AD-D016099] p 3696 N94-32721
Electron cyclotron resonance plasma oxidation studies of InP
[AD-A277431] p 3893 N94-33007
Nanoscale structural changes upon electrooxidation of Au(111) as probed by potentiodynamic scanning tunneling microscopy
[AD-A276780] p 3909 N94-33275

OXIDATION RESISTANCE

Enhancement of oxidation resistance of silicon carbide by high-dose and multi-energy aluminum implantation
[DE94-006560] p 3640 N94-31314
Improved oxidation resistance of 3-D carbon/carbon composites
[AD-A277349] p 3625 N94-32624
Oxidation resistant copper
[AD-D016099] p 3696 N94-32721

OXIDATION-REDUCTION REACTIONS

Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056

OXIDE FILMS

Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Chemical vapor deposition of metal nitrides, phosphides, and arsenides
[DE94-008096] p 3654 N94-31976
Sol-gel coatings for high power laser optics: Past, present, and future
[DE94-007240] p 3718 N94-32252
Si/SiO2 interface studies by immersion ellipsometry
[AD-A277277] p 3881 N94-32324
Energetics, bonding mechanism, and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE94-008551] p 3659 N94-32656
Microanalytical study of defect formation in thin bismuth strontium calcium copper oxide films
[DE94-008217] p 3661 N94-32751
Evaluation of the Hughes conversion coating touch-up pen
[AD-A278398] p 3664 N94-33166
Nanoscale structural changes upon electrooxidation of Au(111) as probed by potentiodynamic scanning tunneling microscopy
[AD-A276780] p 3909 N94-33275
Microstructures and epitaxy in oxide superconductor thin films and devices
[AD-A278427] p 3910 N94-33332

OXIDES

Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Ionizing radiation effects on silicon test structures
[DE94-006060] p 3865 N94-31607
Photopolymerization of cyclohexene oxide: A visible light initiating system and mechanistic investigations
[AD-A277110] p 3654 N94-31981
Heterogeneous catalytic process for alcohol fuels from syngas
[DE94-008729] p 3667 N94-32583

OXIDIZERS

Control experiments in liquid metal combustion
[AD-A276918] p 3635 N94-32234
Formation of gas-phase peroxides in a rural atmosphere: An interpretation of the recent SOS/SERON field results
[DE94-002995] p 3766 N94-32692

OXYGEN

Spectroscopic study of the molecular collisions (hydrogen-nitrogen and hydrogen-oxygen) at energies of several MeV
[ISBN-0-315-86794-9] p 3867 N94-31753
Technical evaluation of the UH-60Q: Medical oxygen system
[AD-A276983] p 3579 N94-32242
Rate coefficient for the reaction H + O2 yields OH + O: Results from 2000 to 5300 K
[DE94-008105] p 3871 N94-32615

OXYGEN ATOMS

Space Station WP-2 application of LDEF MLI results p 3592 N94-31016
Follow-up on the effects of the space environment on UHCRE thermal blankets p 3592 N94-31018
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Atomic oxygen erosion considerations for spacecraft materials selection p 3593 N94-31022
Performance of selected polymeric materials on LDEF p 3593 N94-31023
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF p 3593 N94-31024
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
On the linearity of fast atomic oxygen effects p 3594 N94-31027
Low-Earth orbit effects on organic composite materials flown on LDEF p 3595 N94-31036
Ground-based simulation of LEO environment: Investigations of a select LDEF material: FEP Teflon (trademark) p 3596 N94-31039
An overview of the Evaluation of Oxygen Interaction with Materials-third phase (EOIM-3) experiment: Space Shuttle Mission 46 p 3596 N94-31040
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques p 3596 N94-31041
Spacecraft materials: Comparison between flight results obtained on LDEF and MIR p 3597 N94-31045
Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051
Production and detection of metastable atomic oxygen
[ISBN-0-315-87364-7] p 3868 N94-31915
Enhanced thermal capacity aerogels summary report, FY 1993
[DE94-008888] p 3639 N94-33260

OXYGEN IONS

Follow-up on the effects of the space environment on UHCRE thermal blankets p 3592 N94-31018
Frictional behavior and adhesion of Ag and Au films applied to aluminum oxide by oxygen-ion assisted Screen Cage Ion Plating (SCIP)
[NASA-TM-106522] p 3647 N94-32931

OXYGEN SUPPLY EQUIPMENT

Technical evaluation of the UH-60Q: Medical oxygen system
[AD-A276983] p 3579 N94-32242

OXYNITRIDES

Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Joining of silicon nitrides using oxynitride glasses
[DE94-008517] p 3658 N94-32517

OZONE

One: Microphysics of frost metamorphism: Applications to Triton and Mars. Two: A global analysis of the ozone deficit in the upper stratosphere and lower mesosphere. Three: The diabatic circulation in the stratosphere as diagnosed from Microwave Limb Sounder data p 3942 N94-31975
Formation of gas-phase peroxides in a rural atmosphere: An interpretation of the recent SOS/SERON field results
[DE94-002995] p 3766 N94-32692
Mexico City ozone concentrations as a function of readily-available meteorological parameters
[DE94-007576] p 3768 N94-32814
Quantified estimates of total GWPs for greenhouse gases taking into account tropospheric chemistry
[DE94-007846] p 3768 N94-32817
A correlated k-distribution model of the heating rates for atmospheric mixtures of H2O, CO2, O3, CH4, and N2O in the 0-2500 cm(exp -1) wave number region at altitudes between 0 and 60 km
[DE94-005136] p 3775 N94-32895
How well was total ozone abundance inferred with Mariner 9 p 3947 N94-33212

OZONE DEPLETION

The ozone and the physico-chemical processes in tropical regions p 3770 N94-31010
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite
[AP-31] p 3770 N94-31222
Ionization probes of molecular structure and chemistry
[DE94-007605] p 3872 N94-32643
Possible effect of the chlorine oxide dimer on transient ozone loss in rocket plumes
[AD-A278135] p 3616 N94-33094

P

P-I-N JUNCTIONS

Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323

PACIFIC OCEAN
Investigation of carbon dioxide in the central South Pacific Ocean (WOCE Sections P-16C and P-17C) during the TUNES/2 expedition of the R/V Thomas Washington, July-August, 1991
[DE94-006638] p 3763 N94-31347
The effect of westerly wind bursts on a tropical ocean general circulation model
[AD-A276423] p 3788 N94-31448
Air-sea interaction patterns in the equatorial Pacific
[AD-A277305] p 3788 N94-32072
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260
ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States
[AD-A277306] p 3789 N94-32327
Fine and microstructure observations at Fieberlin g Guyot R/V new horizon cruise report
[AD-A277917] p 3791 N94-33109
SEASOAR and CTD observations during a COARE surveys cruise, W9211C, 22 January - 22 February, 1993
[AD-A277925] p 3791 N94-33244
PACKET SWITCHING
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
Discrete-event-dynamic-system-based approaches for scheduling transmissions in multihop packet radio networks
[AD-A276566] p 3679 N94-32230
Principles of ultradependability in chaotic routing
[AD-A277422] p 3827 N94-32995
Multicast communication with guaranteed quality of service
[AD-A277650] p 3682 N94-33025
PACKET TRANSMISSION
Discrete-event-dynamic-system-based approaches for scheduling transmissions in multihop packet radio networks
[AD-A276566] p 3679 N94-32230
PACKETS (COMMUNICATION)
Gigabits to the Desktop: Installing tomorrow's networks today
[DE94-007701] p 3827 N94-32646
Principles of ultradependability in chaotic routing
[AD-A277422] p 3827 N94-32995
PAINTS
Evaluation of corrosion protective organic coatings for steel structures in fresh water
[PB94-138484] p 3649 N94-31072
Oxide pigments in water: The colloid-chemical point of view
[PB94-148616] p 3633 N94-31591
Conductive paints
[DE94-008508] p 3661 N94-32788
Method and apparatus for inhibiting the disbonding of a paint from metal surfaces
[AD-D016106] p 3663 N94-32960
PAIR PRODUCTION
Time-dependent behavior of active galactic nuclei with pair production p 3929 N94-31125
A constraint on the pair-density ratio (Z+) in an electron-positron pair wind p 3930 N94-31132
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions
[DE94-006315] p 3867 N94-31779
Probing lepton number violation via Majorana neutrinos at hadron supercolliders
[PB94-147055] p 3868 N94-31922
PALEOCLIMATOLOGY
The Earth's climate: Past, present, and future p 3777 N94-30982
Biospheric effects of a large extraterrestrial impact: Case study of the Cretaceous/Tertiary boundary crater
[NASA-CR-195827] p 3942 N94-32740
Carbonate formation on Mars: Latest experiments p 3950 N94-33231
PALLADIUM
Chemisorbed-molecule potential-energy surfaces and electronically-stimulated processes
[DE94-007932] p 3719 N94-32603
PANELS
AGARD membership, 1994
[AGARD-MEMB-94] p 3914 N94-31197
Damage tolerance aspects of a full composite airplane fuselage: Requirements, modelling, predictions, experiments
[LR-728] p 3578 N94-31674
From display and PWB to MCMs: Large panel manufacturing
[DE94-007855] p 3693 N94-32386
Local design optimization for composite transport fuselage crown panels p 3629 N94-33132
Composite fuselage crown panel manufacturing technology p 3629 N94-33133
PARABOLIC DIFFERENTIAL EQUATIONS
Texture generation on irregular regions
[AD-A275999] p 3841 N94-31359
THERM3D: A boundary element computer program for transient heat conduction problems
[DE94-008112] p 3708 N94-32709
A comparison of rough surface parabolic equation models
[AD-A278090] p 3791 N94-33185
PARABOLIC REFLECTORS
Predicting antenna parameters from antenna physical dimensions
[AD-A276442] p 3672 N94-31300
Radar rainfall measurements from space p 3782 N94-31889
PARACHUTES
A novel CFD/structural analysis of a cross parachute
[DE94-005271] p 3568 N94-31578
PARALLEL COMPUTERS
Implanting algorithms on parallel machines
[TELECOM-93-D-017] p 3823 N94-31099
Analysis of the effect of routing strategies for parallel implementations of a selected avionics application
[AD-A276069] p 3581 N94-31458
Computational chemistry on parallel computers
[DE94-008106] p 3636 N94-32616
Toroidal computer memory for serial and parallel processors
[AD-D016144] p 3807 N94-32978
Principles of ultradependability in chaotic routing
[AD-A277422] p 3827 N94-32995
Investigation of modularly configured attached processors with intelligent memories
[AD-A278418] p 3839 N94-33330
PARALLEL FLOW
On wave interactions of rotational and irrotational flows p 3700 N94-31219
PARALLEL PROCESSING (COMPUTERS)
Implanting algorithms on parallel machines
[TELECOM-93-D-017] p 3823 N94-31099
A heterogeneous computing environment for simulating astrophysical fluid flows p 3928 N94-31119
A probabilistic view of Datalog parallelization
[TELECOM-93-D-021] p 3824 N94-31183
Design and analysis of scalable parallel algorithms
[AD-A276255] p 3809 N94-31251
List ranking and list scan on the CRAY C-90
[AD-A276411] p 3824 N94-31259
Proof of concept for the rewrite rule machine: Interensemble studies
[AD-A276506] p 3809 N94-31263
Air Force Space Command satellite orbit predictor using parallel virtual machines
[AD-A276316] p 3601 N94-31298
A parallel implementation of the column subtraction algorithm
[AD-A275922] p 3810 N94-31343
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems
[DE94-007250] p 3609 N94-31382
Parallel structured optimization algorithms for inverse problems
[AD-A276053] p 3811 N94-31443
Analysis of the effect of routing strategies for parallel implementations of a selected avionics application
[AD-A276069] p 3581 N94-31458
Some calculations on supersymmetric graphs as communication networks
[REPT-93-72] p 3824 N94-31641
A comparison of distributed memory and virtual shared memory parallel programming models
[DE94-005473] p 3825 N94-31663
Generalized steady-state method for solving 2-D diffusion systems
[REPT-93-83] p 3825 N94-31700
Methods of implementing the Viterbi algorithm on a massively parallel computer of the SIMD (single instruction multiple data) type
[ISBN-0-315-86783-3] p 3814 N94-31752
Algorithms and parallel architectures for laser acoustic imaging
[ISBN-0-315-86466-4] p 3716 N94-31797
Large-scale shape optimization: Numerical methods, parallel algorithms, and applications to aerodynamic design p 3815 N94-31966
The named-state register file
[AD-A276796] p 3825 N94-32165
MULTIGRAPH: An architecture for model-based programming. Model-based program synthesis for parallel computing. PREMOS: Programming environment for model-based program synthesis, version 01.00.00
[AD-A276949] p 3817 N94-32219
Parallel and distributed computing combinatorial algorithms
[AD-A277333] p 3826 N94-32243
Parallel processing for differencing and histogramming
[AD-A277060] p 3826 N94-32274
An epistemic proof system for parallel processes
[TR-93-17] p 3826 N94-32291
Parallel Monte Carlo reactor neutronics
[DE94-007642] p 3826 N94-32357
Parallel particle simulations of low-density fluid flows
[DE94-007858] p 3707 N94-32373
Studies of an optical multi-processor interconnect
[AD-A277093] p 3881 N94-32392
A high-speed linear algebra library with automatic parallelism p 3828 N94-32440
Construction of a parallel processor for simulating manipulators and other mechanical systems
[NASA-CR-191327] p 3826 N94-32482
Computational chemistry on parallel computers
[DE94-008106] p 3636 N94-32616
Development of a low-latency scalar communication routine on message-passing architectures
[DE94-007061] p 3827 N94-32683
Overview of shock physics codes for armor analysis
[DE94-008948] p 3739 N94-32842
Toroidal computer memory for serial and parallel processors
[AD-D016144] p 3807 N94-32978
Principles of ultradependability in chaotic routing
[AD-A277422] p 3827 N94-32995
Investigation of modularly configured attached processors with intelligent memories
[AD-A278418] p 3839 N94-33330
PARALLEL PROGRAMMING
Implanting algorithms on parallel machines
[TELECOM-93-D-017] p 3823 N94-31099
The ant system: An autocatalytic optimizing process
[REPT-91-016-REV] p 3824 N94-31177
A probabilistic view of Datalog parallelization
[TELECOM-93-D-021] p 3824 N94-31183
A comparison of distributed memory and virtual shared memory parallel programming models
[DE94-005473] p 3825 N94-31663
The named-state register file
[AD-A276796] p 3825 N94-32165
Transformational derivation of (parallel) programs using skeletons
[TR-93-20] p 3825 N94-32196
Methods for parallelizing search paths in phrasing
[AD-A276876] p 3817 N94-32212
Computational chemistry on parallel computers
[DE94-008106] p 3636 N94-32616
A software architecture for multidisciplinary applications: Integrating task and data parallelism
[NASA-CR-194896] p 3820 N94-32928
Finding all periods and initial palindromes of a string in parallel
[AD-B175069] p 3827 N94-33002
PARAMAGNETISM
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
PARAMETER IDENTIFICATION
A new methodology of system parameter estimation
[MATHS-REPT-A-208] p 3808 N94-31163
Identification of polynomial and rational NARMAX models
[RR-483] p 3842 N94-31413
A contribution to the repreaentation and identification of semi-flexible robots
[ISBN-0-315-86450-8] p 3724 N94-31721
Model identification of a reconfigurable robot manipulator
[ISBN-0-315-87109-1] p 3725 N94-31874
On-line physical parameter identification and adaptive control of a launch vehicle p 3602 N94-31891
Approximation theory and computational methods for the identification and control of distributed parameter systems
[AD-A277335] p 3848 N94-32244
PARAMETERIZATION
Use of Air Force cloud cover data to evaluate and improve cloud forecasts and parameterizations in mesocale meteorological models
[AD-A277384] p 3784 N94-32054
The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis
[AD-A277207] p 3784 N94-32094
A parameterization of cloud droplet nucleation
[DE94-007469] p 3785 N94-32268
PARAMETRIC AMPLIFIERS
A noncritically phase matched femtosecond optical parametric oscillator near 3 microns
[DE94-008050] p 3720 N94-32704
PARSING ALGORITHMS
Methods for parallelizing search paths in phrasing
[AD-A276876] p 3817 N94-32212
Informal introduction to the extended affix grammar formalism and its compiler
[TR-93-19] p 3817 N94-32287

PARTIAL DIFFERENTIAL EQUATIONS
Large-scale shape optimization: Numerical methods, parallel algorithms, and applications to aerodynamic design p 3815 N94-31966
Control and stabilization of distributed parameter systems; theoretical and computational aspects [AD-A277239] p 3738 N94-32275
Coherent processes in atom in strong radiation fields [AD-A278388] p 3874 N94-33144
PARTIAL PRESSURE
Simultaneous laboratory measurements of CO2 and H2O adsorption on palagonite: Implications for the Martian climate and volatile reservoir p 3952 N94-33240
PARTICLE ACCELERATION
Collective acceleration in solar flares [DE94-006268] p 3953 N94-31632
PARTICLE ACCELERATOR TARGETS
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter [DE94-007178] p 3938 N94-32638
Spin-structure function of the neutron He-3: SLAC results [DE94-008927] p 3875 N94-33189
PARTICLE ACCELERATORS
AMS beyond 2000 [DE94-006666] p 3632 N94-31352
The D0 upgrade [DE94-006953] p 3867 N94-31671
Probing lepton number violation via Majorana neutrinos at hadron supercolliders [PB94-147055] p 3868 N94-31922
Jet physics and QCD tests at the Tevatron collider [DE94-008987] p 3871 N94-32587
The future of high-energy physics in the US: Statement for the 1994 HEPAP Subpanel [DE94-008994] p 3876 N94-32588
A search for rapidity gaps in jet events and a study of color coherence in multijet events at D0 [DE94-006849] p 3872 N94-32627
Minimax: Multiparticle physics at the Tevatron collider [DE94-007095] p 3873 N94-32689
PARTICLE BEAMS
BNL possibilities [DE94-007179] p 3864 N94-31398
PARTICLE COLLISIONS
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA [ETN-94-96021] p 3865 N94-31534
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions [DE94-006315] p 3867 N94-31779
Collisional and chaotic transport of energetic particles in toroidal plasma [DE94-006504] p 3889 N94-31787
Monoenergetic neutral particle transport in semi-infinite media [AD-A277155] p 3870 N94-32368
Jet physics and QCD tests at the Tevatron collider [DE94-008987] p 3871 N94-32587
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter [DE94-007178] p 3938 N94-32638
Electron: Cluster interactions [DE94-009089] p 3874 N94-32807
PARTICLE DECAY
B lifetimes at CDF [DE94-006850] p 3866 N94-31669
Medium energy measurements of N-N parameters [DE94-006067] p 3869 N94-32173
Semileptonic decays of mesons in the SO(4) model [DE94-008108] p 3873 N94-32708
PARTICLE DIFFUSION
Notes on the Langevin model for turbulent diffusion of marked particles [DE94-007847] p 3708 N94-32652
Particle diffusion from the beam-beam interaction in synchrotron colliders [DE94-007111] p 3876 N94-32685
PARTICLE EMISSION
Counting particles emitted by stratospheric aircraft and measuring size of particles emitted by stratospheric aircraft [NASA-CR-195908] p 3769 N94-33170
PARTICLE ENERGY
Influence of long-range correlations on the spectral functions and response of 48Ca and 90Zr [ETN-94-96017] p 3865 N94-31537
PARTICLE FLUX DENSITY
Surface fluxes of trace gases derived from convective-layer profiles p 3704 N94-31774
PARTICLE IMAGE VELOCIMETRY
Stabilized alumina/ethanol colloidal dispersion for seeding high temperature air flows [NASA-TM-106591] p 3713 N94-32983
PARTICLE IN CELL TECHNIQUE
Pulsed expansion of plasma in a magnetic thruster p 3889 N94-31776
PARTICLE INTERACTIONS
Analysis of the high energy behavior of the forward scattering parameters - sigma(tot), rho and B [DE94-006537] p 3864 N94-31310
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA [ETN-94-96021] p 3865 N94-31534
PARTICLE MASS
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802
PARTICLE MOTION
X ray pulse considerations and electron flow in high voltage diodes [AD-A277301] p 3868 N94-32044
PARTICLE PRODUCTION
State of hadron collider physics [DE94-005279] p 3863 N94-31147
Elimination of two atomic electrons by a single high energy photon [DE94-006834] p 3864 N94-31320
Study of B(0) - bar-B(0) mixing in D0 [DE94-006000] p 3897 N94-31506
Elementary particle physics [DE94-006071] p 3866 N94-31620
Study of associated gauge boson production at D0: W gamma production [DE94-006951] p 3866 N94-31670
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions [DE94-006315] p 3867 N94-31779
Baryogenesis from a primordial lepton asymmetry [PB94-145166] p 3868 N94-31921
Medium energy measurements of N-N parameters [DE94-006067] p 3869 N94-32173
Antiproton production in heavy ion collisions [DE94-007552] p 3870 N94-32271
Jet physics and QCD tests at the Tevatron collider [DE94-008987] p 3871 N94-32587
A search for rapidity gaps in jet events and a study of color coherence in multijet events at D0 [DE94-006849] p 3872 N94-32627
Proceedings of the Workshop on B Physics at Hadron Accelerators [DE94-007961] p 3877 N94-32748
Studies of jet production with the D0 detector [DE94-008271] p 3873 N94-32780
Hyperon polarization, crystal channeling, and E781 at Fermilab [DE94-008224] p 3877 N94-32802
PARTICLE SIZE DISTRIBUTION
Combustor and nozzle effects on particulate behavior in solid rocket motors [AD-A277304] p 3614 N94-32071
Drop size distributions and related properties of fog for five locations measured from aircraft [NASA-CR-4585] p 3787 N94-33065
Counting particles emitted by stratospheric aircraft and measuring size of particles emitted by stratospheric aircraft [NASA-CR-195908] p 3769 N94-33170
The wavelength dependence of Martian atmospheric dust radiative properties p 3950 N94-33228
PARTICLE SPIN
RHIC spin physics [DE94-005452] p 3876 N94-32099
PARTICLE THEORY
Semileptonic decays of mesons in the SO(4) model [DE94-008108] p 3873 N94-32708
PARTICLE TRACKS
Proceedings of the Workshop on B Physics at Hadron Accelerators [DE94-007961] p 3877 N94-32748
PARTICLE TRAJECTORIES
Monoenergetic neutral particle transport in semi-infinite media [AD-A277155] p 3870 N94-32368
PARTICLES
Single scattering of light by ensembles of particles with various shapes [ETN-94-96016] p 3878 N94-31550
PARTICULATE REINFORCED COMPOSITES
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance [AD-A275965] p 3649 N94-31276
PARTICULATE SAMPLING
Remote robot manipulator coupled with remote-controlled guide vehicle for soil sampling in hazardous waste sites p 3723 N94-31569
Counting particles emitted by stratospheric aircraft and measuring size of particles emitted by stratospheric aircraft [NASA-CR-195908] p 3769 N94-33170
PARTICULATES
Electrostatic reduction of particulates for laser resistant hafnia coatings [DE94-005824] p 3651 N94-31557
Micromechanics and effective properties of particulate composites and fluid suspensions p 3703 N94-31744
Combustor and nozzle effects on particulate behavior in solid rocket motors [AD-A277304] p 3614 N94-32071
Photothermal laser deflection, an innovative technique to measure particles in exhausts [AD-A277151] p 3718 N94-32366
PARTITIONS (MATHEMATICS)
SU(2) WZNW model at higher genera from gauge field functional integral [PB94-148467] p 3857 N94-31589
PARTONS
String-parton model description of relativistic heavy-ion collisions [DE94-009164] p 3874 N94-32850
PASSENGER AIRCRAFT
Fracture and fatigue strength evaluation of multiple site damaged aircraft fuselages - curved panel testing and analysis [AD-A277100] p 3579 N94-32015
A comparison of military and commercial aircraft development [AD-A276830] p 3575 N94-32168
PASSIVITY
Passivation of III-V compound semiconductor based devices [AD-A276178] p 3894 N94-31056
Modification of semiconductor surface properties with chemically bound molecular films [AD-A276162] p 3895 N94-31081
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers [DE94-006591] p 3634 N94-32110
PATHOLOGY
High peak power microwaves: A health hazard [AD-A277168] p 3681 N94-32576
PATTERN RECOGNITION
Tracking roads in an aerial image by Kalman filtering [TELECOM-93-D-007] p 3711 N94-31096
Automatic extraction of cartographic objects by fusion of data extracted from satellite images [TELECOM-93-E-001] p 3742 N94-31165
Filtering and recognition of moving boats in radar images [REPT-93-039] p 3671 N94-31190
Feature discovery in gray level imagery for one-class object recognition [DE94-005268] p 3671 N94-31267
Smart environmental monitor based on neural networks and multi-spectral pattern recognition [AD-A276445] p 3829 N94-31301
Digit-Eyes: Vision-based human hand tracking [NASA-CR-195913] p 3803 N94-31447
Polyhedric object recognition by indexing in a model base [ETN-94-95913] p 3812 N94-31542
CAD-based off-line planning for an active-vision system [ISBN-0-315-86317-X] p 3813 N94-31713
Morphological directional coding of images [ISBN-0-315-86336-6] p 3814 N94-31715
Neural networks for model-based recognition [AD-A277375] p 3834 N94-32053
High performance hardware and software for pattern recognition and image processing [AD-A276405] p 3816 N94-32130
Development of phase-only filters for sensor imagery [AD-A276722] p 3880 N94-32151
Algebraic functions for recognition [AD-A276803] p 3846 N94-32167
A differential theory of learning for efficient statistical pattern recognition [AD-A277313] p 3800 N94-32277
Wavelet transform of fixed pattern noise in focal plane arrays [AD-A276963] p 3712 N94-32393
SAR image feature extraction system: A pre-operational application of ERS-1 SAR p 3751 N94-32543
Mechanisms of temporal pattern discrimination by human observers [AD-A277407] p 3801 N94-32577
Correlation filter synthesis using neural networks [AD-A278124] p 3836 N94-33043
A novel optoelectronic system for distortion-invariant ATR [AD-A277985] p 3884 N94-33087

CRAD Signal and Information Processing Working Group Workshop on Neural networks, volume 1
[DREA-TC-93-305-VOL-1] p 3836 N94-33149
Neural networks applied to the phonemic segmentation of speech p 3686 N94-33152
Automatic modulation recognition p 3686 N94-33153
Nearest-neighbour search in constant time: An alternative to neural networks for pattern matching applications p 3838 N94-33157

PATTERN REGISTRATION
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069

PAVEMENTS
Determining the bearing capacity of flexible airfield pavements using a heavy weight deflectometer
[ISBN-0-315-86210-6] p 3587 N94-31710

PAYLOAD INTEGRATION
Payload holddown and release mechanism p 3607 N94-33321

PAYLOAD INTEGRATION PLAN
Development concept for Dutch user support
[PB94-125523] p 3598 N94-31208

PAYLOADS
Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020
DOD space based requirements: Increasing DOD access to space
[AD-A276874] p 3601 N94-32211
Pip pin reliability and design p 3605 N94-33305
Payload holddown and release mechanism p 3607 N94-33321

PEBBLE BED REACTORS
Summary of particle bed reactor designs for the Space Nuclear Thermal Propulsion Program
[DE94-007434] p 3615 N94-32266

PEEK
Optimization of the forming parameters of PEEK/carbon fiber composite
[ISBN-0-315-86410-9] p 3620 N94-31716
Low velocity impact damage in carbon fiber/PEEK composite laminates
[ISBN-0-315-86546-6] p 3622 N94-31909

PENDULUMS
Modeling and control of nonlinear systems
[AD-A277377] p 3834 N94-32095

PENETRATION
Tearing resistance of a thin shell against projectile penetration: Material property effects
[DE94-007466] p 3733 N94-31316
Low dispersion of the muon precession frequency in HTSC samples YBa2Cu3O(x) and EuBa2Cu3O(x)
[DE94-608388] p 3896 N94-31395

PERCEPTUAL TIME CONSTANT
The effects of Above Real-Time Training (ARTT) in an F-16 simulator p 3591 N94-32474

PERCHLORATES
Infrared spectroelectrochemical study of cyanide adsorption and reactions at platinum electrodes in aqueous perchlorate electrolyte
[AD-A276402] p 3631 N94-31238

PERCHLORIC ACID
Charge-dependent atomic-scale structures of high-index and (110) gold electrode surfaces as revealed by scanning tunneling microscopy
[AD-A276782] p 3869 N94-32170

PERFLUORO COMPOUNDS
Perfluoropolyalkylether decomposition on catalytic aluminas
[NASA-TM-106547] p 3617 N94-33021
Development and preliminary evaluation of aryl ester boundary additives for perfluoropolyethers
[NASA-TM-106603] p 3663 N94-33024

PERFORMANCE PREDICTION
Performance predictions for composite materials
[AD-A276451] p 3618 N94-31261
Predicting antenna parameters from antenna physical dimensions
[AD-A276442] p 3672 N94-31300
An analysis of the maintenance performance measurement system for LAMPS MK 3 helicopter squadrons
[AD-A276421] p 3565 N94-31332
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
Compiler techniques for managing data motion
[AD-A276514] p 3918 N94-31930
Civil tiltrotor market penetration: Effects on Northeast corridor airport delay
[AD-A277534] p 3576 N94-32955

PERFORMANCE TESTS
Testing Operational Flight Programs (OFP's)
[AD-A276361] p 3578 N94-31387
Technical evaluation of the UH-60Q: Medical oxygen system
[AD-A276983] p 3579 N94-32242
Performance of the Sony lithium-ion rechargeable battery
[AD-A277076] p 3693 N94-32303
A low-cost, CCD solid state star tracker
[NASA-CR-192722] p 3882 N94-32417
Aircrew Eye/Respiratory Protection (AERP): 16-hour extended wear evaluation of chemical protective equipment
[AD-A277288] p 3804 N94-32609
The relative performance of FeS2 and CoS in long-life thermal-battery applications
[DE94-006145] p 3695 N94-32663
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher
[DE94-005244] p 3603 N94-32671
Temperature-humidity-bias aging technique to identify defective surface mount capacitors
[DE94-005354] p 3660 N94-32727
A 10 GHz bandwidth, single transient, digitized oscilloscope with 20 GHz capability
[DE94-005400] p 3713 N94-32728
Polymer electrolyte fuel cells
[DE94-007558] p 3761 N94-32762
EDD-7 Electric Charge Point Meter test results
[DE94-008515] p 3696 N94-32828
Enhancement of mixing in a rectangular jet by mechanical tabs
[NASA-CR-185207] p 3709 N94-32872
Operational experience and evaluation of a dual-element stretched-membrane heliostat
[DE94-008827] p 3763 N94-32965
Two-axis antenna positioning mechanism p 3605 N94-33308

PERIODIC FUNCTIONS
Representation, prediction and identification of cyclostationary processes: A state-space approach
[REPT-93-041] p 3850 N94-31191
Remarks on a result of LAV Carvalho
[AD-A276404] p 3841 N94-31360

PERIODIC VARIATIONS
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245
ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States
[AD-A277306] p 3789 N94-32327
Dependence of x ray absorption magnetic circular dichroism on layer periodicity in iron-platinum multilayers
[DE94-008786] p 3647 N94-32892

PERIPHERAL EQUIPMENT (COMPUTERS)
Pen-based computers: Computers without keys p 3808 N94-32434
THE VERTICAL p 3806 N94-32435

PERMAFROST
Thermal and hydraulic considerations regarding the fate of water discharged by the outflow channels to the Martian northern plains p 3946 N94-33202
Temporal changes in the geographic distribution, elevation, and potential origin of the Martian outflow channels p 3951 N94-33235

PERMANENT MAGNETS
Selected applications of planar permanent magnet multipoles in FEL insertion device design
[DE94-009014] p 3721 N94-32845

PERMEABILITY
New polymer target-shell properties and characterizations
[DE94-008420] p 3890 N94-32415

PERMEATING
Prediction of hydrogen entry and permeation in metals and alloys
[AD-A276637] p 3642 N94-31995

PERMITTIVITY
Microwave dielectric behavior of soils. Report 1: Summary of related research and applications
[AD-A275980] p 3771 N94-31351
Microwave dielectric behavior of soils. Report 2: A unique coaxial measurement apparatus
[AD-A275982] p 3771 N94-31353
A study of areas of low radio-thermal emissivity on Venus p 3942 N94-31992
A reassessment of the in-situ dielectric constant of polar firn
[AD-A276999] p 3773 N94-32154
Electromagnetic probe technique for fluid flow measurements p 3711 N94-32455
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
Dielectric properties of Mars' surface: Proposed measurement on a Mars lander p 3951 N94-33237

PEROVSKITES
Energetics, bonding mechanism, and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE94-008551] p 3659 N94-32656

PEROXIDES
Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056

PERSONAL COMPUTERS
A PC program to optimize system configuration for desired reliability at minimum cost p 3823 N94-32438
Multimedia as a desktop and classroom tool
[DE94-009118] p 3807 N94-32766

PERSONNEL DEVELOPMENT
European business confronted with the 21st century: Men, the essential risk
[ESA-SP-1167] p 3914 N94-31181
Aircraft communication and navigation systems and communication and navigation systems
[AD-A277309] p 3582 N94-32328

PERSONNEL MANAGEMENT
European business confronted with the 21st century: Men, the essential risk
[ESA-SP-1167] p 3914 N94-31181
Drug-related problems in the workplace
[CRANFIELD-AERO-9306] p 3914 N94-31538

PERTURBATION
Vibration control and design of composite cantilevers taking into account structural uncertainties and damage p 3733 N94-31213
Gravitational effects of cosmic strings
[ISBN-0-315-75484-2] p 3934 N94-31789
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011

PERTURBATION THEORY
Development and implementation of a full-potential ASW method
[ETN-94-95757] p 3858 N94-31560
Perturbative aspects of lower-dimensional gauge theories
[ISBN-0-315-86269-6] p 3911 N94-31712
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Semianalytic Satellite Theory (SST): Mathematical algorithms
[AD-A276836] p 3610 N94-32208
A cell-cycle model revisited
[CWI-AM-R9305] p 3851 N94-32229
Quantum dynamics in dual spaces
[DE94-008303] p 3913 N94-32824

PETRI NETS
Performability modelling using DyQNtool+
[MEMO-INF-93-45] p 3812 N94-31659
Design Methods based On Nets: DEMON
[PB94-147493] p 3813 N94-31687

PH
Recovery of carboxylic acids at pH greater than pKa
[DE94-007030] p 3636 N94-32376
A fuzzy classifier system for process control p 3839 N94-32422
Studies of the fundamental nature of catalytic acidity, sites and intermediates
[DE94-006999] p 3646 N94-32805
The pH of Mars p 3950 N94-33225

PHARMACOLOGY
International Journal of Quantum Chemistry. Quantum Biology Symposium number 20. Proceedings of the International Symposium on the Application of Fundamental Theory to Problems of Biology and Pharmacology
[AD-A276294] p 3792 N94-31294
Review of pharmacological approach to improve cold tolerance p 3796 N94-31740

PHASE COHERENCE
Incoherent imaging by Z-contrast stem: Towards 1 Angstrom resolution
[DE94-006551] p 3896 N94-31489
Evaluation of surface phase change on large zones p 3755 N94-32567
Techniques and applications of SAR interferometry for ERS-1 p 3756 N94-32568

PHASE CONJUGATION
Methods for SBS threshold reduction
[AD-A276554] p 3717 N94-31936
High average power pulsed phase conjugate laser with birefringence correction
[DE94-006049] p 3719 N94-32659
Studies of optical beam phase conjugation and electromagnetic scattering process
[AD-A278389] p 3884 N94-33145

PHASE CONTRAST
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
PHASE DIAGRAMS
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
The new Metals and Alloys Indexes, search manual: A phase diagram research tool
[DE94-005371] p 3643 N94-32098
Phase behavior, structure, and properties of model block polymers
[AD-A277530] p 3662 N94-32954
PHASE LOCKED SYSTEMS
Development, characterization, and applications of high temperature superconductor nanobridge Josephson junctions
[DE94-008113] p 3903 N94-32409
YBCO Josephson Junction arrays
[AD-A277426] p 3908 N94-33005
PHASE MODULATION
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330
High-performance GaAs/AlGaAs optical phase modulators for microwave/photonic integrated circuits
[DE94-006361] p 3688 N94-31483
Analysis of key performance parameters of phase sampling digital RF memories
[AD-A276019] p 3688 N94-31494
High-performance GaAs/AlGaAs optical phase modulators for microwave photonic integrated circuits
[DE94-007376] p 3696 N94-32809
PHASE SHIFT
Phase unwrapping problems in ISAR images
[TELECOM-93-D-006] p 3670 N94-31097
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
Fiber optic continuous true time-delay modulator
[AD-D016098] p 3883 N94-32720
High-performance GaAs/AlGaAs optical phase modulators for microwave photonic integrated circuits
[DE94-007376] p 3696 N94-32809
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011
PHASE SHIFT KEYING
Modulation and coding for the Gaussian channel, possibly affected by fluctuations
[TELECOM-93-E-009] p 3840 N94-31169
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330
PHASE STABILITY (MATERIALS)
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852
The distribution of Martian ground ice at other epochs p 3948 N94-33218
Phase relationships and stability of the (mu)- and (zeta)-phases in the Ag-Al-X (X=Zn, Ga, Ge) systems
[DE94-009391] p 3648 N94-33270
PHASE TRANSFORMATIONS
Structure and dynamics of microemulsions in bulk, at interfaces, and in confined geometries
[DE94-006043] p 3633 N94-31526
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916
Amorphous/crystalline structure and phase transformations in metastable semiconducting Ge(1-x)Sn(x)
[DE94-006659] p 3901 N94-32115
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209
Fabrication, phase transformation studies and characterization of SiC-AlN-Al2OC ceramics
[DE94-008587] p 3659 N94-32657
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
Interface controlled amorphization of crystalline Ni/Ti multilayers
[DE94-008685] p 3906 N94-32884
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993
A tandem microscopic-electrochemical examination of a charge-induced surface phase sequence: Ordered Au(110) in aqueous iodide electrolytes as probed by potentiodynamic scanning tunneling microscopy
[AD-A276905] p 3875 N94-33277
PHASE VELOCITY
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684
PHASED ARRAYS
The development of active integrated antennas and a design methodology
[ISBN-0-315-86119-3] p 3675 N94-31708
Proceedings of the 1993 Antenna Applications Symposium, volume 1
[AD-A277202] p 3676 N94-32049
Proceedings of the 1993 Antenna Applications Symposium, volume 2
[AD-A277203] p 3677 N94-32050
Processing and characterization of functionally gradient ceramic materials
[AD-A277154] p 3657 N94-32367
PHENYLS
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054
PHILIPPINES
Forecasters handbook for the Philippine Islands and surrounding waters
[AD-A277993] p 3787 N94-33089
PHONEMICS
Neural networks applied to the phonemic segmentation of speech p 3686 N94-33152
PHONONS
Experimental investigation of phonon eigenvectors using x ray interference fields
[ETN-94-95751] p 3865 N94-31511
PHOSPHATES
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE94-006759] p 3759 N94-31272
Carbonates, surfates, phosphates, nitrates, and organic materials: Their association in a Martian meteorite p 3952 N94-33239
PHOSPHAZENE
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
PHOSPHORUS
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers
[DE94-006591] p 3634 N94-32110
PHOTOACOUSTIC MICROSCOPY
Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051
PHOTOCHEMICAL REACTIONS
Proceedings of the Seventeenth DOE Solar Photochemistry Research Conference
[DE94-005552] p 3759 N94-31648
Photopolymerization of cyclohexene oxide: A visible light initiating system and mechanistic investigations
[AD-A277110] p 3654 N94-31981
Mechanical properties of acrylate networks formed by visible laser-induced polymerization. 2. Control of the mechanical properties
[AD-A277111] p 3655 N94-31982
A model of the ion chemistry of electrified convection p 3868 N94-31993
Mechanisms of laser induced reactions in opaque heterogeneous environments
[AD-A276642] p 3717 N94-31996
The Sixth Symposium on Unconventional Photoactive Solids. Abstracts
[AD-A277198] p 3655 N94-32016
A visible light initiating system for free radical promoted cationic polymerization
[AD-A277164] p 3655 N94-32069
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757
Structural studies of photoinduced intramolecular electron transfer in cyclopentadienylnickelnitrosyl
[DE94-008467] p 3874 N94-32876
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894
Mars atmospheric loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 3947 N94-33208
How well was total ozone abundance inferred with Mariner 9 p 3947 N94-33212
Escape of Mars atmospheric carbon through time by photochemical means p 3948 N94-33214
PHOTOCONDUCTIVITY
Multifunctional macromolecules
[AD-A277347] p 3656 N94-32246
PHOTOCONDUCTORS
The Sixth Symposium on Unconventional Photoactive Solids. Abstracts
[AD-A277198] p 3655 N94-32016
Fast acting optical deflection
[AD-A276630] p 3879 N94-32037
PHOTODECOMPOSITION
High-energy chemical processes: Laser irradiation of aromatic hydrocarbons
[DE94-008107] p 3720 N94-32707
PHOTODIODES
Analysis of the photodiode boundary layer transition indicator
[DE94-005311] p 3701 N94-31268
PHOTOELECTRIC EFFECT
Imaging of surface structure with energy-dependent photoelectron diffraction
[DE94-009096] p 3907 N94-32934
PHOTOELECTRIC EMISSION
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
Analysis of Dietz's single, rectangular pulse theory for the generation of radiation via photoelectrons
[DE94-006131] p 3681 N94-32661
Particle-In-Cell (PIC) code simulation results and comparison with theory scaling laws for photoelectron-generated radiation
[DE94-006132] p 3695 N94-32662
Strongly anisotropic s-wave versus d-wave gap in cuprate superconductors: Evidence and theory
[DE94-007579] p 3904 N94-32746
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
PHOTOELECTROCHEMISTRY
Proceedings of the Seventeenth DOE Solar Photochemistry Research Conference
[DE94-005552] p 3759 N94-31648
PHOTOELECTRON SPECTROSCOPY
Electron cyclotron resonance plasma oxidation studies of InP
[AD-A277431] p 3893 N94-33007
PHOTOELECTRONS
Photoelectron diffraction and holography: Present status and future prospects
[DE94-006298] p 3712 N94-31629
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
A simple model for determining photoelectron-generated radiation scaling laws
[DE94-006130] p 3761 N94-32660
Analysis of Dietz's single, rectangular pulse theory for the generation of radiation via photoelectrons
[DE94-006131] p 3681 N94-32661
Particle-In-Cell (PIC) code simulation results and comparison with theory scaling laws for photoelectron-generated radiation
[DE94-006132] p 3695 N94-32662
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799
Imaging of surface structure with energy-dependent photoelectron diffraction
[DE94-009096] p 3907 N94-32934
PHOTOGEOLOGY
A model geophysics program
[DE94-007415] p 3747 N94-32203
PHOTOGRAMMETRY
Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224
PHOTOGRAPHIC EQUIPMENT
Imaging devices for satellite remote sensing
[VTT-TIED-1517] p 3743 N94-31658
PHOTOGRAPHIC PROCESSING
The trustworthy digital camera: Restoring credibility to the photographic image p 3714 N94-32470
PHOTOGRAPHS
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
The trustworthy digital camera: Restoring credibility to the photographic image p 3714 N94-32470
PHOTOINTERPRETATION
Radar image classification by texture measurements
[ONERA-NT-1993-3] p 3673 N94-31419
Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536
Almaz marine applications p 3751 N94-32544
Statistical analysis and mapping of cotton and food crop cultivation surfaces in the west of Burkina Faso: Contribution of combined SPOT P and XS data p 3757 N94-32575
PHOTOIONIZATION
Elimination of two atomic electrons by a single high energy photon
[DE94-006834] p 3864 N94-31320

Double photoionization of helium with synchrotron x rays: Proceedings
[DE94-006737] p 3866 N94-31668
High-energy chemical processes: Laser irradiation of aromatic hydrocarbons
[DE94-008107] p 3720 N94-32707

PHOTOLUMINESCENCE
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
Femtosecond probe-probe transmission studies of LT-grown GaAs near the band edge
[DE94-006660] p 3904 N94-32634
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

PHOTOLYSIS
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
Mechanisms of laser induced reactions in opaque heterogeneous environments
[AD-A276642] p 3717 N94-31996
Laser flash photolysis, EPR and Raman studies of liquids at elevated pressures
[DE94-008351] p 3718 N94-32413
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894

PHOTOMAPPING
A model geophysics program
[DE94-007415] p 3747 N94-32203
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681

PHOTOMETERS
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
A 1-picosecond InGaAs photodetector for operation at 1300-1600 nm
[AD-A275959] p 3895 N94-31350
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013
High T(sub c) superconductor tunnel junctions for photon detectors
[DE94-007686] p 3904 N94-32602
Bioluminescence bathyphotometer
[AD-D016102] p 3790 N94-32959
Quantum well infrared photodetector FPA
[AD-A278010] p 3908 N94-33248

PHOTOMULTIPLIER TUBES
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323

PHOTON BEAMS
Proceedings of the 37th international symposium on electron, ion, and photon beams
[AD-A276478] p 3875 N94-31247

PHOTONICS
Photonic bandgaps in periodic dielectric structures
[ISBN-0-315-86902-X] p 3899 N94-31729
Photonic band gap materials
[DE94-005566] p 3677 N94-32101
Flexible manufacturing for photonics device assembly p 3669 N94-32449
Automated fiber pigtailing technology
[DE94-007072] p 3695 N94-32688
Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878

PHOTONS
Time-dependent behavior of active galactic nuclei with pair production p 3929 N94-31125
Elimination of two atomic electrons by a single high energy photon
[DE94-006834] p 3864 N94-31320
Transport properties of quark and gluon plasmas
[DE94-007043] p 3864 N94-31405
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3692 N94-32112
ITS version 3.0: Powerful, user-friendly software for radiation modelling
[DE94-006607] p 3678 N94-32113
A quest for a new superconducting state
[DE94-008439] p 3908 N94-32991

PHOTONUCLEAR REACTIONS
NN-interaction in (1)S0-state: Virtual level or dibaryon resonance?
[DE94-606492] p 3869 N94-32097

PHOTOPRODUCTION
Results from the H1 experiment at HERA
[PB94-145174] p 3868 N94-32008
Chiral symmetry and the threshold gamma(p) yields pi(sup 0)p reaction
[DE94-008117] p 3873 N94-32710

PHOTOSPHERE
Observations of accretion and angular momentum regulation in young circumstellar disks and the implications for planetary formation p 3928 N94-31122

PHOTOSYNTHESIS
Spectral inhomogeneity of the bacterial light-harvesting antennae: Causes and consequences
[ETN-94-96020] p 3792 N94-31533
Light utilization and photoinhibition of photosynthesis in marine phytoplankton
[DE94-005505] p 3794 N94-32896

PHOTOTRANSISTORS
Reconfigurable optical switches with monolithic electrical-to-optical interfaces
[DE94-007745] p 3881 N94-32385

PHOTOVOLTAIC CELLS
Draft minutes of IAPG Mechanical Working Group meeting
[DE94-004954] p 3759 N94-31266
Solar lunar power p 3599 N94-31427
Field operation test of utility interactive load conditioner with photovoltaic cells at a demonstration house
[DE94-757271] p 3762 N94-32918

PHOTOVOLTAIC CONVERSION
Solar energy in China
[PB94-137502] p 3758 N94-31071
Photovoltaics: Program overview, fiscal year 1993
[DE94-000246] p 3758 N94-31235
Solar resource: Utility load-matching assessment
[DE94-000297] p 3758 N94-31264
Silicon-Film(tm) photovoltaic manufacturing technology
[DE94-000202] p 3760 N94-32143
Renewable energy technology development at Sandia National Laboratories
[DE94-007734] p 3761 N94-32383
Solar activities at Sandia National Laboratories
[DE94-007737] p 3761 N94-32648
Development of a computer model for polycrystalline thin-film CuInSe2 and CdTe solar cells
[DE94-006853] p 3762 N94-32763
Optimal planning of residential photovoltaic systems under various rate structure
[DE94-757272] p 3762 N94-32919

PHOTOVOLTAIC EFFECT
Impact of LDEF photovoltaic experiment findings upon spacecraft solar array design and development requirements p 3594 N94-31028

PHYSICAL CHEMISTRY
Physical chemistry of molecules and grains in space
[AD-A276037] p 3932 N94-31280
Studies in physico-chemical hydrodynamics of extended systems
[DE94-006752] p 3706 N94-32149

PHYSICAL EXAMINATIONS
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323

PHYSICAL OPTICS
The conoscopic microscope
[TELECOM-93-E-017] p 3877 N94-31173
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186

PHYSIOLOGICAL EFFECTS
Review of pharmacological approach to improve cold tolerance p 3796 N94-31740
Muscle disuse through tail-suspension: Etiology and therapeutics p 3796 N94-31746
Exposure assessment of JAVELIN missile combustion products
[AD-A278128] p 3616 N94-33059
Characterization and utilization of opiate-like hibernation factors
[AD-A278136] p 3794 N94-33098

PHYSIOLOGICAL RESPONSES
Isolating strain parameters correlated to skeletal adaptation p 3797 N94-31960
Autogenic-feedback training as a treatment for airsickness in high-performance military aircraft: Two case studies
[NASA-TM-108810] p 3801 N94-33068

PHYSIOLOGICAL TESTS
Tripping over obstacles: Biomechanical analyses of how young and old try to avoid it p 3803 N94-31954
Exposure assessment of JAVELIN missile combustion products
[AD-A278128] p 3616 N94-33059

PHYSIOLOGY
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153

PHYTOPLANKTON
Interaction processes between the ocean and the atmosphere p 3777 N94-30987
Light utilization and photoinhibition of photosynthesis in marine phytoplankton
[DE94-005505] p 3794 N94-32896
Bioluminescence bathyphotometer
[AD-D016102] p 3790 N94-32959

PICOSECOND PULSES
Pump-probe method for investigating laser ablation and optical damage threshold mechanisms in optical materials
[DE94-008291] p 3720 N94-32753

PIEZOELECTRIC CERAMICS
Passive vibration damping materials: Piezoelectric ceramic composites for vibration damping applications
[AD-A276550] p 3653 N94-31935

PIEZOELECTRIC TRANSDUCERS
PVDF pressure transducers for shock wave and explosives research
[AD-A277319] p 3712 N94-32051

PIEZOELECTRICITY
Piezoelectric materials research in Europe
[AD-A276207] p 3648 N94-31059
Electric field-induced changes in odd-numbered nylons
[AD-A278003] p 3664 N94-33138

PIGMENTS
Oxide pigments in water: The colloid-chemical point of view
[PB94-148616] p 3633 N94-31591
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045

PILOT ERROR
Flight technical error for category B non-precision approaches and missed approaches using non-differential GPS for course guidance
[PB94-142734] p 3576 N94-31680

PILOT PERFORMANCE
Aircraft simulation and pilot proficiency: From surrogate flying towards effective training
[AD-B179300] p 3587 N94-31179
Situational awareness: A feasibility investigation of near-threshold skills development
[AD-A276467] p 3798 N94-31243
Flight technical error for category B non-precision approaches and missed approaches using non-differential GPS for course guidance
[PB94-142734] p 3576 N94-31680
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
The effects of Above Real-Time Training (ARTT) in an F-16 simulator p 3591 N94-32474

PILOT TRAINING
Aircraft simulation and pilot proficiency: From surrogate flying towards effective training
[AD-B179300] p 3587 N94-31179
Situational awareness: A feasibility investigation of near-threshold skills development
[AD-A276467] p 3798 N94-31243
The effects of Above Real-Time Training (ARTT) in an F-16 simulator p 3591 N94-32474
Autogenic-feedback training as a treatment for airsickness in high-performance military aircraft: Two case studies
[NASA-TM-108810] p 3801 N94-33068

PILOTLESS AIRCRAFT
Army scout/reconnaissance helicopters versus unmanned aerial vehicles
[AD-A276902] p 3579 N94-32232
Design and Monte Carlo analysis of an unmanned aerial vehicle
[AD-A277648] p 3580 N94-33056

PINCH EFFECT
Pinched propagation of high-power, pulsed electron beams for welding and materials processing applications
[AD-A276925] p 3726 N94-32236

PINNING
Effect of twin boundary density on the vortex melting transition in YBa2Cu3O(7-delta) single crystals
[DE94-007684] p 3904 N94-32601

PINS
Pip pin reliability and design p 3605 N94-33305

PION BEAMS
BNL possibilities
[DE94-007179] p 3864 N94-31398

PIONS
Medium energy measurements of N-N parameters
[DE94-006067] p 3869 N94-32173
Chiral symmetry and the threshold gamma(p) yields pi(sup 0)p reaction
[DE94-008117] p 3873 N94-32710

PIPE FLOW
Fluid-structure interaction in case of water hammer with cavitation
[PB94-148277] p 3702 N94-31588
Incompressible viscous flow in tubes with occlusions
[ISBN-0-315-75467-2] p 3704 N94-31778

Electromagnetic probe technique for fluid flow measurements p 3711 N94-32455

PIPELINING (COMPUTERS)

Investigation of modularly configured attached processors with intelligent memories [AD-A278418] p 3839 N94-33330

PIPES (TUBES)

Methodology for damage study of a tube-grill contact [ECL-92-49] p 3734 N94-31562

Fluid-structure interaction in case of water hammer with cavitation [PB94-148277] p 3702 N94-31588

Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment [DE94-007184] p 3738 N94-32639

PISTON ENGINES

The hydrogen hybrid option [DE94-006733] p 3667 N94-32148

PIVOTS

High precision moving magnet chopper for variable operation conditions p 3605 N94-33307

An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine [AD-A277516] p 3805 N94-33349

PLAINS

Thermal and hydraulic considerations regarding the fate of water discharged by the outflow channels to the Martian northern plains p 3946 N94-33202

PLANE STRESS

Influences of pressure-sensitive yielding and non-singular stress on plane-stress elastic-plastic crack-tip fields p 3737 N94-31965

Nonlinear effects in interfacial fracture p 3737 N94-31974

BUCKY instruction manual, version 3.3 [NASA-TM-104793] p 3820 N94-32899

PLANE WAVES

On wave interactions of rotational and irrotational flows p 3700 N94-31219

Boundary control of scattering p 3861 N94-31899

Penetrable wedge analysis [AD-A277219] p 3845 N94-32022

Sound scattering by cylinders of noncircular cross section [AD-A276663] p 3861 N94-32089

Prediction of the plane wave beamformed acoustic arrival structure for the 1992 Barents Sea coastal tomography test [AD-A276741] p 3788 N94-32181

PLANETARY COMPOSITION

Magmatic volatiles and the weathering of Mars p 3946 N94-33201

The pH of Mars p 3950 N94-33225

The mineralogic evolution of the Martian surface through time: Implications from chemical reaction path modeling studies p 3950 N94-33226

PLANETARY CORES

Forced libration of Mercury and geodetic determination of a possible fluid core p 3774 N94-32493

PLANETARY CRATERS

The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111

Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112

A tectonic resurfacing model for Venus p 3941 N94-31113

The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114

PLANETARY CRUSTS

The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111

The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114

Plains tectonism on Venus: The deformation belts of Lavinia Planitia p 3941 N94-31115

Thermal and hydraulic considerations regarding the fate of water discharged by the outflow channels to the Martian northern plains p 3946 N94-33202

The Martian sources of the SNC meteorites (two, not one), and what can and can't be learned from the SNC meteorites p 3951 N94-33234

Temporal changes in the geographic distribution, elevation, and potential origin of the Martian outflow channels p 3951 N94-33235

PLANETARY EVOLUTION

Tectonic History of the Terrestrial Planets [NASA-CR-195696] p 3939 N94-31105

The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111

Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112

A tectonic resurfacing model for Venus p 3941 N94-31113

The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114

Plains tectonism on Venus: The deformation belts of Lavinia Planitia p 3941 N94-31115

Observations of accretion and angular momentum regulation in young circumstellar disks and the implications for planetary formation p 3928 N94-31122

Evolution of protoplanetary disks with dynamo magnetic fields p 3931 N94-31135

Theory of protostellar accretion disks p 3931 N94-31136

Planetesimal dynamics in the vicinity of a growing protoplanet p 3935 N94-31926

A model for the evolution of CO2 on Mars p 3946 N94-33205

The effect of polar caps on obliquity p 3948 N94-33213

The distribution of Martian ground ice at other epochs p 3948 N94-33218

The mineralogic evolution of the Martian surface through time: Implications from chemical reaction path modeling studies p 3950 N94-33226

Geologic controls of erosion and sedimentation on Mars p 3951 N94-33232

PLANETARY GEOLOGY

Tectonic History of the Terrestrial Planets [NASA-CR-195696] p 3939 N94-31105

Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107

State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108

Origin and thermal evolution of Mars p 3940 N94-31109

Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110

The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111

Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112

A tectonic resurfacing model for Venus p 3941 N94-31113

The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114

Quantitative modeling of bottom morphology and subbottom properties [AD-A278142] p 3790 N94-33062

Fine and microstructure observations at Fieberlin g Guyot R/V new horizon cruise report [AD-A277917] p 3791 N94-33109

Mars: Past, Present, and Future. Results from the MSATT Program, part 1 [NASA-CR-194279] p 3943 N94-33190

Deposition rates of oxidized iron on Mars p 3945 N94-33198

Thermal and hydraulic considerations regarding the fate of water discharged by the outflow channels to the Martian northern plains p 3946 N94-33202

The Northern Plains MSATT Meeting, and a call for a field-oriented successor to MSATT p 3947 N94-33210

Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada p 3948 N94-33219

Martian spectral units derived from ISM imaging spectrometer data p 3949 N94-33220

Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224

The mineralogic evolution of the Martian surface through time: Implications from chemical reaction path modeling studies p 3950 N94-33226

Martian deltas: Morphology and distribution p 3950 N94-33230

Geologic controls of erosion and sedimentation on Mars p 3951 N94-33232

The Martian sources of the SNC meteorites (two, not one), and what can and can't be learned from the SNC meteorites p 3951 N94-33234

Temporal changes in the geographic distribution, elevation, and potential origin of the Martian outflow channels p 3951 N94-33235

PLANETARY MAGNETOSPHERES

Plasma and radio waves from Neptune: Source mechanisms and propagation [NASA-CR-195877] p 3943 N94-33103

PLANETARY MAGNETOTAILS

Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326

PLANETARY MAPPING

Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110

Mars: Five views on what is known [NASA-TM-109751] p 3942 N94-31805

The Lunar Scout Program: An international program to survey the Moon from orbit for geochemistry, mineralogy, imagery, geodesy, and gravity [NASA-TM-104791] p 3943 N94-32923

Mars: Past, Present, and Future. Results from the MSATT Program, part 1 [NASA-CR-194279] p 3943 N94-33190

Thermal studies of Martian channels and valleys using Termoskan data: New results p 3944 N94-33194

Global color views of Mars p 3948 N94-33217

Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224

PLANETARY METEOROLOGY

Eddy transport of water vapor in the Martian atmosphere p 3949 N94-33221

Numerical simulation of thermally induced near-surface flows over Martian terrain p 3949 N94-33223

Controls on the CO2 seasonal cycle p 3950 N94-33227

The wavelength dependence of Martian atmospheric dust radiative properties p 3950 N94-33228

PLANETARY ORBITS

The distribution of Martian ground ice at other epochs p 3948 N94-33218

PLANETARY RADIATION

Plasma and radio waves from Neptune: Source mechanisms and propagation [NASA-CR-195877] p 3943 N94-33103

PLANETARY ROTATION

Planetesimal dynamics in the vicinity of a growing protoplanet p 3935 N94-31926

PLANETARY STRUCTURE

Forced libration of Mercury and geodetic determination of a possible fluid core p 3774 N94-32493

PLANETARY SURFACES

Tectonic History of the Terrestrial Planets [NASA-CR-195696] p 3939 N94-31105

PLANETARY SYSTEMS

Evolution of protoplanetary disks with dynamo magnetic fields p 3931 N94-31135

PLANETARY TEMPERATURE

IRTM brightness temperature maps of the Martian south polar region during the polar night: The cold spots don't move p 3949 N94-33222

PLANETARY WAVES

Magnetohydrodynamics of the Earth's core. 1: Steady, rotating magnetoconvection. 2: Magnetic Rossby waves p 3770 N94-31104

Stationary eddies in the Mars general circulation as simulated by the NASA-Ames GCM p 3944 N94-33192

PLANKTON

Light utilization and photoinhibition of photosynthesis in marine phytoplankton [DE94-005505] p 3794 N94-32896

PLANNING

On a formal approach to the methodology of information planning [MEMO-INF-93-42] p 3917 N94-31415

Planning of air crew schedules [ISBN-0-315-86506-7] p 3914 N94-32074

Utility-based planning [NASA-CR-195878] p 3816 N94-32086

An algorithm for probabilistic, totally-ordered temporal projection [AD-A277341] p 3817 N94-32257

PLANTS (BOTANY)

Ninth International Workshop on Plant Membrane Biology [DE94-005690] p 3794 N94-32769

PLASMA ARC WELDING

Robotic weld overlay coatings for erosion control [DE94-008004] p 3658 N94-32408

Development of an automated wire delivery system for robotic welding applications [NASA-CR-194216] p 3727 N94-32479

PLASMA CHEMISTRY

Feasibility study to evaluate plasma quench process for natural gas conversion applications [DE94-000086] p 3758 N94-31234

Degenerate four-wave mixing as a diagnostic of plasma chemistry [DE94-008588] p 3889 N94-31766

PLASMA CLOUDS

Theory, Image Simulation, and Data Analysis of Chemical Release Experiments [NASA-CR-194865] p 3954 N94-31101

Computer modeling of active experiments in space plasmas p 3890 N94-31927

PLASMA COMPOSITION

Characterization of atomic and molecular impurity sources and transport at the tokamak edge [DE94-007212] p 3891 N94-32619

Analysis of data from the plasma composition experiment on the International Sun-Earth Explorer (ISEE 1) [NASA-CR-195880] p 3893 N94-33074

PLASMA CONTROL
L-H confinement mode dynamics in three-dimensional state space
[DE94-007113] p 3887 N94-31396
Toroidal pinch experiments
[DE94-005876] p 3887 N94-31558
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
High beta tokamak research
[DE94-006513] p 3888 N94-31664
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765
Collisional and chaotic transport of energetic particles in toroidal plasma
[DE94-006504] p 3889 N94-31787
FWCD and ECCD experiments on D3-D
[DE94-007371] p 3890 N94-32201
Experimental survey of the L-H transition conditions in the D3-D tokamak
[DE94-007428] p 3891 N94-32595
Recent VH-mode results on D3-D
[DE94-007429] p 3891 N94-32611
Overview of H-mode studies in D3-D
[DE94-007430] p 3891 N94-32612
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
Coaxial slow source
[DE94-008191] p 3892 N94-32800
Divertor pumping and other reactor application issues for H-mode
[DE94-007431] p 3892 N94-32810
Cooperative program on D3-D (FY 1993)
[DE94-008343] p 3892 N94-32820
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922

PLASMA CURRENTS
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765
FWCD and ECCD experiments on D3-D
[DE94-007371] p 3890 N94-32201

PLASMA DENSITY
An edge density fluctuation diagnostic for D3-D using lithium beams
[DE94-008554] p 3890 N94-32519
Divertor pumping and other reactor application issues for H-mode
[DE94-007431] p 3892 N94-32810

PLASMA DIAGNOSTICS
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Diagnostics of high-brightness short-pulse lasers and the plasmas they generate
[DE94-006165] p 3716 N94-31624
High beta tokamak research
[DE94-006513] p 3888 N94-31664
Degenerate four-wave mixing as a diagnostic of plasma chemistry
[DE94-008588] p 3889 N94-31766
An edge density fluctuation diagnostic for D3-D using lithium beams
[DE94-008554] p 3890 N94-32519
Characterization of atomic and molecular impurity sources and transport at the tokamak edge
[DE94-007212] p 3891 N94-32619
Measurement of ICF fuel ion temperature on Nova
[DE94-006150] p 3892 N94-32730
Performance of a quasi-steady, multi megawatt, coaxial plasma thruster
[NASA-CR-195311] p 3616 N94-32970
Ultrafast x ray sources
[AD-A277455] p 3721 N94-33012
Millstone Hill radar studies of plasma waves and turbulence
[AD-A278409] p 3684 N94-33172

PLASMA DIFFUSION
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922

PLASMA DYNAMICS
Convection and electrodynamic signatures in the vicinity of a Sun-aligned arc: Results from the Polar Acceleration Regions and Convection Study (Polar ARCS)
p 3954 N94-31102
L-H confinement mode dynamics in three-dimensional state space
[DE94-007113] p 3887 N94-31396
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Pulsed expansion of plasma in a magnetic thruster
p 3889 N94-31776
Computer modeling of active experiments in space plasmas p 3890 N94-31927
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
Analytic formulation for the ac electrical conductivity in two-temperature, strongly coupled, overdense plasma: FORTRAN subroutine
[DE94-009466] p 3893 N94-32915

PLASMA ELECTRODES
Time resolved measurements of light produced by onset of plasma formation on electrodes of fast pulsed high voltage diodes
[AD-A277974] p 3894 N94-33264

PLASMA ENGINES
Pulsed expansion of plasma in a magnetic thruster
p 3889 N94-31776
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908
Performance of a quasi-steady, multi megawatt, coaxial plasma thruster
[NASA-CR-195311] p 3616 N94-32970

PLASMA ETCHING
Electron cyclotron resonance plasma oxidation studies of InP
[AD-A277431] p 3893 N94-33007

PLASMA FOCUS
Studies of the plasma triggering mechanism of inverse pinch switch
[AD-A276117] p 3887 N94-31530

PLASMA HEATING
Instability heating of solid-fiber Z pinches
[DE94-007055] p 3889 N94-31809
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908
ICRF heating and current drive in TFTR supershot plasmas: Data analysis and interpretation of ICRF/edge interactions
[DE94-008586] p 3890 N94-32520
Experimental survey of the L-H transition conditions in the D3-D tokamak
[DE94-007428] p 3891 N94-32595
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
A comprehensive analysis of electron conical distributions from multi-satellite databases
[NASA-CR-195848] p 3953 N94-33047
Ionospheric plasma outflow in response to transverse ion heating: Self-consistent macroscopic treatment
[NASA-CR-195820] p 3893 N94-33048
Time resolved measurements of light produced by onset of plasma formation on electrodes of fast pulsed high voltage diodes
[AD-A277974] p 3894 N94-33264

PLASMA INTERACTIONS
High sensitivity and resolution decimetric spectroscope: Preliminary analysis of solar bursts
[INPE-5537-TDI/525] p 3954 N94-33080

PLASMA JETS
Development and application of a multimesh auto-adaptive finite element method for the calculation of an electric arc plasma
[ECL-89-03] p 3886 N94-31378
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA
[ETN-94-96021] p 3865 N94-31534
Stark broadening of the 2S state of hydrogen and deuterium in arc plasmas of low density
[ETN-94-95731] p 3888 N94-31572
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843

PLASMA LAYERS
Transport phenomena in the Earth's plasma sheet
p 3772 N94-31970
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326
Analysis of data from the plasma composition experiment on the International Sun-Earth Explorer (ISEE 1)
[NASA-CR-195880] p 3893 N94-33074
Characteristics of ion flow in the quiet state of the inner plasma sheet
[AD-A277451] p 3894 N94-33106

PLASMA OSCILLATIONS
Simultaneous excitation of parametric decay cascades and the OTSI in 1D numerical simulations based on Aakarov's equations
[AD-A278108] p 3893 N94-33042

PLASMA PHYSICS
Laboratory and space experiments as a key to the plasma universe
[TRITA-ALP-1993-01] p 3885 N94-31088
The double probe electric field experiment on Freja: Description and first results
[TRITA-ALP-1993-02] p 3885 N94-31089
Studies of the plasma triggering mechanism of inverse pinch switch
[AD-A276117] p 3887 N94-31530
Stability and instability criteria for magnetohydrodynamics
[PB94-148475] p 3889 N94-31772
Workshop on Models for Plasma Spectroscopy
[AD-A276565] p 3890 N94-32031
Atomic and molecular data needs for fusion
[DE94-006555] p 3870 N94-32177
Analytic properties of the OCP and ionic mixtures in the strongly coupled fluid state
[DE94-008216] p 3637 N94-32801
Cooperative program on D3-D (FY 1993)
[DE94-008343] p 3892 N94-32820
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics
[DE94-008279] p 3892 N94-32838
Stability of tearing modes in tokamak plasmas
[DE94-009205] p 3892 N94-32911
Electron cyclotron resonance plasma oxidation studies of InP
[AD-A277431] p 3893 N94-33007
Simultaneous excitation of parametric decay cascades and the OTSI in 1D numerical simulations based on Aakarov's equations
[AD-A278108] p 3893 N94-33042

PLASMA PINCH
Studies of the plasma triggering mechanism of inverse pinch switch
[AD-A276117] p 3887 N94-31530

PLASMA PRESSURE
Magnetless magnetic fusion
[DE94-007114] p 3891 N94-32686

PLASMA PROPULSION
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908
Performance of a quasi-steady, multi megawatt, coaxial plasma thruster
[NASA-CR-195311] p 3616 N94-32970

PLASMA RADIATION
Radiation from an aperture into an anisotropic plasma half-space p 3885 N94-31205
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

PLASMA RESONANCE
Time domain spectroscopy for studying a monopole antenna immersed in a plasma
[ISBN-0-315-86526-1] p 3888 N94-31727

PLASMA SHEATHS
Time domain spectroscopy for studying a monopole antenna immersed in a plasma
[ISBN-0-315-86526-1] p 3888 N94-31727
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781
ICRF heating and current drive in TFTR supershot plasmas: Data analysis and interpretation of ICRF/edge interactions
[DE94-008586] p 3890 N94-32520
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111

PLASMA SPECTRA
Workshop on Models for Plasma Spectroscopy
[AD-A276565] p 3890 N94-32031

PLASMA SPRAYING
Development and characterization of intermediary layers allowing the bond between a metal alloy and a plasma sprayed ceramic
[ECL-91-39] p 3619 N94-31377

PLASMA TORCHES
Stabilization method of A.C. arc plasma
[DE94-757268] p 3893 N94-32916

PLASMA TURBULENCE
Dynamics of flux tubes in accretion disks
p 3932 N94-31142
Transport suppression by shear flow generation in multihelicity resistive-g turbulence
[DE94-007108] p 3886 N94-31366

L-H confinement mode dynamics in three-dimensional state space
[DE94-007113] p 3887 N94-31396
An edge density fluctuation diagnostic for D3-D using lithium beams
[DE94-008554] p 3890 N94-32519
Recent VH-mode results on D3-D
[DE94-007429] p 3891 N94-32611
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics
[DE94-008279] p 3892 N94-32638
Millstone Hill radar studies of plasma waves and turbulence
[AD-A278409] p 3684 N94-33172

PLASMA WAVES
Collective acceleration in solar flares
[DE94-006288] p 3953 N94-31632
Time domain spectroscopy for studying a monopole antenna immersed in a plasma
[ISBN-0-315-86526-1] p 3888 N94-31727
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
Simultaneous excitation of parametric decay cascades and the OTSI in 1D numerical simulations based on Aakarov's equations
[AD-A278108] p 3893 N94-33042
Plasma and radio waves from Neptune: Source mechanisms and propagation
[NASA-CR-195877] p 3943 N94-33103
Participation in the scientific activities of the Waves in Space Plasma (WISP) project
[NASA-CR-195903] p 3894 N94-33113
Millstone Hill radar studies of plasma waves and turbulence
[AD-A278409] p 3684 N94-33172

PLASMAS (PHYSICS)
Dynamics of flux tubes in accretion disks
p 3932 N94-31142
Radiation from an aperture into an anisotropic plasma half-space p 3885 N94-31205
Theoretical studies on ionospheric irregularities and ion diode performance
[AD-A277115] p 3772 N94-31984
Analytic properties of the OCP and ionic mixtures in the strongly coupled fluid state
[DE94-008215] p 3637 N94-32601
The 1994 International Sherwood Fusion Theory Conference
[DE94-008961] p 3877 N94-32844
Potential applications of fusion neutral beam facilities for advanced material processing
[DE94-009167] p 3647 N94-32851
Stabilization method of A.C. arc plasma
[DE94-757268] p 3893 N94-32916
Ultrafast x ray sources
[AD-A277455] p 3721 N94-33012
Time resolved measurements of light produced by onset of plasma formation on electrodes of fast pulsed high voltage diodes
[AD-A277974] p 3894 N94-33264

PLASTIC COATINGS
Follow-up on the effects of the space environment on UHCRE thermal blankets p 3592 N94-31018

PLASTIC DEFORMATION
Inelastic deformation of metal matrix composites
p 3618 N94-31285
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses
p 3653 N94-31942
High-temperature deformation and fracture toughness of duplex ceramic microstructures p 3653 N94-31945
A state variable material model for superplastic titanium-6 percent Al-4 percent V p 3644 N94-32498

PLASTIC PROPERTIES
On the mechanics of microballoon-reinforced metal matrix composites
[AD-A277928] p 3630 N94-33178

PLASTICIZERS
Electrostrictive response of elastomeric polymers
[AD-A277983] p 3664 N94-33247

PLATE THEORY
An efficient higher order theory for laminated composite plates and a finite element implementation
p 3617 N94-31215

PLATEAUS
Electron energy dependence of amorphization in Zr3Fe
[DE94-008459] p 3906 N94-32875

PLATES
Response of a cantilevered plate in supersonic flow
[AD-A277487] p 3580 N94-33107

PLATES (STRUCTURAL MEMBERS)
An efficient higher order theory for laminated composite plates and a finite element implementation
p 3617 N94-31215
Random vibrations of composite beams and plates
p 3735 N94-31777
QUAD4 seminar
[AD-A277366] p 3818 N94-32330
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011

PLATES (TECTONICS)
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111

PLATINUM
Infrared spectroelectrochemical study of cyanide adsorption and reactions at platinum electrodes in aqueous perchlorate electrolyte
[AD-A276402] p 3631 N94-31238
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322
Induced adsorption of chloride and bromide by submonolayer amounts of copper underpotentially deposited on Pt(111)
[AD-A278023] p 3648 N94-33182
Scanning tunneling microscopy and infrared spectroscopy as combined in-situ probes of electrochemical adlayer structure: Cyanide on Pt(111)
[AD-A276715] p 3909 N94-33274

PLATINUM ALLOYS
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916

PLAYBACKS
An experimental compact Hi-Vision VCR using metal evaporated tape
[NHK-LABS-NOTE-423] p 3683 N94-33081

PLOTTING
Description of a package for the analysis and display of the results of numerical simulations
[AD-A276285] p 3841 N94-31252

PNEUMATICS
Controlling hazardous energy sources (lockout/tagout)
[NASA-TM-105290] p 3669 N94-32861

POINT DEFECTS
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
Defect-solute interactions near irradiation grain boundaries
[DE94-006215] p 3641 N94-31627
IR materials producibility
[AD-A277028] p 3879 N94-32006
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209
Intra-cascade surface recombination of point defects during ion bombardment of Ge(001)
[DE94-007740] p 3903 N94-32384
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852

POINT IMPACT
Point-contact and point-impact dynamics for multibody chains
[ISBN-0-315-87056-7] p 3734 N94-31737

POINTING CONTROL SYSTEMS
Pointing and tracking space mechanism for laser communication p 3606 N94-33310

POINTS (MATHEMATICS)
Kaplan-Meier estimators of interpoint distance distributions for spatial point processes
[CWI-BS-R9315] p 3846 N94-32107

POISSON DENSITY FUNCTIONS
The Laplace functional and Palm measure of a quasi-Cox process which is driven by a Markov chain
[REPT-93-82] p 3851 N94-31699
Light-traffic analysis for queues with spatially distributed arrivals
[MEMO-1150] p 3832 N94-31826
Kaplan-Meier estimators of interpoint distance distributions for spatial point processes
[CWI-BS-R9315] p 3846 N94-32107

POISSON EQUATION
An efficient three-dimensional Poisson solver for SIMD high-performance-computing architectures
p 3823 N94-31120
Eta percent-superconvergence in the interior of locally refined meshes of quadrilaterals: Superconvergence of the gradient in finite element solutions of Laplace's and Poisson's equations
[AD-A277242] p 3848 N94-32331

POISSON RATIO
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632
Indentability of conventional and negative Poisson's ratio foams p 3629 N94-33131

POLAR CAP ABSORPTION
Performance statistics bulletin. High latitude meteor scatter propagation, February, March, April, May 1992
[AD-A276667] p 3677 N94-32083
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation, November and December 1989, and January 1990
[AD-A276688] p 3680 N94-32297
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300
Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347

POLAR CAPS
A reassessment of the in-situ dielectric constant of polar firn
[AD-A276999] p 3773 N94-32154
The effect of polar caps on obliquity
p 3948 N94-33213

POLAR REGIONS
Convection and electrodynamic signatures in the vicinity of a Sun-aligned arc: Results from the Polar Acceleration Regions and Convection Study (Polar ARCS)
p 3954 N94-31102
Radar scattering from the summer polar mesosphere: Theory and observations p 3772 N94-32077
IRTM brightness temperature maps of the Martian south polar region during the polar night: The cold spots don't move p 3949 N94-33222
Polar sediment accumulation: Role of surface winds at the two poles p 3951 N94-33233
Obliquity variation in a Mars climate evolution model
p 3951 N94-33238

POLARIMETERS
Stellar x ray polarimeter polarizer development and calibration at LEA/LLNL
[DE94-006400] p 3712 N94-31783

POLARIMETRY
Multiple scattering of polarized radiation in planetary atmospheres
[ETN-94-96018] p 3674 N94-31551

POLARIZATION (SPIN ALIGNMENT)
Hyperon polarization and magnetic moments
[DE94-006041] p 3864 N94-31507
Fusion with highly spin polarized HD and D2
[DE94-006209] p 3876 N94-32731
Hyperon polarization, crystal channeling, and E781 at Fermilab
[DE94-008224] p 3877 N94-32802

POLARIZATION (WAVES)
Structure estimation of phase objects from the diffraction near field: Microwave and model calculations
[ETN-94-95737] p 3674 N94-31608
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186

POLARIZED LIGHT
Post-calibration correction for rotating-analyzer ellipsometer with optical fiber bundle detection system
[AD-A277329] p 3881 N94-32280
Microreflectance infrared study of electron-molecular vibrational coupling and lattice softness in BEDT-TTF salts
[DE94-008490] p 3907 N94-32989
Coherent processes in atom in strong radiation fields
[AD-A278388] p 3874 N94-33144

POLARIZED RADIATION
Multiple scattering of polarized radiation in planetary atmospheres
[ETN-94-96018] p 3674 N94-31551
RHIC spin physics
[DE94-005452] p 3876 N94-32099

POLARIZERS
Large-area conditioning of optics for high-power laser systems
[DE94-007028] p 3716 N94-31636
Stellar x ray polarimeter polarizer development and calibration at LEA/LLNL
[DE94-006400] p 3712 N94-31783

POLARONS
Theoretical studies of electron transfer and optical spectroscopy
[DE94-006985] p 3871 N94-32375
POLICIES
Europe at the crossroads: The future of its satellite communications industry
[ESA-SP-1166] p 3670 N94-31182
Satellite communications industry
[AD-A276685] p 3610 N94-32039
Interagency Advanced Power Group: Steering Group meeting minutes
[DE94-007951] p 3761 N94-32701
National US public policy on global warming derived from optimization of energy use and environmental impact studies
[DE94-004606] p 3768 N94-32790
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 18: Scientific and Technical Information (STI) policy and the competitive position of the US aerospace industry
[NASA-TM-109782] p 3921 N94-32833
Current policies of the major countries coping with the global warming problem and-the energy demand and supply
[DE94-757291] p 3769 N94-32920
Opinion polls and the US civil space program
[NASA-TM-109700] p 3914 N94-33066
Space history, space policy, and executive leadership
[NASA-TM-109787] p 3924 N94-33067
POLISHING
Neutral ion sources in precision manufacturing
p 3875 N94-32447
POLLEN
Backscatter and transmission of aerosol at UV through middle IR wavelengths
[AD-A277127] p 3718 N94-32305
POLLUTION CONTROL
Information resources for US Department of Energy pollution prevention programs
[DE94-006677] p 3763 N94-31582
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657
Carbon dioxide abatement as a differential game
[DE94-722023] p 3765 N94-32590
Removal of CO2 from flue gases by algae
[DE94-008039] p 3766 N94-32703
Identification of research relating to the critical loads concept and its potential application to the regulation of acidic deposition
[DE94-008234] p 3767 N94-32752
Evaluation of the Hughes conversion coating touch-up pen
[AD-A278398] p 3664 N94-33166
POLLUTION MONITORING
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657
NORSMAP 1989: Norwegian remote sensing spectroscopy for mapping and monitoring or algal blooms and pollution p 3744 N94-31856
Evaluation of Fluorescence Line Imager (FLI) airborne imaging spectrometer data for roadside tree damage assessment p 3745 N94-31866
Focused feasibility study final field sampling plan
[AD-A277445] p 3769 N94-33105
POLLUTION TRANSPORT
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars
p 3947 N94-33211
POLYATOMIC MOLECULES
Energy transfer properties and mechanisms
[DE94-007403] p 3636 N94-32594
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598
POLYCARBOSILANES
Conversion of polymers of methyl- and vinylsilane to Si-C ceramics
[NASA-TM-106554] p 3662 N94-32945
POLYCRYSTALS
Piezoelectric materials research in Europe
[AD-A276207] p 3648 N94-31059
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
Role of polycrystallinity in CdTe and CuInSe2 photovoltaic cells
[DE94-000293] p 3758 N94-31236
A scanning defect mapping system for semiconductor characterization p 3885 N94-32446
Attempts to model the generation of new grain boundaries during the deformation of polycrystals
[DE94-007527] p 3903 N94-32597
Development of a computer model for polycrystalline thin-film CuInSe2 and CdTe solar cells
[DE94-006853] p 3762 N94-32763
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
The path for long range conduction in high J(sub c) TiBa2Ca2Cu3O(8+x) spray-pyrolyzed deposits
[DE94-007211] p 3909 N94-33271
POLYESTERS
Improved resealing procedures for the second deseal/reseal program in RAAF F111 aircraft fuel tanks
[AD-A277069] p 3580 N94-32378
POLYETHYLENE TEREPHTHALATE
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
POLYHEDRONS
Polyhedric object recognition by indexing in a model base
[ETN-94-95913] p 3812 N94-31542
POLYIMIDES
Performance of selected polymeric materials on LDEF
p 3593 N94-31023
Reliability of multilayer copper/polyimide
[AD-A276228] p 3650 N94-31284
Molecular interactions at metal/polyimide interfaces: A correlation with adhesion and bond durability
[AD-A276301] p 3650 N94-31297
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
Characterization of thermally stable dye-doped polyimide based electrooptic materials
[DE94-005309] p 3882 N94-32674
Characterization of crosslinked electrooptic polyimides
[DE94-007934] p 3661 N94-32819
POLYMER BLENDS
Recent developments in polymeric charge transfer complexes
[AD-A277108] p 3654 N94-31979
Solvent diffusion coefficient concentration dependence in polymer solutions
[AD-A277023] p 3655 N94-32005
Compatibility studies of some azo polymer blends
[AD-A277141] p 3657 N94-32365
POLYMER CHEMISTRY
Reactions of electrophilic maleic anhydride and epoxy groups with nucleophilic functionalities such as carboxyl, hydroxyl, and amine groups. Polymer Technology Publication series no. 16
[PB94-135589] p 3648 N94-31069
Novel electroactive polymers and block copolymers
[AD-A276119] p 3650 N94-31509
Competition between crystallization and mixing/demixing in polymer mixture
[ETN-94-95753] p 3651 N94-31513
Mechanical properties of acrylate networks formed by visible laser-induced polymerization. 2. Control of the mechanical properties
[AD-A277111] p 3655 N94-31982
Multifunctional macromolecules
[AD-A277347] p 3656 N94-32246
Nonlinear optical polymers derived from organic/inorganic composites
[AD-A277408] p 3659 N94-32610
Nonlinear optical properties of rigid-rod polymers
[NASA-CR-191349] p 3882 N94-32702
Novel precursor approached for CMC derived by polymer pyrolysis
[AD-A278383] p 3665 N94-33352
POLYMER MATRIX COMPOSITES
Thermal-vacuum response of polymer matrix composites in space p 3595 N94-31033
Space environmental effects on polymer composites: Research needs and opportunities p 3595 N94-31035
Characterization of polymer decomposition products by laser desorption mass spectrometry
p 3597 N94-31046
Space hypervelocity microparticle impact damage in polymer matrix composites
[ISBN-0-315-87057-5] p 3652 N94-31692
Briefing and review meeting implementation of the military handbook 17 for polymer matrix and metal matrix composites
[AD-A277446] p 3663 N94-33010
POLYMER PHYSICS
Competition between crystallization and mixing/demixing in polymer mixture
[ETN-94-95753] p 3651 N94-31513
Influence of trace components on the viscoelastic properties of a polymer solution
[AD-A277171] p 3656 N94-32253
Stable second-order nonlinear optical materials based on interpenetrating polymer networks
[AD-A277410] p 3658 N94-32579
Conjugated polymer fluorescence: Interplay of correlations and alternation
[DE94-005587] p 3660 N94-32729
POLYMERIC FILMS
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions
p 3593 N94-31025
On the linearity of fast atomic oxygen effects
p 3594 N94-31027
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649
Chemical interactions between protein molecules and polymer membrane materials
[DE94-006987] p 3651 N94-31672
Reversible optical storage in azo polymers
[AD-A277109] p 3654 N94-31980
Electrical communication between glucose oxidase and electrodes based on poly(vinylimidazole) complex of Os(bpy)2Cl2
[AD-A276585] p 3635 N94-32231
New developments in second-order nonlinear optical polymeric materials
[AD-A277409] p 3658 N94-32578
Stable second-order nonlinear optical materials based on interpenetrating polymer networks
[AD-A277410] p 3658 N94-32579
Electrostrictive response of elastomeric polymers
[AD-A277983] p 3664 N94-33247
POLYMERIZATION
Photopolymerization of cyclohexene oxide: A visible light initiating system and mechanistic investigations
[AD-A277110] p 3654 N94-31981
Mechanical properties of acrylate networks formed by visible laser-induced polymerization. 2. Control of the mechanical properties
[AD-A277111] p 3655 N94-31982
Isomeric poly(benzophenone)s: Synthesis of highly crystalline poly (4, 4 foot-benzophenone) and amorphous poly (2, 5-benzophenone), a soluble poly (p-phenylene) derivative
[AD-A277261] p 3655 N94-32017
A visible light initiating system for free radical promoted cationic polymerization
[AD-A277164] p 3655 N94-32069
Multifunctional macromolecules
[AD-A277347] p 3656 N94-32246
Intramolecular charge transfer complexes as fluorescence probes for UV and visible light induced acrylate polymerization
[AD-A277129] p 3657 N94-32381
Structure-property relationships of carbon aerogels
[DE94-007120] p 3660 N94-32687
Metal ion complexation by ionizable crown ethers
[DE94-006301] p 3661 N94-32847
Interpenetrating polymer network acoustic damping material
[AD-D016141] p 3663 N94-32975
Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082
POLYMERS
Performance of selected polymeric materials on LDEF
p 3593 N94-31023
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
Nonlinear optical properties of rigid-rod polymers
[NASA-CR-191349] p 3882 N94-32702
Low loss second-order nonlinear optical polymers based on all organic sol-gel materials
[AD-A277482] p 3663 N94-32985
Fundamental studies in crack initiation
[AD-A278387] p 3741 N94-33356
POLYMETHYL METHACRYLATE
Compatibility studies of some azo polymer blends
[AD-A277141] p 3657 N94-32365
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A277513] p 3663 N94-33054
POLYNOMIALS
A polynomial representation of the valence orbital ionization potentials
[USIP-93-06] p 3640 N94-31083
A fully two-dimensional, non-oscillatory advection scheme for momentum and scalar transport equations
[DM-66] p 3700 N94-31221

Identification of polynomial and rational NARMAX models
[RR-483] p 3842 N94-31413
Penetrable wedge analysis
[AD-A277219] p 3845 N94-32022
On interpolating random fields using a finite number of observations
[CWI-BS-R9314] p 3847 N94-32194
On constructing multi-variate orthonormal polynomials associated with spectral distribution functions
[CWI-BS-R9310] p 3851 N94-32225
Polynomial interpolation and approximation of real functions. 2: Symmetrical interpolation for the triangle
[AD-A277345] p 3848 N94-32245
Least squares approximation by G1 piecewise parametric cubes
[AD-A277978] p 3850 N94-33265

POLYSILANES
Temperature dependence of the exciton-exciton annihilation rate constant in poly(di-n-hexylsilane)
[DE94-005584] p 3655 N94-32102
Conversion of polymers of methyl- and vinylsilane to Si-C ceramics
[NASA-TM-106554] p 3662 N94-32945

POLYSILOXANES
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649

POLYSTYRENE
Performance of selected polymeric materials on LDEF p 3593 N94-31023
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses p 3653 N94-31942
Solvent diffusion coefficient concentration dependence in polymer solutions
[AD-A277023] p 3655 N94-32005
New polymer target-shell properties and characterizations
[DE94-008420] p 3890 N94-32415

POLYSULFIDES
Improved resealing procedures for the second deseal/reseal program in RAAF F111 aircraft fuel tanks
[AD-A277069] p 3580 N94-32378

POLYTETRAFLUOROETHYLENE
Custom uniform source system
[NASA-CR-189332] p 3711 N94-31492
Evaluation of pyrolysis and arc tracking on candidate wire insulation designs for space applications
[NASA-CR-195332] p 3731 N94-32901

POLYURETHANE RESINS
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
Mass-loaded coating for reducing the resonant frequency of a ceramic disc
[AD-D016095] p 3660 N94-32739
Acoustic window
[AD-D016171] p 3862 N94-33017
Electrostrictive response of elastomeric polymers
[AD-A277983] p 3664 N94-33247

POPULATION THEORY
Bifurcation and deterministic chaos in dynamic systems
[REPT-93-047] p 3911 N94-31893
On the reciprocal relationship between life histories and population dynamics
[CWI-AM-R9302] p 3793 N94-32226

POPULATIONS
Seasons and chaos in population dynamics p 3912 N94-31897
On the reciprocal relationship between life histories and population dynamics
[CWI-AM-R9302] p 3793 N94-32226
Food security in the context of global environmental change
[DE94-007481] p 3768 N94-32812

POROSITY
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
Characterization of nanoparticles and nanophase materials
[DE94-008348] p 3907 N94-32990

POROUS MATERIALS
The sol-gel-xerogel transition
[AD-A276647] p 3616 N94-32038
High-resolution numerical methods for compressible multi-phase flow in hierarchical porous media
[DE94-008261] p 3707 N94-32410

PORTABLE LIFE SUPPORT SYSTEMS
Metal hydride heat pump engineering demonstration and evaluation model
[NASA-CR-188286] p 3669 N94-32857

PORTUGAL
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045

POSEIDON SATELLITE
Lessons learned from selecting and testing spaceflight potentiometers p 3607 N94-33318

POSITION (LOCATION)
Computing the precision of localization in a plane using projective invariants
[TELECOM-93-D-005] p 3840 N94-31095
Shiptrack database analysis
[AD-A277228] p 3746 N94-32025
Selection of climate station data using clustering and triangulated irregular network techniques
[AD-A276658] p 3784 N94-32046
MODIS. Volume 2: MODIS level 1 geolocation, characterization and calibration algorithm theoretical basis document, version 1
[NASA-TM-104594-VOL-2] p 3613 N94-33289

POSITION ERRORS
Error analysis of real-time and post-processed orbit determination for the Geosat Follow-On altimetric satellite using GPS tracking p 3576 N94-31845

POSITION SENSING
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations
[DE94-007042] p 3795 N94-31323
Digit-Eyes: Vision-based human hand tracking
[NASA-CR-195913] p 3803 N94-31447
CAD-based off-line planning for an active-vision system
[ISBN-0-315-86317-X] p 3813 N94-31713

POSITIONING DEVICES (MACHINERY)
Two-axis antenna positioning mechanism p 3605 N94-33308

POSITIVE IONS
Performance of an ion trap inductively coupled plasma mass spectrometer
[DE94-007470] p 3713 N94-32811

POSITRON ANNIHILATION
A constraint on the pair-density ratio (Z+) in an electron-positron pair wind p 3930 N94-31132
High energy physics program at the University of Alabama
[DE94-006544] p 3875 N94-31488
Production of charginos and neutralinos for the reaction positron electron yields Z' boson yields chargino(+) (sub i) chargino(-) (sub j) or neutralino (sub i) neutralino (sub j) in SU(2) (sub L) x SU(2) (sub R) x U(1) (sub B-L)
[ISBN-0-315-87316-7] p 3867 N94-31832
Positron-molecule interactions
[AD-A276542] p 3869 N94-32082

POSITRONS
Positron-molecule interactions
[AD-A276542] p 3869 N94-32082
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779

POTASSIUM
Silicone grease as a precursor to a pseudo crown-ether ligand: Crystal structure of (K(+)K(Me2SiO)7(+)) (HIn(CH2CMe3)3(-))4
[AD-A276343] p 3895 N94-31327

POTASSIUM ALLOYS
Electrooptic crystal growth and properties
[AD-A276023] p 3896 N94-31439
Structural ordering in liquid K-Te alloys
[DE94-008477] p 3645 N94-32514

POTASSIUM HYDROXIDES
Development of nickel and metal hydride secondary battery
[DE94-757270] p 3697 N94-32917

POTASSIUM OXIDES
High T(sub c) superconductor tunnel junctions for photon detectors
[DE94-007686] p 3904 N94-32602

POTASSIUM PERCHLORATES
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic
[DE94-006467] p 3666 N94-31827

POTASSIUM PHOSPHATES
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963

POTENTIAL ENERGY
Interaction of water with metal surfaces
[AD-A276260] p 3632 N94-31293
Chemisorbed-molecule potential-energy surfaces and electronically-stimulated processes
[DE94-007932] p 3719 N94-32603
Computed potential energy surfaces for chemical reactions
[NASA-CR-195835] p 3639 N94-33036

POTENTIAL FLOW
Prediction of transonic potential flow with slipstreams around configurations
[FFA-TN-1992-15] p 3568 N94-31220
A novel potential/viscous flow coupling technique for computing helicopter flow fields
[NASA-CR-193272] p 3571 N94-32476

POTENTIAL THEORY
A general stochastic Liouville theory for sequential and superexchange electron-transfer reactions involving three Marcus potential surfaces
[DE94-007695] p 3869 N94-32141

POTENTIOMETERS
Lessons learned from selecting and testing spaceflight potentiometers p 3607 N94-33318

POWDER (PARTICLES)
Effect of surface forces on the rheology of particle-liquid systems and the consolidation of ceramic powders
[AD-A277092] p 3657 N94-32391
SUNY beamline facilities at the National Synchrotron Light Source
[DE94-006343] p 3905 N94-32770
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
Characterization of nanoparticles and nanophase materials
[DE94-008348] p 3907 N94-32990

POWDER METALLURGY
Powder metallurgical processing of fibre reinforced aluminium composites
[PB94-148285] p 3620 N94-31688
Pressureless sintering of ceramic composites
[AD-A277274] p 3657 N94-32404
On the formation of muon- and zeta-phases in Ag-Al system by mechanical alloying
[DE94-007125] p 3645 N94-32636

POWDERED ALUMINUM
On the formation of muon- and zeta-phases in Ag-Al system by mechanical alloying
[DE94-007125] p 3645 N94-32636

POWER AMPLIFIERS
Design of a high power x-band magnicon amplifier
[AD-A277001] p 3692 N94-32199
Design, characterization and control of the Unique Mobility Corporation robot p 3603 N94-33296

POWER CONDITIONING
Optimal adaptive estimation algorithm for harmonic current reduction using power limited active line conditioners
[AD-A277354] p 3693 N94-32336
Universal signal conditioning amplifier p 3699 N94-32460
The constant current loop: A new paradigm for resistance signal conditioning p 3685 N94-32461
Field operation test of utility interactive load conditioner with photovoltaic cells at a demonstration house
[DE94-757271] p 3762 N94-32918

POWER CONVERTERS
Real time simulation model for designing converter regulation
[ETN-94-95735] p 3689 N94-31576

POWER EFFICIENCY
Optimal reactive power dispatch of power systems using nonlinear programming
[MATHS-REPT-A-209] p 3808 N94-31164

POWER LINES
Optimal adaptive estimation algorithm for harmonic current reduction using power limited active line conditioners
[AD-A277354] p 3693 N94-32336

POWER SPECTRA
Analysis using bi-spectral related technique
[AD-A276017] p 3672 N94-31386
Atmospheric structure simulation: An autoregressive model for smooth geophysical power spectra with known autocorrelation function
[AD-A276691] p 3773 N94-32118
Note on the variance of autospectral density processed using Welch's method
[DE94-005352] p 3849 N94-32675

POWER TRANSMISSION
High-temperature superconducting transformer performance, cost, and market evaluation
[DE94-005494] p 3687 N94-31152
Roll ring assemblies for the Space Station
p 3603 N94-33294
PRE-MAIN SEQUENCE STARS
Circumstellar material around young stars in Orion
p 3930 N94-31133
Double-lined pre-main-sequence binaries: A test of pre-main-sequence evolutionary theory
p 3933 N94-31497
Radio emission from pre-main-sequence stars
p 3955 N94-31890
PRECESSION
A twisted disk equation that describes warped galaxy disks p 3928 N94-31118
The dynamical settling of warped disks and angular momentum transport in galaxies p 3928 N94-31121
Hyperon polarization, crystal channeling, and E781 at Fermilab
[DE94-008224] p 3877 N94-32802
PRECIPITATES
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993
PRECIPITATION (CHEMISTRY)
Preparation of catalyst particles using methods of colloid chemistry. Part 1: Preparation of silica particles from alcohol solutions
[PB94-135597] p 3634 N94-31679
PRECIPITATION (METEOROLOGY)
Some aspects of the drought in North Africa and in the Mediterranean basin p 3778 N94-30989
Tropical squall lines p 3778 N94-30992
The ocean-atmosphere interactions in the Mediterranean Sea p 3779 N94-30995
The Global Climatology Network precipitation data
[DE93-019199] p 3764 N94-31596
Diagnostic studies of climate variability
[DE94-003629] p 3767 N94-32711
PRECIPITATION HARDENING
Continuous measurement of aging response in aluminum alloys by eddy current methods
[AD-A277233] p 3644 N94-32371
Experimental studies on the effect of coherency strains on coarsening kinetics: Current status and future outlook
[DE94-008480] p 3647 N94-32964
PRECIPITATION PARTICLE MEASUREMENT
Drop size distributions and related properties of fog for five locations measured from aircraft
[NASA-CR-4585] p 3787 N94-33065
PRECISION
Computing the precision of localization in a plane using projective invariants
[TELECOM-93-D-005] p 3840 N94-31095
PRECONDITIONING
Preconditioned time-difference methods for advection-diffusion-reaction equations
[DE94-006472] p 3638 N94-32840
PREDATORS
Qualitative properties of two-dimensional predator-prey systems
[REPT-93-75] p 3844 N94-31644
A predator-prey model with Ivlev's functional response
[REPT-93-79] p 3844 N94-31698
PREDICATE LOGIC
Updates in dynamic semantics
[LP-93-06] p 3856 N94-31450
Weaks vs. strong readings of donkey sentences and monotonicity inference in a dynamic setting
[LP-93-10] p 3856 N94-31468
PREDICTION ANALYSIS TECHNIQUES
Feasibility and stability results for constrained stable generalized predictive control
[MATHS-REPT-A-203] p 3828 N94-31158
Prediction of transonic potential flow with slipstreams around configurations
[FFA-TN-1992-15] p 3568 N94-31220
Development of a three-dimensional icing model for predicting ice accretion on aircraft
[ONERA-NT-1993-5] p 3574 N94-31230
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326
The prediction of convective transfer on the thermal insulation of a solid-propellant rocket motor
[ONERA-NT-1993-15] p 3614 N94-31423
Viscoelastic fracture characterization of polymeric solids p 3652 N94-31745
Computer modelling of cyclic deformation of high-temperature materials
[AD-A277056] p 3623 N94-32012
Fracture and fatigue strength evaluation of multiple site damaged aircraft fuselages - curved panel testing and analysis
[AD-A277100] p 3579 N94-32015
Aircraft weight prediction capability. Volume 1: Weight study and results
[AD-A277206] p 3579 N94-32062
Exploring phase space concepts in the forecasting of time series with artificial neural networks
[DE94-005810] p 3834 N94-32127
Analysis of Dietz's single, rectangular pulse theory for the generation of radiation via photoelectrons
[DE94-006131] p 3681 N94-32661
Aspects of modeling uncertainty and prediction
[DE94-007565] p 3852 N94-32744
User's guide for a flat wake rotor inflow/wake velocity prediction code, DOWN
[NASA-TM-104139] p 3572 N94-32873
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011
Reciprocity-based experimental determination of dynamic forces and moments: A feasibility study
[NASA-CR-194905] p 3862 N94-33023
Statistical characteristics of bistatic surface scatter and mean bistatic surface scattering strengths
[AD-A278155] p 3862 N94-33096
PREDICTIONS
Contribution to the study of multiaxial fatigue under periodic or random stresses
[ISAL-92-0004] p 3734 N94-31544
PREDICTOR-CORRECTOR METHODS
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011
PREFORMS
Second NASA Advanced Composites Technology Conference
[NASA-CP-3154] p 3627 N94-33121
Recent progress in NASA Langley Research Center textile reinforced composites program
p 3629 N94-33134
Advanced textile applications for primary aircraft structures p 3629 N94-33135
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 3630 N94-33136
PREMIXED FLAMES
Turbulence structure of a premixed flame in a coaxial free air jet in the presence or absence of a base flow
[ISBN-0-315-78739-2] p 3633 N94-31471
PREPREGS
Empirical optimization of the consolidation of thermoplastic prepregs
[ISBN-0-315-86455-9] p 3652 N94-31722
PREPROCESSING
Extension of the LUSTRE language and application to circuit design: The LUSTRE V4 language and the POLLUX system
[ETN-94-95918] p 3812 N94-31543
Inflight calibration, preprocessing, and data evaluation of GER 2 imaging spectrometry data
p 3744 N94-31858
CMS Preprocessing Subsystem user's guide: Software version 2.0
[DE94-005327] p 3816 N94-32145
CMS Distribution Subsystem user's guide
[DE94-005328] p 3816 N94-32146
An analog preprocessing architecture for high-speed analog-to-digital conversion
[AD-A276737] p 3807 N94-32163
A novel optoelectronic system for distortion-invariant ATR
[AD-A277985] p 3884 N94-33087
PRESIDENTIAL REPORTS
Aeronautics and space report of the President: Fiscal year 1993 activities p 3966 N94-32854
PRESSURE BROADENING
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351
PRESSURE DEPENDENCE
High pressure experiments on the Y-Ba-Cu-O superconductors: A major role for holes
[ETN-94-96013] p 3897 N94-31547
PRESSURE DISTRIBUTION
Dynamics of flux tubes in accretion disks
p 3932 N94-31142
Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth
[AD-A276424] p 3722 N94-31333
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370
In flight measurement of steady and unsteady blade surface pressure of a single rotation large scale advanced prop-fan installed on the PTA aircraft
[NASA-CR-187096] p 3584 N94-32859
PRESSURE EFFECTS
Computational study of single-expansion-ramp nozzles with external burning
[NASA-TM-106550] p 3700 N94-31229
A model of the ion chemistry of electrified convection
p 3868 N94-31993
Advanced thermally stable jet fuels
[DE94-006760] p 3667 N94-32150
Simulation of low-density nozzle plumes in non-zero ambient pressures
[NASA-TM-106501] p 3615 N94-32742
Composite fuselage shell structures research at NASA Langley Research Center p 3628 N94-33124
The influence of thermal inertia on Mars' seasonal pressure variation and the effect of the weather component p 3952 N94-33238
PRESSURE GRADIENTS
Modification of the MML turbulence model for adverse pressure gradient flows
[NASA-TM-106544] p 3709 N94-32947
PRESSURE MEASUREMENT
Research in marine boundary layer intermittency
[AD-A276076] p 3701 N94-31460
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026
In flight measurement of steady and unsteady blade surface pressure of a single rotation large scale advanced prop-fan installed on the PTA aircraft
[NASA-CR-187096] p 3584 N94-32859
Simultaneous pressure measurement and high-speed photography study of cavitation in a dynamically loaded journal bearing
[NASA-TM-106456] p 3728 N94-32893
PRESSURE OSCILLATIONS
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879
PRESSURE SENSORS
PVDF pressure transducers for shock wave and explosives research
[AD-A277319] p 3712 N94-32051
PRESSURE VESSELS
Development of high-pressure diaphragms for the AEDC impulse tunnel
[AD-A277053] p 3588 N94-32009
Reactor pressure vessel structural integrity research in the US Nuclear Regulatory Commission HSST and HSSI Programs
[DE94-006550] p 3739 N94-32771
PRESSURIZING
Control experiments in liquid metal combustion
[AD-A276918] p 3635 N94-32234
PRETREATMENT
Technology development for iron Fischer-Tropsch catalysts
[DE94-008723] p 3638 N94-32889
Evaluation of the Hughes conversion coating touch-up pen
[AD-A278398] p 3664 N94-33166
PRINCIPAL COMPONENTS ANALYSIS
Principal component analysis with missing data and its application to object modeling
[AD-A276644] p 3845 N94-31939
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539
Statistical intercomparison of global climate models: A common principal component approach
[DE94-008671] p 3768 N94-32882
PRINTED CIRCUITS
From display and PWB to MCMs: Large panel manufacturing
[DE94-007855] p 3693 N94-32386
An electrical test system for conductor formation process analysis
[DE94-007291] p 3696 N94-32786
Space flight printed wiring board measling investigation
[NASA-TM-104602] p 3732 N94-33101
PRIVACY
PEM public key certificate cache server
[DE94-006404] p 3675 N94-31784
PROBABILITY DENSITY FUNCTIONS
Detection of a chi-square fluctuating target in Gaussian noise
[AD-A276078] p 3850 N94-31462

Mixture model simulating reactive turbulent flows: Testing of Eulerian-Lagrangian probabilistic models
[ONERA-NT-1993-13] p 3702 N94-31477
Diagonal band probability distributions
[REPT-93-80] p 3851 N94-31697
A non-local model for prediction of the probability density function of turbulent fluctuations in boundary-layer flows
p 3706 N94-32076
High-performance speech recognition using consistency modeling
[AD-A276775] p 3679 N94-32185

PROBABILITY DISTRIBUTION FUNCTIONS
Diagonal band probability distributions
[REPT-93-80] p 3851 N94-31697
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698
On the relationship between generalization error, hypothesis complexity, and sample complexity for radial basis functions
[AD-A276802] p 3851 N94-32142

PROBABILITY THEORY
A probabilistic view of Datalog parallelization
[TELECOM-93-D-021] p 3824 N94-31183
Study of B(0) - bar-B(0) mixing in D0
[DE94-006000] p 3897 N94-31506
The Laplace functional and Palm measure of a quasi-Cox process which is driven by a Markov chain
[REPT-93-82] p 3851 N94-31699
Performance metrics for low probability of intercept-communication system
[AD-A277346] p 3677 N94-32073
High-performance speech recognition using consistency modeling
[AD-A276775] p 3679 N94-32185
Multiserver queues with impatient customers
[CWI-BS-R9319] p 3835 N94-32198
An algorithm for probabilistic, totally-ordered temporal projection
[AD-A277341] p 3817 N94-32257
Structural probability concepts adapted to electrical engineering
[NASA-TM-106499] p 3739 N94-32735
Aspects of modeling uncertainty and prediction
[DE94-007565] p 3852 N94-32744
Visual processing of object velocity and acceleration
[AD-A277425] p 3801 N94-32998

PROBLEM SOLVING
On the use of genetic algorithms to solve the time-table problem
[REPT-90-060-REV] p 3829 N94-31176
Techniques for increasing the robustness of iterative algorithms for multi-resources location problems
[REPT-93-037] p 3809 N94-31188
Exact solution of the single machine scheduling problem with earliness and flow time penalties
[REPT-93-038] p 3809 N94-31189
A hypertext system that learns from user feedback
p 3923 N94-32428
Reminding-based learning
[AD-A277424] p 3801 N94-32997

PROCESS CONTROL (INDUSTRY)
Managing customer order driven engineering. An interdisciplinary and design oriented approach
[PB94-145083] p 3917 N94-31583
The future of open architecture process control systems
[DE94-006163] p 3830 N94-31623
Powder metallurgical processing of fibre reinforced aluminium composites
[PB94-148285] p 3620 N94-31688
A fuzzy classifier system for process control
p 3839 N94-32422

PROCUREMENT
Estimating the impact of crashworthiness standards on mortality and morbidity events in the US Army rotary-wing aircraft mishaps
[AD-A277121] p 3575 N94-32363

PRODUCT DEVELOPMENT
A comparison of product realization frameworks
[AD-A275992] p 3810 N94-31357
An application reference model for layered manufacturing
[DE94-006368] p 3811 N94-31484
Concept, construction and testing of a high resolution QCLAM electron spectrometer with large solid angle and high impulse acceptance for the electron accelerator S-DALINAC
[ETN-94-95755] p 3711 N94-31515
Managing customer order driven engineering. An interdisciplinary and design oriented approach
[PB94-145083] p 3917 N94-31583
Effective information modelling support
[PB94-148236] p 3917 N94-31586
Case studies of software process improvement methods
[AD-A277289] p 3818 N94-32508

PRODUCTION COSTS
Budget allocation and monopolistic pricing in a multiproduct firm
[REPT-93-86] p 3924 N94-31617
Recovery of carboxylic acids at pH greater than pKa
[DE94-007030] p 3636 N94-32376
Leveraging metal matrix composites to reduce costs in space mechanisms p 3604 N94-33301

PRODUCTION ENGINEERING
Managing customer order driven engineering. An interdisciplinary and design oriented approach
[PB94-145083] p 3917 N94-31583
Fractional-factorial process development techniques
[DE94-005580] p 3690 N94-31593
Flexible manufacturing for photonics device assembly
p 3669 N94-32449

PRODUCTION MANAGEMENT
An application reference model for layered manufacturing
[DE94-006368] p 3811 N94-31484
Managing customer order driven engineering. An interdisciplinary and design oriented approach
[PB94-145083] p 3917 N94-31583
Process mapping: A user-friendly tool for process improvement
[DE94-004357] p 3730 N94-31605

PRODUCTIVITY
An analysis of the records management process to determine the impact of automation on productivity
[AD-A275923] p 3916 N94-31344
Drug-related problems in the workplace
[CRANFIELD-AERO-9306] p 3914 N94-31538

PROGRAM VERIFICATION (COMPUTERS)
Cleanroom engineering handbook. Volume 6: Certification team practices
[AD-A275951] p 3587 N94-31346
The maintenance of operational flight program
[AD-A276363] p 3565 N94-31367
Testing Operational Flight Programs (OFP's)
[AD-A276361] p 3578 N94-31387
Consistency checks for SCR-style requirements specifications
[AD-A276077] p 3811 N94-31461
An epistemic proof system for parallel processes
[TR-93-17] p 3826 N94-32291
SynRGen: An extensible file reference generator
[AD-A277678] p 3821 N94-33030
Faultless software project
[AD-A278161] p 3822 N94-33188
Ada support for the mathematical foundations of software engineering
[AD-A278031] p 3822 N94-33284

PROGRAMMABLE LOGIC DEVICES
Extension of the LUSTRE language and application to circuit design: The LUSTRE V4 language and the POLLUX system
[ETN-94-95918] p 3812 N94-31543

PROGRAMMING ENVIRONMENTS
E-L user's manual
[AD-A276378] p 3810 N94-31370
LORE and reason maintenance
[REPT-93-88] p 3812 N94-31522
Automatic generation of context-sensitive textual help
[REPT-93-68] p 3812 N94-31646
Incremental recompilation for Standard ML of New Jersey
[AD-A276522] p 3815 N94-32080
Integrated Trusted System Development Environment Process
[AD-A276414] p 3816 N94-32131
MULTIGRAPH: An architecture for model-based programming. Model-based program synthesis for parallel computing. PREMOS: Programming environment for model-based program synthesis, version 01.00.00
[AD-A276949] p 3817 N94-32219
Evolving software reengineering technology for the emerging innovative-competitive era
p 3823 N94-32439
MADE: A Multiple Application Development Environment
[CWI-CS-R9360] p 3822 N94-33097

PROGRAMMING LANGUAGES
LORE and reason maintenance
[REPT-93-88] p 3812 N94-31522
Extension of the LUSTRE language and application to circuit design: The LUSTRE V4 language and the POLLUX system
[ETN-94-95918] p 3812 N94-31543
Methods for parallelizing search paths in phrasing
[AD-A276876] p 3817 N94-32212
Translucent procedures, abstraction without opacity
[AD-A276877] p 3817 N94-32213
Information disclosure in evolving information systems: Taking a shot at a moving target
[TR-93-22] p 3919 N94-32506
Machine assisted implementation of complex algorithms and labor intensive software, closing report
[AD-A277662] p 3821 N94-33027

PROJECT MANAGEMENT
An active computer supported medium for distributed planning in enterprises
[ETN-94-95738] p 3829 N94-31372
Evaluating success levels of mega-projects
p 3599 N94-31432

PROJECT PLANNING
NASA's space platform technology program and planning p 3597 N94-31044
NASCOM system development plan: System description, capabilities, and plans, FY 94-2
[NASA-TM-109744] p 3674 N94-31503

PROJECT SETI
The quest for contact
[NASA-TM-109778] p 3806 N94-32389

PROJECTILES
Tearing resistance of a thin shell against projectile penetration: Material property effects
[DE94-007466] p 3733 N94-31316
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems
[DE94-007250] p 3609 N94-31382

PROJECTIVE GEOMETRY
Computing the precision of localization in a plane using projective invariants
[TELECOM-93-D-005] p 3840 N94-31095
Algebraic functions for recognition
[AD-A276803] p 3846 N94-32167

PROJECTORS
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929

PROKARYOTES
Light utilization and photoinhibition of photosynthesis in marine phytoplankton
[DE94-005505] p 3794 N94-32896

PROLATE SPHEROIDS
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476

PROP-FAN TECHNOLOGY
In flight measurement of steady and unsteady blade surface pressure of a single rotation large scale advanced prop-fan installed on the PTA aircraft
[NASA-CR-187096] p 3584 N94-32859

PROPAGATION VELOCITY
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684

PROPANE
Volatiles combustion in fluidized beds
[DE94-008382] p 3636 N94-32414

PROPELLANT ADDITIVES
A compatibility study of FEFO with various containment materials
[DE94-005753] p 3649 N94-31198

PROPELLANT COMBUSTION
Photothermal laser deflection, an innovative technique to measure particles in exhausts
[AD-A277151] p 3718 N94-32366

PROPELLANT GRAINS
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124

PROPELLANT STORABILITY
A compatibility study of FEFO with various containment materials
[DE94-005753] p 3649 N94-31198

PROPELLANT STORAGE
A compatibility study of FEFO with various containment materials
[DE94-005753] p 3649 N94-31198

PROPELLER BLADES
In flight measurement of steady and unsteady blade surface pressure of a single rotation large scale advanced prop-fan installed on the PTA aircraft
[NASA-CR-187096] p 3584 N94-32859

PROPELLER FANS
In flight measurement of steady and unsteady blade surface pressure of a single rotation large scale advanced prop-fan installed on the PTA aircraft
[NASA-CR-187096] p 3584 N94-32859

PROPELLER NOISE
A pilot study of comfort criteria and sound quality metrics for sound inside cabins of propeller-driven aircraft
[CTH-F-93-03] p 3859 N94-31090
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846

PROPELLERS
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846
PROPORTIONAL CONTROL
Development of a reconfigurable helicopter flight control system
[ISBN-0-315-87218-7] p 3585 N94-31837
PROPULSION
Institute for Computational Mechanics in Propulsion (ICOMP)
[NASA-TM-106542] p 3710 N94-32969
PROPULSION SYSTEM CONFIGURATIONS
Futurepath 3
[NASA-TM-109762] p 3735 N94-31819
PROPULSION SYSTEM PERFORMANCE
Futurepath 3
[NASA-TM-109762] p 3735 N94-31819
Performance of a quasi-steady, multi megawatt, coaxial plasma thruster
[NASA-CR-195311] p 3616 N94-32970
PROPULSIVE EFFICIENCY
Pulsed expansion of plasma in a magnetic thruster p 3889 N94-31776
PROSTHETIC DEVICES
Application of dexterous space robotics technology to myoelectric prostheses p 3729 N94-32450
PROTECTION
Controlling hazardous energy sources (lockout/tagout)
[NASA-TM-105290] p 3669 N94-32861
PROTECTIVE CLOTHING
A review of microclimate cooling systems in the chemical, biological, radiological environment
[AD-A276446] p 3802 N94-31302
Proceedings of the DCIEM Diver Thermal Protection Workshop
[DCIEM-92-10] p 3795 N94-31738
Thermotropic liquid crystals: A variable Clo material p 3796 N94-31739
Validation and sensitivity analysis of Texas human thermal model predictions during cold water immersion
[AD-A275240] p 3797 N94-32156
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 389)
[NASA-SP-7011(389)] p 3797 N94-32347
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 385)
[NASA-SP-7011(385)] p 3797 N94-32348
Aircrew Eye/Respiratory Protection (AERP): 16-hour extended wear evaluation of chemical protective equipment
[AD-A277288] p 3804 N94-32609
PROTECTIVE COATINGS
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF p 3593 N94-31024
Low-Earth orbit effects on organic composite materials flown on LDEF p 3595 N94-31036
Evaluation of corrosion protective organic coatings for steel structures in fresh water
[PB94-138484] p 3649 N94-31072
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Electrostatic reduction of particulates for laser resistant hafnia coatings
[DE94-005824] p 3651 N94-31557
Processing boron and boron carbide thin films for protective coatings and device fabrication
[AD-A277266] p 3900 N94-32041
Compilation of diamond-like carbon properties for barriers and hard coatings
[DE94-008231] p 3661 N94-32803
Method and apparatus for inhibiting the disbonding of a paint from metal surfaces
[AD-D016106] p 3663 N94-32960
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029
Evaluation of the Hughes conversion coating touch-up pen
[AD-A278398] p 3664 N94-33166
PROTEINS
Employment of a porous gold actuator in ISFET-based coulometric sensor-actuator systems with application to protein characterization
[ISBN-9-09-005887-7] p 3689 N94-31536
Chemical interactions between protein molecules and polymer membrane materials
[DE94-006987] p 3651 N94-31672
Neural network definitions of highly predictable protein secondary structure classes
[DE94-006234] p 3834 N94-32175
A genetic algorithm based method for docking flexible molecules
[DE94-007525] p 3793 N94-32269
Development and application of photosensitive device systems to studies of biological and organic materials
[DE94-008503] p 3793 N94-32516
The magnesium chelation step in chlorophyll biosynthesis
[DE94-008727] p 3794 N94-32890
PROTOCOL (COMPUTERS)
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
Using atomic actions in replica groups to simplify the replication implementation
[REPT-93-78] p 3813 N94-31695
The FELICIA bulletin board system and the IRBIS anonymous FTP server: Computer security information sources for the DOE community
[DE94-008219] p 3825 N94-31920
The use of service limits for efficient operation of multi-station single-medium communication systems
[CWI-BS-R9312] p 3677 N94-32085
IRIG J asynchronous ASCII time code formats
[AD-A277244] p 3681 N94-32332
Voice and video transmission using XTP and FDDI p 3685 N94-32468
Multicast communication with guaranteed quality of service
[AD-A277650] p 3682 N94-33025
PROTON BEAMS
RHIC spin physics
[DE94-005452] p 3876 N94-32099
PROTON BELTS
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
PROTON-PROTON REACTIONS
Analysis of the high energy behavior of the forward scattering parameters - sigma(tot), rho and B
[DE94-006537] p 3864 N94-31310
PROTONS
State of hadron collider physics
[DE94-005279] p 3863 N94-31147
F0-975, A0-980 as eye-witnesses of confinement
[PB94-147105] p 3868 N94-31923
NN-interaction in (1)S0-state: Virtual level or dibaryon resonance?
[DE94-606492] p 3869 N94-32097
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
Studies of jet production with the D0 detector
[DE94-008271] p 3873 N94-32780
PROTOPLANETS
Observations of accretion and angular momentum regulation in young circumstellar disks and the implications for planetary formation p 3928 N94-31122
Evolution of protoplanetary disks with dynamo magnetic fields p 3931 N94-31135
Multiwavelength search for protoplanetary disks p 3599 N94-31430
Planetesimal dynamics in the vicinity of a growing protoplanet p 3935 N94-31926
PROTOSTARS
Theory of protostellar accretion disks p 3931 N94-31136
Gravitational instabilities in protostellar disks p 3932 N94-31140
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969
PROTOTYPES
Results of real-time testing and demonstration of the US Army Corps of Engineers real-time on-the-fly positioning system
[AD-A276160] p 3576 N94-31080
Model borne data management system for wind tunnel testing, phase 2
[AD-A276296] p 3587 N94-31295
Study of virtual prototyping of aircraft instruments
[CMC-0687-1090] p 3581 N94-31903
Parallel methods for synthesizing whole-hand grasps from generalized prototypes
[AD-A276798] p 3726 N94-32166
Technical evaluation of the UH-60Q: Aircraft in typical aeromedical evacuation missions
[AD-A276944] p 3586 N94-32217
Airborne Trailblazer: Two decades with NASA Langley's 737 flying laboratory
[NASA-SP-4216] p 3566 N94-32793
Design, development, and testing of a lightweight optical sensor cover system p 3604 N94-33302
PSEUDOPOTENTIALS
Theoretical studies of electron transfer and optical spectroscopy
[DE94-006985] p 3871 N94-32375
PSYCHOACOUSTICS
Quality of sound in large rooms: Alteration of room impulse responses
[CTH-E-93-02] p 3859 N94-31077
Complex auditory signals
[AD-A278391] p 3862 N94-33146
PSYCHOPHYSICS
Sensory sensitivities and discriminations and their roles in aviation
[AD-A277312] p 3800 N94-32276
Visual encoding of spatial relations
[AD-A277400] p 3800 N94-32344
Workshop on Visual Perception: Computation and Psychophysics
[AD-A278412] p 3802 N94-33326
PSYCHOPHYSIOLOGY
Determination of multiple sound sources
[AD-A277379] p 3799 N94-32096
From animals to animats
[AD-A277427] p 3802 N94-33241
PUBLIC HEALTH
Systems for the monitoring of working conditions relating to health and safety: Extensive description. Norway
[PB94-138542] p 3803 N94-31839
PUBLIC SPEAKING
An exploratory study of neuro linguistic programming and communication anxiety
[AD-A277756] p 3682 N94-32986
PULMONARY FUNCTIONS
Medical problems in high mountain environments. A handbook for medical officers
[AD-A278095] p 3798 N94-33268
PULSARS
Evolution of vaporizing pulsars p 3929 N94-31128
A study of angular momentum loss in binaries using the free Lagrange method p 3931 N94-31134
A search for 100 TeV gamma ray emission from the x ray binary pulsar 4U 0115+63 using the CYGNUS extensive air-shower array p 3955 N94-31900
The evolutionary status of PSR 1259-63
[DE94-007094] p 3938 N94-32503
PULSE AMPLITUDE
A miniaturized ASIC-based multichannel scaler instrument
[DE94-007222] p 3807 N94-32783
PULSE COMMUNICATION
Channel equalization for block transmission systems
[TELECOM-93-D-002] p 3670 N94-31093
Kalman filtering approach to blind equalization
[AD-A276320] p 3671 N94-31299
The effects of a multipath channel and interference on coherent M-PSK digital communication systems
[AD-A278158] p 3684 N94-33254
PULSE DURATION
Limiting vibration in systems with constant amplitude actuators through command preshaping
[NASA-CR-188284] p 3739 N94-32907
PULSE DURATION MODULATION
Real time simulation model for designing converter regulation
[ETN-94-95735] p 3689 N94-31576
Examination of fast semiconductor diodes (recovery) with respect to switching valves in PWM and resonance devices
[ETN-94-95740] p 3690 N94-31609
Design, characterization and control of the Unique Mobility Corporation robot p 3603 N94-33296
PULSE GENERATORS
Waveform generation for ultra-wideband radar system
[AD-A276352] p 3673 N94-31401
A noncritically phase matched femtosecond optical parametric oscillator near 3 microns
[DE94-008050] p 3720 N94-32704
PULSE MODULATION
Workshop on Commercialization of Pulsed Power Science and Technology Proceedings
[AD-A276987] p 3692 N94-32258
PULSED JET ENGINES
Pulsed expansion of plasma in a magnetic thruster p 3889 N94-31776
PULSED LASER DEPOSITION
In-situ TEM crystallization of anorthite-glass films on (alpha)-Al2O3
[DE94-006317] p 3652 N94-31780
Properties of doped and undoped (Ca,Sr)CuO2 thin films
[DE94-007230] p 3905 N94-32785
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
PULSED LASERS
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
Workshop on Commercialization of Pulsed Power Science and Technology Proceedings
[AD-A276987] p 3692 N94-32258

Ti:sapphire based ultrafast pump-probe laser source in the violet and ultraviolet
[DE94-007542] p 3716 N94-32270
High average power pulsed phase conjugate laser with birefringence correction
[DE94-006049] p 3719 N94-32659
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684
Repetitively pulsed Cr:LiSAF laser for lidar applications
[DE94-007546] p 3720 N94-32761
Progress in understanding and improving x ray lasers
[DE94-006048] p 3720 N94-32794
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS
[DE94-009030] p 3721 N94-32848
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
Ultrafast x ray sources
[AD-A277455] p 3721 N94-33012

PULSED RADIATION
Free electrons as a versatile source of coherent radiation
[ETN-94-96011] p 3715 N94-31545
Design and characterization of a pulsed x ray source for fluorescent lifetime measurements
[DE94-007495] p 3880 N94-32138
A historical perspective on fifteen years of laser damage thresholds at LLNL
[DE94-007930] p 3719 N94-32613

PULTRUSION
Fatigue behavior of unidirectional pultruded composite materials
[ISBN-0-315-86425-7] p 3621 N94-31719

PUMPS
Low power, constant-flow air pump systems
[DE94-007463] p 3727 N94-32758

PURSUIT TRACKING
Analysis of pursuit tracking eye movements in pilots and nonfliers
[AD-A276597] p 3799 N94-32035

PUSHBROOM SENSOR MODES
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539

PYRIDINES
Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3657 N94-32364
Laser flash photolysis, EPR and Raman studies of liquids at elevated pressures
[DE94-008351] p 3718 N94-32413

PYROELECTRICITY
Photopyroelectric spectroscopy as a non-intrusive technique for the determination of the optical absorption spectra of multiple quantum well samples
[ISBN-0-315-87164-4] p 3833 N94-31875

PYROLYSIS
The intramolecular cyclization of bis-2,5-dimethylene-2,5-dihydrofurans and bis-2,5-dimethylene-2,5-dihydrothiophenes: An approach to macrocycles
[DE94-007060] p 3657 N94-32377
Improved oxidation resistance of 3-D carbon/carbon composites
[AD-A277349] p 3625 N94-32624
Structure-property relationships of carbon aerogels
[DE94-007120] p 3660 N94-32687
Direct aromatization of methane
[DE94-008719] p 3638 N94-32888
Evaluation of pyrolysis and arc tracking on candidate wire insulation designs for space applications
[NASA-CR-195332] p 3731 N94-32901
Conversion of polymers of methyl- and vinylsilane to Si-C ceramics
[NASA-TM-106554] p 3662 N94-32945
Novel precursor approached for CMC derived by polymer pyrolysis
[AD-A278383] p 3665 N94-33352

PYROPHORIC MATERIALS
Ignition delays, heats of combustion, and reaction rates of aluminum alkyl derivatives used as ignition and combustion enhancers for supersonic combustion
[NASA-CR-189581] p 3638 N94-32868

PYROTECHNICS
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic
[DE94-006467] p 3666 N94-31827

PYROXENES
Evidence for ultramafic lavas on Syrtis Major
p 3950 N94-33229

Q

Q FACTORS
Aperture excitation of electrically large, lossy cavities
[PB94-145711] p 3675 N94-31683

Q SWITCHED LASERS
Repetitively pulsed Cr:LiSAF laser for lidar applications
[DE94-007546] p 3720 N94-32761

QUADRATIC PROGRAMMING
Large-scale shape optimization: Numerical methods, parallel algorithms, and applications to aerodynamic design p 3815 N94-31966

QUADRATURES
A survey of numerical cubature over triangles
[DE94-006810] p 3841 N94-31274

QUADRUPOLES
General-relativistic celestial mechanics. 4: Theory of satellite motion
[PB94-147782] p 3601 N94-31769
RHIC chromatic correction system
[DE94-008532] p 3883 N94-32994

QUALIFICATIONS
Utilizing a Russian space nuclear reactor for a United States space mission: Flight qualification issues
[DE94-004674] p 3613 N94-31265

QUALITATIVE ANALYSIS
Tetraalkyldiarsines as potential precursors for electronic materials: Synthesis and characterization of various iso-propyl arsenic compounds
[AD-A277003] p 3900 N94-32001

QUALITY
Quality of sound in large rooms: Alteration of room impulse responses
[CTH-E-93-02] p 3859 N94-31077

QUALITY CONTROL
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065
Guide to software quality assurance
[ESA-PSS-05-11-ISSUE-1] p 3809 N94-31223
Cleanroom engineering handbook. Volume 6: Certification team practices
[AD-A275951] p 3587 N94-31346
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers
[DE94-006591] p 3634 N94-32110
Management of government quality assurance functions for NASA contracts
[NHB-5300.4(2B-2)] p 3731 N94-32387
A facilitated mentoring process for engineers
[DE94-005823] p 3914 N94-32677
Pip pin reliability and design p 3605 N94-33305

QUANTITATIVE ANALYSIS
Development of sample charge compensation for characterization of impurities in semiconductor materials
[AD-A277113] p 3899 N94-31983
Rate coefficient for the reaction H + O2 yields OH + O: Results from 2000 to 5300 K
[DE94-008105] p 3871 N94-32615
Molten metal analysis by laser produced plasmas
[DE94-007014] p 3646 N94-32782

QUANTUM CHEMISTRY
International Journal of Quantum Chemistry. Quantum Biology Symposium number 20. Proceedings of the International Symposium on the Application of Fundamental Theory to Problems of Biology and Pharmacology
[AD-A276294] p 3792 N94-31294

QUANTUM CHROMODYNAMICS
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA
[ETN-94-96021] p 3865 N94-31534
Non-equilibrium electrodynamics in the large N expansion
[DE94-006156] p 3911 N94-31760
New QCD results from string theory
[DE94-005226] p 3911 N94-31823
F0-975, A0-980 as eye-witnesses of confinement
[PB94-147105] p 3868 N94-31923
Research in theoretical high-energy physics
[DE94-008388] p 3876 N94-32407
Jet physics and QCD tests at the Tevatron collider
[DE94-008987] p 3871 N94-32587
The form factors of the nucleons
[DE94-007096] p 3872 N94-32630

QUANTUM EFFICIENCY
Quantum well infrared photodetector FPA
[AD-A278010] p 3908 N94-33248

QUANTUM ELECTRODYNAMICS
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
Perturbative aspects of lower-dimensional gauge theories
[ISBN-0-315-86269-6] p 3911 N94-31712
Non-equilibrium electrodynamics in the large N expansion
[DE94-006156] p 3911 N94-31760

QUANTUM ELECTRONICS
Novel growth technologies for in situ formation of semiconductor quantum wire structures
[AD-A277188] p 3902 N94-32255

QUANTUM MECHANICS
Modern integral equation techniques for quantum reactive scattering theory
[DE94-007039] p 3857 N94-31639
Cometary molecules p 3935 N94-31869
Research program in particle physics
[DE94-008449] p 3871 N94-32512
Quantum dynamics in dual spaces
[DE94-008303] p 3913 N94-32824
Computed potential energy surfaces for chemical reactions
[NASA-CR-195835] p 3639 N94-33036

QUANTUM NUMBERS
Baryogenesis from a primordial lepton asymmetry
[PB94-145166] p 3868 N94-31921

QUANTUM THEORY
Dynamical entropy of generalized quantum Markov chains
[PB94-148483] p 3850 N94-31590
Multiparameter quantum groups and multiparameter R-matrices
[CWI-AM-R9307] p 3846 N94-32106
Quantum homogeneous spaces, duality, and quantum 2-spheres
[CWI-AM-R9309] p 3857 N94-32192
Research in theoretical high-energy physics
[DE94-008388] p 3876 N94-32407
Research program in particle physics
[DE94-008449] p 3871 N94-32512
Quantum fluctuations of vortices in Josephson-coupled superconductors
[DE94-007609] p 3905 N94-32747

QUANTUM WELL LASERS
High speed, strained layer, multiquantum well, GaInAsP and GaAs lasers and heterostructures
[AD-A277287] p 3719 N94-32608

QUANTUM WELLS
Photopyroelectric spectroscopy as a non-intrusive technique for the determination of the optical absorption spectra of multiple quantum well samples
[ISBN-0-315-87164-4] p 3833 N94-31875
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360
High speed, strained layer, multiquantum well, GaInAsP and GaAs lasers and heterostructures
[AD-A277287] p 3719 N94-32608
The 6th International Conference on Modulated Semiconductor Structures
[AD-A276815] p 3906 N94-32908
Large-diameter InGaAs/AlGaAs vertical-cavity surface-emitting lasers with low threshold current density fabricated using a simple chemical etch process
[AD-A277733] p 3721 N94-33003
Research in the optical sciences
[AD-A278271] p 3884 N94-33140
Quantum well infrared photodetector FPA
[AD-A278010] p 3908 N94-33248
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

QUARK MODELS
Polarized lepton-nucleon scattering
[DE94-009027] p 3875 N94-33278

QUARK PARTON MODEL
Spin-structure function of the neutron He-3: SLAC results
[DE94-008927] p 3875 N94-33189

QUARKS
Transport properties of quark and gluon plasmas
[DE94-007043] p 3864 N94-31405
F0-975, A0-980 as eye-witnesses of confinement
[PB94-147105] p 3868 N94-31923
The form factors of the nucleons
[DE94-007096] p 3872 N94-32630
CP violation and the top quark
[DE94-008930] p 3874 N94-32841
Nuclear physics and astrophysics
[DE94-007168] p 3939 N94-33147

QUARTZ
NMR characterization of shocked quartz
[DE94-007733] p 3774 N94-32816

QUARTZ CRYSTALS
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010

QUERY LANGUAGES
A probabilistic view of Datalog parallelization
[TELECOM-93-D-021] p 3824 N94-31183
The meaning of duplicates in the relational database model
[CT-93-04] p 3916 N94-31392
A simulation of uncertain reasoning on parametric databases using data-dependency derived inference nets p 3919 N94-32499
Information disclosure in evolving information systems: Taking a shot at a moving target
[TR-93-22] p 3919 N94-32506
QUEUEING THEORY
Performability modelling using DyQNtool+
[MEMO-INF-93-45] p 3812 N94-31659
Light-traffic analysis for queues with spatially distributed arrivals
[MEMO-1150] p 3832 N94-31826
The use of service limits for efficient operation of multi-station single-medium communication systems
[CWI-BS-R9312] p 3677 N94-32085
A polling system with a dormant server
[CWI-BS-R9313] p 3835 N94-32193
Multiserver queues with impatient customers
[CWI-BS-R9319] p 3835 N94-32198
Undiscounted Markov decision chains with partial information; an algorithm for computing a locally optimal periodic policy
[TW-93-10] p 3851 N94-32205

R

RADAR
System analysis of ultra-wideband instrumentation radars: Impulse versus stepped-chirp approaches
[AD-A276624] p 3677 N94-32087
RADAR ANTENNAS
Proceedings of the 1993 Antenna Applications Symposium, volume 1
[AD-A277202] p 3676 N94-32049
Proceedings of the 1993 Antenna Applications Symposium, volume 2
[AD-A277203] p 3677 N94-32050
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
Generation of the ambiguity function for ultra wideband radar waveforms
[AD-A277913] p 3684 N94-33261
RADAR ATTENUATION
Low altitude near-the-horizon propagation: A comparison between RPO and M-layer
[AD-A277358] p 3679 N94-32282
RADAR BEAMS
Subspace estimation without eigenvectors for adaptive beamforming
[AD-A276287] p 3671 N94-31254
RADAR CROSS SECTIONS
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
MOM3D method of moments code theory manual
[NASA-CR-189594] p 3682 N94-32897
RADAR DATA
Radar measurements p 3685 N94-31002
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus p 3776 N94-31106
RADAR DETECTION
Peak detection of Swerling type targets. Part 1: Detection probabilities in white noise
[AD-A276217] p 3670 N94-31062
Proceedings of the 4th Tunnel Detection Symposium on Subsurface Exploration Technology
[AD-A276372] p 3771 N94-31369
Waveform generation for ultra-wideband radar system
[AD-A276352] p 3673 N94-31401
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
Some problems of applied algebra
[CWI-AM-R9306] p 3847 N94-32204
RADAR ECHOES
Radar scattering from the summer polar mesosphere: Theory and observations p 3772 N94-32077
RADAR EQUIPMENT
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-radar module, volume 8
[AD-A276975] p 3589 N94-32314
Assembly flow simulation of a radar p 3823 N94-32431
RADAR IMAGERY
Phase unwrapping problems in ISAR images
[TELECOM-93-D-008] p 3670 N94-31097
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus p 3776 N94-31106
Radar image classification by texture measurements
[ONERA-NT-1993-3] p 3673 N94-31419
Real time character recognition for F-111C video tape records
[AD-A277061] p 3580 N94-32263
Validation support of the ERIM ocean model
[AD-A277364] p 3788 N94-32284
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images p 3750 N94-32535
Fusion of multispectral (XS) and Panchromatic (P) SPOT images and radar images p 3750 N94-32541
Almaz marine applications p 3751 N94-32544
Structural study in an alteritic region: Contribution of ERS-1 SAR data of the Mauges Plateau (Loire Atlantique, France)
[BRGM-93032] p 3752 N94-32551
Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559
European MARS project: The potential integration of SPOT and air- and satellite-borne radar data over two pilot areas for agricultural statistics. PROSPER programme and ERS-1 pilot project
[BRGM-93035] p 3754 N94-32561
Land cover change detection with ERS-1 data and data from other remote sensing satellites. Example: The delta of the River Ebro (Spain) p 3755 N94-32564
The processing technology and some applications of Almaz-1 data p 3756 N94-32573
Synthetic vision technology demonstration. Volume 1: Executive summary
[DOT/FAA/RD-93/40-VOL-1] p 3582 N94-33076
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Synthetic vision technology demonstration. Volume 4: Appendices
[DOT/FAA/RD-93/40-VOL-4] p 3583 N94-33079
RADAR MEASUREMENT
Radar measurements p 3685 N94-31002
Microwave dielectric behavior of soils. Report 1: Summary of related research and applications
[AD-A275980] p 3771 N94-31351
Satellite radar altimetry over the continental ice sheets p 3742 N94-31570
Radar rainfall measurements from space p 3782 N94-31889
High-resolution synthetic aperture radar observations of the Moon p 3676 N94-31952
A reassessment of the in-situ dielectric constant of polar firn
[AD-A276999] p 3773 N94-32154
Gyrotrons and free electron lasers for atmospheric sensing
[AD-A277281] p 3718 N94-32406
The use of ERS images for mapping p 3749 N94-32531
RADAR RECEIVERS
An evaluation of three GPS receivers for use in the GPS sounder
[AD-A278157] p 3577 N94-33253
Generation of the ambiguity function for ultra wideband radar waveforms
[AD-A277913] p 3684 N94-33261
RADAR SCATTERING
Radar scattering from the summer polar mesosphere: Theory and observations p 3772 N94-32077
Millstone Hill radar studies of plasma waves and turbulence
[AD-A278409] p 3684 N94-33172
RADAR SIGNATURES
Precision and level of artefacts in the computation of digital terrain models by interferometry p 3756 N94-32571
RADAR TARGETS
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681
RADAR TRACKING
CRAD Signal and Information Processing Working Group Workshop on Neural networks, volume 1
[DREA-TC-93-305-VOL-1] p 3836 N94-33149
The application of a radial basis function neural network for radar tracking over the sea p 3686 N94-33150
Some neural computing approaches to target tracking p 3837 N94-33151
A heuristic multiple target tracker p 3686 N94-33346
RADAR TRANSMISSION
Waveform generation for ultra-wideband radar system
[AD-A276352] p 3673 N94-31401
Low altitude near-the-horizon propagation: A comparison between RPO and M-layer
[AD-A277358] p 3679 N94-32282
A new tool for signal processing
[AD-A278385] p 3685 N94-33354
RADAR TRANSMITTERS
The CF-18 diagnostic and maintenance expert system project p 3567 N94-33338
RADIAL DISTRIBUTION
Structural ordering in liquid K-Te alloys
[DE94-008477] p 3645 N94-32514
RADIANCE
Custom uniform source system
[NASA-CR-189332] p 3711 N94-31492
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553
RADIANT HEATING
Optical processing for semiconductor device fabrication p 3885 N94-32445
RADIATION ABSORPTION
A comprehensive analysis of electron conical distributions from multi-satellite databases
[NASA-CR-195848] p 3953 N94-33047
RADIATION BELTS
Lightning-induced coupling of the radiation belts to geomagnetically conjugate ionospheric regions p 3772 N94-31773
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
RADIATION CHEMISTRY
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757
RADIATION COUNTERS
The D0 upgrade
[DE94-006953] p 3867 N94-31671
Gamma Large Area Silicon Telescope (GLAST)
[DE94-006439] p 3925 N94-31786
Studies of jet production with the D0 detector
[DE94-008271] p 3873 N94-32780
RADIATION DAMAGE
Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051
The threshold energy for defect production in SiC: A molecular dynamic study
[DE94-007123] p 3896 N94-31499
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666
Experimental investigations and molecular dynamics simulations of radiation induced surface damage
[AD-A277323] p 3871 N94-32621
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993
The impact of ASIC devices on the SEU vulnerability of space-borne computers
[AD-A278134] p 3808 N94-33252
RADIATION DETECTORS
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
High energy physics program at the University of Alabama
[DE94-006544] p 3875 N94-31488
Minimax: Multiparticle physics at the Tevatron collider
[DE94-007095] p 3873 N94-32689
Studies of jet production with the D0 detector
[DE94-008271] p 3873 N94-32780
RADIATION DISTRIBUTION
A study of physical conditions, radiative transfer and shocks in the interstellar medium p 3937 N94-31963
RADIATION DOSAGE
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Ionizing radiation effects on silicon test structures
[DE94-006060] p 3865 N94-31607
Neutron measurements at the commercial aircraft altitudes
[ISBN-0-315-86201-7] p 3955 N94-31709
Ion-irradiation-induced densification of zirconia sol-gel thin films
[DE94-006248] p 3656 N94-32103
Complete model description of an electron beam using ACCEPT Monte Carlo simulation code
[DE94-007063] p 3872 N94-32628

Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin
[DE94-007971] p 3660 N94-32698
Controlling hazardous energy sources (lockout/tagout)
[NASA-TM-105290] p 3669 N94-32861
Electron energy dependence of amorphization in Zr3Fe
[DE94-008459] p 3906 N94-32875
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

RADIATION EFFECTS
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Performance of selected polymeric materials on LDEF p 3593 N94-31023
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
Degradation of optical components in space p 3594 N94-31029
Physical properties of glasses exposed to Earth-facing and trailing-side environments on LDEF p 3594 N94-31030
Space environmental effects on polymer composites: Research needs and opportunities p 3595 N94-31035
Spacecraft materials: Comparison between flight results obtained on LDEF and MIR p 3597 N94-31045
Transient radiation-induced absorption in the materials for a GSGG laser
[DE94-005316] p 3714 N94-31148
Analysis of beam-on-target interaction in a neutron-source test facility
[DE94-005392] p 3863 N94-31151
The role of defects in laser damage of multilayer coatings
[DE94-006731] p 3714 N94-31269
Ion-beam-driven amorphization of Ca2La8(Si4)6O2 single crystals
[DE94-006219] p 3895 N94-31307
Mitigation of adverse environmental effects on lunar-based astronomical instruments p 3598 N94-31426
The threshold energy for defect production in SiC: A molecular dynamic study
[DE94-007123] p 3896 N94-31499
Ionizing radiation effects on silicon test structures
[DE94-006060] p 3865 N94-31607
The influence of transmutation, void swelling, and flux/spectra uncertainties on the electrical properties of copper and copper alloys
[DE94-006213] p 3641 N94-31626
Defect-solute interactions near irradiation grain boundaries
[DE94-006215] p 3641 N94-31627
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764
ITS version 3.0: Powerful, user-friendly software for radiation modelling
[DE94-006607] p 3678 N94-32113
A comparison between two Monte Carlo codes on determination of transient chemical yields
[DE94-007224] p 3636 N94-32251
Analytical solutions of minimum ionization particle induced current shapes of silicon detectors and simulation of charge collection properties
[DE94-007523] p 3870 N94-32355
Intra-cascade surface recombination of point defects during ion bombardment of Ge(001)
[DE94-007740] p 3903 N94-32384
Point defect production, geometry, and stability in silicon: A molecular dynamics simulation study
[DE94-008292] p 3903 N94-32411
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667
Electron energy dependence of amorphization in Zr3Fe
[DE94-008459] p 3906 N94-32875
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

RADIATION HARDENING
Radiation tolerant, high speed, low power, gallium arsenide logic
[AD-A277293] p 3694 N94-32509
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

RADIATION HAZARDS
Laser safety manual for DREO
[AD-A276288] p 3714 N94-31255
High peak power microwaves: A health hazard
[AD-A277168] p 3681 N94-32576
Independent safety assessment of the Topaz-2 space nuclear reactor power system
[DE94-008653] p 3877 N94-32879

RADIATION INJURIES
High peak power microwaves: A health hazard
[AD-A277168] p 3681 N94-32576

RADIATION LAWS
A simple model for determining photoelectron-generated radiation scaling laws
[DE94-006130] p 3761 N94-32660

RADIATION MEASUREMENT
Neutron measurements at the commercial aircraft altitudes
[ISBN-0-315-86201-7] p 3955 N94-31709
Investigation of scintillator and fibre light in plastic scintillation dosimetry
[ISBN-0-315-87190-3] p 3879 N94-31877
System for monitoring and analyzing field energy exposure
[AD-D016115] p 3681 N94-32625
Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759
Radiometry spot measurement system
[NASA-TM-106561] p 3883 N94-32777

RADIATION MEASURING INSTRUMENTS
Evidence of solar oscillations in Rayleigh-scattered light p 3952 N94-31214

RADIATION PROTECTION
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764
Integrated safety program for the Nuclear Electric Propulsion Space Test Program
[DE94-004670] p 3615 N94-32669

RADIATION SHIELDING
Mitigation of adverse environmental effects on lunar-based astronomical instruments p 3598 N94-31426
Complete model description of an electron beam using ACCEPT Monte Carlo simulation code
[DE94-007063] p 3872 N94-32628
Implementation and display of Computer Aided Design (CAD) models in Monte Carlo radiation transport and shielding applications
[DE94-007221] p 3819 N94-32641

RADIATION THERAPY
Laboratory Directed Research & Development Program
[DE94-005928] p 3956 N94-31523

RADIATION TRANSPORT
ITS version 3.0: Powerful, user-friendly software for radiation modelling
[DE94-006607] p 3678 N94-32113
Implementation and display of Computer Aided Design (CAD) models in Monte Carlo radiation transport and shielding applications
[DE94-007221] p 3819 N94-32641
The 2D deterministic radiation transport with the discontinuous finite element method
[DE94-004687] p 3849 N94-32670

RADIATIVE HEAT TRANSFER
Computational radiative heat transfer in homogeneous and nonhomogeneous nonscattering media p 3702 N94-31563
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
An evaluation of RAMS radiation schemes by field measurements
[DE94-008053] p 3767 N94-32750

RADIATIVE LIFETIME
B lifetimes at CDF
[DE94-006850] p 3866 N94-31669

RADIATIVE RECOMBINATION
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

RADIATIVE TRANSFER
Thermal continua of AGN accretion disks p 3931 N94-31137
Three-dimensional radiative transfer calculations on an SIMD machine applied to accretion disks p 3932 N94-31141
A study of physical conditions, radiative transfer and shocks in the interstellar medium p 3937 N94-31963
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars p 3947 N94-33211
How well was total ozone abundance inferred with Mariner 9 p 3947 N94-33212
The wavelength dependence of Martian atmospheric dust radiative properties p 3950 N94-33228

RADICALS
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
A comparison between two Monte Carlo codes on determination of transient chemical yields
[DE94-007224] p 3636 N94-32251

RADIO ANTENNAS
Broadband, high-power, 2-30 MHz, twin-whip antenna. Computer and 1/10-scale model design study
[AD-A277619] p 3682 N94-32971

RADIO ASTRONOMY
Plasma and radio waves from Neptune: Source mechanisms and propagation
[NASA-CR-195877] p 3943 N94-33103

RADIO COMMUNICATION
Fast autodidactic adaptive equalization algorithms
[TELECOM-93-E-018] p 3670 N94-31174
Atmospheric effects assessment program: Ionospheric sounding
[AD-A276447] p 3770 N94-31303
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326
A multichannel architecture for Naval Task Force Communication
[AD-A276230] p 3673 N94-31446
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1990, January 1991
[AD-A276693] p 3676 N94-31998
Design, development, and testing of a Network Frequency Selection Service (NFSS)
[AD-A277362] p 3680 N94-32283
High frequence and automatic link establishment (HF and ALE) radio propagation test to Antarctica
[AD-A277730] p 3682 N94-33001
An analysis of cellular telephone and INMARSAT systems for providing radio data link computer communications for US Navy vessels
[AD-A278143] p 3684 N94-33160
High temperature superconducting Josephson junction array systems, phase 1
[AD-A277937] p 3908 N94-33246

RADIO CONTROL
Remote robot manipulator coupled with remote-controlled guide vehicle for soil sampling in hazardous waste sites p 3723 N94-31569

RADIO EMISSION
Radio emission from pre-main-sequence stars p 3955 N94-31890
Plasma and radio waves from Neptune: Source mechanisms and propagation
[NASA-CR-195877] p 3943 N94-33103

RADIO EQUIPMENT
Low sidelobe reflector antenna design for communications
[AD-A276079] p 3673 N94-31463
High frequence and automatic link establishment (HF and ALE) radio propagation test to Antarctica
[AD-A277730] p 3682 N94-33001

RADIO FREQUENCIES
Noninductive current drive experiments on D3-D, and future plans
[DE94-007373] p 3886 N94-31324
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928
High frequency active auroral research program (HAARP) imager
[AD-A277469] p 3775 N94-32999

RADIO FREQUENCY HEATING
FWCD and ECCD experiments on D3-D
[DE94-007371] p 3890 N94-32201
ICRF heating and current drive in TFTR supershot plasmas: Data analysis and interpretation of ICRF/edge interactions
[DE94-008586] p 3890 N94-32520

RADIO FREQUENCY INTERFERENCE
Aperture excitation of electrically large, lossy cavities
[PB94-145711] p 3675 N94-31683
The effects of a multipath channel and interference on coherent M-PSK digital communication systems
[AD-A278158] p 3684 N94-33254

RADIO FREQUENCY SHIELDING
Aperture excitation of electrically large, lossy cavities
[PB94-145711] p 3675 N94-31683
RADIO HORIZONS
Low altitude near-the-horizon propagation: A comparison between RPO and M-layer
[AD-A277358] p 3679 N94-32282
RADIO METEOROLOGY
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
RADIO RECEIVERS
Design, performance, and test standards for flight termination receivers/decoders. Volume 1: Design and performance requirements
[AD-A277245] p 3602 N94-32333
RADIO SIGNALS
Performance statistics bulletin. High latitude metor scatter propagation, February, March, April, May 1992
[AD-A276667] p 3677 N94-32083
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation, November and December 1989, and January 1990
[AD-A276688] p 3680 N94-32297
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300
Automatic modulation recognition
p 3686 N94-33153
RADIO SPECTROSCOPY
High sensitivity and resolution decimetric spectroscope: Preliminary analysis of solar bursts
[INPE-5537-TDI/525] p 3954 N94-33080
RADIO TELESCOPES
The quest for contact
[NASA-TM-109778] p 3806 N94-32389
RADIO TRANSMISSION
Discrete-event-dynamic-system-based approaches for scheduling transmissions in multihop packet radio networks
[AD-A276566] p 3679 N94-32230
High frequence and automatic link establishment (HF and ALE) radio propagation test to Antarctica
[AD-A277730] p 3682 N94-33001
A comparison of rough surface parabolic equation models
[AD-A278090] p 3791 N94-33185
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186
RADIO TRANSMITTERS
High-power microwave-tube transmitters
[DE94-005340] p 3686 N94-31150
RADIO WAVES
Low altitude near-the-horizon propagation: A comparison between RPO and M-layer
[AD-A277358] p 3679 N94-32282
RADIOACTIVE DECAY
Collective and quasiparticle excitations in light Pb isotopes
[ETN-94-96014] p 3865 N94-31548
RADIOACTIVE WASTES
Surface chemistry and durability of borosilicate glass
[DE94-006734] p 3656 N94-32116
RADIOLYSIS
A comparison between two Monte Carlo codes on determination of transient chemical yields
[DE94-007224] p 3636 N94-32251
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin
[DE94-007971] p 3660 N94-32698
High-energy chemical processes: Laser irradiation of aromatic hydrocarbons
[DE94-008107] p 3720 N94-32707
RADIOMETERS
A study of areas of low radio-thermal emissivity on Venus p 3942 N94-31992
NOAA-9 Earth Radiation Budget Experiment (ERBE) scanner offsets determination
[NASA-TM-109086] p 3785 N94-32737
Radiometry spot measurement system
[NASA-TM-106561] p 3883 N94-32777
Studies of atmospheric dust from Viking IR thermal mapper data p 3948 N94-33216
RADIOMETRIC CORRECTION
European Imaging Spectroscopy Aircraft Campaign
[ESA-SP-360] p 3743 N94-31853
The European Imaging Spectroscopy Airborne Campaign (EISAC). Data takes and evaluation programme: An overview p 3743 N94-31854
Ground based radiometric and atmospheric measurements p 3744 N94-31855
Investigation on correction models for airborne imaging spectrometry data from the EISAC-campaign for geoscientific purposes p 3745 N94-31861
Extraction of agricultural parameters from imaging-spectrometry data and simulated MERIS data through red edge analysis p 3745 N94-31865
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images
p 3750 N94-32535
RADIOSONDES
Coastal boundary layer and refractivity measurements using the ground-based high resolution interferometer sounder (GB-HIS)
[AD-A277980] p 3683 N94-33159
RADIOTELEPHONES
An analysis of cellular telephone and INMARSAT systems for providing radio data link computer communications for US Navy vessels
[AD-A278143] p 3684 N94-33160
RAIL TRANSPORTATION
Theoretical principles for designing long stator/linear motors with iron
[ETN-94-95741] p 3688 N94-31374
Applicable dimensioning and measure and technological examination of long stator-linear motors for magnetic high-speed railways
[ETN-94-95734] p 3689 N94-31575
RAILGUN ACCELERATORS
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher
[DE94-005244] p 3603 N94-32671
RAILS
Considering ties elasticities in high frequency rail dynamics
[ILR-MITT-281(1993)] p 3733 N94-31375
RAIN
Numerical simulations of monsoon rainfall with the NRL/NCSU regional nested grid model
p 3782 N94-31791
Radar rainfall measurements from space
p 3782 N94-31889
Estimation and analysis of climate-scale rainfall over the Tropical Pacific p 3783 N94-32030
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791
TRMM-related research: Tropical rainfall and energy analysis experiment
[NASA-CR-195834] p 3787 N94-33288
RAIN FORESTS
Behavior and dynamics of tropical forests and savannas p 3757 N94-31004
RAINDROPS
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
RAMAN SPECTROSCOPY
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
RANDOM ACCESS MEMORY
Design of free space interconnected signal processor
[AD-A278129] p 3683 N94-33093
RANDOM ERRORS
Regional sources of error growth in the National Meteorological Center's medium-range forecast model
p 3781 N94-31554
Bounds on least-squares four-parameter sine-fit errors due to harmonic distortion and noise
[DE94-007859] p 3849 N94-32653
RANDOM LOADS
Random vibrations of composite beams and plates
p 3735 N94-31777
RANDOM NOISE
Modulation and coding for the Gaussian channel, possibly affected by fluctuations
[TELECOM-93-E-009] p 3840 N94-31169
An adaptive Kalman filter excisor for suppressing narrowband interference
[AD-A276286] p 3671 N94-31253
Analysis using bi-spectral related technique
[AD-A276017] p 3672 N94-31386
Detection of a chi-square fluctuating target in Gaussian noise
[AD-A276078] p 3850 N94-31462
Control of a random walk with noisy delayed information
[CWI-BS-R9316] p 3846 N94-32108
Stochastic realization of a Gaussian stochastic control system
[CWI-BS-R9320] p 3852 N94-32350
The effects of a multipath channel and interference on coherent M-PSK digital communication systems
[AD-A278158] p 3684 N94-33254
RANDOM PROCESSES
On interpolating random fields using a finite number of observations
[CWI-BS-R9314] p 3847 N94-32194
Area-interaction point processes
[CWI-BS-R9318] p 3847 N94-32197
Robust multisource classification method using the Markov random field methods p 3750 N94-32537
RANDOM VARIABLES
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698
On the minimum of independent geometrically distributed random variables
[NASA-CR-194883] p 3821 N94-33075
RANDOM VIBRATION
Random vibrations of composite beams and plates
p 3735 N94-31777
RANDOM WALK
Control of a random walk with noisy delayed information
[CWI-BS-R9316] p 3846 N94-32108
RANGE SAFETY
Design, performance, and test standards for flight termination receivers/decoders. Volume 1: Design and performance requirements
[AD-A277245] p 3602 N94-32333
Integrated safety program for the Nuclear Electric Propulsion Space Test Program
[DE94-004670] p 3615 N94-32669
Independent safety assessment of the Topaz-2 space nuclear reactor power system
[DE94-008653] p 3877 N94-32879
RANKING
List ranking and list scan on the CRAY C-90
[AD-A276411] p 3824 N94-31259
RAPID QUENCHING (METALLURGY)
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
Microstructures and mechanical properties of Al3Ti-based alloys: Analysis in single phase and multiphase systems
[ONERA-NT-1993-6] p 3640 N94-31420
RAPID TRANSIT SYSTEMS
Applicable dimensioning and measure and technological examination of long stator-linear motors for magnetic high-speed railways
[ETN-94-95734] p 3689 N94-31575
RARE EARTH COMPOUNDS
Conductivity measurements of ceria-based solid electrolytes using AC impedance
[DE94-007380] p 3694 N94-32593
RARE EARTH ELEMENTS
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3862 N94-32649
Rare Earth Doped Semiconductors and Materials Research Society Symposium Proceedings, Volume 301
[AD-A277517] p 3908 N94-33055
RARE GASES
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797
RAREFIED GAS DYNAMICS
Surface boundary conditions and related technical issues concerning Burnett equations for 2-D hypersonic flow
[AD-A277322] p 3706 N94-32256
Analysis and computation for vortex dynamics and rarefied gases
[AD-A277415] p 3708 N94-32581
Simulation of CO2 release at 800 km altitude
[AD-A276692] p 3776 N94-33272
RAREFIED GASES
Analysis and computation for vortex dynamics and rarefied gases
[AD-A277415] p 3708 N94-32581
RASTER SCANNING
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
Differential phase acoustic microscope for micro-NDE
[NASA-CR-189617] p 3731 N94-32481
RAWINSONDES
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921

RAY TRACING
The High-Frequency Benchmark propagation program
[AD-A276323] p 3672 N94-31334
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565
Prediction of the plane wave beamformed acoustic arrival structure for the 1992 Barents Sea coastal tomography test
[AD-A276741] p 3788 N94-32181

RAYLEIGH SCATTERING
Evidence of solar oscillations in Rayleigh-scattered light p 3952 N94-31214

RDX
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124

REACTING FLOW
Mixture model simulating reactive turbulent flows: Testing of Eulerian-Lagrangian probabilistic models
[ONERA-NT-1993-13] p 3702 N94-31477
Reactive flows in compact objects p 3934 N94-31567
A numerical method for mixing/chemically reacting compressible flow with finite rate chemistry p 3634 N94-31824
Computed potential energy surfaces for chemical reactions
[NASA-CR-195835] p 3639 N94-33036
Turbulent reacting flows and supersonic combustion
[AD-A277462] p 3639 N94-33242

REACTION KINETICS
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
Combustion-related studies using weakly-bonded complexes
[DE94-006632] p 3633 N94-31493
Cloud studies seen from a physical chemist's perspective
[DE94-006059] p 3771 N94-31527
Modern integral equation techniques for quantum reactive scattering theory
[DE94-007039] p 3857 N94-31639
A numerical method for mixing/chemically reacting compressible flow with finite rate chemistry p 3634 N94-31824
Analysis of forward and inverse problems in chemical dynamics and spectroscopy
[DE94-007607] p 3635 N94-32140
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296
Chemical structure and kinetics at liquid/solid interfaces
[AD-A277112] p 3636 N94-32304
Time-resolved IR spectroscopy, energy transfer, and state-to-state collision dynamics of atmospheric species
[AD-A277372] p 3773 N94-32338
Volatiles combustion in fluidized beds
[DE94-008382] p 3636 N94-32414
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS2 during ion bombardment
[DE94-008487] p 3871 N94-32515
Molecular Science Research Center
[DE94-007464] p 3871 N94-32605
Rate coefficient for the reaction H + O2 yields OH + O: Results from 2000 to 5300 K
[DE94-008105] p 3871 N94-32615
Time-resolved analytical methods for liquid/solid interfaces
[DE94-008352] p 3637 N94-32826
Ignition delays, heats of combustion, and reaction rates of aluminum alkyl derivatives used as ignition and combustion enhancers for supersonic combustion
[NASA-CR-189581] p 3638 N94-32868
Experimental studies on the effect of coherency strains on coarsening kinetics: Current status and future outlook
[DE94-008480] p 3647 N94-32964
Computed potential energy surfaces for chemical reactions
[NASA-CR-195835] p 3639 N94-33036

REACTION PRODUCTS
Ground-based simulation of LEO environment: Investigations of a select LDEF material: FEP Teflon (trademark) p 3596 N94-31039

REACTIVITY
An overview of the Evaluation of Oxygen Interaction with Materials-third phase (EOIM-3) experiment: Space Shuttle Mission 46 p 3596 N94-31040
Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Cloud studies seen from a physical chemist's perspective
[DE94-006059] p 3771 N94-31527

REACTOR DESIGN
Summary of particle bed reactor designs for the Space Nuclear Thermal Propulsion Program
[DE94-007434] p 3615 N94-32266
Overview of H-mode studies in D3-D
[DE94-007430] p 3891 N94-32612

REACTOR MATERIALS
Analysis of beam-on-target interaction in a neutron-source test facility
[DE94-005392] p 3863 N94-31151
Creep properties of vanadium-base alloys
[DE94-006541] p 3641 N94-31486
The influence of transmutation, void swelling, and flux/spectra uncertainties on the electrical properties of copper and copper alloys
[DE94-006213] p 3641 N94-31626
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666
Creep-fatigue criteria and inelastic behavior of modified 9Cr-1Mo steel at elevated temperatures
[DE94-007915] p 3642 N94-31918
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109

REACTOR SAFETY
Quench detection and instrumentation for the Tokamak Physics Experiment magnets
[DE94-006656] p 3888 N94-31667
Integrated safety program for the Nuclear Electric Propulsion Space Test Program
[DE94-004670] p 3615 N94-32669
Independent safety assessment of the Topaz-2 space nuclear reactor power system
[DE94-008653] p 3877 N94-32879

READING
Literacity: A multimedia adult literacy package combining NASA technology, recursive ID theory, and authentic instruction theory p 3924 N94-32462
Reading: Interaction with memory
[AD-A277547] p 3801 N94-32956

REAGENTS
Time-resolved analytical methods for liquid/solid interfaces
[DE94-008352] p 3637 N94-32826

REAL TIME OPERATION
Results of real-time testing and demonstration of the US Army Corps of Engineers real-time on-the-fly positioning system
[AD-A276160] p 3576 N94-31080
Scheduling techniques for multiple processor systems in real-time environments
[AD-A276149] p 3824 N94-31249
New and emerging techniques for imaging surfaces
[AD-A276497] p 3878 N94-31262
Algorithms and structures for real-time signal processing
[AD-A276101] p 3810 N94-31277
ControlShell: A real-time software framework
[AD-A276481] p 3811 N94-31475
A neural network methodology for engineering applications: The learning control of robotic systems
[RR-480] p 3830 N94-31500
The future of open architecture process control systems
[DE94-006163] p 3830 N94-31623
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
A theory of distributed time
[AD-A276631] p 3815 N94-31994
Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020
Gamma-ray optical counterpart search experiment (GROCSE)
[DE94-007124] p 3955 N94-32129
Real time character recognition for F-111C video tape records
[AD-A277061] p 3580 N94-32263
Communication networks for autonomous mobile robot computer architectures and distributed real-time computing p 3680 N94-32310
Photothermal laser deflection, an innovative technique to measure particles in exhausts
[AD-A277151] p 3718 N94-32366
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424
New approaches for real time decision support systems p 3915 N94-32426
Construction of a parallel processor for simulating manipulators and other mechanical systems
[NASA-CR-191327] p 3826 N94-32482
Model-based reconfiguration: Diagnosis and recovery
[NASA-CR-4596] p 3820 N94-32776
A multitasking behavioral control system for the Robotic All Terrain Lunar Exploration Rover (RATLER)
[DE94-007293] p 3835 N94-32787
High frequency active auroral research program (HAARP) imager
[AD-A277469] p 3775 N94-32999
Theory and application of image enhancement
[AD-A277896] p 3821 N94-33031
Real-time centimeter positioning with GPS: A system developed by the US Army Corps of Engineers
[AD-A278152] p 3577 N94-33095
Real-time sensor data validation
[NASA-CR-195295] p 3616 N94-33099
An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine
[AD-A277516] p 3805 N94-33349

RECEIVERS
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
Operational experience and evaluation of a dual-element stretched-membrane heliostat
[DE94-008827] p 3763 N94-32965

RECIRCULATIVE FLUID FLOW
Computational study of simultaneous heat and mass transfer in turbulent separated flows p 3704 N94-31843
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
[NASA-CR-195301] p 3571 N94-32475

RECOMBINATION REACTIONS
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

RECONNAISSANCE AIRCRAFT
Army scout/reconnaissance helicopters versus unmanned aerial vehicles
[AD-A276902] p 3579 N94-32232

RECORDS MANAGEMENT
An analysis of the records management process to determine the impact of automation on productivity
[AD-A275923] p 3916 N94-31344
Developing a personal-computer-based records retention system using Paradox(tm)
[DE94-007984] p 3819 N94-32749

RECRYSTALLIZATION
Work hardening behavior in aluminum alloy 2090
[DE94-007036] p 3643 N94-32064
Attempts to model the generation of new grain boundaries during the deformation of polycrystals
[DE94-007527] p 3903 N94-32597

RECTANGULAR PANELS
Response of a cantilevered plate in supersonic flow
[AD-A277487] p 3580 N94-33107

RECTANGULAR PLATES
Nonlinear vibration analysis of laminated plates on linear and nonlinear elastic foundations p 3737 N94-32079

RECTANGULAR WAVEGUIDES
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908

RECTANGULAR WINGS
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
[NASA-CR-195301] p 3571 N94-32475

RECURSIVE FUNCTIONS
Formal verification of systolic multipliers with the Boyer-Moore theorem prover
[RR-897-M] p 3839 N94-31082

RECYCLING
Feasibility study for the recycling of nickel metal hydride electric vehicle batteries
[DE94-000268] p 3690 N94-31598

RED SHIFT
A constraint on the pair-density ratio (Z+) in an electron-positron pair wind p 3930 N94-31132
The kinematics of dense clusters of galaxies p 3937 N94-32029

REDUNDANCY
A PC program to optimize system configuration for desired reliability at minimum cost p 3823 N94-32438
A new solution method for the inverse kinematic joint velocity calculations of redundant manipulators
[DE94-004427] p 3727 N94-32682

REDUNDANT COMPONENTS
A PC program to optimize system configuration for desired reliability at minimum cost p 3823 N94-32438
Hierarchical modeling for reliability analysis using Markov models
[NASA-CR-188288] p 3731 N94-32862
Fault detection and isolation for the Bluebird test bed aircraft
[AD-A277979] p 3586 N94-33086
REED-SOLOMON CODES
Modulation and coding for the Gaussian channel, possibly affected by fluctuations
[TELECOM-93-E-009] p 3840 N94-31169
REFERENCE STARS
Design and early results of the sodium-layer laser guide star adaptive optics experiment at the Lawrence Livermore National Laboratory
[DE94-006653] p 3926 N94-32189
REFLECTANCE
Modeling the interaction between solar radiation and terrestrial surfaces p 3779 N94-30999
Shiptrack database analysis
[AD-A277228] p 3746 N94-32025
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Research and applications of a canopy reflectance model p 3747 N94-32492
A quest for a new superconducting state
[DE94-008439] p 3908 N94-32991
REFLECTOR ANTENNAS
Low sidelobe reflector antenna design for communications
[AD-A276079] p 3673 N94-31463
Proceedings of the 1993 Antenna Applications Symposium, volume 1
[AD-A277202] p 3676 N94-32049
Proceedings of the 1993 Antenna Applications Symposium, volume 2
[AD-A277203] p 3677 N94-32050
INSAT-2A and 2B development mechanisms p 3603 N94-33293
Special test equipment and fixturing for MSAT reflector assembly alignment p 3606 N94-33316
REFLECTORS
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Special test equipment and fixturing for MSAT reflector assembly alignment p 3606 N94-33316
REFLEXES
Analysis of pursuit tracking eye movements in pilots and nonfliers
[AD-A276597] p 3799 N94-32035
REFRACTED WAVES
Ocean acoustic propagation measurements and wave propagation in random media
[AD-A276165] p 3787 N94-31053
REFRACTIVITY
Ocean acoustic propagation measurements and wave propagation in random media
[AD-A276165] p 3787 N94-31053
Multifunctional macromolecules
[AD-A277347] p 3656 N94-32246
Coastal boundary layer and refractivity measurements using the ground-based high resolution interferometer sounder (GB-HIS)
[AD-A277980] p 3683 N94-33159
REFRACTORIES
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825
REFRACTORY COATINGS
The development of CVR coatings for PBR fuels
[DE94-004233] p 3875 N94-31480
REFRACTORY MATERIALS
High temperature NASP engine seal development
[NASA-TM-109750] p 3725 N94-31804
Computer modelling of cyclic deformation of high-temperature materials
[AD-A277056] p 3623 N94-32012
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825
Research on high reliability refractory ohmic contacts for GaAs FETs and MODFETs
[AD-A276848] p 3697 N94-33034
REFRACTORY METAL ALLOYS
Recent advances and developments in refractory alloys
[DE94-007929] p 3644 N94-32374
High temperature materials technology research for advanced thermionic systems
[DE94-008444] p 3644 N94-32416
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825
REFRACTORY METALS
Recent advances and developments in refractory alloys
[DE94-007929] p 3644 N94-32374
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825
REFRIGERANTS
Application of natural refrigerants: A rational solution to a pressing problem
[PB94-138781] p 3668 N94-31073
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-007723] p 3653 N94-31917
Compatibility of refrigerants and lubricants with elastomers
[DE94-008552] p 3658 N94-32518
REFRIGERATING
Application of natural refrigerants: A rational solution to a pressing problem
[PB94-138781] p 3668 N94-31073
REGENERATIVE COOLING
The 4 K Stirling cryocooler demonstration
[NASA-CR-191792] p 3669 N94-32484
REGENERATORS
The 4 K Stirling cryocooler demonstration
[NASA-CR-191792] p 3669 N94-32484
REGOLITH
The pH of Mars p 3950 N94-33225
Temporal changes in the geographic distribution, elevation, and potential origin of the Martian outflow channels p 3951 N94-33235
Simultaneous laboratory measurements of CO2 and H2O adsorption on palagonite: Implications for the Martian climate and volatile reservoir p 3952 N94-33240
REGRESSION ANALYSIS
Representation, prediction and identification of cyclostationary processes: A state-space approach
[REPT-93-041] p 3850 N94-31191
A review of sensitivity analysis techniques
[DE94-007192] p 3842 N94-31399
Diagonal band probability distributions
[REPT-93-80] p 3851 N94-31697
Multiple regression and measurement errors: Relative efficiency of two models, the standard model and Fuller's model, for estimating structural relationships
[ISBN-0-315-86834-1] p 3845 N94-31755
Feasibility evaluation of new data interpretation approaches for vegetation analysis from airborne imaging spectroscopy p 3745 N94-31862
Hierarchical mixtures of experts and the EM algorithm
[AD-A276516] p 3814 N94-31932
Proceedings of the NIPS 1993 Postconference Workshop on Pulling It All Together: Methods for Combining Neural Networks
[AD-A277507] p 3836 N94-33014
REINFORCED PLATES
Vibrational and acoustic response of ribbed plates p 3736 N94-31955
REINFORCEMENT (STRUCTURES)
Test and analysis results for composite transport fuselage and wing structures p 3628 N94-33129
REINFORCING FIBERS
On the mechanics of stress analysis of fiber-reinforced composites p 3619 N94-31481
Toughening mechanisms in fiber-reinforced ceramic-matrix composites p 3622 N94-31943
Mechanics of the single fiber pullout problem with several interface conditions p 3623 N94-32078
The effect of ductile phase (Nb) reinforcement morphology on the mechanical behavior of an intermetallic matrix (MoSi2) p 3615 N94-32500
Engineering scale development of the Vapor-Liquid-Solid (VLS) process for the production of silicon carbide fibrils
[DE94-007132] p 3659 N94-32618
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 3630 N94-33136
REINFORCING MATERIALS
Leveraging metal matrix composites to reduce costs in space mechanisms p 3604 N94-33301
RELATIVISTIC EFFECTS
General-relativistic celestial mechanics. 4: Theory of satellite motion
[PB94-147782] p 3601 N94-31769
RELATIVISTIC ELECTRON BEAMS
Pinched propagation of high-power, pulsed electron beams for welding and materials processing applications
[AD-A276925] p 3726 N94-32236
RELATIVISTIC PARTICLES
Perturbative and nonperturbative EM lepton pair production in relativistic heavy-ion collisions
[DE94-006315] p 3867 N94-31779
RELATIVISTIC PLASMAS
Transport properties of quark and gluon plasmas
[DE94-007043] p 3864 N94-31405
Non-equilibrium electrodynamics in the large N expansion
[DE94-006156] p 3911 N94-31760
RELATIVISTIC THEORY
General-relativistic celestial mechanics. 4: Theory of satellite motion
[PB94-147782] p 3601 N94-31769
RELATIVITY
Lattice geometrodynamics p 3857 N94-31825
RELAXATION (MECHANICS)
Viscoelastic fracture characterization of polymeric solids p 3652 N94-31745
RELAXATION METHOD (MATHEMATICS)
Exact solution of the single machine scheduling problem with earliness and flow time penalties
[REPT-93-038] p 3809 N94-31189
RELIABILITY
Reliability of multilayer copper/polyimide
[AD-A276228] p 3650 N94-31284
Validation of the Environmentally Conscious Manufacturing Integrated Demonstration hardware
[DE94-003824] p 3765 N94-32144
Effect of surface forces on the rheology of particle-liquid systems and the consolidation of ceramic powders
[AD-A277092] p 3657 N94-32391
A PC program to optimize system configuration for desired reliability at minimum cost p 3823 N94-32438
Space flight risk data collection and analysis project: Risk and reliability database
[NASA-CR-195879] p 3603 N94-32494
Temperature-humidity-bias aging technique to identify defective surface mount capacitors
[DE94-005354] p 3660 N94-32727
Implementing software safety in the NASA environment
[NASA-TM-106597] p 3731 N94-33032
Pip pin reliability and design p 3605 N94-33305
RELIABILITY ANALYSIS
An evaluation of aircraft maintenance performance factors in the objective wing
[AD-A276010] p 3565 N94-31362
Reliability analysis of structural ceramics subjected to biaxial flexure p 3650 N94-31454
Statistical inference for coherent systems from partial information and in resampling techniques in survival analysis
[AD-A277382] p 3852 N94-32339
A PC program to optimize system configuration for desired reliability at minimum cost p 3823 N94-32438
Automatic contact in DYNA3D for vehicle crashworthiness
[DE94-007143] p 3738 N94-32637
Hierarchical modeling for reliability analysis using Markov models
[NASA-CR-188288] p 3731 N94-32862
Stochastic models in reliability theory
[AD-A277529] p 3731 N94-32953
Spur, helical, and spiral bevel transmission life modeling
[NASA-TM-106552] p 3728 N94-32979
Accelerated reliability testing utilizing design of experiments
[AD-A277989] p 3732 N94-33088
Advanced release technologies program p 3607 N94-33322
Assessing the vulnerability of multi-commodity networks with failing components
[AD-A278434] p 3684 N94-33334
RELIABILITY ENGINEERING
Engineering of damage in ion implanted silicon
[ISBN-9-09-005097-3] p 3897 N94-31521
RELIEF MAPS
SPOT imagery for updating land cover information of 1:50,000 numerical topographic maps p 3749 N94-32532
Example of SPOT/ERS-1 complementarity p 3749 N94-32533
REMOTE CONSOLES
Relationships between access and use in information systems: Remote access to and browsing of online catalogs p 3919 N94-32488
REMOTE CONTROL
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
A low-cost, CCD solid state star tracker
[NASA-CR-192722] p 3682 N94-32417
Applying robotics to HAZMAT p 3729 N94-32452

Technology transfer of operator-in-the-loop simulation p 3802 N94-32472

REMOTE SENSING

Subtropical Climates and Their Evolution: From Space-Based Observation to Modelling
[ISBN-2-85-428333-3] p 3776 N94-30981

Radiation/remote sensing: Review of the principal definitions p 3757 N94-30996

Modeling the interaction between solar radiation and terrestrial surfaces p 3779 N94-30999

Radar measurements p 3685 N94-31002

Airborne instruments p 3757 N94-31006

Global change research and NASA's Earth Observing System
[PB94-126992] p 3741 N94-31068

Chamber optics for testing passive remote sensing vapor detectors
[AD-A275909] p 3878 N94-31340

Gas hydrate detection and mapping on the US east coast
[DE94-005959] p 3742 N94-31504

Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553

Imaging devices for satellite remote sensing
[VTT-TIED-1517] p 3743 N94-31658

The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761

European Imaging Spectroscopy Aircraft Campaign
[ESA-SP-360] p 3743 N94-31853

The European Imaging Spectroscopy Airborne Campaign (EISAC). Data takes and evaluation programme: An overview p 3743 N94-31854

NORSMAP 1989: Norwegian remote sensing spectroscopy for mapping and monitoring or algal blooms and pollution p 3744 N94-31856

Analysis of GER imaging spectrometry data for the identification of soil and vegetation parameters in land degradation studies p 3744 N94-31857

Inflight calibration, preprocessing, and data evaluation of GER 2 imaging spectrometry data p 3744 N94-31858

Possibilities of GER data for soil surface characteristics in the Almaden area p 3744 N94-31859

The effects of vegetation on the ability to map soils using GERIS data p 3744 N94-31860

Investigation on correction models for airborne imaging spectrometry data from the EISAC-campaign for geoscientific purposes p 3745 N94-31861

Feasibility evaluation of new data interpretation approaches for vegetation analysis from airborne imaging spectroscopy p 3745 N94-31862

Monitoring fertilizer application by imaging spectrometry (Somerset Levels test site) p 3745 N94-31863

High resolution spectroscopy in agriculture: Results of the EISAC 1989 campaign p 3745 N94-31864

Extraction of agricultural parameters from imaging-spectrometry data and simulated MERIS data through red edge analysis p 3745 N94-31865

Remote infrared vapor detection of volatile organic compounds
[AD-A276982] p 3746 N94-31999

Estimation and analysis of climate-scale rainfall over the Tropical Pacific p 3783 N94-32030

Gyrotrons and free electron lasers for atmospheric sensing
[AD-A277281] p 3718 N94-32406

Remote sensing for urban planning p 3758 N94-32465

Remote sensing and the Mississippi high accuracy reference network p 3758 N94-32466

Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536

Ship traffic monitoring and oil spill detection using the ERS-1 SAR p 3751 N94-32542

SAR image feature extraction system: A pre-operational application of ERS-1 SAR p 3751 N94-32543

Almaz marine applications p 3751 N94-32544

Evaluation of the potential of SAR data for mapping of landslide risks
[BRGM-93033] p 3753 N94-32552

A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping p 3753 N94-32556

Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559

Monitoring landsurface characteristics in Niger using complementary SPOT and ERS-1 SAR data p 3754 N94-32560

European MARS project: The potential integration of SPOT and air- and satellite-borne radar data over two pilot areas for agricultural statistics. PROSPER programme and ERS-1 pilot project
[BRGM-93035] p 3754 N94-32561

Evaluation of surface phase change on large zones p 3755 N94-32567

Quantitative analysis of woody vegetation in Soudano-Sahalian region. Textural approach (application to a Burkina Faso region) p 3757 N94-32574

Statistical analysis and mapping of cotton and food crop cultivation surfaces in the west of Burkina Faso: Contribution of combined SPOT P and XS data p 3757 N94-32575

An integrated cloud observation and modeling investigation in support of the ARM program
[DE94-003160] p 3785 N94-32716

Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759

Repetitively pulsed Cr:LiSAF laser for lidar applcations
[DE94-007546] p 3720 N94-32761

Evolution of diurnal surface winds and surface currents for Monterey Bay
[AD-A277649] p 3790 N94-33057

REMOTE SENSORS

Space equipment for Earth observations p 3613 N94-30997

Airborne instruments p 3757 N94-31006

Imaging devices for satellite remote sensing
[VTT-TIED-1517] p 3743 N94-31658

The processing technology and some applications of Almaz-1 data p 3756 N94-32573

REMOTELY PILOTED VEHICLES

Unmanned Air Vehicle/Remotely Piloted Vehicle analysis for lethal UAV/RPV
[AD-A276052] p 3578 N94-31442

A model geophysics program
[DE94-007415] p 3747 N94-32203

Army scout/reconnaissance helicopters versus unmanned aerial vehicles
[AD-A276902] p 3579 N94-32232

RENDEZVOUS GUIDANCE

Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020

RENDEZVOUS TRAJECTORIES

A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388

RENORMALIZATION GROUP METHODS

Renormalization group theory of Bolgiano scaling in Boussinesq turbulence
[NASA-TM-106602] p 3710 N94-33070

REPEATERS

Advanced satellite communication system
[NASA-CR-194211] p 3681 N94-32477

REPLACING

Enhanced thermal capacity aerogels summary report, FY 1993
[DE94-008888] p 3639 N94-33260

REPORTS

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 11: The voice of the user: How US aerospace engineers and scientists view DOD technical reports
[NASA-TM-109348] p 3921 N94-32834

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 25: The technical communications practices of British aerospace engineers and scientists: Results of the phase 4 RAeS mail survey
[NASA-TM-109098] p 3922 N94-32836

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 24: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SAE mail survey
[NASA-TM-109088] p 3922 N94-32837

REPRODUCTION (BIOLOGY)

The legacy of Kermack and McKendrick
[CWI-AM-R9304] p 3793 N94-32228

REQUIREMENTS

MODIS. Volume 1: MODIS level 1A software baseline requirements
[NASA-TM-104594-VOL-1] p 3823 N94-33287

RESCUE OPERATIONS

SATCOM feasibility study for search and rescue aircraft
[DSIS-94-01083] p 3575 N94-31902

The ALEXIS mission recovery
[DE94-007549] p 3611 N94-32813

RESEARCH

Aviation human factors research in US universities: Potential contributions to national needs
[NASA-TM-108814] p 3575 N94-32927

RESEARCH AIRCRAFT

Fault detection and isolation for the Bluebird test bed aircraft
[AD-A277979] p 3586 N94-33086

RESEARCH AND DEVELOPMENT

Naval Surface Warfare Center Dahlgren Division Technical Digest: Advanced materials technology
[AD-A276448] p 3668 N94-31364

Laboratory Directed Research & Development Program
[DE94-005928] p 3956 N94-31523

The contribution of aeronautics and astronautics to the quality of life on Earth
[ILR-MITT-283(1993)] p 3764 N94-31611

Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814

NASA select yearender review
[NASA-TM-109748] p 3956 N94-31885

Division of Microwave Technology
[PB94-148079] p 3676 N94-31925

Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools
[DE94-006367] p 3901 N94-32104

X ray optics for science and technology
[AD-A277369] p 3880 N94-32155

The future of high energy physics in the US statement for the Science Subcommittee of the House Science, Space and Technology Committee
[DE94-008986] p 3876 N94-32586

The future of high-energy physics in the US: Statement for the 1994 HEPAP Subpanel
[DE94-008994] p 3876 N94-32588

Research on stable, high-efficiency amorphous silicon multijunction modules
[DE94-000298] p 3695 N94-32680

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 5: Aerospace librarians and technical information specialists as information intermediaries: A report of phase 2 activities of the NASA/DOD Aerospace Knowledge Diffusion Research Project
[NASA-TM-109777] p 3921 N94-32829

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 10: The NASA/DOD Aerospace Knowledge Diffusion Research Project
[NASA-TM-109769] p 3921 N94-32831

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 12: The diffusion of federally funded aerospace research and development (R/D) and the information seeking behavior of US aerospace engineers and scientists
[NASA-TM-109404] p 3921 N94-32832

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 18: Scientific and Technical Information (STI) policy and the competitive position of the US aerospace industry
[NASA-TM-109782] p 3921 N94-32833

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 1: The value of scientific and technical information (STI), its relationship to Research and Development (R/D), and its use by US aerospace engineers and scientists
[NASA-TM-109774] p 3922 N94-32835

LLNL casting technology
[DE94-008282] p 3669 N94-32839

Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878

Research and Technology Objectives and Plans Summary (RTOPS)
[NASA-TM-105441] p 3966 N94-32885

Aerospace sponsored research
[ATR-93(8498)-1] p 3966 N94-32949

Novel sol-gel deposition for repair of conducting paths in polyceramic systems
[AD-A278381] p 3664 N94-33350

RESEARCH FACILITIES

BNL possibilities
[DE94-007179] p 3864 N94-31398

Free electrons as a versatile source of coherent radiation
[ETN-94-96011] p 3715 N94-31545

Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814

NASA select yearender review
[NASA-TM-109748] p 3956 N94-31885

Airborne Trailblazer: Two decades with NASA Langley's 737 flying laboratory
[NASA-SP-4216] p 3566 N94-32793

RESEARCH MANAGEMENT

NASA select yearender review
[NASA-TM-109748] p 3956 N94-31885

Construction of visual representations and time-space organization of resources in astronomy
[ISBN-0-315-86694-2] p 3925 N94-31914
Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools
[DE94-006367] p 3901 N94-32104
Research and Technology Objectives and Plans Summary (RTOPS)
[NASA-TM-105441] p 3966 N94-32885
Aviation human factors research in US universities: Potential contributions to national needs
[NASA-TM-108814] p 3575 N94-32927

RESEARCH PROJECTS
State of hadron collider physics
[DE94-005279] p 3863 N94-31147
Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814

RESEARCH VEHICLES
Benchmarking of the state-of-the-art in nondestructive testing/evaluation for applicability in the Composite Armored Vehicle (CAV) Advanced Technology Demonstrator (ATD) program, phase 1
[AD-A276660] p 3730 N94-32088
Airborne Trailblazer: Two decades with NASA Langley's 737 flying laboratory
[NASA-SP-4216] p 3566 N94-32793
Installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119

RESERVOIRS
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209

RESIDENTIAL AREAS
Remote sensing for urban planning p 3758 N94-32465

RESIDUAL STRESS
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A275965] p 3649 N94-31276
Inelastic deformation of metal matrix composites p 3618 N94-31285
Effect of vibratory stress relief during welding of thick stainless steel plate
[DE94-006557] p 3733 N94-31312
Feasibility study of cold expansion processes modelling
[DSIS-94-01186] p 3735 N94-31849
Mechanics of failure of high temperature metal matrix composites
[AD-A277397] p 3624 N94-32342
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639

RESIN TRANSFER MOLDING
Development of stitched/RTM composite primary structures p 3628 N94-33127
Resin transfer molding for advanced composite primary wing and fuselage structures p 3628 N94-33128
Test and analysis results for composite transport fuselage and wing structures p 3628 N94-33129
Composite fuselage crown panel manufacturing technology p 3629 N94-33133
Advanced textile applications for primary aircraft structures p 3629 N94-33135
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 3630 N94-33136

RESINS
Development of stitched/RTM composite primary structures p 3628 N94-33127

RESISTANCE HEATING
Solid-state resistance upset welding: A process with unique advantages for advanced materials
[DE94-005941] p 3723 N94-31524
Time-resolved analytical methods for liquid/solid interfaces
[DE94-008352] p 3637 N94-32826

RESONANCE FLUORESCENCE
Particle-In-Cell (PIC) code simulation results and comparison with theory scaling laws for photoelectron-generated radiation
[DE94-006132] p 3695 N94-32662

RESONANT FREQUENCIES
A series resonant converter in half bridge circuits with combined serial and parallel charge coupling and several output circuits
[ETN-94-95739] p 3687 N94-31373
Considering ties elasticities in high frequency rail dynamics
[ILR-MITT-281(1993)] p 3733 N94-31375
Vibration localization in dual-span axially moving elastic systems p 3736 N94-31964
Mass-loaded coating for reducing the resonant frequency of a ceramic disc
[AD-D016095] p 3660 N94-32739

RESOURCE ALLOCATION
NEMO: Advanced energy systems and technologies
[DE94-721996] p 3760 N94-31767
Construction of visual representations and time-space organization of resources in astronomy
[ISBN-0-315-86694-2] p 3925 N94-31914

RESOURCES MANAGEMENT
Techniques for increasing the robustness of iterative algorithms for multi-resources location problems
[REPT-93-037] p 3809 N94-31188
Common property resources and low-level flying in Labrador: Flight, fight or fancy?
[ISBN-0-315-87318-3] p 3924 N94-31732
Food security in the context of global environmental change
[DE94-007481] p 3768 N94-32812

RESPIRATION
Effects of combined breathing impediments on diver's respiratory performance
[AD-A277437] p 3805 N94-33084
Characterization and utilization of opiate-like hibernation factors
[AD-A278136] p 3794 N94-33098

RETICLES
Application of the modified voltage-dividing potentiometer to overlay metrology in a CMOS/bulk process
[DE94-007937] p 3695 N94-32700

RETINA
High peak power microwaves: A health hazard
[AD-A277168] p 3681 N94-32576

RETRACTABLE EQUIPMENT
Deployable and retractable telescoping tubular structure development p 3607 N94-33317

REVERBERATION
Modelling the late part of room impulse responses using adaptive filtering: On the recreation of reality
[CTH-E-93-01] p 3859 N94-31076
Quality of sound in large rooms: Alteration of room impulse responses
[CTH-E-93-02] p 3859 N94-31077
Surface forward-scattered acoustic measurements and analysis
[AD-A276998] p 3788 N94-32000

REVERSE FIELD PINCH
Toroidal pinch experiments
[DE94-005876] p 3887 N94-31558
Coaxial slow source
[DE94-008191] p 3892 N94-32800

REYNOLDS NUMBER
Hypervelocity Tunnel 9 Mach 10/14 Calibration
[AD-A275960] p 3587 N94-31318
Heat transfer studies on a rectangular channel with offset plate fins
[AD-A277300] p 3912 N94-32043
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370

REYNOLDS STRESS
Transport suppression by shear flow generation in multihelicity resistive-g turbulence
[DE94-007108] p 3886 N94-31366
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Backward-facing step measurements at low Reynolds number, Re(sub h)=5000
[NASA-TM-108807] p 3711 N94-33290

RHENIUM COMPOUNDS
Novel approaches to the production of higher alcohols from synthesis gas
[DE94-006770] p 3666 N94-32132
Ligand intermediates in metal-catalyzed reactions
[DE94-008713] p 3638 N94-32887

RHEOLOGY
Influence of trace components on the viscoelastic properties of a polymer solution
[AD-A277171] p 3656 N94-32253
Effect of surface forces on the rheology of particle-liquid systems and the consolidation of ceramic powders
[AD-A277092] p 3657 N94-32391

RHODIUM COMPOUNDS
Novel approaches to the production of higher alcohols from synthesis gas
[DE94-006770] p 3666 N94-32132

RHOMBOHEDRONS
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855

RIBLETS
Flight test results of riblets at supersonic speeds
[NASA-TM-4387] p 3572 N94-32880

RIBONUCLEIC ACIDS
Employment of a porous gold actuator in ISFET-based coulometric sensor-actuator systems with application to protein characterization
[ISBN-9-09-005887-7] p 3689 N94-31536

RIBS (SUPPORTS)
Vibrational and acoustic response of ribbed plates p 3736 N94-31955

RICCATI EQUATION
Digital state-feedback H(infinity) control of Pritchard-Salamon systems: A Popov function approach
[REPT-93-69] p 3830 N94-31647
A Hyland-Bernstein approach to the digital control of Pritchard-Salamon systems
[REPT-93-76] p 3844 N94-31693

RIEMANN MANIFOLD
SU(2) WZNW model at higher genera from gauge field functional integral
[PB94-148467] p 3857 N94-31589
Conformal field theory and geometry of strings
[PB94-148442] p 3857 N94-31770

RIEMANN WAVES
An approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension)
[NASA-CR-194902] p 3849 N94-33033

RING LASERS
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency conversion
[AD-A276126] p 3714 N94-31278
An investigation of airborne GPS/INS for high accuracy position and velocity determination
[DE94-006139] p 3576 N94-31306

RING STRUCTURES
Roll ring assemblies for the Space Station p 3603 N94-33294
International Space Station Alpha's bearing, motor, and roll ring module developmental testing and results p 3603 N94-33295

RISK
Space flight risk data collection and analysis project: Risk and reliability database
[NASA-CR-195879] p 3603 N94-32494
Evaluation of the potential of SAR data for mapping of landslide risks
[BRGM-93033] p 3753 N94-32552

RIVETED JOINTS
Multiple-site damage in aircraft fuselage structures
[LR-729] p 3578 N94-31675

RLC CIRCUITS
Broadband, high-power, 2-30 MHz, twin-whip antenna. Computer and 1/10-scale model design study
[AD-A277619] p 3682 N94-32971

ROADS
Tracking roads in an aerial image by Kalman filtering
[TELECOM-93-D-007] p 3711 N94-31096
The contribution of satellite data in communication infrastructure projects p 3749 N94-32530

ROBOT ARMS
A high-performance multi-arm environment: Theoretical aspects and practical implementation
[RR-479] p 3722 N94-31379
Control of a flexible space robot tracking a moving target p 3722 N94-31469
Point-contact and point-impact dynamics for multibody chains
[ISBN-0-315-87056-7] p 3734 N94-31737
Trajectory learning with a direct drive robotic manipulator p 3831 N94-31794
Model identification of a reconfigurable robot manipulator
[ISBN-0-315-87109-1] p 3725 N94-31874
Control of a flexible-link robotic arm manipulating an unknown dynamic payload p 3725 N94-31973
Parallel methods for synthesizing whole-hand grasps from generalized prototypes
[AD-A276798] p 3726 N94-32166
Information theory for arm visuo-motor coordination p 3800 N94-32495
Design, characterization and control of the Unique Mobility Corporation robot p 3603 N94-33296

ROBOT CONTROL
Camera-space manipulation with natural visual information p 3829 N94-31207
A high-performance multi-arm environment: Theoretical aspects and practical implementation
[RR-479] p 3722 N94-31379
Control of a flexible space robot tracking a moving target p 3722 N94-31469
ControlShell: A real-time software framework
[AD-A276481] p 3811 N94-31475

Contingency-tolerant robot motion planning and control p 3830 N94-31482
A neural network methodology for engineering applications: The learning control of robotic systems [RR-480] p 3830 N94-31500
Motion and force control of coordinated robots [ISBN-0-315-86323-4] p 3724 N94-31714
Strategy for tracking and grabbing a moving object with the aid of a decouplable manipulator with six degrees of freedom general architecture, guided by a vision system [ISBN-0-315-86864-3] p 3831 N94-31757
Trajectory learning with a direct drive robotic manipulator p 3831 N94-31794
Adaptive control of a robot in Cartesian coordinates: Analysis and implementation [ISBN-0-315-86493-1] p 3831 N94-31798
Development of a feedforward controller for a flexible manipulator [ISBN-0-315-86515-6] p 3832 N94-31801
Real-time control and application to robotics: Hardware and software architectures [ISBN-0-315-87192-X] p 3833 N94-31876
High-speed path constrained manipulator operation using optimal-feedback combined controller p 3833 N94-31962
Control of a flexible-link robotic arm manipulating an unknown dynamic payload p 3725 N94-31973
Parallel methods for synthesizing whole-hand grasps from generalized prototypes [AD-A276798] p 3726 N94-32166
An experimental testbed for a free-floating manipulator [AD-A277350] p 3726 N94-32334
Applying robotics to HAZMAT p 3729 N94-32452
Information theory for arm visuo-motor coordination p 3800 N94-32495
A multitasking behavioral control system for the Robotic All Terrain Lunar Exploration Rover (RATLER) [DE94-007293] p 3835 N94-32787
Identification and control of structures in space [NASA-CR-195910] p 3612 N94-33115
Design, characterization and control of the Unique Mobility Corporation robot p 3603 N94-33296

ROBOT DYNAMICS
Camera-space manipulation with natural visual information p 3829 N94-31207
A high-performance multi-arm environment: Theoretical aspects and practical implementation [RR-479] p 3722 N94-31379
Control of a flexible space robot tracking a moving target p 3722 N94-31469
Kinematic synthesis and analysis of a novel class of six-DOF parallel minimanipulators p 3723 N94-31568
Remote robot manipulator coupled with remote-controlled guide vehicle for soil sampling in hazardous waste sites p 3723 N94-31569
Penetration distances and their applications to path planning p 3858 N94-31725
Point-contact and point-impact dynamics for multibody chains [ISBN-0-315-87056-7] p 3734 N94-31737
Application of contact mechanics for the validation of robotized operations of grasping objects subjected to static and dynamic force fields [ISBN-0-315-86831-7] p 3725 N94-31754
Trajectory learning with a direct drive robotic manipulator p 3831 N94-31794
Study of a path planning and tracking system for an articulated mobile robot [ISBN-0-315-86502-4] p 3831 N94-31800
Automatic analysis of force distribution in multi-fingered articulated hands [ISBN-0-315-87205-5] p 3725 N94-31878
Hierarchical mixtures of experts and the EM algorithm [AD-A276516] p 3814 N94-31932
High-speed path constrained manipulator operation using optimal-feedback combined controller p 3833 N94-31962
Robot motion vision by fixation p 3833 N94-31991
An experimental testbed for a free-floating manipulator [AD-A277350] p 3726 N94-32334
Construction of a parallel processor for simulating manipulators and other mechanical systems [NASA-CR-191327] p 3826 N94-32482
Dynamic error compensation in robotic trusses p 3738 N94-32486
Identification and control of structures in space [NASA-CR-195910] p 3612 N94-33115

ROBOT SENSORS
Synchronized laser scanning three dimensional acquisition system [ISBN-0-315-86848-1] p 3879 N94-31756
Undergraduate robotics projects in support of research on neural networks [AD-A277331] p 3835 N94-32281

ROBOTICS
ControlShell: A real-time software framework [AD-A276481] p 3811 N94-31475
Kinematic synthesis and analysis of a novel class of six-DOF parallel minimanipulators p 3723 N94-31568
A contribution to the representation and identification of semi-flexible robots [ISBN-0-315-86450-8] p 3724 N94-31721
Robot grasping: Stability and optimization issues p 3724 N94-31724
Real-time control and application to robotics: Hardware and software architectures [ISBN-0-315-87192-X] p 3833 N94-31876
Adaptive control of telerobotic systems worn by humans [AD-A276608] p 3834 N94-32036
Parallel methods for synthesizing whole-hand grasps from generalized prototypes [AD-A276798] p 3726 N94-32166
Undergraduate robotics projects in support of research on neural networks [AD-A277331] p 3835 N94-32281
Application of dexterous space robotics technology to myoelectric prostheses p 3729 N94-32450
Navy Omni-Directional Vehicle (ODV) development program p 3729 N94-32451
Development of an automated wire delivery system for robotic welding applications [NASA-CR-194216] p 3727 N94-32479
Dynamic error compensation in robotic trusses p 3738 N94-32486
A new solution method for the inverse kinematic joint velocity calculations of redundant manipulators [DE94-004427] p 3727 N94-32682
A multitasking behavioral control system for the Robotic All Terrain Lunar Exploration Rover (RATLER) [DE94-007293] p 3835 N94-32787
Identification and control of structures in space [NASA-CR-195910] p 3612 N94-33115
The 28th Aerospace Mechanisms Symposium [NASA-CP-3260] p 3603 N94-33291
Innovative mechanism for measuring the mass properties of an object p 3604 N94-33299

ROBOTS
Concepts and environment [REPT-93-032] p 3829 N94-31186
A high-performance multi-arm environment: Theoretical aspects and practical implementation [RR-479] p 3722 N94-31379
Control of a flexible space robot tracking a moving target p 3722 N94-31469
Remote robot manipulator coupled with remote-controlled guide vehicle for soil sampling in hazardous waste sites p 3723 N94-31569
CAD-based off-line planning for an active-vision system [ISBN-0-315-86317-X] p 3813 N94-31713
Motion and force control of coordinated robots [ISBN-0-315-86323-4] p 3724 N94-31714
A contribution to the representation and identification of semi-flexible robots [ISBN-0-315-86450-8] p 3724 N94-31721
Development of a robotic simulator for studying interference and contact problems [ISBN-0-315-86705-1] p 3588 N94-31747
Application of contact mechanics for the validation of robotized operations of grasping objects subjected to static and dynamic force fields [ISBN-0-315-86831-7] p 3725 N94-31754
Adaptive control of a robot in Cartesian coordinates: Analysis and implementation [ISBN-0-315-86493-1] p 3831 N94-31798
Study of a path planning and tracking system for an articulated mobile robot [ISBN-0-315-86502-4] p 3831 N94-31800
Development of a feedforward controller for a flexible manipulator [ISBN-0-315-86515-6] p 3832 N94-31801
Control of a flexible-link robotic arm manipulating an unknown dynamic payload p 3725 N94-31973
Communication networks for autonomous mobile robot computer architectures and distributed real-time computing p 3680 N94-32310
An experimental testbed for a free-floating manipulator [AD-A277350] p 3726 N94-32334
Applying robotics to HAZMAT p 3729 N94-32452
Identification and control of structures in space [NASA-CR-195910] p 3612 N94-33115
From animals to animats [AD-A277427] p 3802 N94-33241

ROBUSTNESS (MATHEMATICS)
Robust multisource classification method using the Markov random field methods p 3750 N94-32537
Limiting vibration in systems with constant amplitude actuators through command preshaping [NASA-CR-188284] p 3739 N94-32907

ROCHE LIMIT
Evolution of vaporizing pulsars p 3929 N94-31128

ROCKET ENGINE DESIGN
The 7.5K lbf thrust engine preliminary design for Orbit Transfer Vehicle [NASA-CR-189175] p 3614 N94-31618
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908
Design of a cold-flow test facility for the high pressure fuel turbopump turbine of the Space Shuttle main engine [AD-A276743] p 3615 N94-32182
Summary of particle bed reactor designs for the Space Nuclear Thermal Propulsion Program [DE94-007434] p 3615 N94-32266

ROCKET ENGINES
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems [DE94-007250] p 3609 N94-31382

ROCKET EXHAUST
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search [NASA-CR-188285] p 3601 N94-32388
Simulation of low-density nozzle plumes in non-zero ambient pressures [NASA-TM-106501] p 3615 N94-32742
Possible effect of the chlorine oxide dimer on transient ozone loss in rocket plumes [AD-A278135] p 3616 N94-33094

ROCKET PROPELLANTS
Laser and Fourier transform spectroscopy of novel propellant molecules [AD-A277506] p 3667 N94-33013

ROCKS
Nonlocal theory for fracturing of quasibrittle materials [AD-A278283] p 3740 N94-33143

ROLL
Phase-lock roll control of inertially pointing spacecraft p 3609 N94-31470

ROLL FORMING
Development of thermoplastic composite aircraft structures [NASA-CR-189593] p 3626 N94-32860

ROLLER BEARINGS
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312

ROOM TEMPERATURE
Molecular/polymeric magnetism [DE94-005888] p 3649 N94-31201
Room temperature molten salts for advanced energy conversion and storage [AD-A277777] p 3763 N94-33015

ROOT-MEAN-SQUARE ERRORS
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553

ROSAT MISSION
Multiwavelength search for protoplanetary disks p 3599 N94-31430

ROSS ICE SHELF
A reassessment of the in-situ dielectric constant of polar firn [AD-A276999] p 3773 N94-32154

ROSSBY REGIMES
Rotational effects in turbulence driven by convection p 3930 N94-31131

ROTARY WING AIRCRAFT
Controls design with crossfeeds for hovering rotorcraft using quantitative feedback theory [NASA-CR-195765] p 3585 N94-31203
Rotorcraft ditchings and water-related impacts that occurred from 1982 - 1989, phase 2 [AD-A276473] p 3574 N94-31246

ROTARY WINGS
Experimental and numerical simulation of helicopter rotor fuselage interaction [ONERA-NT-1993-8] p 3568 N94-31421
A critical assessment of UH-60 main rotor blade airfoil data [NASA-TM-103985] p 3571 N94-32063
User's guide for a flat wake rotor inflow/wake velocity prediction code, DOWN [NASA-TM-104139] p 3572 N94-32873
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control [AD-A277914] p 3573 N94-33108

ROTATING ENVIRONMENTS
Autogenic-feedback training as a treatment for airsickness in high-performance military aircraft: Two case studies [NASA-TM-108810] p 3801 N94-33068

ROTATING FLUIDS
Magnetohydrodynamics of the Earth's core. 1: Steady, rotating magnetoconvection. 2: Magnetic Rossby waves p 3770 N94-31104

On the structure and stability of slender viscous vortices p 3700 N94-31218
ROTATION
Theory of protostellar accretion disks p 3931 N94-31136
Optical flow from 1D correlation: Application to a simple time-to-crash detector [AD-A276777] p 3880 N94-32186
Unit specific crew rest strategies: Phase 1 evaluation of the 1/212th Aviation Battalion during shiftwork transitions [AD-A277122] p 3804 N94-32379
ROTATIONAL SPECTRA
Degenerate four-wave mixing as a diagnostic of plasma chemistry [DE94-008588] p 3889 N94-31766
ROTOR AERODYNAMICS
An adaptive finite element method for unsteady compressible rotor airfoil aerodynamics p 3567 N94-31204
Experimental and numerical simulation of helicopter rotor fuselage interaction [ONERA-NT-1993-8] p 3568 N94-31421
ROTOR BLADES (TURBOMACHINERY)
Development of a cascade simulation of fan-passage flow [AD-A277234] p 3584 N94-32026
ROTOR BODY INTERACTIONS
Experimental and numerical simulation of helicopter rotor fuselage interaction [ONERA-NT-1993-8] p 3568 N94-31421
ROTOR DYNAMICS
Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth [AD-A276424] p 3722 N94-31333
ROTORS
Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth [AD-A276424] p 3722 N94-31333
RUBBER
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses p 3653 N94-31942
RUBIDIUM
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4 [DE94-008433] p 3907 N94-32963
RUBIDIUM COMPOUNDS
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4 [DE94-006141] p 3899 N94-31847
Advances and applications of dynamic-angle spinning nuclear magnetic resonance [DE94-007031] p 3870 N94-32250
Extended-range order in glasses [DE94-008135] p 3681 N94-32798
RUBY LASERS
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS [DE94-009030] p 3721 N94-32848
RUNGE-KUTTA METHOD
Symplectic Runge-Kutta schemes 3: Canonical elementary differentials [MATHS-REPT-A-204] p 3840 N94-31159
Symbolic derivation of Runge-Kutta methods [MATHS-REPT-A-205] p 3840 N94-31160
A brief introduction to symplectic integrators and recent results [DE94-006225] p 3845 N94-31763
Solution of the average-passage equations for the incompressible flow through multiple-blade-row turbomachinery [AD-A276515] p 3583 N94-31931
On the error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods [TW-93-13] p 3847 N94-32206
Fourth-order 2N-storage Runge-Kutta schemes [NASA-TM-109112] p 3573 N94-32950
RUNWAYS
Determining the bearing capacity of flexible airfield pavements using a heavy weight deflectometer [ISBN-0-315-86210-6] p 3587 N94-31710
Evaluation for the development of taxiway lighting intensity standards [AD-A276706] p 3588 N94-32120
RURAL LAND USE
Common property resources and low-level flying in Labrador: Flight, fight or fancy? [ISBN-0-315-87318-3] p 3924 N94-31732
RUSSIAN FEDERATION
Station climatic summaries: China, the former USSR, and Mongolia [AD-A276548] p 3784 N94-32057
Information systems to enhance technology exchange [DE94-007744] p 3920 N94-32808
RYDBERG SERIES
Diamagnetism in helium Rydberg atoms [ETN-94-96015] p 3865 N94-31549

S

S MATRIX THEORY
Single scattering of light by ensembles of particles with various shapes [ETN-94-96016] p 3878 N94-31550
S WAVES
On wave interactions of rotational and irrotational flows p 3700 N94-31219
SADDLE POINTS
Heteroclinic attractors: Time averages and moduli of topological conjugacy [W-9318] p 3844 N94-31690
Steepest descent paths for integrals defining the modified Bessel functions of imaginary order [CWI-AM-R9303] p 3848 N94-32227
SAFETY
Laser safety manual for DREO [AD-A276288] p 3714 N94-31255
Scientific basis for safety science [PB94-138534] p 3668 N94-31838
Systems for the monitoring of working conditions relating to health and safety: Extensive description. Norway [PB94-138542] p 3803 N94-31839
Controlling hazardous energy sources (lockout/tagout) [NASA-TM-105290] p 3669 N94-32861
Implementing software safety in the NASA environment [NASA-TM-106597] p 3731 N94-33032
SAFETY MANAGEMENT
Scientific basis for safety science [PB94-138534] p 3668 N94-31838
Integrated safety program for the Nuclear Electric Propulsion Space Test Program [DE94-004670] p 3615 N94-32669
Independent safety assessment of the Topaz-2 space nuclear reactor power system [DE94-008653] p 3877 N94-32879
SAMPLING
Analysis of key performance parameters of phase sampling digital RF memories [AD-A276019] p 3688 N94-31494
The effects of altimeter sampling characteristics: Some Geosat examples [AD-A276899] p 3747 N94-32214
Focused feasibility study final field sampling plan [AD-A277445] p 3769 N94-33105
SANDSTONES
NMR characterization of shocked quartz [DE94-007733] p 3774 N94-32816
SANDWICH STRUCTURES
Damage tolerance aspects of a full composite airplane fuselage: Requirements, modelling, predictions, experiments [LR-728] p 3578 N94-31674
Honeycomb sandwich structures: Vented versus unvented designs for space systems [AD-A276713] p 3624 N94-32122
SARSAT
A neural network application to search and rescue satellite aided tracking (SARSAT) p 3613 N94-33345
SATELLITE ALTIMETRY
Filtering of satellite altimetry data with optimal smoothing cubic splines to compute geoid heights, along-tract geoid and gravity gradients in the Indonesian waters and its surroundings [PB94-147527] p 3741 N94-31074
Application of radon transformation for improved analysis of sparsely sampled data: A feasibility study [PB94-147535] p 3741 N94-31075
Satellite radar altimetry over the continental ice sheets p 3742 N94-31570
Error analysis of real-time and post-processed orbit determination for the Geosat Follow-On altimetric satellite using GPS tracking p 3576 N94-31845
The effects of altimeter sampling characteristics: Some Geosat examples [AD-A276899] p 3747 N94-32214
Fields of experiments in ERS-1 SAR interferometry in Bonn and Naples p 3756 N94-32572
SATELLITE ANTENNAS
Proceedings of the 1993 Antenna Applications Symposium, volume 1 [AD-A277202] p 3676 N94-32049
Proceedings of the 1993 Antenna Applications Symposium, volume 2 [AD-A277203] p 3677 N94-32050
Two-axis antenna positioning mechanism p 3605 N94-33308
Special test equipment and fixturing for MSAT reflector assembly alignment p 3606 N94-33316
SATELLITE ATTITUDE CONTROL
Chaotic attitude motion of satellites in the central gravitational field [ISBN-0-315-78768-6] p 3610 N94-31723
Trajectory planning for space manipulators [AD-A277229] p 3611 N94-32369
Performance analysis of an integrated GPS/inertial attitude determination system [NASA-CR-188289] p 3577 N94-32864
SATELLITE COMMUNICATION
Europe at the crossroads: The future of its satellite communications industry [ESA-SP-1166] p 3670 N94-31182
Channel and terminal description of the ACTS mobile terminal p 3599 N94-31428
Hubless satellite communications networks p 3600 N94-31433
Multisatellite constellation configuration selection for multiregional highly elliptical orbit constellations p 3600 N94-31437
SATCOM feasibility study for search and rescue aircraft [DSIS-94-01083] p 3575 N94-31902
Satellite communications industry [AD-A276685] p 3610 N94-32039
CIM in space: Corporate Information Management (CIM) implications for space-based information systems [AD-A276882] p 3600 N94-32126
Advanced satellite communication system [NASA-CR-194211] p 3681 N94-32477
COVICS: A covert video communications system [DE94-007568] p 3682 N94-32745
Aerospace sponsored research [ATR-93(8498)-1] p 3966 N94-32949
Pointing and tracking space mechanism for laser communication p 3606 N94-33310
SATELLITE CONSTELLATIONS
Multisatellite constellation configuration selection for multiregional highly elliptical orbit constellations p 3600 N94-31437
SATELLITE CONTROL
Aerospace sponsored research [ATR-93(8498)-1] p 3966 N94-32949
SATELLITE DESIGN
Automated detection of ship tracks in multispectral satellite data [AD-A276697] p 3746 N94-32119
Design and performance of the telescope and detector covers on the Extreme Ultraviolet Explorer satellite p 3605 N94-33309
Pointing and tracking space mechanism for laser communication p 3606 N94-33310
MSAT boom joint testing and load absorber design p 3606 N94-33315
SATELLITE DOPPLER POSITIONING
A neural network application to search and rescue satellite aided tracking (SARSAT) p 3613 N94-33345
SATELLITE GUIDANCE
The ALEXIS mission recovery [DE94-007549] p 3611 N94-32813
SATELLITE IMAGERY
Desert aerosols: Sources, transports, and impacts determined by remote sensing p 3770 N94-31003
Automatic extraction of cartographic objects by fusion of data extracted from satellite images [TELECOM-93-E-001] p 3742 N94-31165
Estimation of visible and near-infrared reflectivity for Peyto Glacier Basin using satellite data [ISBN-0-315-87039-7] p 3743 N94-31733
The basement fracture pattern of southern Ontario: A tectonic interpretation based on Landsat TM imagery, airphotos and field data [ISBN-0-315-87086-9] p 3772 N94-31834
Shiptrack database analysis [AD-A277228] p 3746 N94-32025
Sensitivity analysis of the AVHRR infrared cirrus model [AD-A276690] p 3784 N94-32117
Automated detection of ship tracks in multispectral satellite data [AD-A276697] p 3746 N94-32119
Research and applications of a canopy reflectance model p 3747 N94-32492
From Optics to Radar, SPOT and ERS Applications [ISBN-2-85428-345-7] p 3747 N94-32523
Monitoring land cover and crop types in Denmark using ERS-1 SAR and optical satellite images p 3748 N94-32528
Optics and radar: Cohabitation, rivality or happy marriage. Towards new planning tools p 3748 N94-32529
The contribution of satellite data in communication infrastructure projects p 3749 N94-32530

The use of ERS images for mapping
p 3749 N94-32531
SPOT imagery for updating land cover information of 1:50,000 numerical topographic maps
p 3749 N94-32532
Example of SPOT/ERS-1 complementarity
p 3749 N94-32533
The use of SPOT, and the contribution of ERS-1, in the assessment of urban pressure on agriculture land in Greater Tunis (Tunisia) p 3749 N94-32534
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images
p 3750 N94-32535
Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536
Technique of ERS-1 image processing in association with SPOT data p 3750 N94-32538
Production of terrain data: Optical radar complementarity p 3750 N94-32540
Fusion of multispectral (XS) and Panchromatic (P) SPOT images and radar images p 3750 N94-32541
Integration of ERS-1 images into the European Agriculture Statistics project Action 4: Thematic aspect
p 3753 N94-32554
Rapid estimates of crop acreage and production at European scale using high resolution imagery
p 3754 N94-32557
Differential interferometry study of an earthquake
p 3756 N94-32570
Quantitative analysis of woody vegetation in Soudano-Sahalian region. Textural approach (application to a Burkina Faso region) p 3757 N94-32574
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045

SATELLITE INSTRUMENTS
MODIS. Volume 1: MODIS level 1A software baseline requirements
[NASA-TM-104594-VOL-1] p 3823 N94-33287

SATELLITE NETWORKS
The Second Annual International Space University Alumni Conference
[NASA-CP-3253] p 3598 N94-31425

SATELLITE OBSERVATION
Subtropical Climates and Their Evolution: From Space-Based Observation to Modelling
[ISBN-2-85-428333-3] p 3776 N94-30981
Space equipment for Earth observations
p 3613 N94-30997
The use of meteorological satellite data for studying tropical atmospheric phenomena p 3779 N94-31000
The surface parameters: Remote sensing observations and climatology applications p 3779 N94-31001
Desert aerosols: Sources, transports, and impacts determined by remote sensing p 3770 N94-31003
Airborne instruments p 3757 N94-31006
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553
Imaging devices for satellite remote sensing
[VTT-TIED-1517] p 3743 N94-31658
Radar rainfall measurements from space
p 3782 N94-31889
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Remote sensing and the Mississippi high accuracy reference network p 3758 N94-32466
Research and applications of a canopy reflectance model p 3747 N94-32492
From Optics to Radar, SPOT and ERS Applications
[ISBN-2-85428-345-7] p 3747 N94-32523
The complementary nature of the SPOT and ERS-1 systems and their place in major international programmes p 3748 N94-32524
From optics to radar: Environmental problems and the SPOT/ERS systems p 3748 N94-32525
Feasibility in the use of satellite remote sensing data as a fast reaction tool for natural disaster relief
p 3748 N94-32526
Contribution of SAR ERS1 data to study the French Guiana tropical coast environment
[BRGM-93034] p 3748 N94-32527
Monitoring land cover and crop types in Denmark using ERS-1 SAR and optical satellite images
p 3748 N94-32528
Optics and radar: Cohabitation, rivality or happy marriage. Towards new planning tools
p 3748 N94-32529
The contribution of satellite data in communication infrastructure projects p 3749 N94-32530
The use of ERS images for mapping
p 3749 N94-32531
SPOT imagery for updating land cover information of 1:50,000 numerical topographic maps
p 3749 N94-32532
Example of SPOT/ERS-1 complementarity
p 3749 N94-32533
The use of SPOT, and the contribution of ERS-1, in the assessment of urban pressure on agriculture land in Greater Tunis (Tunisia) p 3749 N94-32534
Almaz marine applications p 3751 N94-32544
The use of SPOT and ERS-1 images to map the eruption of Nevado Sabancaya (Province of Arequipa, South Peru) and evaluate associated risks p 3751 N94-32546
A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping
p 3753 N94-32556
Land cover change detection with ERS-1 data and data from other remote sensing satellites. Example: The delta of the River Ebro (Spain) p 3755 N94-32564
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea
p 3755 N94-32565
Statistical analysis and mapping of cotton and food crop cultivation surfaces in the west of Burkina Faso: Contribution of combined SPOT P and XS data
p 3757 N94-32575
Parameterizing atmosphere-land surface exchange for climate models with satellite data: A case study for the Southern Great Plains CART site
[DE94-005109] p 3775 N94-32874
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045
Stationary eddies in the Mars general circulation as simulated by the NASA-Ames GCM
p 3944 N94-33192
TRMM-related research: Tropical rainfall and energy analysis experiment
[NASA-CR-195834] p 3787 N94-33288
MODIS. Volume 2: MODIS level 1 geolocation, characterization and calibration algorithm theoretical basis document, version 1
[NASA-TM-104594-VOL-2] p 3613 N94-33289

SATELLITE ORBITS
Multisatellite constellation configuration selection for multiregional highly elliptical orbit constellations
p 3600 N94-31437
Possible improvements of satellite ephemeris programs used in geodesy
[PB94-148681] p 3743 N94-31592
General-relativistic celestial mechanics. 4: Theory of satellite motion
[PB94-147782] p 3601 N94-31769
Testing for preferred-frame effects in gravity with artificial Earth satellites
[PB94-148459] p 3610 N94-31771
Semianalytic Satellite Theory (SST): Mathematical algorithms
[AD-A276836] p 3610 N94-32208

SATELLITE ORIENTATION
The ALEXIS mission recovery
[DE94-007549] p 3611 N94-32813
Performance analysis of an integrated GPS/inertial attitude determination system
[NASA-CR-188289] p 3577 N94-32864

SATELLITE PERTURBATION
Semianalytic Satellite Theory (SST): Mathematical algorithms
[AD-A276836] p 3610 N94-32208

SATELLITE SOUNDING
The use of meteorological satellite data for studying tropical atmospheric phenomena p 3779 N94-31000
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553

SATELLITE TRACKING
Air Force Space Command satellite orbit predictor using parallel virtual machines
[AD-A276316] p 3801 N94-31298

SATELLITE-BORNE INSTRUMENTS
Space equipment for Earth observations
p 3613 N94-30997
Imaging devices for satellite remote sensing
[VTT-TIED-1517] p 3743 N94-31658

SATELLITE-TO-SATELLITE TRACKING
Pointing and tracking space mechanism for laser communication p 3606 N94-33310

SCALARS
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652

SCALE EFFECT
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering
[DE94-007300] p 3625 N94-32642

SCALERS
A miniaturized ASIC-based multichannel scaler instrument
[DE94-007222] p 3807 N94-32783

SCALING LAWS
Computer modelling of cyclic deformation of high-temperature materials
[AD-A277056] p 3623 N94-32012
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
A simple model for determining photoelectron-generated radiation scaling laws
[DE94-006130] p 3761 N94-32660
Analysis of Dietz's single, rectangular pulse theory for the generation of radiation via photoelectrons
[DE94-006131] p 3681 N94-32661
Particle-In-Cell (PIC) code simulation results and comparison with theory scaling laws for photoelectron-generated radiation
[DE94-006132] p 3695 N94-32662

SCANNERS
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831
COVICS: A covert video communications system
[DE94-007568] p 3682 N94-32745
PSIDD: A Post-Scan Interactive Data Display system for ultrasonic scans
[NASA-TM-4545] p 3732 N94-33038

SCANNING ELECTRON MICROSCOPY
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781

SCANNING TUNNELING MICROSCOPY
Studying transient mobility and energy loss using scanning tunneling microscopy
[AD-A276292] p 3877 N94-31256
Analytical applications of scanning tunneling microscopy
[AD-A276066] p 3711 N94-31283
The adsorption of sulfate on gold(111) in acidic aqueous media: Adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy
[AD-A276643] p 3642 N94-31997
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
Charge-dependent atomic-scale structures of high-index and (110) gold electrode surfaces as revealed by scanning tunneling microscopy
[AD-A276782] p 3869 N94-32170
The 14th Annual West Coast Theoretical Chemistry/Statistical Mechanics Conference
[AD-A276942] p 3656 N94-32239
Sensitivity of electrochemical adlayer structure to the metal crystallographic orientation: Potential-independent iodide adsorption on Au(100) in comparison with other low-index surfaces
[AD-A276714] p 3909 N94-33273
Scanning tunneling microscopy and infrared spectroscopy as combined in-situ probes of electrochemical adlayer structure: Cyanide on Pt(111)
[AD-A276715] p 3909 N94-33274
Nanoscale structural changes upon electrooxidation of Au(111) as probed by potentiodynamic scanning tunneling microscopy
[AD-A276780] p 3909 N94-33275

SCATTER PROPAGATION
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1990, January 1991
[AD-A276693] p 3676 N94-31998
Performance statistics bulletin. High latitude metor scatter propagation, February, March, April, May 1992
[AD-A276667] p 3677 N94-32083
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation, November and December 1989, and January 1990
[AD-A276688] p 3680 N94-32297
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276694] p 3680 N94-32298
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300

Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347

SCATTERING
Impurities and conductivity in a D-wave superconductor
[DE94-006222] p 3898 N94-31628
Modern integral equation techniques for quantum reactive scattering theory
[DE94-007039] p 3857 N94-31639
Stellar x ray polarimeter polarizer development and calibration at LEA/LLNL
[DE94-006400] p 3712 N94-31783
Penetrable wedge analysis
[AD-A277219] p 3845 N94-32022

SCATTERING COEFFICIENTS
Backscatter and transmission of aerosol at UV through middle IR wavelengths
[AD-A277127] p 3718 N94-32305

SCATTERING CROSS SECTIONS
Production of charginos and neutralinos for the reaction positron electron yields Z' boson yields chargino(+) (sub i) chargino(-) (sub j) or neutralino (sub i) neutralino (sub j) in SU(2) (sub L) x SU(2) (sub R) x U(1) (sub B-L)
[ISBN-0-315-87316-7] p 3867 N94-31832
Scatterometer wind-speed exponents: A review and SAXON 35-GHz measurements
[AD-A276568] p 3783 N94-31937
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
Time-resolved IR spectroscopy, energy transfer, and state-to-state collision dynamics of atmospheric species
[AD-A277372] p 3773 N94-32338
Quantum dynamics in dual spaces
[DE94-008303] p 3913 N94-32824

SCATTERING FUNCTIONS
Single scattering of light by ensembles of particles with various shapes
[ETN-94-96016] p 3878 N94-31550
Recursive analysis of matrix scattering functions
[AD-A277264] p 3845 N94-32018

SCATTEROMETERS
Scatterometer wind-speed exponents: A review and SAXON 35-GHz measurements
[AD-A276568] p 3783 N94-31937

SCENE ANALYSIS
Automatic extraction of cartographic objects by fusion of data extracted from satellite images
[TELECOM-93-E-001] p 3742 N94-31165
Volumetric modelling of three dimensional scenes by octree decomposition of geometric models
[ISBN-0-315-86866-X] p 3814 N94-31728
A neural network model for the visual perception of the depth of a scene from stereoscopy and shading
[ISBN-0-315-86753-1] p 3831 N94-31750
Safe navigation and active vision for autonomous vehicles: A purposive and direct solution
p 3832 N94-31842
Neural models of spatial orientation in novel environments
[AD-A277383] p 3835 N94-32340

SCHEDULES
Unit specific crew rest strategies: Phase 1 evaluation of the 1/212th Aviation Battalion during shiftwork transitions
[AD-A277122] p 3804 N94-32379

SCHEDULING
On the use of genetic algorithms to solve the time-table problem
[REPT-90-060-REV] p 3829 N94-31176
Exact solution of the single machine scheduling problem with earliness and flow time penalties
[REPT-93-038] p 3809 N94-31189
Scheduling techniques for multiple processor systems in real-time environments
[AD-A276149] p 3824 N94-31249
A model and algorithms for a software evolution control system
[AD-A276431] p 3811 N94-31449
Planning of air crew schedules
[ISBN-0-315-86506-7] p 3914 N94-32074
Discrete-event-dynamic-system-based approaches for scheduling transmissions in multihop packet radio networks
[AD-A276566] p 3679 N94-32230
Scheduling fighter missions using an expert system with an operations research module p 3853 N94-33337

SCHLIEREN PHOTOGRAPHY
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 1
[AD-A276211] p 3859 N94-31060

SCHOTTKY DIODES
Modification of semiconductor surface properties with chemically bound molecular films
[AD-A276162] p 3895 N94-31081
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322

SCHROEDINGER EQUATION
Coherent processes in atom in strong radiation fields
[AD-A278388] p 3874 N94-33144

SCIENCE
OPTIONS for systemic change in mathematics, science, and technology education: Scientist/teacher partnerships
[DE94-007472] p 3914 N94-32910

SCIENTIFIC SATELLITES
MSFC orbital spacecraft development emphases for this decade p 3598 N94-31048
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite
[AP-31] p 3770 N94-31222

SCIENTIFIC VISUALIZATION
Applications of data compression to 3-D scalar field visualization p 3817 N94-32294
Virtual reality in medical education and assessment
p 3798 N94-32471
On the use of computers for teaching fluid mechanics
[NASA-TM-106587] p 3820 N94-32773

SCIENTISTS
Construction of visual representations and time-space organization of resources in astronomy
[ISBN-0-315-86694-2] p 3925 N94-31914
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 12: The diffusion of federally funded aerospace research and development (R/D) and the information seeking behavior of US aerospace engineers and scientists
[NASA-TM-109404] p 3921 N94-32832
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 11: The voice of the user: How US aerospace engineers and scientists view DOD technical reports
[NASA-TM-109348] p 3921 N94-32834
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 1: The value of scientific and technical information (STI), its relationship to Research and Development (R/D), and its use by US aerospace engineers and scientists
[NASA-TM-109774] p 3922 N94-32835
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 25: The technical communications practices of British aerospace engineers and scientists: Results of the phase 4 RAeS mail survey
[NASA-TM-109098] p 3922 N94-32836
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 24: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SAE mail survey
[NASA-TM-109088] p 3922 N94-32837

SCINTILLATING FIBERS
Final results from the SDC dopant search for new green wavelength shifting (WLS) fibers, volume 1
[DE94-006744] p 3878 N94-31271
Investigation of scintillator and fibre light in plastic scintillation dosimetry
[ISBN-0-315-87190-3] p 3879 N94-31877

SCINTILLATION
Final results from the SDC dopant search for new green wavelength shifting (WLS) fibers, volume 1
[DE94-006744] p 3878 N94-31271
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764
Statistics of time averaged atmospheric scintillation
[DE94-006998] p 3747 N94-32249
Phase-only correction of scintillated laser beams: Downrange experimental results
[AD-A277778] p 3722 N94-33282

SCINTILLATION COUNTERS
Particle identification in a segmented calorimeter (NUMASS test data, September 1991)
[USIP-93-08] p 3711 N94-31085
Final results from the SDC dopant search for new green wavelength shifting (WLS) fibers, volume 1
[DE94-006744] p 3878 N94-31271
Mechanisms of formation and of de-excitation in the reaction Mg-24 + C-12 yields 9 alpha at 35MeV per nucleon
[ISBN-0-315-86746-9] p 3867 N94-31749
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764
Investigation of scintillator and fibre light in plastic scintillation dosimetry
[ISBN-0-315-87190-3] p 3879 N94-31877

SCREWS
An experimental and analytical investigation of a threaded fastener
[VTT-JULK-786] p 3724 N94-31654

SEA BREEZE
Evolution of diurnal surface winds and surface currents for Monterey Bay
[AD-A277649] p 3790 N94-33057

SEA FLOOR SPREADING
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981

SEA ICE
The use of ERS-1 within an operational ice monitoring program p 3751 N94-32545

SEA LEVEL
World height system definition and implementation
[AD-A276725] p 3747 N94-32160
ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States
[AD-A277306] p 3789 N94-32327

SEA STATES
The application of a radial basis function neural network for radar tracking over the sea p 3686 N94-33150

SEA SURFACE TEMPERATURE
General ocean circulation p 3777 N94-30984
Low frequency variability observed in the tropical Atlantic Ocean p 3778 N94-30991
Air-sea interaction patterns in the equatorial Pacific
[AD-A277305] p 3788 N94-32072
ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States
[AD-A277306] p 3789 N94-32327

SEA WATER
Investigation of carbon dioxide in the central South Pacific Ocean (WOCE Sections P-16C and P-17C) during the TUNES/2 expedition of the R/V Thomas Washington, July-August, 1991
[DE94-008638] p 3763 N94-31347
Magnetohydrodynamic boundary layer control system
[AD-D016120] p 3710 N94-32958

SEALERS
Improved resealing procedures for the second deseal/reseal program in RAAF F111 aircraft fuel tanks
[AD-A277069] p 3580 N94-32378
Compatibility of refrigerants and lubricants with elastomers
[DE94-008552] p 3658 N94-32518

SEALING
Compatibility of refrigerants and lubricants with elastomers
[DE94-008552] p 3658 N94-32518

SEALS (STOPPERS)
High temperature NASP engine seal development
[NASA-TM-109750] p 3725 N94-31804

SEAMOUNTS
Fine and microstructure observations at Fieberlin g Guyot R/V new horizon cruise report
[AD-A277917] p 3791 N94-33109

SEARCH PROFILES
Methods for parallelizing search paths in phrasing
[AD-A276876] p 3817 N94-32212

SEASAT SATELLITES
Comparison of SPOT, ERS-1, SEASAT, LANDSAT TM, and merged imagery for geological investigations
p 3752 N94-32547
Evaluation of surface phase change on large zones
p 3755 N94-32567

SECONDARY EMISSION
Elimination of two atomic electrons by a single high energy photon
[DE94-006834] p 3864 N94-31320
Energy and angular distributions of secondary ions during electronic sputtering of nonconducting surfaces
[ETN-94-95756] p 3865 N94-31516

SECONDARY FLOW
Incorporating radial mixing in axisymmetric streamline curvature through-flow analysis
[AD-A277325] p 3706 N94-32279

SECURITY
NATO contributions to European environmental security
[AD-A275918] p 3763 N94-31275
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831

SEDIMENT TRANSPORT
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars
p 3947 N94-33211
Fluid mechanical measurements within the bottom boundary layer over the Northern California continental shelf during stress
[AD-A277916] p 3791 N94-33243

SEDIMENTARY ROCKS
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005958] p 3771 N94-31525

SEDIMENTS
Gas hydrate detection and mapping on the US east coast
[DE94-005959] p 3742 N94-31504
Geologic controls of erosion and sedimentation on Mars p 3951 N94-33232
Polar sediment accumulation: Role of surface winds at the two poles p 3951 N94-33233
Fluid mechanical measurements within the bottom boundary layer over the Northern California continental shelf during stress
[AD-A277916] p 3791 N94-33243

SEISMIC ENERGY
Finite-element modeling of the blockage and scattering of LG propagation
[AD-A277430] p 3775 N94-33006

SEISMIC WAVES
Finite-element modeling of the blockage and scattering of LG propagation
[AD-A277430] p 3775 N94-33006

SEISMOGRAPHS
Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise)
[AD-A277009] p 3789 N94-32401

SEISMOLOGY
Proceedings of the 4th Tunnel Detection Symposium on Subsurface Exploration Technology
[AD-A276372] p 3771 N94-31369
Gas hydrate detection and mapping on the US east coast
[DE94-005959] p 3742 N94-31504
Differential interferometry study of an earthquake p 3756 N94-32570
Procedures for computing site seismicity
[AD-A277666] p 3775 N94-33028

SELENIUM
Electrical characteristics of GaAs MESFET fabrication by ion implantation of Si or Se
[AD-A278416] p 3909 N94-33328

SELF LUBRICATING MATERIALS
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941

SELF LUBRICATION
Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A278133] p 3728 N94-33061

SELF ORGANIZING SYSTEMS
A generic model for data acquisition: Connectionist methods of information processing
[TELECOM-93-E-003] p 3730 N94-31166
ART: Adaptive Resonance Theory
[TELECOM-93-D-020] p 3829 N94-31193
Numerical optimization techniques in neural network training p 3838 N94-33158

SELF TESTS
Module generation for self-testing integrated systems
[ISBN-9-09-004570-8] p 3688 N94-31520

SEMANTICS
What comes first in dynamic semantics: A compositional, non-representational account of natural language presupposition
[LP-93-15] p 3855 N94-31389
The interpretation of free focus
[CL-93-01] p 3855 N94-31390
Resumptive quantifiers in exception sentences
[LP-93-11] p 3855 N94-31403
Binary quantifiers and relational semantics
[LP-93-13] p 3855 N94-31404
Sums and quantifiers
[LP-93-05] p 3856 N94-31411
Effective truth
[ML-93-15] p 3856 N94-31416
Correspondence theory for extended modal logics, version 3.0
[ML-93-16] p 3856 N94-31417
Updates in dynamic semantics
[LP-93-06] p 3856 N94-31450
Completeness and decidability of the mixed style of inference with composition
[LP-93-09] p 3842 N94-31453
Weaks vs. strong readings of donkey sentences and monotonicity inference in a dynamic setting
[LP-93-10] p 3856 N94-31468
Compositionality of application oriented structuring mechanisms for algebraic specification languages with initial semantics
[ETN-94-95736] p 3812 N94-31577
Report on implementing part relationships using VML metaclasses
[PB94-147485] p 3813 N94-31686
Translucent procedures, abstraction without opacity
[AD-A276877] p 3817 N94-32213
An epistemic proof system for parallel processes
[TR-93-17] p 3826 N94-32291
Multiple inheritance via intersection types
[TR-93-18] p 3848 N94-32292
Formal semantics for a subset of VHDL and its use in analysis of the FTPP scoreboard circuit
[NASA-CR-191577] p 3827 N94-32734

SEMICONDUCTOR DEVICES
III-V compound semiconductor strip-loaded waveguide devices for PICs: Design for minimum crosstalk and high density
[DE94-006588] p 3897 N94-31502
Examination of fast semiconductor diodes (recovery) with respect to switching valves in PWM and resonance devices
[ETN-94-95740] p 3690 N94-31609
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013
Novel growth technologies for in situ formation of semiconductor quantum wire structures
[AD-A277188] p 3902 N94-32255
WOCSDICE 1993 --- 17th European Workshop on Compound Semiconductor Devices and Integrated Circuits
[AD-A276766] p 3693 N94-32307
Optical processing for semiconductor device fabrication p 3885 N94-32445
Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878
The 6th International Conference on Modulated Semiconductor Structures
[AD-A276815] p 3906 N94-32908
Superconducting and semiconducting hybrids and advance memory concepts for superconducting electronics
[AD-A277766] p 3907 N94-32988
Optically switched submillimeter-wave oscillator
[AD-A278014] p 3698 N94-33249
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

SEMICONDUCTOR DIODES
Examination of fast semiconductor diodes (recovery) with respect to switching valves in PWM and resonance devices
[ETN-94-95740] p 3690 N94-31609
High power diode lasers for solid-state laser pumps p 3722 N94-32448

SEMICONDUCTOR JUNCTIONS
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322

SEMICONDUCTOR LASERS
Laser Diode Ignition (LDI)
[DE94-006590] p 3666 N94-31579
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622
High conversion efficiency pumped-cavity second harmonic generation of a diode laser
[DE94-006805] p 3717 N94-32134
Control and reliability of optical networks in multiprocessors
[AD-A277385] p 3881 N94-32285
High power diode lasers for solid-state laser pumps p 3722 N94-32448
Flexible manufacturing for photonics device assembly p 3669 N94-32449
Rare Earth Doped Semiconductors and Materials Research Society Symposium Proceedings, Volume 301
[AD-A277517] p 3908 N94-33055
Research in the optical sciences
[AD-A278271] p 3884 N94-33140
Advanced release technologies program p 3607 N94-33322

SEMICONDUCTORS (MATERIALS)
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
Passivation of III-V compound semiconductor based devices
[AD-A276178] p 3894 N94-31056
Electron-beam controlled semiconductor switches
[AD-A276198] p 3686 N94-31057
Modification of semiconductor surface properties with chemically bound molecular films
[AD-A276162] p 3895 N94-31081
Growth and characterization of III-V semiconductors with rare earth impurities for optoelectronic devices
[AD-A276021] p 3896 N94-31455
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic
[DE94-006467] p 3666 N94-31827
Development of sample charge compensation for characterization of impurities in semiconductor materials
[AD-A277113] p 3899 N94-31983
IR materials producibility
[AD-A277028] p 3879 N94-32006
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013
Anomalous small angle x ray scattering studies of amorphous metal-germanium alloys
[DE94-007258] p 3900 N94-32065
Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools
[DE94-006367] p 3901 N94-32104
Amorphous/crystalline structure and phase transformations in metastable semiconducting Ge(1-x)Sn(x)
[DE94-008659] p 3901 N94-32115
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209
Novel growth technologies for in situ formation of semiconductor quantum wire structures
[AD-A277188] p 3902 N94-32255
Proceedings of the International Workshop on Computational Electronics
[AD-A277020] p 3692 N94-32259
WOCSDICE 1993 --- 17th European Workshop on Compound Semiconductor Devices and Integrated Circuits
[AD-A276766] p 3693 N94-32307
Theoretical studies of electron transfer and optical spectroscopy
[DE94-006985] p 3871 N94-32375
A scanning defect mapping system for semiconductor characterization p 3885 N94-32446
Ionization probes of molecular structure and chemistry
[DE94-007605] p 3872 N94-32643
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE94-000298] p 3695 N94-32680
Application of the modified voltage-dividing potentiometer to overlay metrology in a CMOS/bulk process
[DE94-007937] p 3695 N94-32700
The 6th International Conference on Modulated Semiconductor Structures
[AD-A276815] p 3906 N94-32908
Silicon-Based Optoelectronic Materials Symposium and Materials Research Society Proceedings, volume 298
[AD-A277518] p 3662 N94-32952
Rare Earth Doped Semiconductors and Materials Research Society Symposium Proceedings, Volume 301
[AD-A277517] p 3908 N94-33055
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262
Electrical characteristics of GaAs MESFET fabrication by ion implantation of Si or Se
[AD-A278416] p 3909 N94-33328
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

SENSITIVITY
A review of sensitivity analysis techniques
[DE94-007192] p 3842 N94-31399
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Sensitivity of electrochemical adlayer structure to the metal crystallographic orientation: Potential-independent iodide adsorption on Au(100) in comparison with other low-index surfaces
[AD-A276714] p 3909 N94-33273

SENSORIMOTOR PERFORMANCE
Concepts and environment
[REPT-93-032] p 3829 N94-31186
Situational awareness: A feasibility investigation of near-threshold skills development
[AD-A276467] p 3798 N94-31243
Tripping over obstacles: Biomechanical analyses of how young and old try to avoid it p 3803 N94-31954
Information theory for arm visuo-motor coordination p 3800 N94-32495

SENSORS
Fiber optic chemical sensors on Mars
[DE94-005251] p 3941 N94-31145

SENSORY DISCRIMINATION
Mechanisms of temporal pattern discrimination by human observers
[AD-A277407] p 3801 N94-32577
Complex auditory signals
[AD-A278391] p 3862 N94-33146

SENTENCES
Resumptive quantifiers in exception sentences
[LP-93-11] p 3855 N94-31403

Sums and quantifiers
[LP-93-05] p 3856 N94-31411
Updates in dynamic semantics
[LP-93-06] p 3856 N94-31450
Completeness and decidability of the mixed style of inference with composition
[LP-93-09] p 3842 N94-31453
Weaks vs. strong readings of donkey sentences and monotonicity inference in a dynamic setting
[LP-93-10] p 3856 N94-31468

SEPARATED FLOW
Computational study of simultaneous heat and mass transfer in turbulent separated flows
p 3704 N94-31843
Computational prediction of stall flutter in spanwise-finite blade cascades p 3584 N94-31967
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071
Backward-facing step measurements at low Reynolds number, Re(sub h)=5000
[NASA-TM-108807] p 3711 N94-33290

SEPARATORS
Electrostatic reduction of particulates for laser resistant hafnia coatings
[DE94-005824] p 3651 N94-31557
Development of silver-zinc cells of improved cycle life and energy density
[AD-A277311] p 3693 N94-32329
Fabrication, phase transformation studies and characterization of SiC-AlN-Al2OC ceramics
[DE94-008587] p 3659 N94-32657

SEQUENTIAL CONTROL
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3692 N94-32112

SERIES EXPANSION
Symplectic Runge-Kutta schemes 3: Canonical elementary differentials
[MATHS-REPT-A-204] p 3840 N94-31159
Stirling's formula and approximations for n(factorial) and the middle ratio
[REPT-93-73] p 3843 N94-31642
Generalization of a theorem of Kusmin
[REPT-93-74] p 3844 N94-31643
Finite-part integrals and the Euler-Maclaurin expansion
[DE94-006539] p 3844 N94-31665
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698

SERVICE LIFE
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Design application and development of spacecraft in LEO utilizing LDEF results p 3597 N94-31047
Shearographic inspection of a DeHavilland DHC-7
[AD-A276716] p 3566 N94-32157
Development of silver-zinc cells of improved cycle life and energy density
[AD-A277311] p 3693 N94-32329
Spur, helical, and spiral bevel transmission life modeling
[NASA-TM-106552] p 3728 N94-32979
Analysis of intermediate level maintenance following F404-GE-400 engine component life reductions
[AD-A277918] p 3585 N94-33283
Design of a high-speed reliable ball bearing
p 3606 N94-33314

SERVOMECHANISMS
Design, characterization and control of the Unique Mobility Corporation robot p 3603 N94-33296

SET THEORY
Triangular norms and conorms: A general tool for generating fuzzy mathematical morphologies
[TELECOM-93-D-001] p 3839 N94-31092
Frames and stable bases for shift-invariant subspaces of L(sub 2)(IR(sup d))
[AD-A276470] p 3843 N94-31474
Line transects, covariance functions and set approximation
[CWI-BS-R9311] p 3846 N94-32084
Multiple inheritance via intersection types
[TR-93-18] p 3848 N94-32292

SEWING
Development of stitched/RTM composite primary structures p 3628 N94-33127
Test and analysis results for composite transport fuselage and wing structures p 3628 N94-33129

SHAFTS (MACHINE ELEMENTS)
Flexible drive shaft coupling
[AD-D016096] p 3727 N94-32718
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108

SHAKING
Procedures for computing site seismicity
[AD-A277666] p 3775 N94-33028

SHALLOW SHELLS
Theory of thick, laminated composite shallow shells
p 3622 N94-31953

SHAPE MEMORY ALLOYS
Transmissibility of nickel-titanium shape memory alloy springs
[AD-A276055] p 3640 N94-31456
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320

SHAPES
Interactive reconstruction of anatomical structures with free-form surfaces
[TELECOM-93-E-002] p 3794 N94-31195
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Principal component analysis with missing data and its application to object modeling
[AD-A276644] p 3845 N94-31939
Large-scale shape optimization: Numerical methods, parallel algorithms, and applications to aerodynamic design p 3815 N94-31966
Visual encoding of spatial relations
[AD-A277400] p 3800 N94-32344
Visual neural development and chromatic aberration
[AD-A277402] p 3800 N94-32345

SHEAR FLOW
On wave interactions of rotational and irrotational flows p 3700 N94-31219
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245
Transport suppression by shear flow generation in multihelicity resistive-g turbulence
[DE94-007108] p 3886 N94-31366
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869
The structure of high Reynolds number turbulent boundary layers, part A
[AD-A278392] p 3710 N94-33162

SHEAR LAYERS
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216

SHEAR PROPERTIES
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632
Analysis of new composite architectures
[NASA-CR-195303] p 3626 N94-32904

SHEAR STRENGTH
Joining of alumina by vacuum brazing
[VTT-TIED-1495] p 3724 N94-31656

SHEAR STRESS
An efficient higher order theory for laminated composite plates and a finite element implementation
p 3617 N94-31215
Considering ties elasticities in high frequency rail dynamics
[ILR-MITT-281(1993)] p 3733 N94-31375
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047
Shearographic inspection of a DeHavilland DHC-7
[AD-A276716] p 3566 N94-32157

SHELL STABILITY
A separation technique for asymptotic-numeric solution for general shells of revolution p 3736 N94-31961

SHELL THEORY
Theory of thick, laminated composite shallow shells
p 3622 N94-31953
Development of an advanced continuum theory for composite laminates, volume 2
[AD-A277276] p 3625 N94-32592

SHELLS (STRUCTURAL FORMS)
A separation technique for asymptotic-numeric solution for general shells of revolution p 3736 N94-31961
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011

SHERGOTTITES
SNC meteorites and their implications for reservoirs of Martian volatiles p 3947 N94-33209
The Martian sources of the SNC meteorites (two, not one), and what can and can't be learned from the SNC meteorites p 3951 N94-33234

SHIFT REGISTERS
Some problems of applied algebra
[CWI-AM-R9306] p 3847 N94-32204

SHIP TO SHORE COMMUNICATION
An analysis of cellular telephone and INMARSAT systems for providing radio data link computer communications for US Navy vessels
[AD-A278143] p 3684 N94-33160

SHIPS
Shiptrack database analysis
[AD-A277228] p 3746 N94-32025
Automated detection of ship tracks in multispectral satellite data
[AD-A276697] p 3746 N94-32119
Ship traffic monitoring and oil spill detection using the ERS-1 SAR p 3751 N94-32542

SHOCK ABSORBERS
MSAT boom joint testing and load absorber design
p 3606 N94-33315

SHOCK DISCONTINUITY
An adaptive method for the exact resolution of shock waves and contact discontinuities
[ISBN-0-315-86498-2] p 3704 N94-31799

SHOCK LAYERS
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026

SHOCK RESISTANCE
Mechanical properties of vacuum-sintered yttria ceramics
[DE94-008138] p 3659 N94-32617

SHOCK TUBES
Development of high-pressure diaphragms for the AEDC impulse tunnel
[AD-A277053] p 3588 N94-32009

SHOCK TUNNELS
Calibration and validation studies in the LENS facility
[AD-A278403] p 3591 N94-33167

SHOCK WAVE INTERACTION
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026
Numerical analysis of transonic wing buffet
p 3586 N94-32713
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU fir:te volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926

SHOCK WAVE PROPAGATION
Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 1: Theory and validation
[NASA-CR-191351] p 3637 N94-32696
Convection in Type 2 supernovae
[DE94-009373] p 3938 N94-32914

SHOCK WAVES
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216
Numerical simulation of interplanetary dynamics
p 3933 N94-31566
An adaptive method for the exact resolution of shock waves and contact discontinuities
[ISBN-0-315-86498-2] p 3704 N94-31799
A new inverse method for generating high-speed aerodynamic flows with application to waverider design
p 3569 N94-31828
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879
A study of physical conditions, radiative transfer and shocks in the interstellar medium p 3937 N94-31963
PVDF pressure transducers for shock wave and explosives research
[AD-A277319] p 3712 N94-32051
Elastic as limit of viscoelastic response, in a context of self-similar viscous limits
[AD-A277043] p 3738 N94-32273
Overview of shock physics codes for armor analysis
[DE94-008948] p 3739 N94-32842
Analysis of data from the plasma composition experiment on the International Sun-Earth Explorer (ISEE 1)
[NASA-CR-195880] p 3893 N94-33074

SHOT NOISE
Wavelet transform of fixed pattern noise in focal plane arrays
[AD-A276963] p 3712 N94-32393

SHUTTLE IMAGING RADAR
Optimal geological data extraction from SPOT-radar synergism with samples from Djebel Amour (Algeria), Red Sea Hills (Sudan), Sirte Basin (Libya), and Magdalena Valley (Colombia) p 3752 N94-32548

SIALON
Compositions and chemical bonding in ceramics by quantitative electron energy-loss spectrometry
[DE94-007208] p 3659 N94-32640

SIDELOBES
Low sidelobe reflector antenna design for communications
[AD-A276079] p 3673 N94-31463

SIGNAL ANALYSIS
Automatic modulation recognition
p 3686 N94-33153
SIGNAL ANALYZERS
Surface forward-scattered acoustic measurements and analysis
[AD-A276998] p 3788 N94-32000
Design of free space interconnected signal processor
[AD-A278129] p 3683 N94-33093
SIGNAL DETECTION
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
Auditory perception
[AD-A277414] p 3800 N94-32419
Mechanisms of temporal pattern discrimination by human observers
[AD-A277407] p 3801 N94-32577
SIGNAL DISTORTION
Kalman filtering approach to blind equalization
[AD-A276320] p 3671 N94-31299
SIGNAL GENERATORS
Periodic and chaotic signal generation in a recursive artificial neural network p 3686 N94-33155
SIGNAL PROCESSING
The generalized multi delay adaptive filter: Structure and convergence analysis
[TELECOM-93-D-004] p 3808 N94-31094
Modulation and coding for the Gaussian channel, possibly affected by fluctuations
[TELECOM-93-E-009] p 3840 N94-31169
Fast autodidactic adaptive equalization algorithms
[TELECOM-93-E-018] p 3670 N94-31174
Scheduling techniques for multiple processor systems in real-time environments
[AD-A276149] p 3824 N94-31249
Algorithms and structures for real-time signal processing
[AD-A276101] p 3810 N94-31277
Kalman filtering approach to blind equalization
[AD-A276320] p 3671 N94-31299
Smart environmental monitor based on neural networks and multi-spectral pattern recognition
[AD-A276445] p 3829 N94-31301
Analysis using bi-spectral related technique
[AD-A276017] p 3672 N94-31386
Concurrent architectures for VLSI signal and image processing
[AD-A276124] p 3688 N94-31445
Analysis of the effect of routing strategies for parallel implementations of a selected avionics application
[AD-A276069] p 3581 N94-31458
Analysis of key performance parameters of phase sampling digital RF memories
[AD-A276019] p 3688 N94-31494
Linearly separable stack-like architecture for the design of weighted order statistic filters with application in image processing
[ISBN-0-315-87284-5] p 3675 N94-31731
Algorithms and parallel architectures for laser acoustic imaging
[ISBN-0-315-86466-4] p 3716 N94-31797
Analysis and design of a formal neural network for filtering a dynamic signal
[ISBN-0-315-86932-1] p 3832 N94-31873
Pulse-splitting and AM-FM conversion in a nonlinear dispersive medium
[AD-A277041] p 3861 N94-32262
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424
A new high-speed IR camera system
p 3713 N94-32459
Universal signal conditioning amplifier
p 3699 N94-32460
The constant current loop: A new paradigm for resistance signal conditioning p 3685 N94-32461
Bounds on least-squares four-parameter sine-fit errors due to harmonic distortion and noise
[DE94-007859] p 3849 N94-32653
Arithmetic averaging: A versatile technique for smoothing and trend removal
[DE94-005274] p 3852 N94-32673
COVICS: A covert video communications system
[DE94-007568] p 3682 N94-32745
Noise cancellation for CELP voice encoders in an F/A-18 noise environment
[AD-A277652] p 3683 N94-33026
Design of free space interconnected signal processor
[AD-A278129] p 3683 N94-33093
High temperature superconducting Josephson junction array systems, phase 1
[AD-A277937] p 3908 N94-33246
Design, characterization and control of the Unique Mobility Corporation robot p 3603 N94-33296
Applied harmonic analysis
[AD-A278384] p 3685 N94-33353
A new tool for signal processing
[AD-A278385] p 3685 N94-33354
SIGNAL RECEPTION
An evaluation of three GPS receivers for use in the GPS sounder
[AD-A278157] p 3577 N94-33253
SIGNAL TO NOISE RATIOS
Performance statistics bulletin. High latitude meteor scatter propagation February, March, April, May 1991
[AD-A276723] p 3678 N94-32158
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276695] p 3680 N94-32299
Performance statistics bulletin. High latitude meteor scatter propagation
[AD-A276696] p 3680 N94-32300
Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347
SIGNAL TRANSMISSION
Channel equalization for block transmission systems
[TELECOM-93-D-002] p 3670 N94-31093
Multi-line passive fiber optic slipring
[AD-D016092] p 3883 N94-32738
Digital beamforming and filtering circuit
[AD-D016142] p 3697 N94-32976
Roll ring assemblies for the Space Station
p 3603 N94-33294
International Space Station Alpha's bearing, motor, and roll ring module developmental testing and results
p 3603 N94-33295
SIGNATURES
The trustworthy digital camera: Restoring credibility to the photographic image p 3714 N94-32470
SILICA GEL
Surface chemistry and durability of borosilicate glass
[DE94-006734] p 3656 N94-32116
Time-resolved analytical methods for liquid/solid interfaces
[DE94-008352] p 3637 N94-32826
SILICA GLASS
Oriented Si and Ge nanocrystals formed in Al2O3 by ion implantation and annealing
[DE94-005593] p 3901 N94-32172
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029
Optical properties of doped sol-gel silica glasses
[AD-A278094] p 3884 N94-33267
SILICATES
Advances and applications of dynamic-angle spinning nuclear magnetic resonance
[DE94-007031] p 3870 N94-32250
SILICIDES
Ion beam synthesis of IrSi3 by 1-MeV Ir ion implantation into Si(111)
[DE94-006556] p 3896 N94-31501
The effect of ductile phase (Nb) reinforcement morphology on the mechanical behavior of an intermetallic matrix (MoSi2) p 3615 N94-32500
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672
SILICON
An extended approach to oxidations and nitridations of Si and Ge(x)Si(1-x) materials
[AD-A276056] p 3631 N94-31282
Ion beam synthesis of IrSi3 by 1-MeV Ir ion implantation into Si(111)
[DE94-006556] p 3896 N94-31501
A silicon condenser microphone: Modelling and electronic circuitry
[ISBN-9-09-005279-8] p 3688 N94-31517
A silicon condenser microphone: Materials and technology
[ISBN-9-09-005899-0] p 3688 N94-31518
Engineering of damage in ion implanted silicon
[ISBN-9-09-005097-3] p 3897 N94-31521
Electrochemical surface modification of silicon monocrystals: A surface analytic examination
[ETN-94-95733] p 3633 N94-31574
Ionizing radiation effects on silicon test structures
[DE94-006060] p 3865 N94-31607
Silicon-Film(tm) photovoltaic manufacturing technology
[DE94-000202] p 3760 N94-32143
Oriented Si and Ge nanocrystals formed in Al2O3 by ion implantation and annealing
[DE94-005593] p 3901 N94-32172
Novel optoelectronic devices based on combining GaAs and InP on Si
[AD-A277018] p 3693 N94-32301
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322
Si/SiO2 interface studies by immersion ellipsometry
[AD-A277277] p 3881 N94-32324
Analytical solutions of minimum ionization particle induced current shapes of silicon detectors and simulation of charge collection properties
[DE94-007523] p 3870 N94-32355
Characterization of interface structure in multilayers using specular x ray reflectance
[DE94-007698] p 3657 N94-32358
Point defect production, geometry, and stability in silicon: A molecular dynamics simulation study
[DE94-008292] p 3903 N94-32411
A scanning defect mapping system for semiconductor characterization p 3885 N94-32446
Femtosecond probe-probe transmission studies of LT-grown GaAs near the band edge
[DE94-006660] p 3904 N94-32634
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672
Ab initio study of the epitaxial growth of Ge on Si(100) surface
[DE94-007245] p 3904 N94-32724
Thin EFG octagons
[DE94-006855] p 3905 N94-32764
Silicon-Based Optoelectronic Materials Symposium and Materials Research Society Proceedings, volume 298
[AD-A277518] p 3662 N94-32952
Low energy ion beam assisted growth of homoepitaxial silicon films at low temperature
[AD-A278092] p 3908 N94-33039
Reconfigurable Array of Radiating Elements (RARE) controlled by light
[NASA-CR-195828] p 3884 N94-33073
Electrical characteristics of GaAs MESFET fabrication by ion implantation of Si or Se
[AD-A278416] p 3909 N94-33328
SILICON ALLOYS
In-situ characterization of growth and interfaces in a-Si:H devices
[DE94-000291] p 3760 N94-31812
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE94-000292] p 3899 N94-31813
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE94-000298] p 3695 N94-32680
Large-area, triple-junction a-Si alloy production scale-up
[DE94-006856] p 3762 N94-32785
SILICON CARBIDES
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A275965] p 3649 N94-31276
Enhancement of oxidation resistance of silicon carbide by high-dose and multi-energy aluminum implantation
[DE94-006560] p 3640 N94-31314
The threshold energy for defect production in SiC: A molecular dynamic study
[DE94-007123] p 3896 N94-31499
The origin of neon-E: Neon-E in single interstellar silicon carbide and graphite grains p 3933 N94-31556
Interfacial behaviour: Wettability in SiC(sub p) metal matrix composites
[ISBN-0-315-87206-3] p 3621 N94-31835
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023
Pressureless sintering of ceramic composites
[AD-A277274] p 3657 N94-32404
Engineering scale development of the Vapor-Liquid-Solid (VLS) process for the production of silicon carbide fibrils
[DE94-007132] p 3659 N94-32618
Improved oxidation resistance of 3-D carbon/carbon composites
[AD-A277349] p 3625 N94-32624
Compositions and chemical bonding in ceramics by quantitative electron energy-loss spectrometry
[DE94-007208] p 3659 N94-32640
Conversion of polymers of methyl- and vinylsilane to Si-C ceramics
[NASA-TM-106554] p 3662 N94-32945
Novel precursor approached for CMC derived by polymer pyrolysis
[AD-A278383] p 3665 N94-33352
SILICON DIOXIDE
Evidence for a correct SiO2 voltage acceleration model
[DE94-006578] p 3690 N94-31594

Hydrogen incorporation and radiation induced dynamics in metal-oxide-silicon structures: A study using nuclear reaction analysis
[ETN-94-95742] p 3898 N94-31610
Preparation of catalyst particles using methods of colloid chemistry. Part 1: Preparation of silica particles from alcohol solutions
[PB94-135597] p 3634 N94-31679
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
Chemical vapor deposition of metal nitrides, phosphides, and arsenides
[DE94-008096] p 3654 N94-31976
Sol-gel coatings for high power laser optics: Past, present, and future
[DE94-007240] p 3718 N94-32252
Si/SiO2 interface studies by immersion ellipsometry
[AD-A277277] p 3881 N94-32324
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3657 N94-32364
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering
[DE94-007300] p 3625 N94-32642
Enhanced thermal capacity aerogels summary report, FY 1993
[DE94-008888] p 3639 N94-33260

SILICON FILMS
Low energy ion beam assisted growth of homoepitaxial silicon films at low temperature
[AD-A278092] p 3908 N94-33039

SILICON JUNCTIONS
Si/SiO2 interface studies by immersion ellipsometry
[AD-A277277] p 3881 N94-32324
Resistivity measurements on the neutron irradiated detector grade silicon materials
[DE94-009083] p 3906 N94-32822

SILICON NITRIDES
Effects of oxidation and creep damage mechanisms on creep behavior in HIPed silicon nitrides
[DE94-006559] p 3618 N94-31313
Reliability analysis of structural ceramics subjected to biaxial flexure p 3650 N94-31454
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
Chemical vapor deposition of metal nitrides, phosphides, and arsenides
[DE94-008096] p 3654 N94-31976
Joining of silicon nitrides using oxynitride glasses
[DE94-008517] p 3658 N94-32517
Novel precursor approached for CMC derived by polymer pyrolysis
[AD-A278383] p 3665 N94-33352

SILICON RADIATION DETECTORS
Gamma Large Area Silicon Telescope (GLAST)
[DE94-006439] p 3925 N94-31786
Resistivity measurements on the neutron irradiated detector grade silicon materials
[DE94-009083] p 3906 N94-32822

SILICONE RUBBER
Effects of orbital exposure on RTV during the LDEF mission p 3597 N94-31043

SILICONES
Silicone grease as a precursor to a pseudo crown-ether ligand: Crystal structure of (K(+)K(Me2SiO)7(+))(HIn(CH2CMe3)3(-))4)
[AD-A276343] p 3895 N94-31327

SILOXANES
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering
[DE94-007300] p 3625 N94-32642

SILVER
High performance YBCO films
[AD-A276493] p 3897 N94-31531
On the formation of muon- and zeta-phases in Ag-Al system by mechanical alloying
[DE94-007125] p 3645 N94-32636

SILVER ALLOYS
On the formation of muon- and zeta-phases in Ag-Al system by mechanical alloying
[DE94-007125] p 3645 N94-32636
Phase relationships and stability of the (mu)- and (zeta)-phases in the Ag-Al-X (X=Zn, Ga, Ge) systems
[DE94-009391] p 3648 N94-33270

SILVER ZINC BATTERIES
Development of silver-zinc cells of improved cycle life and energy density
[AD-A277311] p 3693 N94-32329

SIMD (COMPUTERS)
An efficient three-dimensional Poisson solver for SIMD high-performance-computing architectures
p 3823 N94-31120
Three-dimensional radiative transfer calculations on an SIMD machine applied to accretion disks
p 3932 N94-31141
Proof of concept for the rewrite rule machine: Interensemble studies
[AD-A276506] p 3809 N94-31263
Methods of implementing the Viterbi algorithm on a massively parallel computer of the SIMD (single instruction multiple data) type
[ISBN-0-315-86783-3] p 3814 N94-31752
An analysis of instruction-cached SIMD computer architecture
[AD-A276519] p 3806 N94-31934
Transformational derivation of (parallel) programs using skeletons
[TR-93-20] p 3825 N94-32196

SIMULATION
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Modular Simulator System (MSS) management guide
[AD-A277098] p 3588 N94-32014
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664

SIMULATORS
Modular Simulator System (MSS) management guide
[AD-A277098] p 3588 N94-32014

SINE WAVES
Visual evaluation of computer-generated textures
[AD-A277201] p 3816 N94-32093
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360
Bounds on least-squares four-parameter sine-fit errors due to harmonic distortion and noise
[DE94-007859] p 3849 N94-32653
Generation of the ambiguity function for ultra wideband radar waveforms
[AD-A277913] p 3684 N94-33261

SINGLE CRYSTALS
Ion-beam-driven amorphization of Ca2La8(Si4)6O2 single crystals
[DE94-006219] p 3895 N94-31307
Electrooptic crystal growth and properties
[AD-A276023] p 3896 N94-31439
GaAs/GaN strained layer superlattice materials for high temperature transistors, phase 1
[AD-A276115] p 3897 N94-31528
Characterization of the rare earth orthophosphates and Ce-doped LaPO4 by x ray absorption spectroscopy
[DE94-006313] p 3898 N94-31630
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
In-situ TEM crystallization of anorthite-glass films on (alpha)-Al2O3
[DE94-006317] p 3652 N94-31780
Thermocapillary convection in evaporating sessile drops
[NASA-TM-109758] p 3705 N94-31886
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047
Effect of twin boundary density on the vortex melting transition in YBa2Cu3O(7-delta) single crystals
[DE94-007684] p 3904 N94-32601
SUNY beamline facilities at the National Synchrotron Light Source
[DE94-006343] p 3905 N94-32770
Hyperon polarization, crystal channeling, and E781 at Fermilab
[DE94-008224] p 3877 N94-32802
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825
Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082

SINGLE EVENT UPSETS
Radiation tolerant, high speed, low power, gallium arsenide logic
[AD-A277293] p 3694 N94-32509
Temperature dependence of single-event burnout in n-channel power MOSFET's
[AD-A277921] p 3698 N94-33177
The impact of ASIC devices on the SEU vulnerability of space-borne computers
[AD-A278134] p 3808 N94-33252
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

SINGLE STAGE TO ORBIT VEHICLES
The National Aerospace Plane (NASP): Development issues for the follow-on vehicle
[AD-A278417] p 3581 N94-33329

SINGULARITY (MATHEMATICS)
Finite-part integrals and the Euler-Maclaurin expansion
[DE94-006539] p 3844 N94-31665

SINKS
Defect-solute interactions near irradiation grain boundaries
[DE94-006215] p 3641 N94-31627

SINTERING
Pressureless sintering of ceramic composites
[AD-A277274] p 3657 N94-32404
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779
Enhanced thermal capacity aerogels summary report, FY 1993
[DE94-008888] p 3639 N94-33260

SIS (SUPERCONDUCTORS)
High T(sub c) superconductor tunnel junctions for photon detectors
[DE94-007686] p 3904 N94-32602

SKIN (ANATOMY)
Development of a video fluorescence system for assessing burn depth
[AD-A278127] p 3798 N94-33092

SKIN FRICTION
Flight test results of riblets at supersonic speeds
[NASA-TM-4387] p 3572 N94-32880

SKIN TEMPERATURE (BIOLOGY)
Errors associated with the use of heat flow transducers p 3796 N94-31742

SKIRTS
Heave dynamics of an air cushion vehicle bag and finger skirt
[ISBN-0-315-87053-2] p 3568 N94-31734

SKY SURVEYS (ASTRONOMY)
Multiwavelength search for protoplanetary disks
p 3599 N94-31430
Near infrared surveys of high mass star forming regions p 3925 N94-31898
A multi-frequency study of an x ray selected sample of active galactic nuclei p 3937 N94-31987

SKY WAVES
Atmospheric effects assessment program: Ionospheric sounding
[AD-A276447] p 3770 N94-31303

SLEEP
Unit specific crew rest strategies: Phase 1 evaluation of the 1/212th Aviation Battalion during shiftwork transitions
[AD-A277122] p 3804 N94-32379

SLEEP DEPRIVATION
Effects of methamphetamine and fatigue on long- and short-term memory
[AD-A276452] p 3799 N94-32187

SLENDER BODIES
A new method for calculating wing along aerodynamics to angle of attack 180 deg
[AD-A277965] p 3574 N94-33263

SLIDING FRICTION
Mechanics of failure of high temperature metal matrix composites
[AD-A277397] p 3624 N94-32342

SLIP CASTING
Pressureless sintering of ceramic composites
[AD-A277274] p 3657 N94-32404

SLIPSTREAMS
Prediction of transonic potential flow with slipstreams around configurations
[FFA-TN-1992-15] p 3568 N94-31220

SLOT ANTENNAS
Analysis of a slot coupled coplanar waveguide fed patch antenna
[NASA-TM-106567] p 3698 N94-33116

SLOTS
Applied Computational Electromagnetics Society Journal, volume 9, number 1, March 1994
[AD-A276753] p 3679 N94-32183

SLURRIES
Development of a catalytic system for gasification of wet biomass
[DE94-006216] p 3759 N94-31762
Effect of surface forces on the rheology of particle-liquid systems and the consolidation of ceramic powders
[AD-A277092] p 3657 N94-32391
Technology development for iron Fischer-Tropsch catalysts
[DE94-008723] p 3638 N94-32889

SMALL SCIENTIFIC SATELLITES
The ALEXIS mission recovery
[DE94-007549] p 3611 N94-32813

SMART STRUCTURES
Control and stabilization of distributed parameter systems; theoretical and computational aspects
[AD-A277239] p 3738 N94-32275

Structural integrity of intelligent materials and structures
[AD-A278397] p 3630 N94-33165
SMOOTHING
Filtering of satellite altimetry data with optimal smoothing cubic splines to compute geoid heights, along-tract geoid and gravity gradients in the Indonesian waters and its surroundings
[PB94-147527] p 3741 N94-31074
SNOW
Satellite radar altimetry over the continental ice sheets p 3742 N94-31570
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model
[AD-A277217] p 3783 N94-32021
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791
SNOW COVER
Snowmelt forecasting. Further cold regions development of operational hydrological forecasting, volume 2
[AD-A278123] p 3757 N94-33269
SOCIAL FACTORS
Using the National Information Infrastructure for social science, education, and informed decision making
[DE94-005442] p 3920 N94-32676
SOCIOLOGY
The contribution of aeronautics and astronautics to the quality of life on Earth
[ILR-MITT-283(1993)] p 3764 N94-31611
Using the National Information Infrastructure for social science, education, and informed decision making
[DE94-005442] p 3920 N94-32676
SODIUM
Near resonant absorption by atoms in intense fluctuating laser fields
[DE94-005873] p 3714 N94-31200
SODIUM SULFATES
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023
SODIUM SULFUR BATTERIES
Overview of Sandia's electric vehicle battery program
[DE94-008944] p 3696 N94-32806
SOFTWARE ENGINEERING
Design patterns mixing genericity and inheritance in the development of reusable components
[REPT-93-021] p 3808 N94-31178
Guide to software quality assurance
[ESA-PSS-05-11-ISSUE-1] p 3809 N94-31223
Cleanroom engineering handbook. Volume 6: Certification team practices
[AD-A275951] p 3587 N94-31346
Cleanroom engineering handbook. Volume 1: Cleanroom engineering process introduction and overview
[AD-A275949] p 3587 N94-31356
E-L user's manual
[AD-A276378] p 3810 N94-31370
The development and use of an evaluation mechanism for the assessment of software configuration management tools
[AD-A275961] p 3810 N94-31383
A model and algorithms for a software evolution control system
[AD-A276431] p 3811 N94-31449
Software reuse case study: TRILLIUM
[AD-A276108] p 3811 N94-31465
Overview of megaprogramming course: Lectures and exercises
[AD-A276169] p 3814 N94-31810
Aerospace software engineering for advanced systems architectures
[AD-A277101] p 3581 N94-31977
Getting a handle on designing for avionics software supportability and maintainability
[AD-A276362] p 3581 N94-32055
The advent of failure analysis software technology
[DE94-006593] p 3692 N94-32111
Integrated Trusted System Development Environment Process
[AD-A276414] p 3816 N94-32131
Modular Simulator System (MSS). Engineering design guide
[AD-A276967] p 3589 N94-32394
Modular Simulator System (MSS): Interface design document for the generic MSS
[AD-A277270] p 3590 N94-32403
Evolving software reengineering technology for the emerging innovative-competitive era p 3823 N94-32439
Emacs Lisp in Edwin scheme
[AD-A276721] p 3818 N94-32504
Case studies of software process improvement methods
[AD-A277289] p 3818 N94-32508
OPT++: An object-oriented class library for nonlinear optimization
[DE94-008890] p 3818 N94-32584
The role of guideline-based design tools
[DE94-007482] p 3804 N94-32596
A framework for developing and managing reusable avionics software
[AD-A276846] p 3582 N94-32909
Machine assisted implementation of complex algorithms and labor intensive software, closing report
[AD-A277662] p 3821 N94-33027
Implementing software safety in the NASA environment
[NASA-TM-106597] p 3731 N94-33032
Increasing the practical impact of formal methods for computer-aided software development: Software slicing, merging and integration
[AD-A277929] p 3822 N94-33179
Faultless software project
[AD-A278161] p 3822 N94-33188
Structuring Z specifications with views
[AD-A277618] p 3822 N94-33279
Ada support for the mathematical foundations of software engineering
[AD-A278031] p 3822 N94-33284
MODIS. Volume 1: MODIS level 1A software baseline requirements
[NASA-TM-104594-VOL-1] p 3823 N94-33287
A problem-solving approach to knowledge acquisition p 3854 N94-33344
SOFTWARE RELIABILITY
Guide to software quality assurance
[ESA-PSS-05-11-ISSUE-1] p 3809 N94-31223
Cleanroom engineering handbook. Volume 6: Certification team practices
[AD-A275951] p 3587 N94-31346
Consistency checks for SCR-style requirements specifications
[AD-A276077] p 3811 N94-31461
Getting a handle on designing for avionics software supportability and maintainability
[AD-A276362] p 3581 N94-32055
A framework for developing and managing reusable avionics software
[AD-A276846] p 3582 N94-32909
Increasing the practical impact of formal methods for computer-aided software development: Software slicing, merging and integration
[AD-A277929] p 3822 N94-33179
SOFTWARE REUSE
Design patterns mixing genericity and inheritance in the development of reusable components
[REPT-93-021] p 3808 N94-31178
Software reuse case study: TRILLIUM
[AD-A276108] p 3811 N94-31465
Evolving software reengineering technology for the emerging innovative-competitive era p 3823 N94-32439
A framework for developing and managing reusable avionics software
[AD-A276846] p 3582 N94-32909
SOFTWARE TOOLS
Discovery systems for manufacturing
[AD-A276216] p 3828 N94-31061
A comparison of product realization frameworks
[AD-A275992] p 3810 N94-31357
The development and use of an evaluation mechanism for the assessment of software configuration management tools
[AD-A275961] p 3810 N94-31383
Consistency checks for SCR-style requirements specifications
[AD-A276077] p 3811 N94-31461
A hierarchical approach to test generation for CMOS VLSI circuits
[ISBN-9-09-005449-9] p 3689 N94-31535
DOME: Dynamic optimization on multiprocessor engines, a statistical approach p 3807 N94-31972
Incremental recompilation for Standard ML of New Jersey
[AD-A276522] p 3815 N94-32080
Experiences with EDO: An Evolutionary Database Optimizer
[TR-93-23] p 3918 N94-32105
The advent of failure analysis software technology
[DE94-006593] p 3692 N94-32111
Analytical Design Package (ADP2): A computer aided engineering tool for aircraft transparency design p 3823 N94-32430
CONFIG: Integrated engineering of systems and their operation p 3823 N94-32432
Spacecraft On-Board Information Extraction Computer (SOBIEC) p 3808 N94-32433
Emacs Lisp in Edwin scheme
[AD-A276721] p 3818 N94-32504
Production of terrain data: Optical radar complementarity p 3750 N94-32540
MADE: A Multiple Application Development Environment
[CWI-CS-R9360] p 3822 N94-33097
Selection criteria and facilitation training for the study of groupware
[NASA-CR-195906] p 3822 N94-33114
The hypermedia technology as front end to knowledge processing systems p 3854 N94-33343
SOI (SEMICONDUCTORS)
Advanced silicon technology for microwave circuits
[AD-A278039] p 3698 N94-33091
SOIL EROSION
Arid regions and wind erosion p 3780 N94-31005
SOIL MAPPING
Possible complementarity of SPOT/ERS in mapping land use: Study on agricultural land in Brittany (France) p 3755 N94-32563
SOIL MECHANICS
Microwave dielectric behavior of soils. Report 3: Measurement and modeling
[AD-A276060] p 3771 N94-31457
SOIL MOISTURE
Microwave dielectric behavior of soils. Report 1: Summary of related research and applications
[AD-A275980] p 3771 N94-31351
Microwave dielectric behavior of soils. Report 2: A unique coaxial measurement apparatus
[AD-A275982] p 3771 N94-31353
Application of ERS-1 SAR data for hydrological studies p 3754 N94-32558
A long-term simulation of surface fluxes and soil moisture
[DE94-006661] p 3774 N94-32772
SOIL SCIENCE
Microwave dielectric behavior of soils. Report 1: Summary of related research and applications
[AD-A275980] p 3771 N94-31351
Microwave dielectric behavior of soils. Report 2: A unique coaxial measurement apparatus
[AD-A275982] p 3771 N94-31353
SOILS
Fiber optic chemical sensors on Mars
[DE94-005251] p 3941 N94-31145
Microwave dielectric behavior of soils. Report 1: Summary of related research and applications
[AD-A275980] p 3771 N94-31351
Microwave dielectric behavior of soils. Report 2: A unique coaxial measurement apparatus
[AD-A275982] p 3771 N94-31353
Microwave dielectric behavior of soils. Report 3: Measurement and modeling
[AD-A276060] p 3771 N94-31457
Analysis of GER imaging spectrometry data for the identification of soil and vegetation parameters in land degradation studies p 3744 N94-31857
Possibilities of GER data for soil surface characteristics in the Almaden area p 3744 N94-31859
The effects of vegetation on the ability to map soils using GERIS data p 3744 N94-31860
Procedures for computing site seismicity
[AD-A277666] p 3775 N94-33028
Mars: Past, Present, and Future. Results from the MSATT Program, part 1
[NASA-CR-194279] p 3943 N94-33190
Thermal emission measurements (5-25 microns) of Hawaiian palagonitic soils with implications for Mars p 3944 N94-33193
The importance of environmental conditions in reflectance spectroscopy of laboratory analogs for Mars surface materials p 3944 N94-33195
Ferric sulfate montmorillonites as Mars soil analogs p 3944 N94-33196
Magmatic volatiles and the weathering of Mars p 3946 N94-33201
Martian spectral units derived from ISM imaging spectrometer data p 3949 N94-33220
SOL-GEL PROCESSES
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Passive vibration damping materials: Piezoelectric ceramic composites for vibration damping applications
[AD-A276550] p 3653 N94-31935
The sol-gel-xerogel transition
[AD-A276647] p 3616 N94-32038
Ion-irradiation-induced densification of zirconia sol-gel thin films
[DE94-006248] p 3656 N94-32103
Sol-gel coatings for high power laser optics: Past, present, and future
[DE94-007240] p 3718 N94-32252

Nonlinear optical polymers derived from organic/inorganic composites
[AD-A277408] p 3659 N94-32610
Structure-property relationships of carbon aerogels
[DE94-007120] p 3660 N94-32687
Low loss second-order nonlinear optical polymers based on all organic sol-gel materials
[AD-A277482] p 3663 N94-32985
Optical properties of doped sol-gel silica glasses
[AD-A278094] p 3884 N94-33267
Novel sol-gel deposition for repair of conducting paths in polyceramic systems
[AD-A278381] p 3664 N94-33350

SOLAR ACTIVITY
Proceedings of the International Workshop on Artificial Intelligence Applications in Solar-Terrestrial Physics
[PB94-142064] p 3832 N94-31808
Steps toward understanding the solar dynamo
[AD-A277398] p 3953 N94-32343
Solar activities at Sandia National Laboratories
[DE94-007737] p 3761 N94-32648
Diurnal, seasonal and solar activity variations of F-region parameters
[AD-A278106] p 3776 N94-33285

SOLAR ACTIVITY EFFECTS
Evidence of solar oscillations in Rayleigh-scattered light p 3952 N94-31214

SOLAR ARRAYS
Atomic oxygen erosion considerations for spacecraft materials selection p 3593 N94-31022
Impact of LDEF photovoltaic experiment findings upon spacecraft solar array design and development requirements p 3594 N94-31028
Solar lunar power p 3599 N94-31427
A solar array module fabrication process for HALE solar electric UAVs
[DE94-006212] p 3760 N94-32174
Arcing in space structures in low Earth orbit
[NASA-CR-194223] p 3694 N94-32478
INSAT-2A and 2B development mechanisms p 3603 N94-33293
Space Station Freedom Solar Array tension mechanism development p 3604 N94-33300
Lessons learned from selecting and testing spaceflight potentiometers p 3607 N94-33318
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320

SOLAR BLANKETS
Space Station Freedom solar array containment box mechanisms p 3603 N94-33292

SOLAR CELLS
Impact of LDEF photovoltaic experiment findings upon spacecraft solar array design and development requirements p 3594 N94-31028
Role of polycrystallinity in CdTe and CuInSe2 photovoltaic cells
[DE94-000293] p 3758 N94-31236
Automated solar cell assembly teamed process research
[DE94-000295] p 3759 N94-31279
Solar lunar power p 3599 N94-31427
In-situ characterization of growth and interfaces in a-Si:H devices
[DE94-000291] p 3760 N94-31812
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE94-000292] p 3899 N94-31813
Silicon-Film(tm) photovoltaic manufacturing technology
[DE94-000202] p 3760 N94-32143
A solar array module fabrication process for HALE solar electric UAVs
[DE94-006212] p 3760 N94-32174
A scanning defect mapping system for semiconductor characterization p 3885 N94-32446
Arcing in space structures in low Earth orbit
[NASA-CR-194223] p 3694 N94-32478
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE94-000298] p 3695 N94-32680
Development of a computer model for polycrystalline thin-film CuInSe2 and CdTe solar cells
[DE94-006853] p 3762 N94-32763
Thin EFG octagons
[DE94-006855] p 3905 N94-32764
Large-area, triple-junction a-Si alloy production scale-up
[DE94-006856] p 3762 N94-32765
Combined contamination and space environmental effects on solar cells and thermal control surfaces
[NASA-TM-106592] p 3617 N94-33022
Space Station Freedom solar array containment box mechanisms p 3603 N94-33292
Space Station Freedom Solar Array tension mechanism development p 3604 N94-33300

SOLAR COLLECTORS
Databases and demands for solar heating materials
[PB94-137494] p 3758 N94-31070
Solar energy in China
[PB94-137502] p 3758 N94-31071
Concentration system performance degradation in the aftermath of Mount Pinatubo
[DE94-001879] p 3764 N94-31602
Operational experience and evaluation of a dual-element stretched-membrane heliostat
[DE94-008827] p 3763 N94-32965

SOLAR ENERGY
Solar resource: Utility load-matching assessment
[DE94-000297] p 3758 N94-31264
Solar lunar power p 3599 N94-31427
NEMO: Advanced energy systems and technologies
[DE94-721996] p 3760 N94-31767
Renewable energy technology development at Sandia National Laboratories
[DE94-007734] p 3761 N94-32383
Solar activities at Sandia National Laboratories
[DE94-007737] p 3761 N94-32648

SOLAR ENERGY CONVERSION
Solar energy in China
[PB94-137502] p 3758 N94-31071
Proceedings of the Seventeenth DOE Solar Photochemistry Research Conference
[DE94-005552] p 3759 N94-31648
NEMO: Advanced energy systems and technologies
[DE94-721996] p 3760 N94-31767

SOLAR FLARES
Collective acceleration in solar flares
[DE94-006288] p 3953 N94-31632
Steps toward understanding the solar dynamo
[AD-A277398] p 3953 N94-32343
BATSE data analysis
[NASA-CR-195818] p 3927 N94-32942
Spatial correlation of ionospheric variability
[AD-A278105] p 3776 N94-33041

SOLAR FLUX
An evaluation of RAMS radiation schemes by field measurements
[DE94-008053] p 3767 N94-32750

SOLAR GENERATORS
Metal hydrides in hydrogen energy systems
[VTT-TIED-1407] p 3759 N94-31655
Optimal planning of residential photovoltaic systems under various rate structure
[DE94-757272] p 3762 N94-32919

SOLAR HEATING
Databases and demands for solar heating materials
[PB94-137494] p 3758 N94-31070
Solar energy in China
[PB94-137502] p 3758 N94-31071

SOLAR INSTRUMENTS
Evidence of solar oscillations in Rayleigh-scattered light p 3952 N94-31214

SOLAR MAGNETIC FIELD
Theoretical studies of magnetohydrodynamic equilibria and dynamics of a solar coronal loop p 3953 N94-31792
Steps toward understanding the solar dynamo
[AD-A277398] p 3953 N94-32343

SOLAR NEUTRINOS
Nuclear physics and astrophysics
[DE94-007168] p 3939 N94-33147

SOLAR OSCILLATIONS
Evidence of solar oscillations in Rayleigh-scattered light p 3952 N94-31214

SOLAR PHYSICS
Solar physics and terrestrial effects. A curriculum guide for teachers, grade 7-12
[PB94-142247] p 3953 N94-31595
Theoretical studies of magnetohydrodynamic equilibria and dynamics of a solar coronal loop p 3953 N94-31792
Proceedings of the International Workshop on Artificial Intelligence Applications in Solar-Terrestrial Physics
[PB94-142064] p 3832 N94-31808
High sensitivity and resolution decimetric spectroscope: Preliminary analysis of solar bursts
[INPE-5537-TDI/525] p 3954 N94-33080

SOLAR POWERED AIRCRAFT
A solar array module fabrication process for HALE solar electric UAVs
[DE94-006212] p 3760 N94-32174

SOLAR RADIATION
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
Evidence of solar oscillations in Rayleigh-scattered light p 3952 N94-31214
Users manual for SERI QC software assessing the quality of solar radiation data
[DE93-018210] p 3953 N94-31491
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153
Steps toward understanding the solar dynamo
[AD-A277398] p 3953 N94-32343

SOLAR RADIO BURSTS
High sensitivity and resolution decimetric spectroscope: Preliminary analysis of solar bursts
[INPE-5537-TDI/525] p 3954 N94-33080

SOLAR TERRESTRIAL INTERACTIONS
Solar physics and terrestrial effects. A curriculum guide for teachers, grade 7-12
[PB94-142247] p 3953 N94-31595
Proceedings of the International Workshop on Artificial Intelligence Applications in Solar-Terrestrial Physics
[PB94-142064] p 3832 N94-31808
Analysis of data from the plasma composition experiment on the International Sun-Earth Explorer (ISEE 1)
[NASA-CR-195880] p 3893 N94-33074

SOLAR THERMAL ELECTRIC POWER PLANTS
Renewable energy technology development at Sandia National Laboratories
[DE94-007734] p 3761 N94-32383

SOLAR WIND
Analysis of data from the plasma composition experiment on the International Sun-Earth Explorer (ISEE 1)
[NASA-CR-195880] p 3893 N94-33074

SOLDERING
Automated solar cell assembly teamed process research
[DE94-000295] p 3759 N94-31279
The 18th annual electronics manufacturing seminar
[AD-A276038] p 3687 N94-31281
Aging effects on the microstructure, surface characteristics and wettability of Cu pretinned with Sn-Pb solders
[DE94-007033] p 3641 N94-31638
Automated fiber pigtailing technology
[DE94-007072] p 3695 N94-32688
Space flight printed wiring board measling investigation
[NASA-TM-104602] p 3732 N94-33101

SOLDERS
Aging effects on the microstructure, surface characteristics and wettability of Cu pretinned with Sn-Pb solders
[DE94-007033] p 3641 N94-31638

SOLID ELECTROLYTES
Novel electroactive polymers and block copolymers
[AD-A276119] p 3650 N94-31509
Conductivity measurements of ceria-based solid electrolytes using AC impedance
[DE94-007380] p 3694 N94-32593

SOLID LUBRICANTS
Soft x ray photoelectron spectroscopy study of the interaction of Cr with MoS2(0001)
[AD-A276916] p 3635 N94-32233
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941
Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A278133] p 3728 N94-33061
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312

SOLID PHASES
Strongly coupled ionic mixtures and the H/He EOS
[DE94-006391] p 3934 N94-31782
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296

SOLID PROPELLANT COMBUSTION
Condensed-phase processes during solid propellant combustion. 3: Preliminary depth-profiling studies on XM39, JA2, M9, M30, and HMX2
[AD-A276595] p 3635 N94-32124

SOLID PROPELLANT IGNITION
Shock tube ignition and combustion of aluminum/magnesium alloy particles in oxygen at high pressure p 3631 N94-31286

SOLID PROPELLANT ROCKET ENGINES
The prediction of convective transfer on the thermal insulation of a solid-propellant rocket motor
[ONERA-NT-1993-15] p 3614 N94-31423
Combustor and nozzle effects on particulate behavior in solid rocket motors
[AD-A277304] p 3614 N94-32071

SOLID PROPELLANTS
A model of concurrent flow flame spread over a thin solid fuel p 3634 N94-31795

NATO Advanced Study Institute on Unsteady Combustion. Volume 2: Research papers, September 6-17, 1993
[AD-A276572] p 3634 N94-32033
SOLID SOLUTIONS
On the formation of muon- and zeta-phases in Ag-Al system by mechanical alloying
[DE94-007125] p 3645 N94-32636
Phase relationships and stability of the (mu)- and (zeta)-phases in the Ag-Al-X (X=Zn, Ga, Ge) systems
[DE94-009391] p 3648 N94-33270
SOLID STATE
Summary of the 1993 Winter ACP Workshop on Collective Dynamics in Disordered System
[AD-A276355] p 3664 N94-31402
Solid-state resistance upset welding: A process with unique advantages for advanced materials
[DE94-005941] p 3723 N94-31524
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-006132] p 3905 N94-32779
SOLID STATE DEVICES
Proceedings of the International Workshop on Computational Electronics
[AD-A277020] p 3692 N94-32259
SOLID STATE LASERS
Transient radiation-induced absorption in the materials for a GSGG laser
[DE94-005316] p 3714 N94-31148
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency conversion
[AD-A276126] p 3714 N94-31278
Scenarios for multi-unit inertial fusion energy plants producing hydrogen fuel
[DE94-006614] p 3666 N94-32114
High conversion efficiency pumped-cavity second harmonic generation of a diode laser
[DE94-006805] p 3717 N94-32134
Ti:sapphire based ultrafast pump-probe laser source in the violet and ultraviolet
[DE94-007542] p 3718 N94-32270
Repetitively pulsed Cr:LiSAF laser for lidar applcations
[DE94-007546] p 3720 N94-32761
Multifrequency, rapidly sequenced or simultaneous tunable laser
[AD-D016169] p 3721 N94-32968
SOLID SURFACES
Solid surface
[NASA-TM-109746] p 3634 N94-31883
SOLID-SOLID INTERFACES
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649
New micro- and macroscopic models of contact and friction
[AD-A277240] p 3726 N94-32320
SOLIDIFICATION
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
Microstructures and mechanical properties of Al3Ti-based alloys: Analysis in single phase and multiphase systems
[ONERA-NT-1993-6] p 3640 N94-31420
SOLIDS
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248
The Sixth Symposium on Unconventional Photoactive Solids. Abstracts
[AD-A277198] p 3655 N94-32016
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209
Advances and applications of dynamic-angle spinning nuclear magnetic resonance
[DE94-007031] p 3870 N94-32250
SOLITARY WAVES
Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250
SOLUBILITY
Cloud studies seen from a physical chemist's perspective
[DE94-006059] p 3771 N94-31527
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-007723] p 3653 N94-31917
Phase relationships and stability of the (mu)- and (zeta)-phases in the Ag-Al-X (X=Zn, Ga, Ge) systems
[DE94-009391] p 3648 N94-33270
SOLUTES
Defect-solute interactions near irradiation grain boundaries
[DE94-006215] p 3641 N94-31627
SOLUTIONS
Solvent diffusion coefficient concentration dependence in polymer solutions
[AD-A277023] p 3655 N94-32005
Influence of trace components on the viscoelastic properties of a polymer solution
[AD-A277171] p 3656 N94-32253
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3657 N94-32364
SOLVATION
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757
SOLVENT EXTRACTION
Recovery of carboxylic acids at pH greater than pKa
[DE94-007030] p 3636 N94-32376
SOLVENTS
Solvent diffusion coefficient concentration dependence in polymer solutions
[AD-A277023] p 3655 N94-32005
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3657 N94-32364
Radiation and photochemistry section
[DE94-008880] p 3873 N94-32757
SONAR
Analysis using bi-spectral related technique
[AD-A276017] p 3672 N94-31386
Multi-scale studies of seafloor topography
[AD-A277008] p 3789 N94-32400
SONDES
Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759
SONIC BOOMS
Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Investigation of sonic boom for the Space Shuttle: Low cross-range orbiter
[NASA-TM-108237] p 3860 N94-31337
SOOT
Soot and liquid-phase fuel distributions in a newly designed optically accessible DI diesel engine
[DE94-005648] p 3723 N94-31651
Photothermal laser deflection, an innovative technique to measure particles in exhausts
[AD-A277151] p 3718 N94-32366
SORBENTS
Recovery of carboxylic acids at pH greater than pKa
[DE94-007030] p 3636 N94-32376
SOUND FIELDS
Scattering of a random acoustic field by an infinite cylinder: Application to the modelization of the acoustic environment of the 'Ariane 5' launcher scale-model using experimental data
[ONERA-NT-1993-11] p 3860 N94-31226
Computer implementation of Arnott's formulation of thermoacoustics using MATLAB
[AD-A276356] p 3860 N94-31257
Wavevector-frequency analysis with applications to acoustics
[AD-A276618] p 3861 N94-32125
SOUND PRESSURE
Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Investigation of sonic boom for the Space Shuttle: Low cross-range orbiter
[NASA-TM-108237] p 3860 N94-31337
SOUND RANGING
Multi-scale studies of seafloor topography
[AD-A277008] p 3789 N94-32400
SOUND TRANSMISSION
Vibrations of a heavy truck diesel engine and gearbox unit: Examining structure-borne sound transmission with statistical energy analysis
[CTH-E-93-04] p 3722 N94-31194
Acoustic window
[AD-D016171] p 3862 N94-33017
SOUND WAVES
Ocean acoustic propagation measurements and wave propagation in random media
[AD-A276165] p 3787 N94-31053
Quality of sound in large rooms: Alteration of room impulse responses
[CTH-E-93-02] p 3859 N94-31077
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276463] p 3860 N94-31242
Aeroacoustic sources in internal flows
[ISBN-9-03-86-0282-0] p 3860 N94-31653
Fiber optic sensors for the detection of surface acoustic waves on metals
[ISBN-0-315-87055-9] p 3878 N94-31736
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846
Boundary control of scattering p 3861 N94-31899
Wavevector-frequency analysis with applications to acoustics
[AD-A276618] p 3861 N94-32125
Pulse-splitting and AM-FM conversion in a nonlinear dispersive medium
[AD-A277041] p 3861 N94-32262
Auditory perception
[AD-A277414] p 3800 N94-32419
Advanced satellite communication system
[NASA-CR-194211] p 3681 N94-32477
Digital beamforming and filtering circuit
[AD-D016142] p 3697 N94-32976
Acoustic window
[AD-D016171] p 3862 N94-33017
SOURCE PROGRAMS
Incremental recompilation for Standard ML of New Jersey
[AD-A276522] p 3815 N94-32080
SOUTHERN OSCILLATION
Air-sea interaction patterns in the equatorial Pacific
[AD-A277305] p 3788 N94-32072
ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States
[AD-A277306] p 3789 N94-32327
SPACE BASED RADAR
Radar rainfall measurements from space p 3782 N94-31889
SPACE CHARGE
Development of a 3D numerical code to calculate the trajectories of the blow off electrons emitted by a vacuum surface discharge: Application to the study of the electromagnetic interference induced on a spacecraft
[ONERA-NT-1993-12] p 3863 N94-31227
Resistivity measurements on the neutron irradiated detector grade silicon materials
[DE94-009083] p 3906 N94-32822
SPACE COLONIES
Marsville: The cosmic village
[NASA-TM-109752] p 3913 N94-31806
SPACE COMMERCIALIZATION
Access to space: The Space Shuttle's evolving rolee
[AD-A276785] p 3608 N94-32190
SPACE DEBRIS
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Morphology correlation of craters formed by hypervelocity impacts p 3594 N94-31031
Micrometeoroid/space debris effects on materials p 3595 N94-31032
SPACE ENVIRONMENT SIMULATION
Ground-based simulation of LEO environment: Investigations of a select LDEF material: FEP Teflon (trademark) p 3596 N94-31039
What LDEF means for development and testing of materials p 3598 N94-31050
Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814
SPACE ERECTABLE STRUCTURES
MSAT boom joint testing and load absorber design p 3606 N94-33315
SPACE EXPLORATION
Evaluating success levels of mega-projects p 3599 N94-31432
NASA report to education, volume 9
[NASA-TM-109760] p 3913 N94-31817
NASA strategic plan
[NASA-TM-109780] p 3915 N94-32222
SPACE INDUSTRIALIZATION
Space industrialization: A guide to government information
[RELEASE-1.2] p 3916 N94-31338
DOD space based requirements: Increasing DOD access to space
[AD-A276874] p 3601 N94-32211
SPACE LAW
Legal regime of human activities in outer space law p 3599 N94-31431
Space history, space policy, and executive leadership
[NASA-TM-109787] p 3924 N94-33067
SPACE LOGISTICS
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100

SPACE MAINTENANCE
Use of a pitch adjustable foot restraint system: Operator strength capability and load requirements
[NASA-TP-3477] p 3805 N94-33050
SPACE MANUFACTURING
A large motion zero-gravity suspension system for experimental simulation of orbital construction and deployment
[NASA-CR-195881] p 3668 N94-33037
Design, characterization, and control of the NASA three degree of freedom reaction compensation platform
p 3605 N94-33304
SPACE MISSIONS
The double probe electric field experiment on Freja: Description and first results
[TRITA-ALP-1993-02] p 3885 N94-31089
Participation in the scientific activities of the Waves in Space Plasma (WISP) project
[NASA-CR-195903] p 3894 N94-33113
SPACE NAVIGATION
The contribution of aeronautics and astronautics to the quality of life on Earth
[ILR-MITT-283(1993)] p 3764 N94-31611
SPACE PERCEPTION
A neural network model for the visual perception of the depth of a scene from stereoscopy and shading
[ISBN-0-315-86753-1] p 3831 N94-31750
Sensory sensitivities and discriminations and their roles in aviation
[AD-A277312] p 3800 N94-32276
Neural models of spatial orientation in novel environments
[AD-A277383] p 3835 N94-32340
Visual neural development and chromatic aberration
[AD-A277402] p 3800 N94-32345
SPACE PLASMAS
Laboratory and space experiments as a key to the plasma universe
[TRITA-ALP-1993-01] p 3885 N94-31088
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781
Computer modeling of active experiments in space plasmas p 3890 N94-31927
Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326
Ionospheric plasma outflow in response to transverse ion heating: Self-consistent macroscopic treatment
[NASA-CR-195820] p 3893 N94-33048
Characteristics of ion flow in the quiet state of the inner plasma sheet
[AD-A277451] p 3894 N94-33106
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111
Participation in the scientific activities of the Waves in Space Plasma (WISP) project
[NASA-CR-195903] p 3894 N94-33113
SPACE PLATFORMS
NASA's space platform technology program and planning p 3597 N94-31044
SPACE POWER REACTORS
Utilizing a Russian space nuclear reactor for a United States space mission: Flight qualification issues
[DE94-004674] p 3613 N94-31265
Draft minutes of IAPG Mechanical Working Group meeting
[DE94-004954] p 3759 N94-31266
The development of CVR coatings for PBR fuels
[DE94-004233] p 3875 N94-31480
Development of lightweight radiators for lunar based power systems
[NASA-TM-106604] p 3726 N94-32272
A 1050 K Stirling space engine design
[NASA-CR-182149] p 3616 N94-32866
Independent safety assessment of the Topaz-2 space nuclear reactor power system
[DE94-008653] p 3877 N94-32879
SPACE PROBES
The double probe electric field experiment on Freja: Description and first results
[TRITA-ALP-1993-02] p 3885 N94-31089
SPACE PROCESSING
Design, characterization, and control of the NASA three degree of freedom reaction compensation platform
p 3605 N94-33304
SPACE PROGRAMS
Aeronautics and space report of the President: Fiscal year 1993 activities p 3966 N94-32854
SPACE RENDEZVOUS
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388
SPACE SHUTTLE MAIN ENGINE
Design of a cold-flow test facility for the high pressure fuel turbopump turbine of the Space Shuttle main engine
[AD-A276743] p 3615 N94-32182
Real-time sensor data validation
[NASA-CR-195295] p 3616 N94-33099
SPACE SHUTTLE MISSIONS
OARE flight maneuvers and calibration measurements on STS-58
[NASA-TM-109093] p 3613 N94-32924
Chronology of KSC and KSC related events for 1993
[NASA-TM-109196] p 3966 N94-33072
SPACE SHUTTLE ORBITERS
Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Investigation of sonic boom for the Space Shuttle: Low cross-range orbiter
[NASA-TM-108237] p 3860 N94-31337
Computational methods for frictional contact with applications to the Space Shuttle orbiter nose-gear tire
p 3608 N94-32295
SPACE SHUTTLES
Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020
Access to space: The Space Shuttle's evolving rolee
[AD-A276785] p 3608 N94-32190
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
Limiting vibration in systems with constant amplitude actuators through command preshaping
[NASA-CR-188284] p 3739 N94-32907
Pip pin reliability and design p 3605 N94-33305
SPACE STATION FREEDOM
A study of the Space Station Freedom response to the disturbance environment p 3600 N94-31434
Solar connection
[NASA-TM-109761] p 3614 N94-31818
A hypertext system that learns from user feedback
p 3923 N94-32428
Catalytic methods using molecular oxygen for treatment of PMMS and ECLSS waste streams, volume 2
[NASA-CR-190299] p 3804 N94-32697
Space Station evolution study
[NASA-CR-193937] p 3611 N94-32898
An investigation of acoustic noise requirements for the Space Station centrifuge facility
[NASA-TM-108811] p 3805 N94-32936
Space Station Freedom solar array containment box mechanisms p 3603 N94-33292
Roll ring assemblies for the Space Station
p 3603 N94-33294
Space Station Freedom Solar Array tension mechanism development p 3604 N94-33300
Energy absorber for the CETA p 3604 N94-33303
SPACE STATION PAYLOADS
Space Station evolution study
[NASA-CR-193937] p 3611 N94-32898
SPACE STATION POWER SUPPLIES
Solar lunar power p 3599 N94-31427
Solar connection
[NASA-TM-109761] p 3614 N94-31818
SPACE STATION STRUCTURES
A study of the Space Station Freedom response to the disturbance environment p 3600 N94-31434
SPACE STATIONS
Space Station WP-2 application of LDEF MLI results
p 3592 N94-31016
The Second Annual International Space University Alumni Conference
[NASA-CP-3253] p 3598 N94-31425
Access to space: The Space Shuttle's evolving rolee
[AD-A276785] p 3608 N94-32190
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
Research and technology, 1993
[NASA-TM-106376] p 3567 N94-33046
SPACE TRANSPORTATION
Design of a logistics model for building and supporting a lunar station
[ILR-MITT-282(1993)] p 3803 N94-31852
Access to space: The Space Shuttle's evolving rolee
[AD-A276785] p 3608 N94-32190
SPACE TRANSPORTATION SYSTEM
Access to space: The Space Shuttle's evolving rolee
[AD-A276785] p 3608 N94-32190
Pen-based computers: Computers without keys
p 3808 N94-32434
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100
SPACE TRANSPORTATION SYSTEM FLIGHTS
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
SPACE WEAPONS
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667
SPACE-TIME FUNCTIONS
Research in theoretical high-energy physics
[DE94-008388] p 3876 N94-32407
SPACEBORNE EXPERIMENTS
Spacecraft contamination issues from LDEF: Issues for design p 3592 N94-31020
Impact of LDEF photovoltaic experiment findings upon spacecraft solar array design and development requirements p 3594 N94-31028
Space environmental effects on polymer composites: Research needs and opportunities p 3595 N94-31035
Spacecraft materials: Comparison between flight results obtained on LDEF and MIR p 3597 N94-31045
Design application and development of spacecraft in LEO utilizing LDEF results p 3597 N94-31047
What LDEF means for development and testing of materials p 3598 N94-31050
Laboratory and space experiments as a key to the plasma universe
[TRITA-ALP-1993-01] p 3885 N94-31088
Development concept for Dutch user support
[PB94-125523] p 3596 N94-31208
Various magnet options for Delta launched version of ASTROMAG
[DE94-006292] p 3955 N94-31635
Space acceleration measurement system
[NASA-TM-109754] p 3913 N94-31807
Steady thermal convection in multiple liquid layers
p 3705 N94-31844
Computer modeling of active experiments in space plasmas p 3890 N94-31927
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320
SPACEBORNE PHOTOGRAPHY
An intelligent interactive visual database management system for Space Shuttle closeout image management
p 3923 N94-32469
SPACECRAFT ANTENNAS
The 20 GHz circularly polarized, high temperature superconducting microstrip antenna array
[NASA-CR-195097] p 3683 N94-33083
The Galileo high gain antenna deployment anomaly
p 3607 N94-33319
SPACECRAFT CABIN ATMOSPHERES
Atmosphere quality standards in manned space vehicles
[ESA-PSS-03-401-ISSUE-1] p 3802 N94-31224
Technical assessment of Mir-1 life support hardware for the international space station
[NASA-TM-108441] p 3803 N94-31380
SPACECRAFT CHARGING
Development of a 3D numerical code to calculate the trajectories of the blow off electrons emitted by a vacuum surface discharge: Application to the study of the electromagnetic interference induced on a spacecraft
[ONERA-NT-1993-12] p 3863 N94-31227
Arcing in space structures in low Earth orbit
[NASA-CR-194223] p 3694 N94-32478
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262
SPACECRAFT COMMUNICATION
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
SPACECRAFT COMPONENTS
The 28th Aerospace Mechanisms Symposium
[NASA-CP-3260] p 3603 N94-33291
SPACECRAFT CONFIGURATIONS
Dynamics and control of orbiting flexible systems: A formulation with applications
[ISBN-0-315-75390-0] p 3611 N94-32502
SPACECRAFT CONSTRUCTION MATERIALS
LDEF Materials Results for Spacecraft Applications
[NASA-CP-3257] p 3591 N94-31012
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Atomic oxygen erosion considerations for spacecraft materials selection p 3593 N94-31022
Performance of selected polymeric materials on LDEF
p 3593 N94-31023

Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
On the linearity of fast atomic oxygen effects p 3594 N94-31027
Summary of materials and hardware performance on LDEF p 3595 N94-31037
LDEF materials special investigation group's data bases p 3596 N94-31038
An overview of the Evaluation of Oxygen Interaction with Materials-third phase (EOIM-3) experiment: Space Shuttle Mission 46 p 3596 N94-31040
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques p 3596 N94-31041
Preliminary results from the CONCAP-2-01 and EIOM-3 experiments on STS-46 p 3596 N94-31042
Design application and development of spacecraft in LEO utilizing LDEF results p 3597 N94-31047
What LDEF means for development and testing of materials p 3598 N94-31050
Computer modelling of cyclic deformation of high-temperature materials
[AD-A277056] p 3623 N94-32012

SPACECRAFT CONTAMINATION
Spacecraft contamination issues from LDEF: Issues for design p 3592 N94-31020
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques p 3596 N94-31041
Preliminary results from the CONCAP-2-01 and EIOM-3 experiments on STS-46 p 3596 N94-31042
An overview of the on-orbit contamination of the Long Duration Exposure Facility (LDEF) p 3598 N94-31049
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010
Combined contamination and space environmental effects on solar cells and thermal control surfaces
[NASA-TM-106592] p 3617 N94-33022
Design and performance of the telescope and detector covers on the Extreme Ultraviolet Explorer satellite p 3605 N94-33309

SPACECRAFT CONTROL
Phase-lock roll control of inertially pointing spacecraft p 3609 N94-31470
Adaptive nonlinear control of spacecraft p 3609 N94-31564
Dynamics and control of orbiting flexible systems: A formulation with applications
[ISBN-0-315-75390-0] p 3611 N94-32502

SPACECRAFT DESIGN
LDEF Materials Results for Spacecraft Applications
[NASA-CP-3257] p 3591 N94-31012
Spacecraft contamination issues from LDEF: Issues for design p 3592 N94-31020
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
The Second Annual International Space University Alumni Conference
[NASA-CP-3253] p 3598 N94-31425
Honeycomb sandwich structures: Vented versus unvented designs for space systems
[AD-A276713] p 3624 N94-32122

SPACECRAFT DOCKING
Fuzzy logic application for modeling man-in-the-loop space shuttle proximity operations
[NASA-CR-188283] p 3835 N94-32359
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388

SPACECRAFT ELECTRONIC EQUIPMENT
Characteristics of III-V semiconductor devices at high temperature
[NASA-TM-106574] p 3697 N94-33052

SPACECRAFT ENVIRONMENTS
Modeling of LDEF contamination environment p 3592 N94-31019
Atmosphere quality standards in manned space vehicles
[ESA-PSS-03-401-ISSUE-1] p 3802 N94-31224
Technical assessment of Mir-1 life support hardware for the international space station
[NASA-TM-108441] p 3803 N94-31380
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

SPACECRAFT EQUIPMENT
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320
Payload holddown and release mechanism p 3607 N94-33321
Advanced release technologies program p 3607 N94-33322

SPACECRAFT INSTRUMENTS
Space acceleration measurement system
[NASA-TM-109754] p 3913 N94-31807

SPACECRAFT LAUNCHING
Scattering of a random acoustic field by an infinite cylinder: Application to the modelization of the acoustic environment of the 'Ariane 5' launcher scale-model using experimental data
[ONERA-NT-1993-11] p 3860 N94-31226
DOD space based requirements: Increasing DOD access to space
[AD-A276874] p 3601 N94-32211
Independent safety assessment of the Topaz-2 space nuclear reactor power system
[DE94-008653] p 3877 N94-32879
Chronology of KSC and KSC related events for 1993
[NASA-TM-109196] p 3966 N94-33072
Advanced transportation system study: Manned launch vehicle concepts for two way transportation system payloads to LEO
[NASA-CR-193951] p 3608 N94-33100
Design, development, and testing of a lightweight optical sensor cover system p 3604 N94-33302

SPACECRAFT LUBRICATION
Soft x ray photoelectron spectroscopy study of the interaction of Cr with MoS2(0001)
[AD-A276916] p 3635 N94-32233
A comparison of the performance of solid and liquid lubricants in oscillating spacecraft ball bearings p 3606 N94-33311
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312
The preliminary evaluation of liquid lubricants for space applications by vacuum tribometry p 3606 N94-33313

SPACECRAFT MAINTENANCE
Development of an interchangeable end effector mechanism for the Ranger telerobotic vehicle p 3604 N94-33297

SPACECRAFT MANEUVERS
OARE flight maneuvers and calibration measurements on STS-58
[NASA-TM-109093] p 3613 N94-32924

SPACECRAFT MODELS
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802

SPACECRAFT ORBITS
Combined contamination and space environmental effects on solar cells and thermal control surfaces
[NASA-TM-106592] p 3617 N94-33022

SPACECRAFT PERFORMANCE
Spacecraft contamination issues from LDEF: Issues for design p 3592 N94-31020
Space flight risk data collection and analysis project: Risk and reliability database
[NASA-CR-195879] p 3603 N94-32494

SPACECRAFT POWER SUPPLIES
Room temperature molten salts for advanced energy conversion and storage
[AD-A277777] p 3763 N94-33015
The 28th Aerospace Mechanisms Symposium
[NASA-CP-3260] p 3603 N94-33291
Roll ring assemblies for the Space Station p 3603 N94-33294
International Space Station Alpha's bearing, motor, and roll ring module developmental testing and results p 3603 N94-33295

SPACECRAFT PROPULSION
The 7.5K lbf thrust engine preliminary design for Orbit Transfer Vehicle
[NASA-CR-189175] p 3614 N94-31618
Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814
Performance evaluation and operating characteristics of a waveguide microwave applicator for space propulsion applications p 3614 N94-31908
Summary of particle bed reactor designs for the Space Nuclear Thermal Propulsion Program
[DE94-007434] p 3615 N94-32266

SPACECRAFT RADIATORS
Thermocapillary convection in evaporating sessile drops
[NASA-TM-109758] p 3705 N94-31886
Development of lightweight radiators for lunar based power systems
[NASA-TM-106604] p 3726 N94-32272

SPACECRAFT REENTRY
The influence of the deorbit-burn manoeuvre on the footprint of a re-entry capsule
[LR-727] p 3609 N94-31705
Implementation of a vibrationally linked chemical reaction model for DSMC
[NASA-TM-109109] p 3710 N94-33020

SPACECRAFT SHIELDING
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910

SPACECRAFT STERILIZATION
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques p 3596 N94-31041

SPACECRAFT STRUCTURES
Anodized aluminum on LDEF p 3592 N94-31017
Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369
Arcing in space structures in low Earth orbit
[NASA-CR-194223] p 3694 N94-32478

SPACECRAFT SURVIVABILITY
NASA report to education, volume 9
[NASA-TM-109760] p 3913 N94-31817

SPACECRAFT TEMPERATURE
Physics of heat pipe rewetting
[NASA-CR-195902] p 3913 N94-33148

SPACECRAFT TRAJECTORIES
Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388

SPACECREWS
Legal regime of human activities in outer space law p 3599 N94-31431

SPALLING
Micrometeoroid/space debris effects on materials p 3595 N94-31032

SPATIAL DISTRIBUTION
A comparison between two Monte Carlo codes on determination of transient chemical yields
[DE94-007224] p 3636 N94-32251
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309
Visual encoding of spatial relations
[AD-A277400] p 3800 N94-32344
A scanning defect mapping system for semiconductor characterization p 3885 N94-32446
Spatial correlation of ionospheric variability
[AD-A278105] p 3776 N94-33041
Martian spectral units derived from ISM imaging spectrometer data p 3949 N94-33220
Martian deltas: Morphology and distribution p 3950 N94-33230

SPECKLE PATTERNS
Elastic modulus measurements of LDEF glasses and glass-ceramics using a speckle technique
[NASA-CR-195911] p 3653 N94-31851
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images p 3750 N94-32535

SPECTRA
Quantum dynamics in dual spaces
[DE94-008303] p 3913 N94-32824

SPECTRAL BANDS
Characterization of the rare earth orthophosphates and Ce-doped LaPO4 by x ray absorption spectroscopy
[DE94-006313] p 3898 N94-31630

SPECTRAL EMISSION
Computational radiative heat transfer in homogeneous and nonhomogeneous nonscattering media p 3702 N94-31563

SPECTRAL ENERGY DISTRIBUTION
Multiwavelength search for protoplanetary disks p 3599 N94-31430
Radio emission from pre-main-sequence stars p 3955 N94-31890
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969
Note on the variance of autospectral density processed using Welch's method
[DE94-005352] p 3849 N94-32675

SPECTRAL LINE WIDTH
Impact of observed hyperfine splitting on X-ray laser gain
[DE94-005822] p 3717 N94-32128

SPECTRAL METHODS
Spectral analysis method and sample generation for real time visualization of speech
[ETN-94-95732] p 3674 N94-31573
A stability estimate based on numerical ranges with application to a spectral discretization of a convection-diffusion equation
[TW-93-12] p 3847 N94-32200
Analysis of a slot coupled coplanar waveguide fed patch antenna
[NASA-TM-106567] p 3698 N94-33116

SPECTRAL RECONNAISSANCE
Remote sensing for hurricane Andrew impact assessment p 3758 N94-32464
Developments in ERS-1 SAR interferometry: Use of the spectral shift p 3756 N94-32569

SPECTRAL REFLECTANCE
Radiation/remote sensing: Review of the principal definitions p 3757 N94-30996
Modeling the interaction between solar radiation and terrestrial surfaces p 3779 N94-30999
Estimation of visible and near-infrared reflectivity for Peyto Glacier Basin using satellite data [ISBN-0-315-87039-7] p 3743 N94-31733
Feasibility evaluation of new data interpretation approaches for vegetation analysis from airborne imaging spectroscopy p 3745 N94-31862
Monitoring fertilizer application by imaging spectrometry (Somerset Levels test site) p 3745 N94-31863
High resolution spectroscopy in agriculture: Results of the EISAC 1989 campaign p 3745 N94-31864
Evaluation of Fluorescence Line Imager (FLI) airborne imaging spectrometer data for roadside tree damage assessment p 3745 N94-31866
Parameterizing atmosphere-land surface exchange for climate models with satellite data: A case study for the Southern Great Plains CART site [DE94-005109] p 3775 N94-32874
The importance of environmental conditions in reflectance spectroscopy of laboratory analogs for Mars surface materials p 3944 N94-33195
Ferric sulfate montmorillonites as Mars soil analogs p 3944 N94-33196
Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada p 3948 N94-33219
Martian spectral units derived from ISM imaging spectrometer data p 3949 N94-33220

SPECTRAL RESOLUTION
Evaluation of GER- and FLI-data with reference to forest p 3746 N94-31868

SPECTRAL SIGNATURES
Convection and electrodynamic signatures in the vicinity of a Sun-aligned arc: Results from the Polar Acceleration Regions and Convection Study (Polar ARCS) p 3954 N94-31102
Smart environmental monitor based on neural networks and multi-spectral pattern recognition [AD-A276445] p 3829 N94-31301
European Imaging Spectroscopy Aircraft Campaign [ESA-SP-360] p 3743 N94-31853
Inflight calibration, preprocessing, and data evaluation of GER 2 imaging spectrometry data p 3744 N94-31858
Extraction of agricultural parameters from imaging-spectrometry data and simulated MERIS data through red edge analysis p 3745 N94-31865
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969
Mineralogical diversity (spectral reflectance and Moessbauer data) in compositionally similar impact melt rocks from Manicouagan Crater, Canada p 3948 N94-33219

SPECTRAL THEORY
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model [AD-A277217] p 3783 N94-32021

SPECTROMETERS
Instrumentation for EXELFS measurements using convergent beam diffraction coupling to the electron energy loss spectrometer [USIP-93-07] p 3858 N94-31084
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite [AP-31] p 3770 N94-31222
Elementary particle physics [DE94-006071] p 3866 N94-31620
Varicus magnet options for Delta launched version of ASTROMAG [DE94-006292] p 3955 N94-31635
Time domain spectroscopy for studying a monopole antenna immersed in a plasma [ISBN-0-315-86526-1] p 3888 N94-31727
The Los Alamos National Laboratory precision double crystal spectrometer [DE94-008075] p 3713 N94-32706

SPECTROPHOTOMETRY
Digital image profilers for detecting faint sources which have bright companions [NASA-CR-191348] p 3927 N94-32695

SPECTRORADIOMETERS
Chamber optics for testing passive remote sensing vapor detectors [AD-A275909] p 3878 N94-31340
MODIS. Volume 1: MODIS level 1A software baseline requirements [NASA-TM-104594-VOL-1] p 3823 N94-33287

SPECTROSCOPIC ANALYSIS
Summary of some data processing routines in the molecular physics group of Stockholm University [USIP-93-05] p 3808 N94-31087
Infrared spectroelectrochemical study of cyanide adsorption and reactions at platinum electrodes in aqueous perchlorate electrolyte [AD-A276402] p 3631 N94-31238
Compositions and chemical bonding in ceramics by quantitative electron energy-loss spectrometry [DE94-007208] p 3659 N94-32640
Ionization probes of molecular structure and chemistry [DE94-007605] p 3872 N94-32643
Gettering of metal impurities by cavities in silicon [DE94-005248] p 3645 N94-32672
Characterization of thermally stable dye-doped polyimide based electrooptic materials [DE94-005309] p 3882 N94-32674
Ferric sulfate montmorillonites as Mars soil analogs p 3944 N94-33196
Aerosols scattering and near-infrared observations of the Martian surface p 3946 N94-33204
Material engineering of the novel semiconductor structures [AD-A278386] p 3910 N94-33355

SPECTROSCOPY
Time domain spectroscopy for studying a monopole antenna immersed in a plasma [ISBN-0-315-86526-1] p 3888 N94-31727
Photopyroelectric spectroscopy as a non-intrusive technique for the determination of the optical absorption spectra of multiple quantum well samples [ISBN-0-315-87164-4] p 3833 N94-31875
Workshop on Models for Plasma Spectroscopy [AD-A276565] p 3890 N94-32031
Cooling and trapping of neutral atoms [AD-A276957] p 3870 N94-32360
Theoretical studies of electron transfer and optical spectroscopy [DE94-006985] p 3871 N94-32375
A miniaturized ASIC-based multichannel scaler instrument [DE94-007222] p 3807 N94-32783
Technology development for iron Fischer-Tropsch catalysts [DE94-008723] p 3638 N94-32889
Electron cyclotron resonance plasma oxidation studies of InP [AD-A277431] p 3893 N94-33007

SPECTRUM ANALYSIS
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 1 [AD-A276211] p 3859 N94-31060
Analysis using bi-spectral related technique [AD-A276017] p 3672 N94-31386
Influence of long-range correlations on the spectral functions and response of 48Ca and 90Zr [ETN-94-96017] p 3865 N94-31537
Impurities and conductivity in a D-wave superconductor [DE94-006222] p 3898 N94-31628
Fractal and spectral analysis [ISBN-0-315-86460-5] p 3676 N94-31796
Inflight calibration, preprocessing, and data evaluation of GER 2 imaging spectrometry data p 3744 N94-31858
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 2 [AD-A276629] p 3861 N94-32059
Atmospheric structure simulation: An autoregressive model for smooth geophysical power spectra with known autocorrelation function [AD-A276691] p 3773 N94-32118
Development, characterization, and applications of high temperature superconductor nanobridge Josephson junctions [DE94-008113] p 3903 N94-32409
Noninvasive spectroscopic diagnosis of superficial ocular lesions and corneal infections [DE94-006231] p 3797 N94-32732
Index and bulk parameters for frequency-direction spectra measured at CERC Field Research Facility [AD-A277759] p 3791 N94-33085
Distribution and nature of UV absorbers on Triton's surface [NASA-CR-195886] p 3943 N94-33104

SPECULAR REFLECTION
Characterization of interface structure in multilayers using specular x ray reflectance [DE94-007698] p 3657 N94-32358

SPEECH
Automatic translation among spoken languages p 3685 N94-32437

SPEECH RECOGNITION
Application of the wavelet transform for speech processing p 3600 N94-31435
Segment-based acoustic models for continuous speech recognition [AD-A276109] p 3673 N94-31466
Spectral analysis method and sample generation for real time visualization of speech [ETN-94-95732] p 3674 N94-31573
High-performance speech recognition using consistency modeling [AD-A276775] p 3679 N94-32185
Automatic translation among spoken languages p 3685 N94-32437
Neural networks applied to the phonemic segmentation of speech p 3686 N94-33152
Modular neural network architectures p 3838 N94-33156

SPHERES
Strictly positive definite functions on spheres [AD-A276471] p 3855 N94-31244
Custom uniform source system [NASA-CR-189332] p 3711 N94-31492
Quantum homogeneous spaces, duality, and quantum 2-spheres [CWI-AM-R9309] p 3857 N94-32192

SPHERICAL HARMONICS
Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110

SPHERICAL WAVES
Development and implementation of a full-potential ASW method [ETN-94-95757] p 3858 N94-31560

SPHEROIDS
Single scattering of light by ensembles of particles with various shapes [ETN-94-96016] p 3878 N94-31550

SPIN
Spin-structure function of the neutron He-3: SLAC results [DE94-008927] p 3875 N94-33189

SPINEL
Characterization and growth mechanisms of the MgAl2O4 phase in Al2O3-reinforced Al-Mg composites [ISBN-0-315-86531-8] p 3620 N94-31706

SPIRAL ANTENNAS
Predicting antenna parameters from antenna physical dimensions [AD-A276442] p 3672 N94-31300

SPIRAL GALAXIES
The dynamical settling of warped disks and angular momentum transport in galaxies p 3928 N94-31121

SPLINE FUNCTIONS
Filtering of satellite altimetry data with optimal smoothing cubic splines to compute geoid heights, along-tract geoid and gravity gradients in the Indonesian waters and its surroundings [PB94-147527] p 3741 N94-31074
Multivariate spline approximation [AD-A276034] p 3842 N94-31441

SPORES
Backscatter and transmission of aerosol at UV through middle IR wavelengths [AD-A277127] p 3718 N94-32305

SPOT (FRENCH SATELLITE)
From Optics to Radar, SPOT and ERS Applications [ISBN-2-85428-345-7] p 3747 N94-32523
The complementary nature of the SPOT and ERS-1 systems and their place in major international programmes p 3748 N94-32524
From optics to radar: Environmental problems and the SPOT/ERS systems p 3748 N94-32525
Optics and radar: Cohabitation, rivality or happy marriage. Towards new planning tools p 3748 N94-32529
Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536
Robust multisource classification method using the Markov random field methods p 3750 N94-32537
Technique of ERS-1 image processing in association with SPOT data p 3750 N94-32538
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539
Production of terrain data: Optical radar complementarity p 3750 N94-32540
Fusion of multispectral (XS) and Panchromatic (P) SPOT images and radar images p 3750 N94-32541
The use of SPOT and ERS-1 images to map the eruption of Nevado Sabancaya (Province of Arequipa, South Peru) and evaluate associated risks p 3751 N94-32546
Comparison of SPOT, ERS-1, SEASAT, LANDSAT TM, and merged imagery for geological investigations p 3752 N94-32547
Optimal geological data extraction from SPOT-radar synergism with samples from Djebel Amour (Algeria), Red Sea Hills (Sudan), Sirte Basin (Libya), and Magdalena Valley (Colombia) p 3752 N94-32548

Use of SPOT and ERS-1 SAR data to study the tectonic and climatic history of arid regions p 3752 N94-32550
Study of subpolar glaciers of Spitzbergen using SPOT, ERS-1, and hypsometric data: Results and perspectives p 3753 N94-32553
Use of SPOT and ERS-1 to map tropical vegetation and mangrove dynamics in Guiana p 3753 N94-32555
A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping p 3753 N94-32556
Rapid estimates of crop acreage and production at European scale using high resolution imagery p 3754 N94-32557
Monitoring landsurface characteristics in Niger using complementary SPOT and ERS-1 SAR data p 3754 N94-32560
European MARS project: The potential integration of SPOT and air- and satellite-borne radar data over two pilot areas for agricultural statistics. PROSPER programme and ERS-1 pilot project
[BRGM-93035] p 3754 N94-32561
Comparing SPOT and SIR A for mapping superficial formations in tropical forest regions: Example of the Yaoundy Region (Cameroon) p 3755 N94-32562
Possible complementarity of SPOT/ERS in mapping land use: Study on agricultural land in Brittany (France) p 3755 N94-32563
Land cover change detection with ERS-1 data and data from other remote sensing satellites. Example: The delta of the River Ebro (Spain) p 3755 N94-32564
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea p 3755 N94-32565
Quantitative analysis of woody vegetation in Soudano-Sahalian region. Textural approach (application to a Burkina Faso region) p 3757 N94-32574
Statistical analysis and mapping of cotton and food crop cultivation surfaces in the west of Burkina Faso: Contribution of combined SPOT P and XS data p 3757 N94-32575

SPRAYERS
Thermocapillary convection in evaporating sessile drops
[NASA-TM-109758] p 3705 N94-31886

SPRAYING
Analysis of strong acoustic excitation on the breakup and dispersion of a liquid jet
[ONERA-NT-1993-9] p 3701 N94-31422

SPREAD SPECTRUM TRANSMISSION
Spread-spectrum radio systems and networks
[AD-A276449] p 3671 N94-31260
Communications networks in stressed environments
[AD-A275967] p 3672 N94-31384
Direct-sequence spread-spectrum performance in a multipath fading environment
[AD-A276080] p 3673 N94-31464
Applied harmonic analysis
[AD-A278384] p 3685 N94-33353
A new tool for signal processing
[AD-A278385] p 3685 N94-33354

SPRINGS (ELASTIC)
Transmissibility of nickel-titanium shape memory alloy springs
[AD-A276055] p 3640 N94-31456
Nonlinear analysis of springs using helical finite elements p 3859 N94-31906

SPUTTERING
Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
Energy and angular distributions of secondary ions during electronic sputtering of nonconducting surfaces
[ETN-94-95756] p 3865 N94-31516
Amorphous/crystalline structure and phase transformations in metastable semiconducting Ge(1-x)Sn(x)
[DE94-006659] p 3901 N94-32115
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS2 during ion bombardment
[DE94-008487] p 3871 N94-32515
Dependence of x ray absorption magnetic circular dichroism on layer periodicity in iron-platinum multilayers
[DE94-008786] p 3647 N94-32892
Mars atmospheric loss and isotopic fractionation by solar-wind-induced sputtering and photochemical escape p 3947 N94-33208

SQUALLS
Tropical squall lines p 3778 N94-30992

STABILITY
The performance of thermal control coatings on LDEF and implications to future spacecraft p 3591 N94-31013
Nonlinear calculations of the time evolution of black hole accretion disks p 3929 N94-31127
Gravitational instabilities in protostellar disks p 3932 N94-31140
Multidimensional WAF-type schemes for model conservation laws
[CRANFIELD-AERO-9312] p 3843 N94-31541
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764
Modal analysis of multiterminal high voltage direct current transmission
[DE94-006426] p 3691 N94-31785
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296
Research on stable, high-efficiency amorphous silicon multijunction modules
[DE94-000298] p 3695 N94-32680
Stability of tearing modes in tokamak plasmas
[DE94-009205] p 3892 N94-32911

STABILITY TESTS
A simplified Von Neumann method for linear stability analysis
[CRANFIELD-AERO-9310] p 3843 N94-31540
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802

STABILIZATION
Automatic resonator alignment and power stabilization of high power C02 lasers
[ISBN-0-315-77217-4] p 3714 N94-31472
Stabilization method of A.C. arc plasma
[DE94-757268] p 3893 N94-32916

STABILIZERS (AGENTS)
Oxide pigments in water: The colloid-chemical point of view
[PB94-148616] p 3633 N94-31591

STABILIZERS (FLUID DYNAMICS)
Active control for fin buffet alleviation
[AD-A276844] p 3586 N94-32224

STACKS
Detailed design of the 2MW Demonstration Plant
[DE94-000042] p 3762 N94-32823

STAINLESS STEELS
Effect of vibratory stress relief during welding of thick stainless steel plate
[DE94-006557] p 3733 N94-31312
Solid-state resistance upset welding: A process with unique advantages for advanced materials
[DE94-005941] p 3723 N94-31524
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109
Stage 1 behavior in a stress corrosion study of Type 304 stainless steel
[DE94-008054] p 3645 N94-32614
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639

STANDARD DEVIATION
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553

STANDARDIZATION
Standardization and intellectual property control: A reflection on the informatics case
[TELECOM-93-E-016] p 3915 N94-31172
Untying the gordian data knot. A paper on Information Engineering (IE) and Corporate Information Management (CIM)
[AD-A276862] p 3918 N94-32210

STANDARDS
Guide to software quality assurance
[ESA-PSS-05-11-ISSUE-1] p 3809 N94-31223
Minutes: Accredited Standards Committee on Bioacoustics, S3. US TAG for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock
[AD-A276201] p 3795 N94-31490
Evaluation for the development of taxiway lighting intensity standards
[AD-A276706] p 3588 N94-32120

STANDING WAVES
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276463] p 3860 N94-31242
Observation of the traveling component of an x ray standing wave field
[DE94-007671] p 3672 N94-31317
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360

STAR CLUSTERS
Circumstellar material around young stars in Orion p 3930 N94-31133
Near infrared surveys of high mass star forming regions p 3925 N94-31898

STAR DISTRIBUTION
Nonthermal accretion disk models around neutron stars p 3931 N94-31139

STAR FORMATION
Circumstellar material around young stars in Orion p 3930 N94-31133
Gravitational instabilities in protostellar disks p 3932 N94-31140
The stellar and gaseous content of massive low surface brightness disk galaxies p 3933 N94-31495
Double-lined pre-main-sequence binaries: A test of pre-main-sequence evolutionary theory p 3933 N94-31497
Evolution of stars and winds in the starburst galaxy M82 p 3934 N94-31758
Near infrared surveys of high mass star forming regions p 3925 N94-31898
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969

STAR FORMATION RATE
Evolution of stars and winds in the starburst galaxy M82 p 3934 N94-31758
Ionized gas in the halos of edge-on infrared-bright galaxies: Evidence for starburst-driven superwinds p 3936 N94-31948

STAR TRACKERS
Design and early results of the sodium-layer laser guide star adaptive optics experiment at the Lawrence Livermore National Laboratory
[DE94-006653] p 3926 N94-32189

STARBURST GALAXIES
Evolution of stars and winds in the starburst galaxy M82 p 3934 N94-31758
Ionized gas in the halos of edge-on infrared-bright galaxies: Evidence for starburst-driven superwinds p 3936 N94-31948

STARK EFFECT
Stark broadening of the 2S state of hydrogen and deuterium in arc plasmas of low density
[ETN-94-95731] p 3888 N94-31572

STATE ESTIMATION
Representation, prediction and identification of cyclostationary processes: A state-space approach
[REPT-93-041] p 3850 N94-31191

STATE VECTORS
Observations of the notion of minimality in the generalized state space
[MATHS-REPT-A-207] p 3840 N94-31162
A separation technique for asymptotic-numeric solution for general shells of revolution p 3736 N94-31961
Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020

STATIC CHARACTERISTICS
METCAN demonstration manual, version 1.0
[NASA-TM-105607] p 3626 N94-32858

STATIC PRESSURE
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026

STATIC STABILITY
Robot grasping: Stability and optimization issues p 3724 N94-31724

STATISTICAL ANALYSIS
Vibrations of a heavy truck diesel engine and gearbox unit: Examining structure-borne sound transmission with statistical energy analysis
[CTH-E-93-04] p 3722 N94-31194
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553
DOME: Dynamic optimization on multiprocessor engines, a statistical approach p 3807 N94-31972
Development of phase-only filters for sensor imagery
[AD-A276722] p 3880 N94-32151
Area-interaction point processes
[CWI-BS-R9318] p 3847 N94-32197
European MARS project: The potential integration of SPOT and air- and satellite-borne radar data over two pilot areas for agricultural statistics. PROSPER programme and ERS-1 pilot project
[BRGM-93035] p 3754 N94-32561
Arithmetic averaging: A versatile technique for smoothing and trend removal
[DE94-005274] p 3852 N94-32673
Using the National Information Infrastructure for social science, education, and informed decision making
[DE94-005442] p 3920 N94-32676
Faultless software project
[AD-A278161] p 3822 N94-33188

STATISTICAL CORRELATION
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326

Selection of climate station data using clustering and triangulated irregular network techniques
[AD-A276658] p 3784 N94-32046

STATISTICAL DISTRIBUTIONS
Machinery monitoring and diagnostics using pseudo Wigner-Ville distribution and backpropagation neural network
[AD-A276219] p 3828 N94-31064
On the minimum of independent geometrically distributed random variables
[NASA-CR-194883] p 3821 N94-33075

STATISTICAL MECHANICS
A cross-disciplinary report on the mathematical sciences applied to materials science, part 1
[AD-A276116] p 3843 N94-31529
The 14th Annual West Coast Theoretical Chemistry/Statistical Mechanics Conference
[AD-A276942] p 3656 N94-32239

STATISTICAL TESTS
Nonlinear model validation using correlation tests
[RR-463] p 3842 N94-31394
Statistical inference for coherent systems from partial information and in resampling techniques in survival analysis
[AD-A277382] p 3852 N94-32339
Multidimensional scaling of user information satisfaction
[AD-A277230] p 3920 N94-32633
Fault detection and isolation for the Bluebird test bed aircraft
[AD-A277979] p 3586 N94-33086
Statistical characteristics of bistatic surface scatter and mean bistatic surface scattering strengths
[AD-A278155] p 3862 N94-33096

STATORS
Theoretical principles for designing long stator/linear motors with iron
[ETN-94-95741] p 3688 N94-31374
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042

STEADY FLOW
CFD-based drag prediction: State-of-the-art, theory, prospects
[AD-B179297] p 3567 N94-31180
Additional capabilities of the unified waves model
[AD-A276114] p 3702 N94-31467

STEADY STATE
Invariance of the generalized steady-state for 1-D distributed parameter systems
[REPT-93-66] p 3825 N94-31662
Generalized steady-state method for solving 2-D diffusion systems
[REPT-93-83] p 3825 N94-31700

STEADY STATE CREEP
Creep properties of vanadium-base alloys
[DE94-006541] p 3641 N94-31486

STEEL STRUCTURES
Evaluation of corrosion protective organic coatings for steel structures in fresh water
[PB94-138484] p 3649 N94-31072

STEELS
Correlation of flux composition and inclusion characteristics with submerged arc weld metal properties in HY-100 steel
[AD-A277040] p 3726 N94-32261
Reactor pressure vessel structural integrity research in the US Nuclear Regulatory Commission HSST and HSSI Programs
[DE94-006550] p 3739 N94-32771
Method and apparatus for inhibiting the disbonding of a paint from metal surfaces
[AD-D016106] p 3663 N94-32960

STEERING
Optical processing of MMW for agile beamsteering and beamforming
[AD-A277161] p 3880 N94-32068

STELLAR ATMOSPHERES
A critical examination of stellar atmosphere theory for metal-poor K-giant stars p 3927 N94-32308

STELLAR COLOR
Near infrared surveys of high mass star forming regions p 3925 N94-31898

STELLAR COMPOSITION
Line-strength gradients and kinematic profiles in elliptical galaxies p 3934 N94-31788
A critical examination of stellar atmosphere theory for metal-poor K-giant stars p 3927 N94-32308

STELLAR ENVELOPES
Observations of accretion and angular momentum regulation in young circumstellar disks and the implications for planetary formation p 3928 N94-31122
Circumstellar material around young stars in Orion p 3930 N94-31133
Multiwavelength search for protoplanetary disks p 3599 N94-31430

STELLAR EVOLUTION
Observations of accretion and angular momentum regulation in young circumstellar disks and the implications for planetary formation p 3928 N94-31122

STELLAR LUMINOSITY
Near infrared surveys of high mass star forming regions p 3925 N94-31898

STELLAR MAGNETIC FIELDS
Dynamics of flux tubes in accretion disks p 3932 N94-31142
Hydrodynamics of neutron star interiors and laboratory superfluids p 3936 N94-31949

STELLAR MAGNITUDE
Near infrared surveys of high mass star forming regions p 3925 N94-31898

STELLAR MASS
Near infrared surveys of high mass star forming regions p 3925 N94-31898
A chemical analysis of solar neighborhood dwarfs p 3926 N94-31951

STELLAR MASS ACCRETION
Reactive flows in compact objects p 3934 N94-31567
Structure and stability of spherical accretion flows onto compact objects p 3935 N94-31946

STELLAR MODELS
Evolution of vaporizing pulsars p 3929 N94-31128
Double-lined pre-main-sequence binaries: A test of pre-main-sequence evolutionary theory p 3933 N94-31497
Theoretical studies of magnetohydrodynamic equilibria and dynamics of a solar coronal loop p 3953 N94-31792
Structure and stability of spherical accretion flows onto compact objects p 3935 N94-31946
A critical examination of stellar atmosphere theory for metal-poor K-giant stars p 3927 N94-32308
Convection in Type 2 supernovae
[DE94-009373] p 3938 N94-32914

STELLAR RADIATION
A search for 100 TeV gamma ray emission from the x ray binary pulsar 4U 0115+63 using the CYGNUS extensive air-shower array p 3955 N94-31900

STELLAR ROTATION
The evolutionary status of PSR 1259-63
[DE94-007094] p 3938 N94-32503

STELLAR SPECTRA
Extreme ultraviolet opacity sources in the DA white dwarf G191-B2B p 3924 N94-31210
A chemical analysis of solar neighborhood dwarfs p 3926 N94-31951

STELLAR SYSTEMS
Study of stellar associations located in the region contained between the Magellanic Clouds
[ISBN-0-315-86692-6] p 3935 N94-31913

STELLAR WINDS
Evolution of stars and winds in the starburst galaxy M82 p 3934 N94-31758
Winds from disks in compact binaries
[DE94-007452] p 3938 N94-32137
The evolutionary status of PSR 1259-63
[DE94-007094] p 3938 N94-32503

STELLARATORS
L-H confinement mode dynamics in three-dimensional state space
[DE94-007113] p 3887 N94-31396
Collisional and chaotic transport of energetic particles in toroidal plasma
[DE94-006504] p 3889 N94-31787
Stability of bootstrap current driven magnetic islands in stellarators
[DE94-009207] p 3893 N94-32912

STEPPES
Parameterizing atmosphere-land surface exchange for climate models with satellite data: A case study for the Southern Great Plains CART site
[DE94-005109] p 3775 N94-32874

STEREOSCOPIC VISION
Stereoscopic correspondence based on the structure of shading
[ISBN-0-315-86418-4] p 3814 N94-31718
A neural network model for the visual perception of the depth of a scene from stereoscopy and shading
[ISBN-0-315-86753-1] p 3831 N94-31750

STEREOSCOPY
Alternatives to hierarchical techniques in stereo correlation
[AD-A276570] p 3746 N94-31938

STIFFENING
Test and analysis results for composite transport fuselage and wing structures p 3628 N94-33129

STIFFNESS
Effect of elevated temperature and cyclic loading on properties and damage modes in ceramic composites
[DE94-008736] p 3662 N94-32891

STIFFNESS MATRIX
Minimization of computational requirements in the hybrid stress finite element method
[AD-A277120] p 3846 N94-32048

STIMULANTS
Effects of methamphetamine and fatigue on long- and short-term memory
[AD-A276452] p 3799 N94-32187

STIRLING CYCLE
The 4 K Stirling cryocooler demonstration
[NASA-CR-191792] p 3669 N94-32484

STIRLING ENGINES
Oscillating-flow loss test results in rectangular heat exchanger passages
[NASA-CR-185297] p 3615 N94-32792
A 1050 K Stirling space engine design
[NASA-CR-182149] p 3616 N94-32866

STOCHASTIC PROCESSES
The ant system: An autocatalytic optimizing process
[REPT-91-016-REV] p 3824 N94-31177
Representation, prediction and identification of cyclostationary processes: A state-space approach
[REPT-93-041] p 3850 N94-31191
Near resonant absorption by atoms in intense fluctuating laser fields
[DE94-005873] p 3714 N94-31200
Towards simplicity: Noise and cooperation in the perfect integrator
[AD-A276256] p 3799 N94-31291
Identification of polynomial and rational NARMAX models
[RR-483] p 3842 N94-31413
Light-traffic analysis for queues with spatially distributed arrivals
[MEMO-1150] p 3832 N94-31826
On the convergence of stochastic iterative dynamic programming
[AD-A276517] p 3815 N94-31933
Utility-based planning
[NASA-CR-195878] p 3816 N94-32086
Modeling and control of nonlinear systems
[AD-A277377] p 3834 N94-32095
Kaplan-Meier estimators of interpoint distance distributions for spatial point processes
[CWI-BS-R9315] p 3846 N94-32107
Atmospheric structure simulation: An autoregressive model for smooth geophysical power spectra with known autocorrelation function
[AD-A276691] p 3773 N94-32118
Multiserver queues with impatient customers
[CWI-BS-R9319] p 3835 N94-32198
Stochastic realization of a Gaussian stochastic control system
[CWI-BS-R9320] p 3852 N94-32350
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652
State-space self-tuner for on-line adaptive control
[NASA-CR-195836] p 3835 N94-32943
Stochastic models in reliability theory
[AD-A277529] p 3731 N94-32953
SynRGen: An extensible file reference generator
[AD-A277678] p 3821 N94-33030
On the minimum of independent geometrically distributed random variables
[NASA-CR-194883] p 3821 N94-33075
Adaptive control of nonlinear and stochastic systems
[AD-A278411] p 3839 N94-33325

STOICHIOMETRY
Properties of doped and undoped (Ca,Sr)CuO2 thin films
[DE94-007230] p 3905 N94-32785

STORAGE BATTERIES
NEMO: Advanced energy systems and technologies
[DE94-721996] p 3760 N94-31767
Performance of the Sony lithium-ion rechargeable battery
[AD-A277076] p 3693 N94-32303
Development of nickel and metal hydride secondary battery
[DE94-757270] p 3697 N94-32917
Field operation test of utility interactive load conditioner with photovoltaic cells at a demonstration house
[DE94-757271] p 3762 N94-32918
Optimal planning of residential photovoltaic systems under various rate structure
[DE94-757272] p 3762 N94-32919

STORAGE RINGS (PARTICLE ACCELERATORS)
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA
[ETN-94-96021] p 3865 N94-31534
Results from the H1 experiment at HERA
[PB94-145174] p 3868 N94-32008

STORAGE STABILITY
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin
[DE94-007971] p 3660 N94-32698
STORM DAMAGE
Remote sensing for hurricane Andrew impact assessment p 3758 N94-32464
STORMS
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model
[AD-A277217] p 3783 N94-32021
STORMS (METEOROLOGY)
Tropical squall lines p 3778 N94-30992
STOVL AIRCRAFT
Antiwindup analysis and design approaches for MIMO systems
[NASA-CR-195304] p 3584 N94-32075
STRAIN DISTRIBUTION
Isolating strain parameters correlated to skeletal adaptation p 3797 N94-31960
STRAIN ENERGY METHODS
Development of thermoplastic composite aircraft structures
[NASA-CR-189593] p 3626 N94-32860
STRAIN ENERGY RELEASE RATE
Acoustic emission from crack growth in 7050 aluminum and 7075 aluminum as a function of temperature and heat treatment
[DREP-CRS-93-15] p 3642 N94-31871
STRAIN GAGES
A laboratory study of multiple site damage in fuselage lap splices
[AD-A276151] p 3578 N94-31078
Strain sensing using optical fibers
[NASA-CR-195807] p 3740 N94-32940
STRAIN MEASUREMENT
Fiber optic sensors for the detection of surface acoustic waves on metals
[ISBN-0-315-87055-9] p 3878 N94-31736
Strain sensing using optical fibers
[NASA-CR-195807] p 3740 N94-32940
STRAIN RATE
Tensile properties of commercially pure vanadium from room temperature to 1200 C
[DE94-006622] p 3641 N94-31581
Isolating strain parameters correlated to skeletal adaptation p 3797 N94-31960
STRANGE ATTRACTORS
Heteroclinic attractors: Time averages and moduli of topological conjugacy
[W-9318] p 3844 N94-31690
Deterministic chaos p 3912 N94-31896
STRATIFICATION
Steady thermal convection in multiple liquid layers p 3705 N94-31844
STRATIFIED FLOW
Laser-induced fluorescence/particle tracking system for stratified flow research
[AD-A275917] p 3701 N94-31341
Effects of buoyancy on fluid flows and turbulence
[AD-A276586] p 3706 N94-32123
STRATIGRAPHY
Analysis of deep seismic reflection and other data from the southern Washington Cascades
[DE94-005958] p 3771 N94-31525
STRATOCUMULUS CLOUDS
An integrated cloud observation and modeling investigation in support of the ARM program
[DE94-003160] p 3785 N94-32716
STRATOSPHERE
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite
[AP-31] p 3770 N94-31222
One: Microphysics of frost metamorphism: Applications to Triton and Mars. Two: A global analysis of the ozone deficit in the upper stratosphere and lower mesosphere. Three: The diabatic circulation in the stratosphere as diagnosed from Microwave Limb Sounder data p 3942 N94-31975
Quantified estimates of total GWPs for greenhouse gases taking into account tropospheric chemistry
[DE94-007846] p 3768 N94-32817
Counting particles emitted by stratospheric aircraft and measuring size of particles emitted by stratospheric aircraft
[NASA-CR-195908] p 3769 N94-33170
STREAM FUNCTIONS (FLUIDS)
Finite element vorticity-based methods for the solution of the incompressible and compressible Navier-Stokes equations
[ISBN-0-315-87265-9] p 3703 N94-31730
STRESS (PHYSIOLOGY)
Muscle disuse through tail-suspension: Etiology and therapeutics p 3796 N94-31746
STRESS (PSYCHOLOGY)
Development and enhancement of a model of performance and decision making under stress in a real life setting
[AD-A276029] p 3799 N94-31440
Stress-induced enhancement of the startle reflex
[AD-A278414] p 3802 N94-33327
STRESS ANALYSIS
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
On the mechanics of stress analysis of fiber-reinforced composites p 3619 N94-31481
Contribution to the study of multiaxial fatigue under periodic or random stresses
[ISAL-92-0004] p 3734 N94-31544
A novel CFD/structural analysis of a cross parachute
[DE94-005271] p 3568 N94-31578
An approximate solution for interlaminar stresses in laminated composites p 3621 N94-31901
Finite element analysis of damage in fibrous composites using a micromechanical model
[AD-A277226] p 3623 N94-32024
Bond stress-slip characteristics of FRP rebars
[AD-A277191] p 3623 N94-32070
Mechanics of the single fiber pullout problem with several interface conditions p 3623 N94-32078
Finite element analysis of MB326H Macchi wing lower spar cap fatigue cracks
[AD-A277062] p 3580 N94-32264
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Development of an advanced continuum theory for composite laminates, volume 1
[AD-A277275] p 3625 N94-32591
Development of an advanced continuum theory for composite laminates, volume 2
[AD-A277276] p 3625 N94-32592
A thermal viscoelastic analysis for thick-walled composite cylinders
[AD-A274143] p 3625 N94-32604
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher
[DE94-005244] p 3603 N94-32671
METCAN demonstration manual, version 1.0
[NASA-TM-105607] p 3626 N94-32858
A procedure for 3-D contact stress analysis of spiral bevel gears
[NASA-CR-194472] p 3728 N94-32929
STRESS CONCENTRATION
Physical properties of glasses exposed to Earth-facing and trailing-side environments on LDEF p 3594 N94-31030
Micromechanical analysis of the interface and basic damage modes in glass fiber/epoxy resin model composites
[ONERA-NT-1993-4] p 3618 N94-31225
Reliability analysis of structural ceramics subjected to biaxial flexure p 3650 N94-31454
Tension fracture of laminates for transport fuselage. Part 1: Material screening p 3629 N94-33130
Structural integrity of intelligent materials and structures
[AD-A278397] p 3630 N94-33165
Fundamental studies in crack initiation
[AD-A278387] p 3741 N94-33356
STRESS CORROSION CRACKING
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109
Stage 1 behavior in a stress corrosion study of Type 304 stainless steel
[DE94-008054] p 3645 N94-32614
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639
STRESS DISTRIBUTION
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
Influences of pressure-sensitive yielding and non-singular stress on plane-stress elastic-plastic crack-tip fields p 3737 N94-31965
Minimization of computational requirements in the hybrid stress finite element method
[AD-A277120] p 3846 N94-32048
Mechanics of the single fiber pullout problem with several interface conditions p 3623 N94-32078
Analysis of new composite architectures
[NASA-CR-195303] p 3626 N94-32904
A procedure for 3-D contact stress analysis of spiral bevel gears
[NASA-CR-194472] p 3728 N94-32929
Tension fracture of laminates for transport fuselage. Part 1: Material screening p 3629 N94-33130
STRESS INTENSITY FACTORS
A fracture mechanics methodology for characterizing the performance of flawed polymeric dielectric materials p 3654 N94-31956
Effects of interphases on the mechanical, thermal and hygromechanical response of fiber-reinforced composites p 3624 N94-32496
Stage 1 behavior in a stress corrosion study of Type 304 stainless steel
[DE94-008054] p 3645 N94-32614
Compliance measurements of chevron notched four point bend specimen
[NASA-TM-106538] p 3740 N94-32932
STRESS MEASUREMENT
Shearographic inspection of a DeHavilland DHC-7
[AD-A276716] p 3566 N94-32157
Compilation of diamond-like carbon properties for barriers and hard coatings
[DE94-008231] p 3661 N94-32803
STRESS RELAXATION
Processing of novel nanoparticle dispersion strengthened ceramics for improved mechanical performance
[AD-A275965] p 3649 N94-31276
Effect of vibratory stress relief during welding of thick stainless steel plate
[DE94-006557] p 3733 N94-31312
STRESS-STRAIN RELATIONSHIPS
Boron and hydrogen in Ni3Al. Part 2: Mechanical testing of bicrystals
[DE94-007441] p 3904 N94-32606
On the mechanics of microballoon-reinforced metal matrix composites
[AD-A277928] p 3630 N94-33178
STRIATION
On the nature of striae in strontium barium niobate
[DE94-006486] p 3901 N94-32176
STRING THEORY
Gravitational effects of cosmic strings
[ISBN-0-315-75484-2] p 3934 N94-31789
New QCD results from string theory
[DE94-005226] p 3911 N94-31823
The Kaluza-Klein approach and gauge supersymmetry
[ISBN-0-315-86553-9] p 3912 N94-31911
Tensor gauge potentials in loop space formulation of Yang-Mills fields
[PB94-147147] p 3912 N94-31924
String-parton model description of relativistic heavy-ion collisions
[DE94-009164] p 3874 N94-32850
STRONG INTERACTIONS (FIELD THEORY)
The D0 upgrade
[DE94-006953] p 3867 N94-31671
Baryogenesis from a primordial lepton asymmetry
[PB94-145166] p 3868 N94-31921
STRONGLY COUPLED PLASMAS
Analytic formulation for the ac electrical conductivity in two-temperature, strongly coupled, overdense plasma: FORTRAN subroutine
[DE94-009466] p 3893 N94-32915
STRONTIUM OXIDES
On the nature of striae in strontium barium niobate
[DE94-006486] p 3901 N94-32176
STRUCTURAL ANALYSIS
A novel CFD/structural analysis of a cross parachute
[DE94-005271] p 3568 N94-31578
Nonlinear analysis of springs using helical finite elements p 3859 N94-31906
Theory of thick, laminated composite shallow shells p 3622 N94-31953
Prediction of hydrogen entry and permeation in metals and alloys
[AD-A276637] p 3642 N94-31995
Finite element analysis of damage in fibrous composites using a micromechanical model
[AD-A277226] p 3623 N94-32024
QUAD4 seminar
[AD-A277366] p 3818 N94-32330
Structural study in an alteritic region: Contribution of ERS-1 SAR data of the Mauges Plateau (Loire Atlantique, France)
[BRGM-93032] p 3752 N94-32551
Molecular Science Research Center
[DE94-007464] p 3871 N94-32605
Innovative fabrication processing of advanced composite materials concepts for primary aircraft structures
[NASA-CR-189558] p 3626 N94-32877
A case study of analysis methods for large deflections of a cantilever beam
[NASA-TM-108454] p 3739 N94-32903
Institute for Computational Mechanics in Propulsion (ICOMP)
[NASA-TM-106542] p 3710 N94-32969

STRUCTURAL BASINS
Thermal studies of Martian channels and valleys using Termoskan data: New results p 3944 N94-33194
Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224

STRUCTURAL DESIGN
Structural design of the superconducting Poloidal Field coils for the Tokamak Physics Experiment
[DE94-007078] p 3887 N94-31406
Multidisciplinary optimization of high-speed civil transport configurations using variable-complexity modeling p 3578 N94-31881
Fracture and fatigue strength evaluation of multiple site damaged aircraft fuselages - curved panel testing and analysis
[AD-A277100] p 3579 N94-32015
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
Structural probability concepts adapted to electrical engineering
[NASA-TM-106499] p 3739 N94-32735
Local design optimization for composite transport fuselage crown panels p 3629 N94-33132
Leveraging metal matrix composites to reduce costs in space mechanisms p 3604 N94-33301

STRUCTURAL FAILURE
Deformation and rupture of cylindrical shells under dynamic loading p 3733 N94-31288
Reactor pressure vessel structural integrity research in the US Nuclear Regulatory Commission HSST and HSSI Programs
[DE94-006550] p 3739 N94-32771
Structural integrity of intelligent materials and structures
[AD-A278397] p 3630 N94-33165
Design, development, and testing of a lightweight optical sensor cover system p 3604 N94-33302

STRUCTURAL PROPERTIES (GEOLOGY)
The basement fracture pattern of southern Ontario: A tectonic interpretation based on Landsat TM imagery, airphotos and field data
[ISBN-0-315-87086-9] p 3772 N94-31834
Procedures for computing site seismicity
[AD-A277666] p 3775 N94-33028

STRUCTURAL RELIABILITY
Structural probability concepts adapted to electrical engineering
[NASA-TM-106499] p 3739 N94-32735
Structural integrity of intelligent materials and structures
[AD-A278397] p 3630 N94-33165

STRUCTURAL STABILITY
Structural stability and bifurcations p 3911 N94-31895

STRUCTURAL STRAIN
Deformation and rupture of cylindrical shells under dynamic loading p 3733 N94-31288

STRUCTURAL VIBRATION
Vibrations of a heavy truck diesel engine and gearbox unit: Examining structure-borne sound transmission with statistical energy analysis
[CTH-E-93-04] p 3722 N94-31194
Effect of vibratory stress relief during welding of thick stainless steel plate
[DE94-006557] p 3733 N94-31312
Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth
[AD-A276424] p 3722 N94-31333
Study of wave propagation and dynamic response of laminated composite structures
[AD-A276123] p 3619 N94-31444
Random vibrations of composite beams and plates p 3735 N94-31777
Vibrational and acoustic response of ribbed plates p 3736 N94-31955
Nonlinear vibration analysis of laminated plates on linear and nonlinear elastic foundations p 3737 N94-32079
Feed-forward control of gear mesh vibration using piezoelectric actuators
[NASA-TM-106366] p 3728 N94-32902
An analytical study of the vibration of beams fitted with neutralizers. Part 2: Assessment of the effects of mounting configurations
[ISVR-TR-225-PT-2] p 3740 N94-32982
Reciprocity-based experimental determination of dynamic forces and moments: A feasibility study
[NASA-CR-194905] p 3862 N94-33023
Vibration Isolation Technology (VIT) ATD project
[NASA-TM-106496] p 3567 N94-33064
Response of a cantilevered plate in supersonic flow
[AD-A277487] p 3580 N94-33107
Structural damping studies at cryogenic temperatures
[NASA-TM-109073] p 3740 N94-33118

STRUCTURAL WEIGHT
Aircraft weight prediction capability. Volume 1: Weight study and results
[AD-A277206] p 3579 N94-32062

STRUCTURED PROGRAMMING
Compositionality of application oriented structuring mechanisms for algebraic specification languages with initial semantics
[ETN-94-95736] p 3812 N94-31577

STUDENTS
Ada support for the mathematical foundations of software engineering
[AD-A278031] p 3822 N94-33284

STYRENES
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3857 N94-32364

SUBDUCTION (GEOLOGY)
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111
Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992
[AD-A277935] p 3791 N94-33245

SUBGROUPS
A note on cocycles in a semidirect product
[REPT-93-65] p 3851 N94-31661
Quantum homogeneous spaces, duality, and quantum 2-spheres
[CWI-AM-R9309] p 3857 N94-32192

SUBLIMATION
Obliquity variation in a Mars climate evolution model p 3951 N94-33236

SUBMILLIMETER WAVES
Optically switched submillimeter-wave oscillator
[AD-A278014] p 3698 N94-33249
High precision moving magnet chopper for variable operation conditions p 3605 N94-33307

SUBREFLECTORS
High precision moving magnet chopper for variable operation conditions p 3605 N94-33307

SUBROUTINES
Arnoldi code for computing selected eigenvalues of sparse real unsymmetric matrices
[PB94-145182] p 3813 N94-31682
Analytic formulation for the ac electrical conductivity in two-temperature, strongly coupled, overdense plasma: FORTRAN subroutine
[DE94-009466] p 3893 N94-32915

SUBSONIC FLOW
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
[NASA-CR-195301] p 3571 N94-32475
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869

SUBSONIC FLUTTER
Aeroelastic vibrations of lifting surfaces
[ECL-91-01] p 3585 N94-31677

SUBSONIC SPEED
installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119

SUBSONIC WIND TUNNELS
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042

SUBSTRATES
A new mechanism for surface diffusion: Motion of a substrate-adsorbate complex
[AD-A276072] p 3632 N94-31459
In-situ TEM crystallization of anorthite-glass films on (alpha)-Al2O3
[DE94-006317] p 3652 N94-31780
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A277116] p 3900 N94-31985
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A276904] p 3692 N94-32215
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296
An electrical test system for conductor formation process analysis
[DE94-007291] p 3696 N94-32786
Conductive paints
[DE94-008508] p 3661 N94-32788
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843

SUBSTRUCTURES
Transport phenomena in the Earth's plasma sheet p 3772 N94-31970

SUCTION
Results for the hybrid laminar flow control experiment conducted in the NASA Langley 8-foot transonic pressure tunnel on a 7-foot chord model
[NASA-TM-107582] p 3601 N94-32870

SULFATES
The adsorption of sulfate on gold(111) in acidic aqueous media: Adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy
[AD-A276643] p 3642 N94-31997
Evaluation of sulfate aerosol optical depths over the North Atlantic and comparison with satellite observations
[DE94-005457] p 3746 N94-32100
Fine resolution atmospheric sulfate model driven by operational meteorological data: Comparison with observations
[DE94-002994] p 3766 N94-32691
Climate effects of anthropogenic sulfate: Simulations from a coupled chemistry/climate model
[DE94-004352] p 3767 N94-32789
Ferric sulfate montmorillonites as Mars soil analogs p 3944 N94-33196

SULFIDES
New molecular-based routes to binary main group metal sulfides
[AD-A277005] p 3900 N94-32003
Processable, chemical routes to binary metal sulfides
[AD-A277006] p 3642 N94-32004
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011
The relative performance of FeS2 and CoS in long-life thermal-battery applications
[DE94-006145] p 3695 N94-32663

SULFONIC ACID
Metal ion complexation by ionizable crown ethers
[DE94-008301] p 3661 N94-32847

SULFUR
The intramolecular cyclization of bis-2,5-dimethylene-2,5-dihydrofurans and bis-2,5-dimethylene-2,5-dihydrothiophenes: An approach to macrocycles
[DE94-007060] p 3657 N94-32377
Fine resolution atmospheric sulfate model driven by operational meteorological data: Comparison with observations
[DE94-002994] p 3766 N94-32691

SULFUR COMPOUNDS
Processable, chemical routes to binary metal sulfides
[AD-A277006] p 3642 N94-32004

SULFUR DIOXIDES
Cloud studies seen from a physical chemist's perspective
[DE94-006059] p 3771 N94-31527
Time-dependent behavior of Mount Pinatubo aerosol
[DE94-001877] p 3764 N94-31601
Concentration system performance degradation in the aftermath of Mount Pinatubo
[DE94-001879] p 3764 N94-31602

SULFUR OXIDES
Identification of research relating to the critical loads concept and its potential application to the regulation of acidic deposition
[DE94-008234] p 3767 N94-32752

SULFURIC ACID
Anodized aluminum on LDEF p 3592 N94-31017
Climate effects of anthropogenic sulfate: Simulations from a coupled chemistry/climate model
[DE94-004352] p 3767 N94-32789

SUM RULES
Spin-structure function of the neutron He-3: SLAC results
[DE94-008927] p 3875 N94-33189

SUNLIGHT
Spectral inhomogeneity of the bacterial light-harvesting antennae: Causes and consequences
[ETN-94-96020] p 3792 N94-31533
The properties of sunflecks in a flexible plant canopy, and their relationship to turbulence p 3782 N94-31775

SUPERCOMPUTERS
Sandia's research network for Supercomputing 1993: A demonstration of advanced technologies for building high-performance networks
[DE94-005319] p 3823 N94-31149
Parallel supercomputing: Advanced methods, algorithms, and software for large-scale linear and nonlinear problems
[DE94-008446] p 3836 N94-32992

SUPERCONDUCTING DEVICES
Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250
Microstructures and epitaxy in oxide superconductor thin films and devices
[AD-A278427] p 3910 N94-33332
SUPERCONDUCTING FILMS
Preliminary results from the CONCAP-2-01 and EIOM-3 experiments on STS-46 p 3596 N94-31042
High performance YBCO films
[AD-A276493] p 3897 N94-31531
The charging effect in high-Tc superconducting thin films
[AD-A277265] p 3900 N94-32040
Microanalytical study of defect formation in thin bismuth strontium calcium copper oxide films
[DE94-008217] p 3661 N94-32751
Microstructures and epitaxy in oxide superconductor thin films and devices
[AD-A278427] p 3910 N94-33332
SUPERCONDUCTING MAGNETS
Structural design of the superconducting Poloidal Field coils for the Tokamak Physics Experiment
[DE94-007078] p 3887 N94-31406
Various magnet options for Delta launched version of ASTROMAG
[DE94-006292] p 3955 N94-31635
Quench detection and instrumentation for the Tokamak Physics Experiment magnets
[DE94-006656] p 3888 N94-31667
On the unsteady-motion theory of magnetic forces for maglev
[DE94-007765] p 3727 N94-32778
RHIC chromatic correction system
[DE94-008532] p 3883 N94-32994
SUPERCONDUCTIVITY
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
Experimental evidence for lattice effects in high temperature superconductors
[DE94-006250] p 3899 N94-31633
Finite element analysis of time-independent superconductivity p 3691 N94-31905
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
Superconducting and semiconducting hybrids and advance memory concepts for superconducting electronics
[AD-A277766] p 3907 N94-32988
A quest for a new superconducting state
[DE94-008439] p 3908 N94-32991
SUPERCONDUCTORS
Various magnet options for Delta launched version of ASTROMAG
[DE94-006292] p 3955 N94-31635
Finite element analysis of time-independent superconductivity p 3691 N94-31905
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209
Strongly anisotropic s-wave versus d-wave gap in cuprate superconductors: Evidence and theory
[DE94-007579] p 3904 N94-32746
Superconducting and semiconducting hybrids and advance memory concepts for superconducting electronics
[AD-A277766] p 3907 N94-32988
SUPERCOOLING
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
SUPERCRITICAL FLUIDS
Biocatalytic processing polymers in supercritical fluids
[AD-A276120] p 3651 N94-31510
Improved oxidation resistance of 3-D carbon/carbon composites
[AD-A277349] p 3625 N94-32624
SUPERFLUIDITY
Hydrodynamics of neutron star interiors and laboratory superfluids p 3936 N94-31949
SUPERHIGH FREQUENCIES
Design of a high power x-band magnicon amplifier
[AD-A277001] p 3892 N94-32199
YBCO Josephson Junction arrays
[AD-A277426] p 3908 N94-33005
The 20 GHz circularly polarized, high temperature superconducting microstrip antenna array
[NASA-CR-195097] p 3683 N94-33083
SUPERLATTICES
Experimental and theoretical studies of hydrogenated amorphous semiconductor alloys and superlattices
[AD-A276159] p 3686 N94-31079
A 1-picosecond InGaAs photodetector for operation at 1300-1600 nm
[AD-A275959] p 3895 N94-31350
The relationship of the electronic structures of semiconductor surfaces and heterostructures to crystal growth
[AD-A276465] p 3896 N94-31473
Ion beam synthesis of IrSi3 by 1-MeV Ir ion implantation into Si(111)
[DE94-006556] p 3896 N94-31501
GaAs/GaN strained layer superlattice materials for high temperature transistors, phase 1
[AD-A276115] p 3897 N94-31528
Energetics, bonding mechanism, and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE94-008551] p 3659 N94-32656
Microanalytical study of defect formation in thin bismuth strontium calcium copper oxide films
[DE94-008217] p 3661 N94-32751
Interface controlled amorphization of crystalline Ni/Ti multilayers
[DE94-008685] p 3906 N94-32884
SUPERNOVA REMNANTS
Structure and stability of spherical accretion flows onto compact objects p 3935 N94-31946
SUPERNOVAE
Reactive flows in compact objects p 3934 N94-31567
Evolution of stars and winds in the starburst galaxy M82 p 3934 N94-31758
Convection in Type 2 supernovae
[DE94-009373] p 3938 N94-32914
SUPERPLASTICITY
A state variable material model for superplastic titanium-6 percent Al-4 percent V p 3644 N94-32498
SUPERSONIC AIRCRAFT
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026
SUPERSONIC COMBUSTION
Ignition delays, heats of combustion, and reaction rates of aluminum alkyl derivatives used as ignition and combustion enhancers for supersonic combustion
[NASA-CR-189581] p 3638 N94-32868
Turbulent reacting flows and supersonic combustion
[AD-A277462] p 3639 N94-33242
SUPERSONIC COMBUSTION RAMJET ENGINES
A numerical method for mixing/chemically reacting compressible flow with finite rate chemistry p 3634 N94-31824
SUPERSONIC FLOW
Shock-dependent, optimum thrust wings in supersonic flow p 3570 N94-32027
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869
Flutter analysis of a supersonic cascade in time domain using an ADI Euler solver
[NASA-TM-105625] p 3739 N94-32883
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU finite volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926
A mathematical model for simulating noise suppression of lined ejectors
[NASA-TP-3425] p 3861 N94-32930
Response of a cantilevered plate in supersonic flow
[AD-A277487] p 3580 N94-33107
Turbulent reacting flows and supersonic combustion
[AD-A277462] p 3639 N94-33242
SUPERSONIC FLUTTER
Aeroelastic vibrations of lifting surfaces
[ECL-91-01] p 3585 N94-31677
SUPERSONIC SPEED
Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Flight test results of riblets at supersonic speeds
[NASA-TM-4387] p 3572 N94-32880
SUPERSONIC TRANSPORTS
Multidisciplinary optimization of high-speed civil transport configurations using variable-complexity modeling p 3578 N94-31881
Use of Navier-Stokes methods for the calculation of high-speed nozzle flow fields
[NASA-TM-106551] p 3573 N94-32984
SUPERSYMMETRY
High energy physics studies
[DE94-005970] p 3876 N94-31505
Some calculations on supersymmetric graphs as communication networks
[REPT-93-72] p 3824 N94-31641
Conformal field theory and geometry of strings
[PB94-148442] p 3857 N94-31770
Production of charginos and neutralinos for the reaction positron electron yields Z° boson yields chargino(+) (sub i) chargino(-) (sub j) or neutralino (sub i) neutralino (sub j) in SU(2) (sub L) x SU(2) (sub R) x U(1) (sub B-L)
[ISBN-0-315-87316-7] p 3867 N94-31832
The Kaluza-Klein approach and gauge supersymmetry
[ISBN-0-315-86553-9] p 3912 N94-31911
Baryogenesis from a primordial lepton asymmetry
[PB94-145166] p 3868 N94-31921
Tensor gauge potentials in loop space formulation of Yang-Mills fields
[PB94-147147] p 3912 N94-31924
SUPPORT SYSTEMS
New approaches for real time decision support systems p 3915 N94-32426
Knowledge-based commodity distribution planning p 3915 N94-32427
Selection criteria and facilitation training for the study of groupware
[NASA-CR-195906] p 3822 N94-33114
A decision support system for electronic warfare analysts p 3853 N94-33336
SUPPRESSORS
An adaptive Kalman filter excisor for suppressing narrowband interference
[AD-A276286] p 3671 N94-31253
SURFACE CRACKS
Temperature-humidity-bias aging technique to identify defective surface mount capacitors
[DE94-005354] p 3660 N94-32727
Fundamental studies in crack initiation
[AD-A278387] p 3741 N94-33356
SURFACE DEFECTS
Reliability analysis of structural ceramics subjected to biaxial flexure p 3650 N94-31454
Intra-cascade surface recombination of point defects during ion bombardment of Ge(001)
[DE94-007740] p 3903 N94-32384
Reactor pressure vessel structural integrity research in the US Nuclear Regulatory Commission HSST and HSSI Programs
[DE94-006550] p 3739 N94-32771
SURFACE DIFFUSION
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
A new mechanism for surface diffusion: Motion of a substrate-adsorbate complex
[AD-A276072] p 3632 N94-31459
SURFACE EMITTING LASERS
Passivation of III-V compound semiconductor based devices
[AD-A276178] p 3894 N94-31056
Large-diameter InGaAs/AlGaAs vertical-cavity surface-emitting lasers with low threshold current density fabricated using a simple chemical etch process
[AD-A277733] p 3721 N94-33003
SURFACE ENERGY
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248
SURFACE FINISHING
Analysis of leading edge and trailing edge cover glass samples before and after treatment with advanced satellite contamination removal techniques p 3596 N94-31041
Neutral ion sources in precision manufacturing p 3875 N94-32447
SURFACE LAYERS
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649
High-resolution synthetic aperture radar observations of the Moon p 3676 N94-31952
Dielectric properties of Mars' surface: Proposed measurement on a Mars lander p 3951 N94-33237
SURFACE PROPERTIES
The surface parameters: Remote sensing observations and climatology applications p 3779 N94-31001

Modification of semiconductor surface properties with chemically bound molecular films
[AD-A276162] p 3895 N94-31081
Molecular dynamics computer simulations of charged metal electrode-aqueous electrolyte interfaces
[AD-A276401] p 3863 N94-31237
Electromagnetic scattering through loaded aperture panels with nonzero contact impedance
[ONERA-NT-1993-2] p 3673 N94-31418
A new mechanism for surface diffusion: Motion of a substrate-adsorbate complex
[AD-A276072] p 3632 N94-31459
The relationship of the electronic structures of semiconductor surfaces and heterostructures to crystal growth
[AD-A276485] p 3896 N94-31473
Satellite radar altimetry over the continental ice sheets p 3742 N94-31570
Prediction of hydrogen entry and permeation in metals and alloys
[AD-A276637] p 3642 N94-31995
Metal clusters: Dynamics and structure
[AD-A276842] p 3643 N94-32091
Visual neural development and chromatic aberration
[AD-A277402] p 3800 N94-32345
SUNY beamline facilities at the National Synchrotron Light Source
[DE94-006343] p 3905 N94-32770
Parameterizing atmosphere-land surface exchange for climate models with satellite data: A case study for the Southern Great Plains CART site
[DE94-005109] p 3775 N94-32874
Imaging of surface structure with energy-dependent photoelectron diffraction
[DE94-009096] p 3907 N94-32934
Surface conforming flexible eddy current probe for scanning varying surface contours
[AD-D016173] p 3627 N94-33018
Distribution and nature of UV absorbers on Triton's surface
[NASA-CR-195886] p 3943 N94-33104
The importance of environmental conditions in reflectance spectroscopy of laboratory analogs for Mars surface materials p 3944 N94-33195
Martian spectral units derived from ISM imaging spectrometer data p 3949 N94-33220

SURFACE REACTIONS
Ground-based simulation of LEO environment: Investigations of a select LDEF material: FEP Teflon (trademark) p 3596 N94-31039
An overview of the Evaluation of Oxygen Interaction with Materials-third phase (EOIM-3) experiment: Space Shuttle Mission 46 p 3596 N94-31040
Effects of orbital exposure on RTV during the LDEF mission p 3597 N94-31043
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
Mechanisms of laser induced reactions in opaque heterogeneous environments
[AD-A276642] p 3717 N94-31996
A new-type of long-range restructuring of ordered metal surfaces induced by lateral adsorbate interactions: Iodide on AU(110) electrodes
[AD-A276633] p 3643 N94-32060
Surface chemistry and durability of borosilicate glass
[DE94-006734] p 3656 N94-32116
Soft x ray photoelectron spectroscopy study of the interaction of Cr with MoS2(0001)
[AD-A276916] p 3635 N94-32233
Chemical structure and kinetics at liquid/solid interfaces
[AD-A277112] p 3636 N94-32304
Chemisorbed-molecule potential-energy surfaces and electronically-stimulated processes
[DE94-007932] p 3719 N94-32603
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
Time-resolved analytical methods for liquid/solid interfaces
[DE94-008352] p 3637 N94-32826
Induced adsorption of chloride and bromide by submonolayer amounts of copper underpotentially deposited on Pt(111)
[AD-A278023] p 3648 N94-33182

SURFACE ROUGHNESS
New micro- and macroscopic models of contact and friction
[AD-A277240] p 3726 N94-32320
Almaz marine applications p 3751 N94-32544
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029

SURFACE ROUGHNESS EFFECTS
A comparison of rough surface parabolic equation models
[AD-A278090] p 3791 N94-33185
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186

SURFACE STABILITY
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916

SURFACE TEMPERATURE
Heat transfer studies on a rectangular channel with offset plate fins
[AD-A277300] p 3912 N94-32043
Sensitivity analysis of the AVHRR infrared cirrus model
[AD-A276690] p 3784 N94-32117
Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559
Dual-band infrared imaging to detect corrosion damage within airframes and concrete structures
[DE94-006047] p 3580 N94-32658
Development of lightweight ceramic ablators and arc-jet test results
[NASA-TM-108798] p 3617 N94-33117

SURFACE TREATMENT
Operation of D3-D with all-graphite walls
[DE94-004858] p 3886 N94-31304
Large-area conditioning of optics for high-power laser systems
[DE94-007028] p 3716 N94-31636
Fatigue testing of 2024-T3 material after four cycles of PMB stripping
[AD-A276926] p 3644 N94-32237
Evaluation of the Hughes conversion coating touch-up pen
[AD-A278398] p 3664 N94-33166

SURFACE VEHICLES
Navy Omni-Directional Vehicle (ODV) development program p 3729 N94-32451

SURFACES
Aeroelastic vibrations of lifting surfaces
[ECL-91-01] p 3585 N94-31677

SURVEILLANCE
Millimeter wave, high-resolution, holographic surveillance system
[DE94-004289] p 3712 N94-31831

SURVEYS
Results of real-time testing and demonstration of the US Army Corps of Engineers real-time on-the-fly positioning system
[AD-A276160] p 3576 N94-31080
Active matrix liquid crystal display. Industry survey results
[AD-A276415] p 3895 N94-31329
Hydrographic service Royal Australian Navy
[AD-A277134] p 3788 N94-32066
Aircraft communication and navigation systems and communication and navigation systems
[AD-A277309] p 3582 N94-32328
The relationship between integrative task design for information systems professionals and perceived information systems effectiveness p 3919 N94-32487
Relationships between access and use in information systems: Remote access to and browsing of online catalogs p 3919 N94-32488
Multidimensional scaling of user information satisfaction
[AD-A277230] p 3920 N94-32633

SURVIVAL
NASA report to education, volume 9
[NASA-TM-109760] p 3913 N94-31817

SUSPENDING (HANGING)
A large motion zero-gravity suspension system for experimental simulation of orbital construction and deployment
[NASA-CR-195881] p 3668 N94-33037

SUSPENSIONS
Micromechanics and effective properties of particulate composites and fluid suspensions p 3703 N94-31744

SWELLING
The influence of transmutation, void swelling, and flux/spectra uncertainties on the electrical properties of copper and copper alloys
[DE94-006213] p 3641 N94-31626
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666

SWEPT WINGS
Numerical analysis of transonic wing buffet p 3586 N94-32713

SWITCHES
Electron-beam controlled semiconductor switches
[AD-A276198] p 3686 N94-31057
Studies of the plasma triggering mechanism of inverse pinch switch
[AD-A276117] p 3887 N94-31530
The named-state register file
[AD-A276796] p 3825 N94-32165
Reconfigurable optical switches with monolithic electrical-to-optical interfaces
[DE94-007745] p 3881 N94-32385
High power switch design for the Nova upgrade laser (Project HERCULES: High Energy Research Concerning the Ultimate Lifetime of Experimental Switches)
[DE94-007921] p 3719 N94-32654
Optically switched submillimeter-wave oscillator
[AD-A278014] p 3698 N94-33249

SWITCHING
Studies of the plasma triggering mechanism of inverse pinch switch
[AD-A276117] p 3887 N94-31530
High power switch design for the Nova upgrade laser (Project HERCULES: High Energy Research Concerning the Ultimate Lifetime of Experimental Switches)
[DE94-007921] p 3719 N94-32654

SWITCHING CIRCUITS
Electron-beam controlled semiconductor switches
[AD-A276198] p 3686 N94-31057
Examination of fast semiconductor diodes (recovery) with respect to switching valves in PWM and resonance devices
[ETN-94-95740] p 3690 N94-31609
The named-state register file
[AD-A276796] p 3825 N94-32165
Characterization of thermally stable dye-doped polyimide based electrooptic materials
[DE94-005309] p 3882 N94-32674
Fiber optic continuous true time-delay modulator
[AD-D016098] p 3883 N94-32720
Buffered feedthrough crossbar switch
[AD-D016145] p 3697 N94-32967

SYMBOLS
Beginning the 21st century with advanced Automatic Parts Identification (API) p 3923 N94-32444

SYMMETRY
N(exp n(n-1)/2)-state R-matrix related with U(sub q)(sl(n)) algebra at q(exp 2N) = 1
[DE94-608140] p 3902 N94-32247
Fabrication, phase transformation studies and characterization of SiC-AlN-Al2OC ceramics
[DE94-008587] p 3659 N94-32657

SYNCHRONISM
Extension of the LUSTRE language and application to circuit design: The LUSTRE V4 language and the POLLUX system
[ETN-94-95918] p 3812 N94-31543

SYNCHRONOUS MOTORS
Theoretical principles for designing long stator/linear motors with iron
[ETN-94-95741] p 3688 N94-31374
Applicable dimensioning and measure and technological examination of long stator-linear motors for magnetic high-speed railways
[ETN-94-95734] p 3689 N94-31575

SYNCHROTRON RADIATION
Characterization of the rare earth orthophosphates and Ce-doped LaPO4 by x ray absorption spectroscopy
[DE94-006313] p 3898 N94-31630
Double photoionization of helium with synchrotron x rays: Proceedings
[DE94-006737] p 3866 N94-31668
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799

SYNCHROTRONS
Time-dependent behavior of active galactic nuclei with pair production p 3929 N94-31125
Particle diffusion from the beam-beam interaction in synchrotron colliders
[DE94-007111] p 3876 N94-32b95

SYNOPTIC METEOROLOGY
Dynamics in the tropics and synoptic disturbances p 3778 N94-30990

SYNTAX
Correspondence theory for extended modal logics, version 3.0
[ML-93-16] p 3856 N94-31417
Compositionality of application oriented structuring mechanisms for algebraic specification languages with initial semantics
[ETN-94-95736] p 3812 N94-31577
Informal introduction to the extended affix grammar formalism and its compiler
[TR-93-19] p 3817 N94-32287
An epistemic proof system for parallel processes
[TR-93-17] p 3826 N94-32291

SYNTHESIS (CHEMISTRY)
Feasibility study to evaluate plasma quench process for natural gas conversion applications
[DE94-000086] p 3758 N94-31234
Novel electroactive polymers and block copolymers
[AD-A276119] p 3650 N94-31509
Biocatalytic processing polymers in supercritical fluids
[AD-A276120] p 3651 N94-31510
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
Tetraalkyldiarsines as potential precursors for electronic materials: Synthesis and characterization of various iso-propyl arsenic compounds
[AD-A277003] p 3900 N94-32001
Processable, chemical routes to binary metal sulfides
[AD-A277006] p 3642 N94-32004
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011
High octane ethers from synthesis gas-derived alcohols
[DE94-006774] p 3667 N94-32133
Towards a detailed understanding of the structural variability in lignins: A new approach
[DE94-007449] p 3793 N94-32267
SYNTHESIZERS
Modelling the late part of room impulse responses using adaptive filtering: On the recreation of reality
[CTH-E-93-01] p 3859 N94-31076
SYNTHETIC APERTURE RADAR
Phase unwrapping problems in ISAR images
[TELECOM-93-D-008] p 3670 N94-31097
High-resolution synthetic aperture radar observations of the Moon p 3676 N94-31952
Validation support of the ERIM ocean model
[AD-A277364] p 3788 N94-32284
From Optics to Radar, SPOT and ERS Applications
[ISBN-2-85428-345-7] p 3747 N94-32523
Contribution of SAR ERS1 data to study the French Guiana tropical coast environment
[BRGM-93034] p 3748 N94-32527
Monitoring land cover and crop types in Denmark using ERS-1 SAR and optical satellite images p 3748 N94-32528
The use of ERS images for mapping p 3749 N94-32531
Example of SPOT/ERS-1 complementarity p 3749 N94-32533
Restoration of interferometric, polarimetric, radiometric, and textural information in SAR images p 3750 N94-32535
Assessment of region-based methods for automated SAR/optical registration, attribute extraction, and classification p 3750 N94-32536
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539
Ship traffic monitoring and oil spill detection using the ERS-1 SAR p 3751 N94-32542
SAR image feature extraction system: A pre-operational application of ERS-1 SAR p 3751 N94-32543
Almaz marine applications p 3751 N94-32544
The use of ERS-1 within an operational ice monitoring program p 3751 N94-32545
The use of SPOT and ERS-1 images to map the eruption of Nevado Sabancaya (Province of Arequipa, South Peru) and evaluate associated risks p 3751 N94-32546
Respective contributions of VIS-PIR, SAR-ERS 1, and airborne radar data for morphostructural and morphoneotectonic analysis: Practical examples p 3752 N94-32549
Use of SPOT and ERS-1 SAR data to study the tectonic and climatic history of arid regions p 3752 N94-32550
Structural study in an alteritic region: Contribution of ERS-1 SAR data of the Mauges Plateau (Loire Atlantique, France)
[BRGM-93032] p 3752 N94-32551
Evaluation of the potential of SAR data for mapping of landslide risks
[BRGM-93033] p 3753 N94-32552
Use of SPOT and ERS-1 to map tropical vegetation and mangrove dynamics in Guiana p 3753 N94-32555
A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping p 3753 N94-32556
Application of ERS-1 SAR data for hydrological studies p 3754 N94-32558
Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559
Monitoring landsurface characteristics in Niger using complementary SPOT and ERS-1 SAR data p 3754 N94-32560
Possible complementarity of SPOT/ERS in mapping land use: Study on agricultural land in Brittany (France) p 3755 N94-32563
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea p 3755 N94-32565
SAR interferometry with ERS-1 p 3755 N94-32566
Techniques and applications of SAR interferometry for ERS-1 p 3756 N94-32568
Developments in ERS-1 SAR interferometry: Use of the spectral shift p 3756 N94-32569
Fields of experiments in ERS-1 SAR interferometry in Bonn and Naples p 3756 N94-32572
The processing technology and some applications of Almaz-1 data p 3756 N94-32573
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681
SYNTHETIC APERTURES
Ultra wide band radar holographic imaging of subsurface targets
[DE94-004271] p 3713 N94-32681
SYNTHETIC FUELS
Heterogeneous catalytic process for alcohol fuels from syngas
[DE94-008729] p 3667 N94-32583
SYSTEM EFFECTIVENESS
The relationship between integrative task design for information systems professionals and perceived information systems effectiveness p 3919 N94-32487
Multidimensional scaling of user information satisfaction
[AD-A277230] p 3920 N94-32633
SYSTEM FAILURES
Spacecraft contamination issues from LDEF: Issues for design p 3592 N94-31020
Principles of ultradependability in chaotic routing
[AD-A277422] p 3827 N94-32995
SYSTEM IDENTIFICATION
A new methodology of system parameter estimation
[MATHS-REPT-A-208] p 3808 N94-31163
Optimal adaptive estimation algorithm for harmonic current reduction using power limited active line conditioners
[AD-A277354] p 3693 N94-32336
Stochastic realization of a Gaussian stochastic control system
[CWI-BS-R9320] p 3852 N94-32350
Parametric robust control and system identification: Unified approach
[NASA-CR-195826] p 3836 N94-32980
SYSTEMS ANALYSIS
A new methodology of system parameter estimation
[MATHS-REPT-A-208] p 3808 N94-31163
Covert channel analysis of trusted systems. A guide to understanding
[AD-A276418] p 3916 N94-31331
On a formal approach to the methodology of information planning
[MEMO-INF-93-42] p 3917 N94-31415
Modal analysis of multiterminal high voltage direct current transmission
[DE94-006426] p 3691 N94-31785
System analysis of ultra-wideband instrumentation radars: Impulse versus stepped-chirp approaches
[AD-A276624] p 3677 N94-32087
World height system definition and implementation
[AD-A276725] p 3747 N94-32160
A polling system with a dormant server
[CWI-BS-R9313] p 3835 N94-32193
Hierarchical modeling for reliability analysis using Markov models
[NASA-CR-188288] p 3731 N94-32862
SYSTEMS ENGINEERING
A new methodology of system parameter estimation
[MATHS-REPT-A-208] p 3808 N94-31163
A neural network methodology for engineering applications: The learning control of robotic systems
[RR-480] p 3830 N94-31500
Effective information modelling support
[PB94-148236] p 3917 N94-31586
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-flight station module, volume 2
[AD-A276969] p 3588 N94-32313
A PC program to optimize system configuration for desired reliability at minimum cost p 3823 N94-32438
Research and technology, 1993
[NASA-TM-106376] p 3567 N94-33046
Real-time centimeter positioning with GPS: A system developed by the US Army Corps of Engineers
[AD-A278152] p 3577 N94-33095
SYSTEMS INTEGRATION
Channel and terminal description of the ACTS mobile terminal p 3599 N94-31428
An information system organized as stratified hypermedia
[TR-93-12] p 3918 N94-32289
Modular Simulator System (MSS). System/segment specification for the generic MSS-system integration, volume 1
[AD-A276968] p 3588 N94-32312
Modular Simulator System (MSS): Interface design document for the generic MSS
[AD-A277270] p 3590 N94-32403
SYSTEMS MANAGEMENT
DoD information systems capacity management function
[AD-A275987] p 3916 N94-31355
SYSTEMS SIMULATION
A finite state machine model for object oriented systems
[REPT-93-040] p 3809 N94-31212
SYSTEMS STABILITY
Structural stability and bifurcations p 3911 N94-31895

T

T TAURI STARS
Observations of accretion and angular momentum regulation in young circumstellar disks and the implications for planetary formation p 3928 N94-31122
Evolution of dynamo-generated magnetic fields in accretion disks around compact and young stars p 3931 N94-31138
Multiwavelength search for protoplanetary disks p 3599 N94-31430
TABS (CONTROL SURFACES)
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 1: Results and discussion
[NASA-CR-182296-VOL-1] p 3708 N94-32867
Shear flow control of cold and heated rectangular jets by mechanical tabs. Volume 2: Tabulated data
[NASA-CR-182296-VOL-2] p 3709 N94-32869
Enhancement of mixing in a rectangular jet by mechanical tabs
[NASA-CR-185207] p 3709 N94-32872
TAKEOFF
Scattering of a random acoustic field by an infinite cylinder: Application to the modelization of the acoustic environment of the 'Ariane 5' launcher scale-model using experimental data
[ONERA-NT-1993-11] p 3860 N94-31226
TALKING
Spectral analysis method and sample generation for real time visualization of speech
[ETN-94-95732] p 3674 N94-31573
TANTALUM ALLOYS
Electrooptic crystal growth and properties
[AD-A276023] p 3896 N94-31439
TARGET ACQUISITION
Peak detection of Swerling type targets. Part 1: Detection probabilities in white noise
[AD-A276217] p 3670 N94-31062
Analysis using bi-spectral related technique
[AD-A276017] p 3672 N94-31386
Waveform generation for ultra-wideband radar system
[AD-A276352] p 3673 N94-31401
Detection of a chi-square fluctuating target in Gaussian noise
[AD-A276078] p 3850 N94-31462
Visual processing of object velocity and acceleration
[AD-A277425] p 3801 N94-32998
The application of a radial basis function neural network for radar tracking over the sea p 3686 N94-33150
Some neural computing approaches to target tracking p 3837 N94-33151
Multi-sensor data fusion for target acquisition p 3837 N94-33154
TARGET RECOGNITION
Atmospheric propagation effects through natural and man-made obscurants for visible to MM-wave radiation
[AD-A276919] p 3679 N94-32235
Correlation filter synthesis using neural networks
[AD-A278124] p 3836 N94-33043
A novel optoelectronic system for distortion-invariant ATR
[AD-A277985] p 3884 N94-33087
Multi-sensor data fusion for target acquisition p 3837 N94-33154
TASK PLANNING (ROBOTICS)
A high-performance multi-arm environment: Theoretical aspects and practical implementation
[RR-479] p 3722 N94-31379
Contingency-tolerant robot motion planning and control p 3830 N94-31482
Advanced teleoperation: Technology innovations and applications p 3806 N94-32453

TAXIING
Evaluation for the development of taxiway lighting intensity standards
[AD-A276706] p 3588 N94-32120
TAYLOR SERIES
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698
Light-traffic analysis for queues with spatially distributed arrivals
[MEMO-1150] p 3832 N94-31826
TEARING
Tearing resistance of a thin shell against projectile penetration: Material property effects
[DE94-007486] p 3733 N94-31316
TEARING MODES (PLASMAS)
Stability of tearing modes in tokamak plasmas
[DE94-009205] p 3892 N94-32911
TECHNOLOGIES
OPTIONS for systemic change in mathematics, science, and technology education: Scientist/teacher partnerships
[DE94-007472] p 3914 N94-32910
TECHNOLOGY ASSESSMENT
High-temperature superconducting transformer performance, cost, and market evaluation
[DE94-005494] p 3687 N94-31152
Active matrix liquid crystal display. Industry survey results
[AD-A276415] p 3895 N94-31329
Technical assessment of Mir-1 life support hardware for the international space station
[NASA-TM-108441] p 3803 N94-31380
Semiconductor microcavity lasers
[DE94-006143] p 3716 N94-31622
Benchmarking of the state-of-the-art in nondestructive testing/evaluation for applicability in the Composite Armored Vehicle (CAV) Advanced Technology Demonstrator (ATD) program, phase 1
[AD-A276660] p 3730 N94-32088
LLNL casting technology
[DE94-008282] p 3669 N94-32839
Application of a design-build-team approach to low cost and weight composite fuselage structure
[NASA-CR-4418] p 3626 N94-32863
TECHNOLOGY TRANSFER
Photovoltaics: Program overview, fiscal year 1993
[DE94-000246] p 3758 N94-31235
Cleanroom engineering handbook. Volume 1: Cleanroom engineering process introduction and overview
[AD-A275949] p 3587 N94-31356
Naval Surface Warfare Center Dahlgren Division Technical Digest: Advanced materials technology
[AD-A276448] p 3668 N94-31364
Renewable energy technology development at Sandia National Laboratories
[DE94-007734] p 3761 N94-32383
Technology 2003: The Fourth National Technology Transfer Conference and Exposition, volume 2
[NASA-CP-3249] p 3956 N94-32420
Information systems to enhance technology exchange
[DE94-007744] p 3920 N94-32808
Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878
Research and technology, 1993
[NASA-TM-106376] p 3567 N94-33046
TECHNOLOGY UTILIZATION
High-temperature superconducting transformer performance, cost, and market evaluation
[DE94-005494] p 3687 N94-31152
Putting the information infrastructure to work: Report of the Information Infrastructure Task Force Committee on Applications and Technology
[NIST/SP-857] p 3916 N94-31228
AMS beyond 2000
[DE94-006666] p 3632 N94-31352
A study of theoretical models for managing technology change and a comparison to a radio frequency identification implementation
[AD-A276012] p 3672 N94-31385
The contribution of aeronautics and astronautics to the quality of life on Earth
[ILR-MITT-283(1993)] p 3764 N94-31611
Workshop on Commercialization of Pulsed Power Science and Technology Proceedings
[AD-A276987] p 3692 N94-32258
Advanced teleoperation: Technology innovations and applications p 3806 N94-32453
Research and technology, 1993
[NASA-TM-106376] p 3567 N94-33046
Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262
Advanced release technologies program p 3607 N94-33322
TECTONICS
Tectonic History of the Terrestrial Planets
[NASA-CR-195696] p 3939 N94-31105
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus p 3776 N94-31106
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111
A tectonic resurfacing model for Venus p 3941 N94-31113
The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114
Plains tectonism on Venus: The deformation belts of Lavinia Planitia p 3941 N94-31115
Respective contributions of VIS-PIR, SAR-ERS 1, and airborne radar data for morphostructural and morphoneotectonic analysis: Practical examples p 3752 N94-32549
Use of SPOT and ERS-1 SAR data to study the tectonic and climatic history of arid regions p 3752 N94-32550
TEFLON (TRADEMARK)
Performance of silvered Teflon (trademark) thermal control blankets on spacecraft p 3591 N94-31014
Follow-up on the effects of the space environment on UHCRE thermal blankets p 3592 N94-31018
Ground-based simulation of LEO environment: Investigations of a select LDEF material: FEP Teflon (trademark) p 3596 N94-31039
TELECOMMUNICATION
The Nomad Explorer assembly assist vehicle: An architecture for rapid global extraterrestrial base infrastructure establishment p 3599 N94-31429
TELECONNECTIONS (METEOROLOGY)
Short term teleconnections associated with an individual tropical cyclone
[AD-A277210] p 3783 N94-32019
TELEMETRY
Data processing algorithms for on-board satellite event analysis
[AD-A278406] p 3838 N94-33168
TELEOPERATORS
Adaptive control of telerobotic systems worn by humans
[AD-A276608] p 3834 N94-32036
Advanced teleoperation: Technology innovations and applications p 3806 N94-32453
Technology transfer of operator-in-the-loop simulation p 3802 N94-32472
Development of an interchangeable end effector mechanism for the Ranger telerobotic vehicle p 3604 N94-33297
TELEPHONES
Remote sensing for urban planning p 3758 N94-32465
TELEPHONY
Remote sensing for urban planning p 3758 N94-32465
Reliable communication in the presence of severe noise or jamming
[AD-A278410] p 3684 N94-33173
TELEROBOTICS
Remote robot manipulator coupled with remote-controlled guide vehicle for soil sampling in hazardous waste sites p 3723 N94-31569
Applying robotics to HAZMAT p 3729 N94-32452
Advanced teleoperation: Technology innovations and applications p 3806 N94-32453
Technology transfer of operator-in-the-loop simulation p 3802 N94-32472
Development of an interchangeable end effector mechanism for the Ranger telerobotic vehicle p 3604 N94-33297
TELESCOPES
Design and early results of the sodium-layer laser guide star adaptive optics experiment at the Lawrence Livermore National Laboratory
[DE94-006653] p 3926 N94-32189
Digital image profilers for detecting faint sources which have bright companions
[NASA-CR-191348] p 3927 N94-32695
TELEVISION SYSTEMS
The development and testing of a backscatter absorption gas imaging (BAGI) system designed to image at a range of 300 m
[DE94-006192] p 3675 N94-31761
Welcome to the Ohio Aerospace Institute
[NASA-TM-109756] p 3913 N94-31815
TELLURIUM ALLOYS
Structural ordering in liquid K-Te alloys
[DE94-008477] p 3645 N94-32514
TEMPERATURE CONTROL
Performance of silvered Teflon (trademark) thermal control blankets on spacecraft p 3591 N94-31014
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Draft minutes of IAPG Mechanical Working Group meeting
[DE94-004954] p 3759 N94-31266
Metal hydride heat pump engineering demonstration and evaluation model
[NASA-CR-188286] p 3669 N94-32857
Combined contamination and space environmental effects on solar cells and thermal control surfaces
[NASA-TM-106592] p 3617 N94-33022
TEMPERATURE DEPENDENCE
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
Acoustic emission from crack growth in 7050 aluminum and 7075 aluminum as a function of temperature and heat treatment
[DREP-CRS-93-15] p 3642 N94-31871
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916
Creep-fatigue criteria and inelastic behavior of modified 9Cr-1Mo steel at elevated temperatures
[DE94-007915] p 3642 N94-31918
Temperature dependence of the exciton-exciton annihilation rate constant in poly(di-n-hexylsilane)
[DE94-005584] p 3655 N94-32102
Computerized Ultrasonic Testing System (CUTS) for in-process thickness determination p 3862 N94-32456
Computational modeling of convective heat transfer to liquid hydrogen coolant p 3707 N94-32485
Rate coefficient for the reaction H + O2 yields OH + O: Results from 2000 to 5300 K
[DE94-008105] p 3871 N94-32615
The relative performance of FeS2 and CoS in long-life thermal-battery applications
[DE94-006145] p 3695 N94-32663
Temperature dependence of single-event burnout in n-channel power MOSFET's
[AD-A277921] p 3698 N94-33177
TEMPERATURE DISTRIBUTION
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF p 3593 N94-31024
CO observations in external galaxies and gas mass determination p 3925 N94-31790
Computational modeling of convective heat transfer to liquid hydrogen coolant p 3707 N94-32485
IRTM brightness temperature maps of the Martian south polar region during the polar night: The cold spots don't move p 3949 N94-33222
TEMPERATURE EFFECTS
Computational study of single-expansion-ramp nozzles with external burning
[NASA-TM-106550] p 3700 N94-31229
Tensile properties of commercially pure vanadium from room temperature to 1200 C
[DE94-006822] p 3641 N94-31581
Experimental evidence for lattice effects in high temperature superconductors
[DE94-006250] p 3899 N94-31633
A model of the ion chemistry of electrified convection p 3868 N94-31993
Effects of interphases on the mechanical, thermal and hygromechanical response of fiber-reinforced composites p 3624 N94-32496
Temperature-humidity-bias aging technique to identify defective surface mount capacitors
[DE94-005354] p 3660 N94-32727
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781
Effect of elevated temperature and cyclic loading on properties and damage modes in ceramic composites
[DE94-008736] p 3662 N94-32891
Numerical model of the thermal behavior of an extremity in a cold environment including counter-current heat exchange between the blood vessels
[AD-A278099] p 3798 N94-33040
Advanced high frequency partial discharge measuring system
[NASA-CR-195240] p 3697 N94-33044
Space flight printed wiring board measling investigation
[NASA-TM-104602] p 3732 N94-33101
Development of lightweight ceramic ablators and arc-jet test results
[NASA-TM-108798] p 3617 N94-33117
Structural damping studies at cryogenic temperatures
[NASA-TM-109073] p 3740 N94-33118

Physics of heat pipe rewetting
[NASA-CR-195902] p 3913 N94-33148
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320

TEMPERATURE MEASUREMENT
Profiling ALACE instruments
[AD-A277246] p 3789 N94-32321
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370
Homogeneous global mean temperature time series
[DE94-002194] p 3766 N94-32690
Radiometry spot measurement system
[NASA-TM-106561] p 3883 N94-32777
High resolution molecular spectroscopy of atmospheric species
[AD-A278382] p 3776 N94-33351

TEMPERATURE MEASURING INSTRUMENTS
Radiometry spot measurement system
[NASA-TM-106561] p 3883 N94-32777

TEMPERATURE PROFILES
Effects of the deep tropical convection in the large scale atmospheric flow p 3778 N94-30994
Multiwavelength search for protoplanetary disks p 3599 N94-31430
Profiling ALACE instruments
[AD-A277246] p 3789 N94-32321
Mars atmospheric dust properties: A synthesis of Mariner 9, Viking, and Phobos observations p 3945 N94-33200

TEMPORAL RESOLUTION
A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping p 3753 N94-32556

TENDONS
Minimization of carpal tunnel syndrome
[AD-A276409] p 3795 N94-31363

TENSILE CREEP
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses p 3653 N94-31942
High-temperature deformation and fracture toughness of duplex ceramic microstructures p 3653 N94-31945

TENSILE DEFORMATION
An approximate solution for interlaminar stresses in laminated composites p 3621 N94-31901
Bond stress-slip characteristics of FRP rebars
[AD-A277191] p 3623 N94-32070

TENSILE PROPERTIES
Tensile properties of commercially pure vanadium from room temperature to 1200 C
[DE94-006622] p 3641 N94-31581
Evaluating in-plane elastic constants of damaged carbon-epoxy laminates using a quantitative ultrasonic technique p 3621 N94-31793
Boron and hydrogen in Ni3Al. Part 2: Mechanical testing of bicrystals
[DE94-007441] p 3904 N94-32606
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665

TENSILE STRENGTH
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632
Development of stitched/RTM composite primary structures p 3628 N94-33127

TENSILE STRESS
Torque-balanced extendable fiber optic cable
[AD-D016097] p 3882 N94-32719

TENSILE TESTS
Tensile properties of commercially pure vanadium from room temperature to 1200 C
[DE94-006622] p 3641 N94-31581
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109
Boron and hydrogen in Ni3Al. Part 2: Mechanical testing of bicrystals
[DE94-007441] p 3904 N94-32606

TENSION
Space Station Freedom Solar Array tension mechanism development p 3604 N94-33300

TENSORS
Tensor gauge potentials in loop space formulation of Yang-Mills fields
[PB94-147147] p 3912 N94-31924

TERMINAL BALLISTICS
Tearing resistance of a thin shell against projectile penetration: Material property effects
[DE94-007466] p 3733 N94-31316
Experimental measurement of dynamic failure and fragmentation properties of metals
[DE94-007377] p 3737 N94-32135

TERMINAL FACILITIES
Cockpit Electronic Display Workshop: A synopsis
[AD-A277728] p 3583 N94-33280

TERMINOLOGY
Total Quality Management implementation guidelines
[DE94-007232] p 3915 N94-32723

TERMS
DTIC Thesaurus on diskette with dBase 4.1 runtime (computer diskette)
[AD-M000306] p 3922 N94-33256
DTIC Thesaurus on diskette (ASC2) (computer diskette)
[AD-M000309] p 3922 N94-33257
DTIC Thesaurus on diskette without runtime (computer diskette)
[AD-M000310] p 3923 N94-33258
DTIC Thesaurus on diskette without runtime (computer diskette)
[AD-M000312] p 3923 N94-33259

TERNARY SYSTEMS
Phase relationships and stability of the (mu)- and (zeta)-phases in the Ag-Al-X (X=Zn, Ga, Ge) systems
[DE94-009391] p 3648 N94-33270

TERRAIN
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Alternatives to hierarchical techniques in stereo correlation
[AD-A276570] p 3746 N94-31938
Monitoring landsurface characteristics in Niger using complementary SPOT and ERS-1 SAR data p 3754 N94-32560
A multitasking behavioral control system for the Robotic All Terrain Lunar Exploration Rover (RATLER)
[DE94-007293] p 3835 N94-32787
Numerical simulation of thermally induced near-surface flows over Martian terrain p 3949 N94-33223

TERRAIN ANALYSIS
Example of SPOT/ERS-1 complementarity p 3749 N94-32533
Production of terrain data: Optical radar complementarity p 3750 N94-32540
Evaluation of the potential of SAR data for mapping of landslide risks
[BRGM-93033] p 3753 N94-32552
Study of subpolar glaciers of Spitzbergen using SPOT, ERS-1, and hypsometric data: Results and perspectives p 3753 N94-32553
Comparing SPOT and SIR A for mapping superficial formations in tropical forest regions: Example of the Yaoundy Region (Cameroon) p 3755 N94-32562
Evaluation of surface phase change on large zones p 3755 N94-32567
Precision and level of artefacts in the computation of digital terrain models by interferometry p 3756 N94-32571
Fields of experiments in ERS-1 SAR interferometry in Bonn and Naples p 3756 N94-32572

TERRESTRIAL PLANETS
Tectonic History of the Terrestrial Planets
[NASA-CR-195696] p 3939 N94-31105
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107

TEST CHAMBERS
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370

TEST EQUIPMENT
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370

TEST FACILITIES
Analysis of beam-on-target interaction in a neutron-source test facility
[DE94-005392] p 3863 N94-31151
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
Aerospace test facilities at NASA LERC Plumbrook
[NASA-TM-109755] p 3602 N94-31814
Real-time control and application to robotics: Hardware and software architectures
[ISBN-0-315-87192-X] p 3833 N94-31876
Design of a cold-flow test facility for the high pressure fuel turbopump turbine of the Space Shuttle main engine
[AD-A276743] p 3615 N94-32182
High power switch design for the Nova upgrade laser (Project HERCULES: High Energy Research Concerning the Ultimate Lifetime of Experimental Switches)
[DE94-007921] p 3719 N94-32654
The preliminary evaluation of liquid lubricants for space applications by vacuum tribometry p 3606 N94-33313

TEST PATTERN GENERATORS
A hierarchical approach to test generation for CMOS VLSI circuits
[ISBN-9-09-005449-9] p 3689 N94-31535

TEST RANGES
Hydrologic Database user's manual
[DE94-003950] p 3743 N94-31603

TEST STANDS
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
An experimental testbed for a free-floating manipulator
[AD-A277350] p 3726 N94-32334

TETRAETHYL ORTHOSILICATE
Preparation of catalyst particles using methods of colloid chemistry. Part 1: Preparation of silica particles from alcohol solutions
[PB94-135597] p 3634 N94-31679

TETRAGONS
Eta percent-superconvergence in the interior of locally refined meshes of quadrilaterals: Superconvergence of the gradient in finite element solutions of Laplace's and Poisson's equations
[AD-A277242] p 3848 N94-32331

TETRAHEDRONS
Rare Earth Doped Semiconductors and Materials Research Society Symposium Proceedings, Volume 301
[AD-A277517] p 3908 N94-33055

TEXTBOOKS
Solar physics and terrestrial effects. A curriculum guide for teachers, grade 7-12
[PB94-142247] p 3953 N94-31595

TEXTILES
Analysis of new composite architectures
[NASA-CR-195303] p 3626 N94-32904
Fracture micromechanics of continuous fiber and textile reinforced metal and ceramic matrix composites
[AD-A277434] p 3627 N94-33008
Second NASA Advanced Composites Technology Conference
[NASA-CP-3154] p 3627 N94-33121
Recent progress in NASA Langley Research Center textile reinforced composites program p 3629 N94-33134
Advanced textile applications for primary aircraft structures p 3629 N94-33135
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 3630 N94-33136
Characterization and manufacture of braided composites for large commercial aircraft structures p 3630 N94-33137

TEXTS
Detecting the erosion of hierarchic information structures
[RUU-CS-93-10] p 3916 N94-31365
High-speed data search p 3923 N94-32441
Emacs Lisp in Edwin scheme
[AD-A276721] p 3818 N94-32504
Finding all periods and initial palindromes of a string in parallel
[AD-B175069] p 3827 N94-33002

TEXTURES
Texture generation on irregular regions
[AD-A275999] p 3841 N94-31359
Radar image classification by texture measurements
[ONERA-NT-1993-3] p 3673 N94-31419
Visual evaluation of computer-generated textures
[AD-A277201] p 3816 N94-32093
Quantitative analysis of woody vegetation in Soudano-Sahalian region. Textural approach (application to a Burkina Faso region) p 3757 N94-32574

THALLIUM COMPOUNDS
The path for long range conduction in high J(sub c) TlBa2Ca2Cu3O(8+x) spray-pyrolyzed deposits
[DE94-007211] p 3909 N94-33271

THEMATIC MAPPERS (LANDSAT)
Comparison of SPOT, ERS-1, SEASAT, LANDSAT TM, and merged imagery for geological investigations p 3752 N94-32547
Optimal geological data extraction from SPOT-radar synergism with samples from Djebel Amour (Algeria), Red Sea Hills (Sudan), Sirte Basin (Libya), and Magdalena Valley (Colombia) p 3752 N94-32548
Rapid estimates of crop acreage and production at European scale using high resolution imagery p 3754 N94-32557
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea p 3755 N94-32565

THEMATIC MAPPING
The effects of vegetation on the ability to map soils using GERIS data p 3744 N94-31860
A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping p 3753 N94-32556

Comparing SPOT and SIR A for mapping superficial formations in tropical forest regions: Example of the Yaoundy Region (Cameroon) p 3755 N94-32562
ERS-1 SAR and optical data for land use/land cover mapping: A case study in a savannah zone of Guinea p 3755 N94-32565

THEOREM PROVING
Formal verification of systolic multipliers with the Boyer-Moore theorem prover
[RR-897-M] p 3839 N94-31082
OTTER 3.0 reference manual and guide
[DE94-007457] p 3829 N94-31315
Proving theorems of the Lambek calculus of order 2 in polynomial time
[CT-93-05] p 3842 N94-31393
The p-q-r-medial axis algorithm requires only local operations
[CWI-BS-R9317] p 3849 N94-32507
Interpreter composition issues in the formal verification of a processor-memory module
[NASA-CR-4594] p 3820 N94-32775

THEOREMS
Remarks on a result of LAV Carvalho
[AD-A276404] p 3841 N94-31360
Generalization of a theorem of Kusmin
[REPT-93-74] p 3844 N94-31643
The Cameron-Martin theorem
[W-9315] p 3844 N94-31676
The p-q-r-medial axis algorithm requires only local operations
[CWI-BS-R9317] p 3849 N94-32507

THEORETICAL PHYSICS
Conformal field theory and geometry of strings
[PB94-148442] p 3857 N94-31770
New QCD results from string theory
[DE94-005226] p 3911 N94-31823
The 14th Annual West Coast Theoretical Chemistry/Statistical Mechanics Conference
[AD-A276942] p 3656 N94-32239
Research program in particle physics
[DE94-008449] p 3871 N94-32512

THERMAL ANALYSIS
A thermal viscoelastic analysis for thick-walled composite cylinders
[AD-A274143] p 3625 N94-32604
THERM3D: A boundary element computer program for transient heat conduction problems
[DE94-008112] p 3708 N94-32709
Novel precursor approached for CMC derived by polymer pyrolysis
[AD-A278383] p 3665 N94-33352

THERMAL BATTERIES
The relative performance of FeS2 and CoS in long-life thermal-battery applications
[DE94-006145] p 3695 N94-32663

THERMAL BUCKLING
Effective computational strategy for predicting the response of complex systems
[AD-A277452] p 3740 N94-33011

THERMAL CONDUCTIVITY
The impact of LDEF results on the space application of metal matrix composites p 3595 N94-31034
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A276904] p 3692 N94-32215
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632
Snowmelt forecasting. Further cold regions development of operational hydrological forecasting, volume 2
[AD-A278123] p 3757 N94-33269

THERMAL CONTROL COATINGS
The performance of thermal control coatings on LDEF and implications to future spacecraft p 3591 N94-31013
Anodized aluminum on LDEF p 3592 N94-31017
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025

THERMAL CYCLING TESTS
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
Space environmental effects on polymer composites: Research needs and opportunities p 3595 N94-31035
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010

THERMAL DEGRADATION
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047

THERMAL DIFFUSIVITY
Ceramic Technology Project database
[DE94-008494] p 3659 N94-32632

THERMAL EMISSION
Dual-band infrared imaging to detect corrosion damage within airframes and concrete structures
[DE94-006047] p 3580 N94-32658
Thermal emission measurements (5-25 microns) of Hawaiian palagonitic soils with implications for Mars p 3944 N94-33193
Thermal studies of Martian channels and valleys using Termoskan data: New results p 3944 N94-33194
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars p 3947 N94-33211

THERMAL ENERGY
Thermal continua of AGN accretion disks p 3931 N94-31137
Stability and precipitation kinetics in Si(1-y)C(y)/Si and Si(1-x-y)Ge(x)C(y)/Si heterostructures prepared by solid phase epitaxy
[DE94-006589] p 3902 N94-32296

THERMAL ENVIRONMENTS
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981

THERMAL EXPANSION
Thermal-vacuum response of polymer matrix composites in space p 3595 N94-31033
The impact of LDEF results on the space application of metal matrix composites p 3595 N94-31034
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
Mechanics of cracking for composite material p 3624 N94-32501
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029

THERMAL FATIGUE
The impact of LDEF results on the space application of metal matrix composites p 3595 N94-31034
Development and characterization of intermediary layers allowing the bond between a metal alloy and a plasma sprayed ceramic
[ECL-91-39] p 3619 N94-31377
Thermal-mechanical fatigue crack growth in aircraft engine materials
[ISBN-0-315-86543-1] p 3734 N94-31707
Fatigue in single crystal nickel superalloys
[AD-A276662] p 3643 N94-32047

THERMAL INSTABILITY
Disk instability and the spectral evolution of the 1992 outburst of the intermediate polar GK Persei p 3928 N94-31123
Disk irradiation and light curves of x ray novae p 3929 N94-31124
Can a variable alpha induce limit cycle behavior and exponential luminosity decay in transient soft x ray sources? p 3929 N94-31129
The physics of black hole x ray novae p 3932 N94-31143

THERMAL INSULATION
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Follow-up on the effects of the space environment on UHCRE thermal blankets p 3592 N94-31018
The prediction of convective transfer on the thermal insulation of a solid-propellant rocket motor
[ONERA-NT-1993-15] p 3614 N94-31423
Proceedings of the DCIEM Diver Thermal Protection Workshop
[DCIEM-92-10] p 3795 N94-31738
Thermotropic liquid crystals: A variable Clo material p 3796 N94-31739

THERMAL MAPPING
Thermal studies of Martian channels and valleys using Termoskan data: New results p 3944 N94-33194
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203
Temporal and spatial mapping of atmospheric dust opacity and surface albedo on Mars p 3947 N94-33211
Studies of atmospheric dust from Viking IR thermal mapper data p 3948 N94-33216
IRTM brightness temperature maps of the Martian south polar region during the polar night: The cold spots don't move p 3949 N94-33222

THERMAL NOISE
Computer implementation of Arnott's formulation of thermoacoustics using MATLAB
[AD-A276356] p 3860 N94-31257

THERMAL PROTECTION
Development and characterization of intermediary layers allowing the bond between a metal alloy and a plasma sprayed ceramic
[ECL-91-39] p 3619 N94-31377
Proceedings of the DCIEM Diver Thermal Protection Workshop
[DCIEM-92-10] p 3795 N94-31738
Thermotropic liquid crystals: A variable Clo material p 3796 N94-31739

THERMAL RADIATION
Thermal continua of AGN accretion disks p 3931 N94-31137
Radiometry spot measurement system
[NASA-TM-106561] p 3883 N94-32777
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981

THERMAL SHOCK
Mechanical properties of vacuum-sintered yttria ceramics
[DE94-008138] p 3659 N94-32617

THERMAL STABILITY
Advanced thermally stable jet fuels
[DE94-006760] p 3667 N94-32150
Characterization of thermally stable dye-doped polyimide based electrooptic materials
[DE94-005309] p 3882 N94-32674
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin
[DE94-007971] p 3660 N94-32698
The development of precipitated iron catalysts with improved stability
[DE94-008711] p 3638 N94-32886
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941
Novel polydiacetylenes as materials for second and third order nonlinear optics
[AD-A277512] p 3664 N94-33082

THERMAL STRESSES
Evolution of the interface properties with temperature in the T800H/ bismaleimide composites
[ONERA-NT-1993-14] p 3619 N94-31478
Validation and sensitivity analysis of Texas human thermal model predictions during cold water immersion
[AD-A275240] p 3797 N94-32156

THERMAL VACUUM TESTS
Thermal-vacuum response of polymer matrix composites in space p 3595 N94-31033

THERMIONIC CONVERTERS
High temperature materials technology research for advanced thermionic systems
[DE94-008341] p 3646 N94-32825

THERMISTORS
Automatic resonator alignment and power stabilization of high power C02 lasers
[ISBN-0-315-77217-4] p 3714 N94-31472

THERMOCHEMICAL PROPERTIES
Ignition delays, heats of combustion, and reaction rates of aluminum alkyl derivatives used as ignition and combustion enhancers for supersonic combustion
[NASA-CR-189581] p 3638 N94-32868

THERMODYNAMIC CYCLES
Application of natural refrigerants: A rational solution to a pressing problem
[PB94-138781] p 3668 N94-31073

THERMODYNAMIC EQUILIBRIUM
Non-equilibrium electrodynamics in the large N expansion
[DE94-006156] p 3911 N94-31760
SOLGAS refined: A computerized thermodynamic equilibrium calculation tool
[DE94-009021] p 3913 N94-32846

THERMODYNAMIC PROPERTIES
A numerical method for mixing/chemically reacting compressible flow with finite rate chemistry p 3634 N94-31824
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011
Isomeric poly(benzophenone)s: Synthesis of highly crystalline poly (4, 4 foot-benzophenone) and amorphous poly (2, 5-benzophenone), a soluble poly (p-phenylene) derivative
[AD-A277261] p 3655 N94-32017
Some perspectives on solution-phase electron-transfer processes
[AD-A276906] p 3635 N94-32216
Inorganic polymer engineering materials
[DE94-008519] p 3659 N94-32655
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933

CET93 and CETPC: An interim updated version of the NASA Lewis computer program for calculating complex chemical equilibria with applications
[NASA-TM-4557] p 3636 N94-32948
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203

THERMODYNAMICS
Reactive flows in compact objects
p 3934 N94-31567
Strongly coupled ionic mixtures and the H/He EOS
[DE94-006391] p 3934 N94-31782
Numerical simulations of monsoon rainfall with the NRL/NCSU regional nested grid model
p 3782 N94-31791
SOLGAS refined: A computerized thermodynamic equilibrium calculation tool
[DE94-009021] p 3913 N94-32846

THERMOELECTRICITY
Pre-flight testing of Thermoelectric Quartz Crystal Microbalances (TQCM) for midcourse space experiment (MSX) spacecraft
[AD-A277054] p 3610 N94-32010

THERMOGRAVIMETRY
New molecular-based routes to binary main group metal sulfides
[AD-A277005] p 3900 N94-32003

THERMOMECHANICAL TREATMENT
A state variable material model for superplastic titanium-6 percent Al-4 percent V p 3644 N94-32498
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665

THERMONUCLEAR EXPLOSIONS
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667

THERMONUCLEAR REACTIONS
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631

THERMOPHYSICAL PROPERTIES
Computational modeling of convective heat transfer to liquid hydrogen coolant p 3707 N94-32485

THERMOPILES
Radiometry spot measurement system
[NASA-TM-106561] p 3883 N94-32777

THERMOPLASTIC RESINS
Empirical optimization of the consolidation of thermoplastic prepregs
[ISBN-0-315-86455-9] p 3652 N94-31722
Development of thermoplastic composite aircraft structures
[NASA-CR-189593] p 3626 N94-32660
Characterization and manufacture of braided composites for large commercial aircraft structures
p 3630 N94-33137

THERMOSETTING RESINS
Evolution of the interface properties with temperature in the T800H/ bismaleimide composites
[ONERA-NT-1993-14] p 3619 N94-31478

THERMOSPHERE
Thermospheric modeling accuracies using F10.7 and Ap
[AD-A277355] p 3773 N94-32337

THESAURI
DTIC Thesaurus on diskette with dBase 4.1 runtime (computer diskette)
[AD-M000306] p 3922 N94-33256
DTIC Thesaurus on diskette (ASC2) (computer diskette)
[AD-M000309] p 3922 N94-33257
DTIC Thesaurus on diskette without runtime (computer diskette)
[AD-M000310] p 3923 N94-33258
DTIC Thesaurus on diskette without runtime (computer diskette)
[AD-M000312] p 3923 N94-33259

THETA PINCH
Coaxial slow source
[DE94-008191] p 3892 N94-32800

THICK FILMS
New thick film feedthrough configurations
[DE94-008706] p 3694 N94-32582

THICK PLATES
An efficient higher order theory for laminated composite plates and a finite element implementation
p 3617 N94-31215

THICKNESS
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A276904] p 3692 N94-32215
Computerized Ultrasonic Testing System (CUTS) for in-process thickness determination
p 3862 N94-32456

THIN FILMS
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649
Degenerate four-wave mixing as a diagnostic of plasma chemistry
[DE94-008588] p 3889 N94-31766
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928
A fracture mechanics methodology for characterizing the performance of flawed polymeric dielectric materials
p 3654 N94-31956
Chemical vapor deposition of metal nitrides, phosphides, and arsenides
[DE94-008096] p 3654 N94-31976
The charging effect in high-Tc superconducting thin films
[AD-A277265] p 3900 N94-32040
Processing boron and boron carbide thin films for protective coatings and device fabrication
[AD-A277266] p 3900 N94-32041
Anomalous small angle x ray scattering studies of amorphous metal-germanium alloys
[DE94-007258] p 3900 N94-32065
Metal clusters: Dynamics and structure
[AD-A276842] p 3643 N94-32091
Correlations between micromagnetic, microstructural and microchemical properties in ultrathin epitaxial magnetic structures
[AD-A277200] p 3901 N94-32092
Ion-irradiation-induced densification of zirconia sol-gel thin films
[DE94-006248] p 3656 N94-32103
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers
[DE94-006591] p 3634 N94-32110
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A276904] p 3692 N94-32215
NMR studies of organic thin films
[AD-A276953] p 3656 N94-32221
Si/SiO2 interface studies by immersion ellipsometry
[AD-A277277] p 3881 N94-32324
Stable second-order nonlinear optical materials based on interpenetrating polymer networks
[AD-A277410] p 3658 N94-32579
Femtosecond probe-probe transmission studies of LT-grown GaAs near the band edge
[DE94-006660] p 3904 N94-32634
Thin-film decoupling capacitors for multi-chip modules
[DE94-007743] p 3695 N94-32650
Energetics, bonding mechanism, and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE94-008551] p 3659 N94-32656
Microanalytical study of defect formation in thin bismuth strontium calcium copper oxide films
[DE94-008217] p 3661 N94-32751
Development of a computer model for polycrystalline thin-film CuInSe2 and CdTe solar cells
[DE94-006853] p 3762 N94-32763
Thin EFG octagons
[DE94-006855] p 3905 N94-32764
Properties of doped and undoped (Ca,Sr)CuO2 thin films
[DE94-007230] p 3905 N94-32785
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
Frictional behavior and adhesion of Ag and Au films applied to aluminum oxide by oxygen-ion assisted Screen Cage Ion Plating (SCIP)
[NASA-TM-106522] p 3647 N94-32931
Low energy ion beam assisted growth of homoepitaxial silicon films at low temperature
[AD-A276092] p 3908 N94-33039
Rare Earth Doped Semiconductors and Materials Research Society Symposium Proceedings, Volume 301
[AD-A277517] p 3908 N94-33055
Ceramic and metal composite circuit-board-level technology for application specific electronic modules (ASEM)
[AD-A277961] p 3630 N94-33180
Microstructures and epitaxy in oxide superconductor thin films and devices
[AD-A278427] p 3910 N94-33332

THIN PLATES
Nonlinear vibration analysis of laminated plates on linear and nonlinear elastic foundations p 3737 N94-32079

THIN WALLED SHELLS
Tearing resistance of a thin shell against projectile penetration: Material property effects
[DE94-007466] p 3733 N94-31316

THIOLS
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011

THREADS
An experimental and analytical investigation of a threaded fastener
[VTT-JULK-786] p 3724 N94-31654

THREE DIMENSIONAL BODIES
Visual perception of 3-dimensional structure from different types of optical deformation
[AD-A278272] p 3884 N94-33141

THREE DIMENSIONAL BOUNDARY LAYER
Computation of three-dimensional compressible boundary layers to fourth-order accuracy on wings and fuselages
[NASA-CR-4269] p 3709 N94-32871

THREE DIMENSIONAL COMPOSITES
A thermal viscoelastic analysis for thick-walled composite cylinders
[AD-A274143] p 3625 N94-32604

THREE DIMENSIONAL FLOW
A heterogeneous computing environment for simulating astrophysical fluid flows p 3928 N94-31119
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476
A new inverse method for generating high-speed aerodynamic flows with application to waverider design
p 3569 N94-31828
Solution of the average-passage equations for the incompressible flow through multiple-blade-row turbomachinery
[AD-A276515] p 3583 N94-31931
A study of the development and attenuation of wing-generated, vortical wakes p 3570 N94-31971
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
[NASA-CR-195301] p 3571 N94-32475
Boundary element analysis of three-dimensional nonlinear hydrodynamics in a reduced gravity environment p 3668 N94-32715
Inlet distortion in engines on VSTOL aircraft
[NASA-CR-195841] p 3584 N94-33035

THREE DIMENSIONAL MODELS
The dynamical settling of warped disks and angular momentum transport in galaxies p 3928 N94-31121
An investigation of the spin-coating process and a model for three-dimensional regular foams
p 3649 N94-31206
Development of a 3D numerical code to calculate the trajectories of the blow off electrons emitted by a vacuum surface discharge: Application to the study of the electromagnetic interference induced on a spacecraft
[ONERA-NT-1993-12] p 3863 N94-31227
Development of a three-dimensional icing model for predicting ice accretion on aircraft
[ONERA-NT-1993-5] p 3574 N94-31230
ADCIRC: An advanced three-dimensional circulation model for shelves, coasts, and estuaries. User's manual for ADCIRC-2DDI
[AD-A276150] p 3787 N94-31250
Multidimensional WAF-type schemes for model conservation laws
[CRANFIELD-AERO-9312] p 3843 N94-31541
Finite element analysis of damage in fibrous composites using a micromechanical model
[AD-A277226] p 3623 N94-32024
Complete model description of an electron beam using ACCEPT Monte Carlo simulation code
[DE94-007063] p 3872 N94-32628
Climate effects of anthropogenic sulfate: Simulations from a coupled chemistry/climate model
[DE94-004352] p 3767 N94-32789
Fast nonsupervised 3D registration of PET and MR images of the brain
[TELECOM-93-C-006] p 3798 N94-33069

THREE DIMENSIONAL MOTION
Identification and control of structures in space
[NASA-CR-195910] p 3612 N94-33115

THRESHOLD CURRENTS
Large-diameter InGaAs/AlGaAs vertical-cavity surface-emitting lasers with low threshold current density fabricated using a simple chemical etch process
[AD-A277733] p 3721 N94-33003
THRUST
Shock-dependent, optimum thrust wings in supersonic flow p 3570 N94-32027
THRUST CONTROL
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388
TILT ROTOR AIRCRAFT
Civil tiltrotor market penetration: Effects on Northeast corridor airport delay
[AD-A277534] p 3576 N94-32955
An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine
[AD-A277516] p 3805 N94-33349
TIME DEPENDENCE
Time-dependent behavior of active galactic nuclei with pair production p 3929 N94-31125
The physics of black hole x ray novae p 3932 N94-31143
A theory of distributed time
[AD-A276631] p 3815 N94-31994
Prediction of the plane wave beamformed acoustic arrival structure for the 1992 Barents Sea coastal tomography test
[AD-A276741] p 3788 N94-32181
Arithmetic averaging: A versatile technique for smoothing and trend removal
[DE94-005274] p 3852 N94-32673
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781
Space flight printed wiring board measling investigation
[NASA-TM-104602] p 3732 N94-33101
TIME DISCRIMINATION
Mechanisms of temporal pattern discrimination by human observers
[AD-A277407] p 3801 N94-32577
TIME DIVISION MULTIPLE ACCESS
Reliable communication in the presence of severe noise or jamming
[AD-A278410] p 3684 N94-33173
TIME LAG
A theory of distributed time
[AD-A276631] p 3815 N94-31994
Fiber optic continuous true time-delay modulator
[AD-D016098] p 3883 N94-32720
TIME MARCHING
Preconditioned time-difference methods for advection-diffusion-reaction equations
[DE94-006472] p 3638 N94-32840
TIME MEASUREMENT
VME rollback hardware for time warp multiprocessor systems
[NASA-CR-191796] p 3826 N94-32483
Time resolved measurements of light produced by onset of plasma formation on electrodes of fast pulsed high voltage diodes
[AD-A277974] p 3894 N94-33264
TIME OF FLIGHT SPECTROMETERS
Production and detection of metastable atomic oxygen
[ISBN-0-315-87364-7] p 3868 N94-31915
TIME RESPONSE
The Second International Workshop on Discrete Time Domain Modelling of Electromagnetic Fields and Networks. Program and information
[AD-A277136] p 3677 N94-32067
TIME SERIES ANALYSIS
A radial basis function approach to financial time series analysis
[AD-A276408] p 3924 N94-31361
Exploring phase space concepts in the forecasting of time series with artificial neural networks
[DE94-005810] p 3834 N94-32127
Arithmetic averaging: A versatile technique for smoothing and trend removal
[DE94-005274] p 3852 N94-32673
Homogeneous global mean temperature time series
[DE94-002194] p 3766 N94-32690
SEASOAR and CTD observations during a COARE surveys cruise, W9211C, 22 January - 22 February, 1993
[AD-A277925] p 3791 N94-33244
TIME SIGNALS
Machinery monitoring and diagnostics using pseudo Wigner-Ville distribution and backpropagation neural network
[AD-A276219] p 3828 N94-31064
IRIG J asynchronous ASCII time code formats
[AD-A277244] p 3681 N94-32332
TIME TEMPERATURE PARAMETER
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781
TIN
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029
TIN ALLOYS
Aging effects on the microstructure, surface characteristics and wettability of Cu pretinned with Sn-Pb solders
[DE94-007033] p 3641 N94-31638
TIN COMPOUNDS
Amorphous/crystalline structure and phase transformations in metastable semiconducting Ge(1-x)Sn(x)
[DE94-006659] p 3901 N94-32115
TIN OXIDES
Chemical vapor deposition of metal nitrides, phosphides, and arsenides
[DE94-008096] p 3654 N94-31976
TITANIUM
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic
[DE94-006467] p 3666 N94-31827
Interface controlled amorphization of crystalline Ni/Ti multilayers
[DE94-008685] p 3906 N94-32884
TITANIUM ALLOYS
High temperature ductility loss in titanium alloys: A review
[DE94-006606] p 3640 N94-31345
Microstructures and mechanical properties of Al3Ti-based alloys: Analysis in single phase and multiphase systems
[ONERA-NT-1993-6] p 3640 N94-31420
Transmissibility of nickel-titanium shape memory alloy springs
[AD-A276055] p 3640 N94-31456
Creep properties of vanadium-base alloys
[DE94-006541] p 3641 N94-31486
Thermal-mechanical fatigue crack growth in aircraft engine materials
[ISBN-0-315-86543-1] p 3734 N94-31707
A state variable material model for superplastic titanium-6 percent Al-4 percent V p 3644 N94-32498
Structure, stability, and mechanical properties of intermetallic phases
[DE94-009178] p 3647 N94-32852
TITANIUM COMPOUNDS
Inorganic materials for anomalous-dispersion phase-matched second harmonic generation: Rubidium titanyl arsenate isomorphs, Rb(Ti(1-2x)Ln(x)Nb(x))OAsO4
[DE94-006141] p 3899 N94-31847
TITANIUM OXIDES
Oxide pigments in water: The colloid-chemical point of view
[PB94-148616] p 3633 N94-31591
Processing and characterization of functionally gradient ceramic materials
[AD-A277154] p 3657 N94-32367
TITRATION
A fuzzy classifier system for process control p 3839 N94-32422
Isothermal sintering, microstructure, and superconducting properties of Y1Ba2Cu3O(7-x) compound
[DE94-008132] p 3905 N94-32779
TOKAMAK DEVICES
Operation of D3-D with all-graphite walls
[DE94-004858] p 3886 N94-31304
Noninductive current drive experiments on D3-D, and future plans
[DE94-007373] p 3886 N94-31324
L-H confinement mode dynamics in three-dimensional state space
[DE94-007113] p 3887 N94-31396
Structural design of the superconducting Poloidal Field coils for the Tokamak Physics Experiment
[DE94-007078] p 3887 N94-31406
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
Two-gigawatt burst-mode operation of the Intense Microwave Prototype (IMP) Free-Electron Laser (FEL) for the Microwave Tokamak Experiment (MTX)
[DE94-006613] p 3715 N94-31580
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
High beta tokamak research
[DE94-006513] p 3888 N94-31664
Quench detection and instrumentation for the Tokamak Physics Experiment magnets
[DE94-006656] p 3888 N94-31667
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765
Collisional and chaotic transport of energetic particles in toroidal plasma
[DE94-006504] p 3889 N94-31787
FWCD and ECCD experiments on D3-D
[DE94-007371] p 3890 N94-32201
Fusion applications of high power millimeter wave sources
[DE94-007374] p 3718 N94-32202
An edge density fluctuation diagnostic for D3-D using lithium beams
[DE94-008554] p 3890 N94-32519
Experimental survey of the L-H transition conditions in the D3-D tokamak
[DE94-007428] p 3891 N94-32595
Recent VH-mode results on D3-D
[DE94-007429] p 3891 N94-32611
Overview of H-mode studies in D3-D
[DE94-007430] p 3891 N94-32612
Characterization of atomic and molecular impurity sources and transport at the tokamak edge
[DE94-007212] p 3891 N94-32619
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
Cooperative program on D3-D (FY 1993)
[DE94-008343] p 3892 N94-32820
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics
[DE94-008279] p 3892 N94-32838
Stability of tearing modes in tokamak plasmas
[DE94-009205] p 3892 N94-32911
TOLERANCES (MECHANICS)
Assessment of impact damage in composite structures
[AD-A277063] p 3624 N94-32265
Tension fracture of laminates for transport fuselage. Part 1: Material screening p 3629 N94-33130
TOLUENE
Energy transfer properties and mechanisms
[DE94-007403] p 3636 N94-32594
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
TOMOGRAPHY
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565
Prediction of the plane wave beamformed acoustic arrival structure for the 1992 Barents Sea coastal tomography test
[AD-A276741] p 3788 N94-32181
Ocean optics, ocean imaging and optical tomography
[AD-A277010] p 3789 N94-32402
TOOLING
Analytical Design Package (ADP2): A computer aided engineering tool for aircraft transparency design p 3823 N94-32430
Innovative fabrication processing of advanced composite materials concepts for primary aircraft structures
[NASA-CR-189558] p 3626 N94-32877
TOPEX
Lessons learned from selecting and testing spaceflight potentiometers p 3607 N94-33318
TOPOGRAPHY
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus p 3776 N94-31106
Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110
Three dimensional vorticity field in the California current system
[AD-A276951] p 3788 N94-32220
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-environment module, volume 13
[AD-A276980] p 3589 N94-32319
Multi-scale studies of seafloor topography
[AD-A277008] p 3789 N94-32400
The use of ERS images for mapping p 3749 N94-32531
Use of SPOT and ERS-1 SAR data to study the tectonic and climatic history of arid regions p 3752 N94-32550
Monitoring landsurface characteristics in Niger using complementary SPOT and ERS-1 SAR data p 3754 N94-32560
Comparing SPOT and SIR A for mapping superficial formations in tropical forest regions: Example of the Yaoundy Region (Cameroon) p 3755 N94-32562

SAR interferometry with ERS-1 p 3755 N94-32566
Techniques and applications of SAR interferometry for ERS-1 p 3756 N94-32568
Developments in ERS-1 SAR interferometry: Use of the spectral shift p 3756 N94-32569
Differential interferometry study of an earthquake p 3756 N94-32570
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791
Quantitative modeling of bottom morphology and subbottom properties
[AD-A278142] p 3790 N94-33062
Fine and microstructure observations at Fieberlin g Guyot R/V new horizon cruise report
[AD-A277917] p 3791 N94-33109

TOPOLOGY
The small-scale topology of a 2:1 aspect-ratio elliptic jet p 3699 N94-31184
Strictly positive definite functions on spheres
[AD-A276471] p 3855 N94-31244
SU(2) WZNW model at higher genera from gauge field functional integral
[PB94-148467] p 3857 N94-31589
Heteroclinic attractors: Time averages and moduli of topological conjugacy
[W-9318] p 3844 N94-31690

TOROIDAL PLASMAS
Numerical method for the investigation of the magnetohydrodynamic stability of three dimensional plasma equilibria
[ETN-94-95752] p 3887 N94-31512
Toroidal pinch experiments
[DE94-005876] p 3887 N94-31558
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765
Collisional and chaotic transport of energetic particles in toroidal plasma
[DE94-008504] p 3889 N94-31787
Experimental survey of the L-H transition conditions in the D3-D tokamak
[DE94-007428] p 3891 N94-32595
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics
[DE94-008279] p 3892 N94-32838
Stability of tearing modes in tokamak plasmas
[DE94-009205] p 3892 N94-32911
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922

TORQUE
Flexible drive shaft coupling
[AD-D016096] p 3727 N94-32718
Torque-balanced extendable fiber optic cable
[AD-D016097] p 3882 N94-32719
Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A278133] p 3728 N94-33061
A comparison of the performance of solid and liquid lubricants in oscillating spacecraft ball bearings p 3606 N94-33311

TORQUE MOTORS
International Space Station Alpha's bearing, motor, and roll ring module developmental testing and results p 3603 N94-33295

TORSION
Flexible drive shaft coupling
[AD-D016096] p 3727 N94-32718
Technology integration box beam failure study p 3628 N94-33126

TOTAL QUALITY MANAGEMENT
Process mapping: A user-friendly tool for process improvement
[DE94-004357] p 3730 N94-31605
Application of Artificial Intelligence to the DoD Corporate Information Management (CIM) program
[AD-A276656] p 3834 N94-32061
CIM in space: Corporate Information Management (CIM) implications for space-based information systems
[AD-A276882] p 3600 N94-32126
Case studies of software process improvement methods
[AD-A277289] p 3818 N94-32508
Agile total quality guidelines for enhancing teamwork and success
[DE93-019972] p 3915 N94-32678
Total Quality Management implementation guidelines
[DE94-007232] p 3915 N94-32723

TOUGHNESS
Toughening mechanisms in the high strain rate deformation of rubber-modified polymer glasses p 3653 N94-31942
Toughening mechanisms in fiber-reinforced ceramic-matrix composites p 3622 N94-31943
Correlation of flux composition and inclusion characteristics with submerged arc weld metal properties in HY-100 steel
[AD-A277040] p 3726 N94-32261
The effect of ductile phase (Nb) reinforcement morphology on the mechanical behavior of an intermetallic matrix (MoSi2) p 3615 N94-32500

TOXIC HAZARDS
Applying robotics to HAZMAT p 3729 N94-32452
Controlling hazardous energy sources (lockout/tagout)
[NASA-TM-105290] p 3669 N94-32861

TOXICITY
Formation of gas-phase peroxides in a rural atmosphere: An interpretation of the recent SOS/SERON field results
[DE94-002995] p 3766 N94-32692

TRACE CONTAMINANTS
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657

TRACE ELEMENTS
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657
Surface fluxes of trace gases derived from convective-layer profiles p 3704 N94-31774
Development of sample charge compensation for characterization of impurities in semiconductor materials
[AD-A277113] p 3899 N94-31983

TRACERS
Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992
[AD-A277935] p 3791 N94-33245

TRACKING (POSITION)
Tracking roads in an aerial image by Kalman filtering
[TELECOM-93-D-007] p 3711 N94-31096
Study of a path planning and tracking system for an articulated mobile robot
[ISBN-0-315-86502-4] p 3831 N94-31800
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Automated detection of ship tracks in multispectral satellite data
[AD-A276697] p 3746 N94-32119
Fuzzy-neural control of an aircraft tracking camera platform p 3839 N94-32423

TRACKING FILTERS
Some neural computing approaches to target tracking p 3837 N94-33151

TRACKING PROBLEM
Feasibility and stability results for constrained stable generalized predictive control
[MATHS-REPT-A-203] p 3828 N94-31158
Strategy for tracking and grabbing a moving object with the aid of a decouplable manipulator with six degrees of freedom general architecture, guided by a vision system
[ISBN-0-315-86864-3] p 3831 N94-31757
The application of a radial basis function neural network for radar tracking over the sea p 3686 N94-33150
Some neural computing approaches to target tracking p 3837 N94-33151

TRAILERS
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322

TRAINING ANALYSIS
The effects of Above Real-Time Training (ARTT) in an F-16 simulator p 3591 N94-32474

TRAINING DEVICES
Modular Simulator System (MSS) management guide
[AD-A277098] p 3588 N94-32014
Modular Simulator System (MSS). Executive report
[AD-A276966] p 3588 N94-32241
Modular Simulator System (MSS). System/segment specification for the generic MSS-system integration, volume 1
[AD-A276968] p 3588 N94-32312
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-flight station module, volume 2
[AD-A276969] p 3588 N94-32313
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-radar module, volume 8
[AD-A276975] p 3589 N94-32314
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-electronic warfare module, volume 9
[AD-A276976] p 3589 N94-32315
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-physical cues module, volume 10
[AD-A276977] p 3589 N94-32316
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-visual module, volume 11
[AD-A276978] p 3589 N94-32317
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-instructor/operator station module, volume 12
[AD-A276979] p 3589 N94-32318
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-environment module, volume 13
[AD-A276980] p 3589 N94-32319
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-flight controls module, volume 3
[AD-A276970] p 3590 N94-32395
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-flight dynamics module, volume 4
[AD-A276971] p 3590 N94-32396
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-propulsion module propulsion module, volume 5
[AD-A276972] p 3590 N94-32397
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-navigation/communication module, volume 6
[AD-A276973] p 3590 N94-32398
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-weapons module, volume 7
[AD-A276974] p 3590 N94-32399
Modular Simulator System (MSS): Interface design document for the generic MSS
[AD-A277270] p 3590 N94-32403
A systems approach to computer-based training p 3823 N94-32436
An evaluation framework for designing a night vision, computer-based trainer
[AD-A278005] p 3590 N94-33139

TRAINING EVALUATION
Aircraft simulation and pilot proficiency: From surrogate flying towards effective training
[AD-B179300] p 3587 N94-31179

TRAINING SIMULATORS
Aircraft simulation and pilot proficiency: From surrogate flying towards effective training
[AD-B179300] p 3587 N94-31179

TRAJECTORIES
Visual processing of object velocity and acceleration
[AD-A277425] p 3801 N94-32998

TRAJECTORY ANALYSIS
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems
[DE94-007250] p 3609 N94-31382
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346

TRAJECTORY CONTROL
ControlShell: A real-time software framework
[AD-A276481] p 3811 N94-31475
Trajectory learning with a direct drive robotic manipulator p 3831 N94-31794
Adaptive control of a robot in Cartesian coordinates: Analysis and implementation
[ISBN-0-315-86493-1] p 3831 N94-31798
On-line physical parameter identification and adaptive control of a launch vehicle p 3602 N94-31891
High-speed path constrained manipulator operation using optimal-feedback combined controller p 3833 N94-31962
Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369

TRAJECTORY PLANNING
ControlShell: A real-time software framework
[AD-A276481] p 3811 N94-31475
Abstracts of the Workshop on Computational Geometry (CG 1992)
[PB94-147022] p 3844 N94-31684
Penetration distances and their applications to path planning p 3858 N94-31725
Strategy for tracking and grabbing a moving object with the aid of a decouplable manipulator with six degrees of freedom general architecture, guided by a vision system
[ISBN-0-315-86864-3] p 3831 N94-31757
Study of a path planning and tracking system for an articulated mobile robot
[ISBN-0-315-86502-4] p 3831 N94-31800
Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369
A six degree of freedom, plume-fuel optimal trajectory planner for spacecraft proximity operations using an A* node search
[NASA-CR-188285] p 3601 N94-32388

TRANSATMOSPHERIC VEHICLES
The National Aerospace Plane (NASP): Development issues for the follow-on vehicle
[AD-A278417] p 3581 N94-33329
TRANSDUCERS
Errors associated with the use of heat flow transducers p 3796 N94-31742
Universal signal conditioning amplifier p 3699 N94-32460
The constant current loop: A new paradigm for resistance signal conditioning p 3685 N94-32461
Acoustic window
[AD-D016171] p 3862 N94-33017
TRANSFER FUNCTIONS
Structural properties of inverse linear systems
[MATHS-REPT-A-200] p 3840 N94-31156
Observations of the notion of minimality in the generalized state space
[MATHS-REPT-A-207] p 3840 N94-31162
Analysis and synthesis of MOS translinear circuits
[ISBN-9-09-005495-2] p 3690 N94-31616
Performance statistics bulletin. High latitude meteor scatter propagation October, November, December 1991, January 1992
[AD-A276724] p 3678 N94-32159
Performance statistics bulletin. High latitude meteor scatter propagation, June, July, August, September 1992
[AD-A277508] p 3685 N94-33347
TRANSFORMATIONS (MATHEMATICS)
Application of radon transformation for improved analysis of sparsely sampled data: A feasibility study
[PB94-147535] p 3741 N94-31075
Structural properties of inverse linear systems
[MATHS-REPT-A-200] p 3840 N94-31156
An algebraic view on Rosetta
[CL-93-02] p 3841 N94-31391
Minimization of computational requirements in the hybrid stress finite element method
[AD-A277120] p 3846 N94-32048
Modeling and control of nonlinear systems
[AD-A277377] p 3834 N94-32095
Transformational derivation of (parallel) programs using skeletons
[TR-93-20] p 3825 N94-32196
Steepest descent paths for integrals defining the modified Bessel functions of imaginary order
[CWI-AM-R9303] p 3848 N94-32227
TRANSFORMERS
High-temperature superconducting transformer performance, cost, and market evaluation
[DE94-005494] p 3687 N94-31152
TRANSIENT OSCILLATIONS
Advanced CFD methodology for fast transients encountered in nonlinear combustion instability problems. Volume 1: Theory and validation
[NASA-CR-191351] p 3637 N94-32696
TRANSIENT RESPONSE
Study of wave propagation and dynamic response of laminated composite structures
[AD-A276123] p 3619 N94-31444
TRANSISTOR CIRCUITS
Analysis and synthesis of MOS translinear circuits
[ISBN-9-09-005495-2] p 3690 N94-31616
TRANSISTOR LOGIC
Novel failure analysis techniques using photon probing with a scanning optical microscope
[DE94-006594] p 3692 N94-32112
TRANSISTORS
GaAs/GaN strained layer superlattice materials for high temperature transistors, phase 1
[AD-A276115] p 3897 N94-31528
Analysis and synthesis of MOS translinear circuits
[ISBN-9-09-005495-2] p 3690 N94-31616
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928
Application of the modified voltage-dividing potentiometer to overlay metrology in a CMOS/bulk process
[DE94-007937] p 3695 N94-32700
TRANSITION FLOW
Analysis of the photodiode boundary layer transition indicator
[DE94-005311] p 3701 N94-31268
TRANSITION METALS
A polynomial representation of the valence orbital ionization potentials
[USIP-93-06] p 3640 N94-31083
Combinatorial ion sensors
[AD-A276567] p 3825 N94-32032
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
Experimental investigations and molecular dynamics simulations of radiation induced surface damage
[AD-A277323] p 3871 N94-32621
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
TRANSITION TEMPERATURE
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916
Short coherence length superconductors: Intermediate regime between BCS and bosons
[DE94-007694] p 3904 N94-32645
A quest for a new superconducting state
[DE94-008439] p 3908 N94-32991
TRANSLATING
Combinatory reduction systems: Introduction and survey
[CWI-CS-R9362] p 3849 N94-32349
Automatic translation among spoken languages p 3685 N94-32437
Translating an AI application from Lisp to Ada: A case study
[NASA-TM-103845] p 3820 N94-32906
Energy absorber for the CETA p 3604 N94-33303
TRANSLATIONAL MOTION
A paraperspective factorization method for shape and motion recovery
[AD-A276513] p 3712 N94-31929
Vibration localization in dual-span axially moving elastic systems p 3736 N94-31964
TRANSMISSION ELECTRON MICROSCOPY
Incoherent imaging by Z-contrast stem: Towards 1 Angstrom resolution
[DE94-006551] p 3896 N94-31489
Engineering of damage in ion implanted silicon
[ISBN-9-09-005097-3] p 3897 N94-31521
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
Gettering of metal impurities by cavities in silicon
[DE94-005248] p 3645 N94-32672
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition
[DE94-007295] p 3661 N94-32796
TRANSMISSION LINES
Studies of an optical multi-processor interconnect
[AD-A277093] p 3881 N94-32392
Torque-balanced extendable fiber optic cable
[AD-D016097] p 3882 N94-32719
TRANSMISSION LOSS
Optimal reactive power dispatch of power systems using nonlinear programming
[MATHS-REPT-A-209] p 3808 N94-31164
Low altitude near-the-horizon propagation: A comparison between RPO and M-layer
[AD-A277358] p 3679 N94-32282
TRANSMISSIONS (MACHINE ELEMENTS)
Spur, helical, and spiral bevel transmission life modeling
[NASA-TM-106552] p 3728 N94-32979
TRANSMISSIVITY
Development of a statistical method for estimating the downward longwave radiation at the surface from satellite observations p 3742 N94-31553
TRANSMITTANCE
Degradation of optical components in space p 3594 N94-31029
Fast acting optical deflection
[AD-A276630] p 3879 N94-32037
TRANSMITTER RECEIVERS
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330
Analysis and design of a high speed, wide range stepwise tunable optical filter/amplifier
[PB94-149572] p 3698 N94-33169
High temperature superconducting Josephson junction array systems, phase 1
[AD-A277937] p 3908 N94-33246
TRANSMITTERS
Multicast communication with guaranteed quality of service
[AD-A277650] p 3682 N94-33025
TRANSMUTATION
The influence of transmutation, void swelling, and flux/spectra uncertainties on the electrical properties of copper and copper alloys
[DE94-006213] p 3641 N94-31626
TRANSONIC FLOW
Prediction of transonic potential flow with slipstreams around configurations
[FFA-TN-1992-15] p 3568 N94-31220
Numerical simulation of combined external/internal transonic flow on the forebody/inlet of the AV-8B Harrier 2 p 3569 N94-31759
An adaptive method for the exact resolution of shock waves and contact discontinuities
[ISBN-0-315-86498-2] p 3704 N94-31799
Numerical analysis of transonic wing buffet p 3586 N94-32713
A finite-difference approximate-factorization algorithm for solution of the unsteady transonic small-disturbance equation
[NASA-TP-3129] p 3572 N94-32865
TRANSONIC FLUTTER
Numerical analysis of transonic wing buffet p 3586 N94-32713
TRANSONIC WIND TUNNELS
Results for the hybrid laminar flow control experiment conducted in the NASA Langley 8-foot transonic pressure tunnel on a 7-foot chord model
[NASA-TM-107582] p 3601 N94-32870
TRANSPIRATION
A long-term simulation of surface fluxes and soil moisture
[DE94-006661] p 3774 N94-32772
TRANSPORT AIRCRAFT
CFD-based drag prediction: State-of-the-art, theory, prospects
[AD-B179297] p 3567 N94-31180
Airborne Trailblazer: Two decades with NASA Langley's 737 flying laboratory
[NASA-SP-4216] p 3566 N94-32793
Application of a design-build-team approach to low cost and weight composite fuselage structure
[NASA-CR-4418] p 3626 N94-32863
Designer's unified cost model p 3627 N94-33122
COINS: A composites information database system p 3627 N94-33123
Composite fuselage shell structures research at NASA Langley Research Center p 3628 N94-33124
Structural testing of the technology integration box beam p 3628 N94-33125
Local design optimization for composite transport fuselage crown panels p 3629 N94-33132
Recent progress in NASA Langley Research Center textile reinforced composites program p 3629 N94-33134
TRANSPORT PROPERTIES
Studying transient mobility and energy loss using scanning tunneling microscopy
[AD-A276292] p 3877 N94-31256
Transport properties of quark and gluon plasmas
[DE94-007043] p 3864 N94-31405
Compressible convection with ionization p 3911 N94-31498
Adjacent-cell Preconditioners for solving optically thick neutron transport problems
[DE94-007219] p 3872 N94-32666
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922
CET93 and CETPC: An interim updated version of the NASA Lewis computer program for calculating complex chemical equilibria with applications
[NASA-TM-4557] p 3638 N94-32948
Computed potential energy surfaces for chemical reactions
[NASA-CR-195835] p 3639 N94-33036
Transport and diffusion in turbulent fields modeling and measurements techniques
[AD-A278114] p 3769 N94-33110
TRANSPORT THEORY
Transport suppression by shear flow generation in multihelicity resistive-g turbulence
[DE94-007108] p 3886 N94-31366
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Non-equilibrium electrodynamics in the large N expansion
[DE94-006156] p 3911 N94-31760
Parallel Monte Carlo reactor neutronics
[DE94-007642] p 3826 N94-32357
Monoenergetic neutral particle transport in semi-infinite media
[AD-A277155] p 3870 N94-32368
Numerical transport theory
[DE94-009064] p 3857 N94-32589
Characterization of atomic and molecular impurity sources and transport at the tokamak edge
[DE94-007212] p 3891 N94-32619
Adjacent-cell Preconditioners for solving optically thick neutron transport problems
[DE94-007219] p 3872 N94-32666
Analytic formulation for the ac electrical conductivity in two-temperature, strongly coupled, overdense plasma: FORTRAN subroutine
[DE94-009466] p 3893 N94-32915
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922
TRANSPORTATION
Review and status of Maglev in the United States
[DE94-006832] p 3722 N94-31319

Sandia technology engineering and science accomplishments
[DE94-008312] p 3668 N94-32412

TRANSVERSE LOADS
On the constitutive response of transversely loaded fiber composites with compliant interphases
p 3619 N94-31555

TRANSVERSE OSCILLATION
Study of wave propagation and dynamic response of laminated composite structures
[AD-A276123] p 3619 N94-31444
Transverse mode analysis of hole-coupled free-electron lasers
[ETN-94-96019] p 3715 N94-31532
Vibration localization in dual-span axially moving elastic systems p 3736 N94-31964

TRAPEZOIDS
Transformational derivation of (parallel) programs using skeletons
[TR-93-20] p 3825 N94-32196

TRAPPED PARTICLES
Collisional and chaotic transport of energetic particles in toroidal plasma
[DE94-006504] p 3889 N94-31787

TRAPPING
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360

TRAVELING SALESMAN PROBLEM
The ant system: An autocatalytic optimizing process
[REPT-91-016-REV] p 3824 N94-31177
A worst-case analysis of two approximate algorithms for the symmetric travelling salesman problem
[REPT-93-036] p 3840 N94-31187
Simple Patch: A new heuristic for the product traveling salesman problem
[REPT-93-85] p 3845 N94-31702

TRAVELING WAVES
Observation of the traveling component of an x ray standing wave field
[DE94-007671] p 3672 N94-31317

TREES (MATHEMATICS)
Symplectic Runge-Kutta schemes 3: Canonical elementary differentials
[MATHS-REPT-A-204] p 3840 N94-31159
Symbolic derivation of Runge-Kutta methods
[MATHS-REPT-A-205] p 3840 N94-31160
A worst-case analysis of two approximate algorithms for the symmetric travelling salesman problem
[REPT-93-036] p 3840 N94-31187
A worst-case analysis of an approximate algorithm for finding the minimum hamiltonian cycle on paths
[REPT-93-042] p 3809 N94-31192

TRIANGLES
A survey of numerical cubature over triangles
[DE94-006810] p 3841 N94-31274

TRIANGULATION
Abstracts of the Workshop on Computational Geometry (CG 1992)
[PB94-147022] p 3844 N94-31684
Selection of climate station data using clustering and triangulated irregular network techniques
[AD-A276656] p 3784 N94-32046
Incremental triangulation by way of edge swapping and local optimization
[NASA-TM-103979] p 3709 N94-32946

TRIBOLOGY
Cracking induced in small fretting: Application to the case of aeronautical aluminum alloys
[ECL-92-50] p 3735 N94-31870
New micro- and macroscopic models of contact and friction
[AD-A277240] p 3726 N94-32320
Lubrication with binary mixtures: Liquid-liquid emulsion in elastohydrodynamics and metal forming
p 3658 N94-32490
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941
A comparison of the performance of solid and liquid lubricants in oscillating spacecraft ball bearings
p 3606 N94-33311
Development of long-life, low-noise linear bearings for atmospheric interferometry p 3606 N94-33312
The preliminary evaluation of liquid lubricants for space applications by vacuum tribometry p 3606 N94-33313

TRIODES
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928

TRITON
One: Microphysics of frost metamorphism: Applications to Triton and Mars. Two: A global analysis of the ozone deficit in the upper stratosphere and lower mesosphere. Three: The diabatic circulation in the stratosphere as diagnosed from Microwave Limb Sounder data
p 3942 N94-31975
Distribution and nature of UV absorbers on Triton's surface
[NASA-CR-195886] p 3943 N94-33104

TROPICAL METEOROLOGY
The use of meteorological satellite data for studying tropical atmospheric phenomena p 3779 N94-31000
Air-sea interaction patterns in the equatorial Pacific
[AD-A277305] p 3788 N94-32072
Tropical cyclone forecasters reference guide. 5: Numerical track forecast guidance
[AD-A277318] p 3785 N94-32278
TRMM-related research: Tropical rainfall and energy analysis experiment
[NASA-CR-195834] p 3787 N94-33288

TROPICAL REGIONS
Subtropical Climates and Their Evolution: From Space-Based Observation to Modelling
[ISBN-2-85-428333-3] p 3776 N94-30981
Dynamics in the tropics and synoptic disturbances
p 3778 N94-30990
Low frequency variability observed in the tropical Atlantic Ocean p 3778 N94-30991
Tropical squall lines p 3778 N94-30992
Effects of the deep tropical convection in the large scale atmospheric flow p 3778 N94-30994
Behavior and dynamics of tropical forests and savannas p 3757 N94-31004
The ozone and the physico-chemical processes in tropical regions p 3770 N94-31010
The effect of westerly wind bursts on a tropical ocean general circulation model
[AD-A276423] p 3788 N94-31448
Use of SPOT and ERS-1 to map tropical vegetation and mangrove dynamics in Guiana p 3753 N94-32555
A case study comparing multi-temporal ERS-1 SAR data and SPOT data for tropical forest mapping
p 3753 N94-32556
Comparing SPOT and SIR A for mapping superficial formations in tropical forest regions: Example of the Yaoundy Region (Cameroon) p 3755 N94-32562

TROPICAL STORMS
Short term teleconnections associated with an individual tropical cyclone
[AD-A277210] p 3783 N94-32019
Tropical cyclone forecasters reference guide. 5: Numerical track forecast guidance
[AD-A277318] p 3785 N94-32278
Forecasters handbook for the Philippine Islands and surrounding waters
[AD-A277993] p 3787 N94-33089

TROPOSPHERE
The ozone and the physico-chemical processes in tropical regions p 3770 N94-31010
Quantified estimates of total GWPs for greenhouse gases taking into account tropospheric chemistry
[DE94-007846] p 3768 N94-32817
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894

TRUSSES
Real-time control of the Trussarm variable-geometry-truss manipulator utilizing machine vision
[ISBN-0-315-87054-0] p 3830 N94-31735
A real-time computer control and trajectory generation environment for Trussarm
[ISBN-0-315-87060-5] p 3832 N94-31833
Dynamic error compensation in robotic trusses
p 3738 N94-32486

TUNABLE LASERS
Ionization probes of molecular structure and chemistry
[DE94-007605] p 3872 N94-32643
A reliable low-maintenance flashlamp-pumped Ti:sapphire laser operating at 120 PPS
[DE94-009030] p 3721 N94-32848
Multifrequency, rapidly sequenced or simultaneous tunable laser
[AD-D016169] p 3721 N94-32968

TUNGSTEN
Chemical vapour deposition of tungsten for the application in integrated circuits
[ISBN-9-09-005151-1] p 3641 N94-31519
High temperature materials technology research for advanced thermionic systems
[DE94-008444] p 3644 N94-32416

TUNGSTEN COMPOUNDS
Laser flash photolysis, EPR and Raman studies of liquids at elevated pressures
[DE94-008351] p 3718 N94-32413

TUNISIA
The use of SPOT, and the contribution of ERS-1, in the assessment of urban pressure on agriculture land in Greater Tunis (Tunisia) p 3749 N94-32534

TUNNEL JUNCTIONS
High T(sub c) superconductor tunnel junctions for photon detectors
[DE94-007686] p 3904 N94-32602

TUNNELS
Proceedings of the 4th Tunnel Detection Symposium on Subsurface Exploration Technology
[AD-A276372] p 3771 N94-31369

TURBINE BLADES
Computational study of simultaneous heat and mass transfer in turbulent separated flows
p 3704 N94-31843

TURBINE PUMPS
The 7.5K lbf thrust engine preliminary design for Orbit Transfer Vehicle
[NASA-CR-189175] p 3614 N94-31618
Solution of the average-passage equations for the incompressible flow through multiple-blade-row turbomachinery
[AD-A276515] p 3583 N94-31931
Design of a cold-flow test facility for the high pressure fuel turbopump turbine of the Space Shuttle main engine
[AD-A276743] p 3615 N94-32182

TURBOCOMPRESSORS
Inlet distortion in engines on VSTOL aircraft
[NASA-CR-195841] p 3584 N94-33035

TURBOFAN ENGINES
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026
Analysis of intermediate level maintenance following F404-GE-400 engine component life reductions
[AD-A277918] p 3585 N94-33283

TURBOMACHINE BLADES
Computational prediction of stall flutter in spanwise-finite blade cascades p 3584 N94-31967
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042

TURBOMACHINERY
A solution adaptive structured-unstructured grid procedure for unsteady flows p 3700 N94-31217
Solution of the average-passage equations for the incompressible flow through multiple-blade-row turbomachinery
[AD-A276515] p 3583 N94-31931
Incorporating radial mixing in axisymmetric streamline curvature through-flow analysis
[AD-A277325] p 3706 N94-32279

TURBULENCE
Rotational effects in turbulence driven by convection
p 3930 N94-31131
A priori tests of large eddy simulation of the compressible plane mixing layer
[MEMO-1152] p 3699 N94-31185
Response of wall turbulence to high frequency streamwise and spanwise oscillations
p 3700 N94-31211
Turbulence structure of a premixed flame in a coaxial free air jet in the presence or absence of a base flow
[ISBN-0-315-78739-2] p 3633 N94-31471
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476
Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042
A non-local model for prediction of the probability density function of turbulent fluctuations in boundary-layer flows
p 3706 N94-32076
Effects of buoyancy on fluid flows and turbulence
[AD-A276586] p 3706 N94-32123
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Transport and diffusion in turbulent fields modeling and measurements techniques
[AD-A278114] p 3769 N94-33110
The structure of high Reynolds number turbulent boundary layers, part A
[AD-A278392] p 3710 N94-33162
Scalar imaging velocimetry studies of turbulent flow structure and dynamics
[AD-A278395] p 3710 N94-33164

TURBULENCE EFFECTS
Phase-only correction of scintillated laser beams: Downrange experimental results
[AD-A277778] p 3722 N94-33282

TURBULENCE MODELS
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Additive turbulent decomposition of the incompressible and compressible Navier-Stokes equations
[AD-A277321] p 3708 N94-32511
Performance of a new wind updating system for a prognostic meteorological model in the environs of Mexico City
[DE94-006243] p 3786 N94-32937
Modification of the MML turbulence model for adverse pressure gradient flows
[NASA-TM-106544] p 3709 N94-32947
Use of Navier-Stokes methods for the calculation of high-speed nozzle flow fields
[NASA-TM-106551] p 3573 N94-32984
Renormalization group theory of Bolgiano scaling in Boussinesq turbulence
[NASA-TM-106602] p 3710 N94-33070
TURBULENT BOUNDARY LAYER
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879
A non-local model for prediction of the probability density function of turbulent fluctuations in boundary-layer flows p 3706 N94-32076
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Flight test results of riblets at supersonic speeds
[NASA-TM-4387] p 3572 N94-32880
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU finite volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926
Modification of the MML turbulence model for adverse pressure gradient flows
[NASA-TM-106544] p 3709 N94-32947
The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111
The structure of high Reynolds number turbulent boundary layers, part A
[AD-A278392] p 3710 N94-33162
TURBULENT DIFFUSION
Incorporating radial mixing in axisymmetric streamline curvature through-flow analysis
[AD-A277325] p 3706 N94-32279
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652
TURBULENT FLOW
Convective solar nebula p 3930 N94-31130
The small-scale topology of a 2:1 aspect-ratio elliptic jet p 3699 N94-31184
Response of wall turbulence to high frequency streamwise and spanwise oscillations p 3700 N94-31211
Research in marine boundary layer intermittency
[AD-A276076] p 3701 N94-31460
Mixture model simulating reactive turbulent flows: Testing of Eulerian-Lagrangian probabilistic models
[ONERA-NT-1993-13] p 3702 N94-31477
Finite volume discretization of the k-epsilon turbulence model in general coordinates
[REPT-93-90] p 3703 N94-31703
Finite element numerical simulation of turbulent flows
[ISBN-0-315-86416-8] p 3703 N94-31717
Numerical modelling of turbulence
[ISBN-0-315-86439-7] p 3703 N94-31720
Computational study of simultaneous heat and mass transfer in turbulent separated flows p 3704 N94-31843
Multigrid diagonal implicit solutions for compressible turbulent flows and their evaluation p 3705 N94-31941
NATO Advanced Study Institute on Unsteady Combustion. Volume 2: Research papers, September 6-17, 1993
[AD-A276572] p 3634 N94-32033
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042
A non-local model for prediction of the probability density function of turbulent fluctuations in boundary-layer flows p 3706 N94-32076
Effects of buoyancy on fluid flows and turbulence
[AD-A276586] p 3706 N94-32123
Wavevector-frequency analysis with applications to acoustics
[AD-A276618] p 3861 N94-32125
Aerodynamic drag of droplets in turbulent flow fields
[ISBN-0-315-75827-9] p 3571 N94-32491
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Additive turbulent decomposition of the incompressible and compressible Navier-Stokes equations
[AD-A277321] p 3708 N94-32511
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652
Numerical analysis of transonic wing buffet p 3586 N94-32713
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU finite volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071
Scalar imaging velocimetry studies of turbulent flow structure and dynamics
[AD-A278395] p 3710 N94-33164
Turbulent reacting flows and supersonic combustion
[AD-A277462] p 3639 N94-33242
TURBULENT HEAT TRANSFER
Mixture model simulating reactive turbulent flows: Testing of Eulerian-Lagrangian probabilistic models
[ONERA-NT-1993-13] p 3702 N94-31477
TURBULENT MIXING
A priori tests of large eddy simulation of the compressible plane mixing layer
[MEMO-1152] p 3699 N94-31185
Laser-induced fluorescence/particle tracking system for stratified flow research
[AD-A275917] p 3701 N94-31341
Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988
Use of Navier-Stokes methods for the calculation of high-speed nozzle flow fields
[NASA-TM-106551] p 3573 N94-32984
Turbulent reacting flows and supersonic combustion
[AD-A277462] p 3639 N94-33242
Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992
[AD-A277935] p 3791 N94-33245
TURING MACHINES
A finite state machine model for object oriented systems
[REPT-93-040] p 3809 N94-31212
TVD SCHEMES
Viscous limiter functions for model convection-diffusion equations
[CRANFIELD-AERO-9103] p 3702 N94-31559
TWINNING
Effect of twin boundary density on the vortex melting transition in YBa2Cu3O(7-delta) single crystals
[DE94-007684] p 3904 N94-32601
TWO DIMENSIONAL FLOW
A solution adaptive structured-unstructured grid procedure for unsteady flows p 3700 N94-31217
A fully two-dimensional, non-oscillatory advection scheme for momentum and scalar transport equations
[DM-66] p 3700 N94-31221
Multigrid diagonal implicit solutions for compressible turbulent flows and their evaluation p 3705 N94-31941
On an adaptation method for dense, 2D, C-type grids
[W-9321] p 3706 N94-32045
Surface boundary conditions and related technical issues concerning Burnett equations for 2-D hypersonic flow
[AD-A277322] p 3706 N94-32256
TWO DIMENSIONAL MODELS
A fully two-dimensional, non-oscillatory advection scheme for momentum and scalar transport equations
[DM-66] p 3700 N94-31221
Multidimensional WAF-type schemes for model conservation laws
[CRANFIELD-AERO-9312] p 3843 N94-31541
Qualitative properties of two-dimensional predator-prey systems
[REPT-93-75] p 3844 N94-31644
A predator-prey model with Ivlev's functional response
[REPT-93-79] p 3844 N94-31696
Perturbative aspects of lower-dimensional gauge theories
[ISBN-0-315-86269-6] p 3911 N94-31712
On an adaptation method for 2-dimensional C-type grids
[W-9322] p 3569 N94-31822
The 2D deterministic radiation transport with the discontinuous finite element method
[DE94-004687] p 3849 N94-32670
TYPHOONS
Recurvature dynamics of a typhoon
[AD-A276792] p 3784 N94-32164
Typhoon havens handbook for the western Pacific and Indian Oceans, change 3
[AD-A277030] p 3784 N94-32260
Forecasters handbook for the Philippine Islands and surrounding waters
[AD-A277993] p 3787 N94-33089

U

U.S.S.R.
Station climatic summaries: China, the former USSR, and Mongolia
[AD-A276548] p 3784 N94-32057
Information systems to enhance technology exchange
[DE94-007744] p 3920 N94-32808
UH-60A HELICOPTER
A critical assessment of UH-60 main rotor blade airfoil data
[NASA-TM-103985] p 3571 N94-32063
ULTRAHIGH FREQUENCIES
A multichannel architecture for Naval Task Force Communication
[AD-A276230] p 3673 N94-31446
System analysis of ultra-wideband instrumentation radars: Impulse versus stepped-chirp approaches
[AD-A276624] p 3677 N94-32087
Millstone Hill radar studies of plasma waves and turbulence
[AD-A278409] p 3684 N94-33172
ULTRASHORT PULSED LASERS
Study of the dynamics of a nonlinear coupled-cavity laser system
[ISBN-0-315-86717-5] p 3716 N94-31748
ULTRASONIC AGITATION
Novel ultrasonic method for food hydration
[AD-A277411] p 3804 N94-32580
ULTRASONIC FLAW DETECTION
Evaluating in-plane elastic constants of damaged carbon-epoxy laminates using a quantitative ultrasonic technique p 3621 N94-31793
Ultrasonic characterization of damage in a simulated CF-18 composite structure
[DREP-LN-93-26] p 3730 N94-31872
ULTRASONIC RADIATION
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 2
[AD-A276629] p 3861 N94-32059
ULTRASONIC SCANNERS
Ultrasonic characterization of damage in a simulated CF-18 composite structure
[DREP-LN-93-26] p 3730 N94-31872
A versatile nondestructive evaluation imaging workstation p 3732 N94-32458
ULTRASONIC TESTS
Computerized Ultrasonic Testing System (CUTS) for in-process thickness determination p 3862 N94-32456
Differential phase acoustic microscope for micro-NDE
[NASA-CR-189617] p 3731 N94-32481
PSIDD: A Post-Scan Interactive Data Display system for ultrasonic scans
[NASA-TM-4545] p 3732 N94-33038
ULTRASONIC WAVE TRANSDUCERS
Fiber optic sensors for the detection of surface acoustic waves on metals
[ISBN-0-315-87055-9] p 3878 N94-31736
ULTRASONICS
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 1
[AD-A276211] p 3859 N94-31060
Ultrasonic tomography in fiber-reinforced composite materials p 3620 N94-31565
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 2
[AD-A276629] p 3861 N94-32059
Novel ultrasonic method for food hydration
[AD-A277411] p 3804 N94-32580
ULTRAVIOLET ABSORPTION
Laser and Fourier transform spectroscopy of novel propellant molecules
[AD-A277506] p 3667 N94-33013
Distribution and nature of UV absorbers on Triton's surface
[NASA-CR-195886] p 3943 N94-33104
ULTRAVIOLET ASTRONOMY
Extreme ultraviolet opacity sources in the DA white dwarf G191-B2B p 3924 N94-31210
ULTRAVIOLET EMISSION
Laser and Fourier transform spectroscopy of novel propellant molecules
[AD-A277506] p 3667 N94-33013

ULTRAVIOLET LASERS
Ti:sapphire based ultrafast pump-probe laser source in the violet and ultraviolet
[DE94-007542] p 3718 N94-32270
ULTRAVIOLET RADIATION
Model of spacecraft atomic oxygen and solar exposure microenvironments p 3593 N94-31021
Fluorescence observations of LDEF exposed materials as an indicator of induced material reactions p 3593 N94-31025
Laser-induced fluorescence of space-exposed polyurethane p 3593 N94-31026
ULTRAVIOLET SPECTRA
Disk instability and the spectral evolution of the 1992 outburst of the intermediate polar GK Persei p 3928 N94-31123
The 4f heavy fermion photoelectron spectra do not exhibit the Kondo scale
[DE94-006252] p 3898 N94-31631
An analysis of ionospheric dayglow from observations of the Naval Postgraduate School Middle Ultraviolet Spectrograph (MUSTANG)
[AD-A277351] p 3773 N94-32335
Distribution and nature of UV absorbers on Triton's surface
[NASA-CR-195886] p 3943 N94-33104
How well was total ozone abundance inferred with Mariner 9 p 3947 N94-33212
ULTRAVIOLET SPECTROSCOPY
An analysis of ionospheric dayglow from observations of the Naval Postgraduate School Middle Ultraviolet Spectrograph (MUSTANG)
[AD-A277351] p 3773 N94-32335
Fiber optic chemical sensors
[AD-A277128] p 3881 N94-32380
UNDERGROUND STRUCTURES
Proceedings of the 4th Tunnel Detection Symposium on Subsurface Exploration Technology
[AD-A276372] p 3771 N94-31369
UNDERWATER ACOUSTICS
Ocean acoustic propagation measurements and wave propagation in random media
[AD-A276165] p 3787 N94-31053
Vibrational and acoustic response of ribbed plates p 3736 N94-31955
Surface forward-scattered acoustic measurements and analysis
[AD-A276998] p 3788 N94-32000
Sound scattering by cylinders of noncircular cross section
[AD-A276663] p 3861 N94-32089
Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise)
[AD-A277009] p 3789 N94-32401
Acoustic window
[AD-D016171] p 3862 N94-33017
Statistical characteristics of bistatic surface scatter and mean bistatic surface scattering strengths
[AD-A278155] p 3862 N94-33096
UNDERWATER EXPLOSIONS
A study of near-surface and underwater explosions by computer simulations
[DE94-009038] p 3708 N94-32849
UNDERWATER OPTICS
Ocean optics, ocean imaging and optical tomography
[AD-A277010] p 3789 N94-32402
UNDERWATER PHYSIOLOGY
Proceedings of the DCIEM Diver Thermal Protection Workshop
[DCIEM-92-10] p 3795 N94-31738
UNIFORM FLOW
Hypervelocity Tunnel 9 Mach 10/14 Calibration
[AD-A275960] p 3587 N94-31318
UNIQUENESS
Qualitative properties of two-dimensional predator-prey systems
[REPT-93-75] p 3844 N94-31644
UNIQUENESS THEOREM
A predator-prey model with Iviev's functional response
[REPT-93-79] p 3844 N94-31696
UNITED KINGDOM
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 25: The technical communications practices of British aerospace engineers and scientists: Results of the phase 4 RAeS mail survey
[NASA-TM-109098] p 3922 N94-32836
UNITED STATES
Review and status of Maglev in the United States
[DE94-006832] p 3722 N94-31319
Aeronautics and space report of the President: Fiscal year 1993 activities p 3966 N94-32854
UNIVERSE
Testing for preferred-frame effects in gravity with artificial Earth satellites
[PB94-148459] p 3610 N94-31771
UNIVERSITIES
ISU in an era of partial reconvergence --- International Space University p 3600 N94-31438

[NASA-TM-108814] p 3575 N94-32927
UNIVERSITY PROGRAM
Welcome to the Ohio Aerospace Institute
[NASA-TM-109756] p 3913 N94-31815
UNIX (OPERATING SYSTEM)
Extender's guide for artifacts and drafts
[AD-A276344] p 3810 N94-31328
An MS-DOS file system for UNIX
[AD-A276523] p 3816 N94-32081
Moving BASISplus and TECHLIBplus from VAX/VMS to UNIX
[DE94-004696] p 3826 N94-32248
Use and administration of UNIX (tm) systems p 3821 N94-33051
UNSTEADY AERODYNAMICS
An adaptive finite element method for unsteady compressible rotor airfoil aerodynamics p 3567 N94-31204
Aeroelastic vibrations of lifting surfaces
[ECL-91-01] p 3585 N94-31677
Experimental and computational studies on propeller noise due to inflow distortion p 3860 N94-31846
Computational prediction of stall flutter in spanwise-finite blade cascades p 3584 N94-31967
Numerical analysis of transonic wing buffet p 3586 N94-32713
Study of dynamic stall phenomenon and its control using vorticity, stream function and circulation form of the unsteady Navier-Stokes equations p 3572 N94-32714
In flight measurement of steady and unsteady blade surface pressure of a single rotation large scale advanced prop-fan installed on the PTA aircraft
[NASA-CR-187096] p 3584 N94-32859
A finite-difference approximate-factorization algorithm for solution of the unsteady transonic small-disturbance equation
[NASA-TP-3129] p 3572 N94-32865
Flutter analysis of a supersonic cascade in time domain using an ADI Euler solver
[NASA-TM-105625] p 3739 N94-32883
Modeling of aircraft unsteady aerodynamic characteristics. Part 1: Postulated models
[NASA-TM-109120] p 3586 N94-32951
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108
UNSTEADY FLOW
An adaptive finite element method for unsteady compressible rotor airfoil aerodynamics p 3567 N94-31204
A solution adaptive structured-unstructured grid procedure for unsteady flows p 3700 N94-31217
Simulations of the creation and motion of vortex rings
[W-9319] p 3703 N94-31691
NATO Advanced Study Institute on Unsteady Combustion. Volume 2: Research papers, September 6-17, 1993
[AD-A276572] p 3634 N94-32033
Study of dynamic stall phenomenon and its control using vorticity, stream function and circulation form of the unsteady Navier-Stokes equations p 3572 N94-32714
UPPER ATMOSPHERE
Theory, Image Simulation, and Data Analysis of Chemical Release Experiments
[NASA-CR-194865] p 3954 N94-31101
UPWELLING WATER
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045
UPWIND SCHEMES (MATHEMATICS)
Multidimensional WAF-type schemes for model conservation laws
[CRANFIELD-AERO-9312] p 3843 N94-31541
URANIUM
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
URANIUM ALLOYS
Investigation of superconductivity and magnetism in d and f-electron materials
[DE94-008535] p 3907 N94-32933
URANIUM CARBIDES
The development of CVR coatings for PBR fuels
[DE94-004233] p 3875 N94-31480
URANUS (PLANET)
Planetary magnetotails: Magnetic configuration and nonthermal plasma p 3942 N94-32326
URBAN DEVELOPMENT
The use of SPOT, and the contribution of ERS-1, in the assessment of urban pressure on agriculture land in Greater Tunis (Tunisia) p 3749 N94-32534
URBAN PLANNING
Remote sensing for urban planning p 3758 N94-32465
The contribution of satellite data in communication infrastructure projects p 3749 N94-32530
URBAN TRANSPORTATION
Greenhouse gas emission impacts of electric vehicles under varying driving cycles in various countries and US cities
[DE94-007647] p 3765 N94-32600
USER MANUALS (COMPUTER PROGRAMS)
ADCIRC: An advanced three-dimensional circulation model for shelves, coasts, and estuaries. User's manual for ADCIRC-2DDI
[AD-A276150] p 3787 N94-31250
Predicting antenna parameters from antenna physical dimensions
[AD-A276442] p 3672 N94-31300
OTTER 3.0 reference manual and guide
[DE94-007457] p 3829 N94-31315
Extender's guide for artifacts and drafts
[AD-A276344] p 3810 N94-31328
Developing the Multimedia User Interface Component (MUSIC) for the Icarus Presentation System (IPS)
[AD-A276341] p 3810 N94-31335
E-L user's manual
[AD-A276378] p 3810 N94-31370
Users manual for SERI QC software assessing the quality of solar radiation data
[DE93-018210] p 3953 N94-31491
Hydrologic Database user's manual
[DE94-003950] p 3743 N94-31603
Arnoldi code for computing selected eigenvalues of sparse real unsymmetric matrices
[PB94-145182] p 3813 N94-31682
Noninvasive spectral analysis and beam mapping of focused ultrasound, part 2
[AD-A276629] p 3861 N94-32059
MICA, a facility to achieve portability for message-passing and dynamic memory management in FORTRAN
[DE94-006692] p 3807 N94-32147
The intelligent monitoring system: Generic Database Interface (GDI). Revised user manual
[AD-A277131] p 3919 N94-32382
GRAFTED - GRAphical fault tree EDitor: A fault tree description program for target vulnerability/survivability analysis. User manual
[AD-A277067] p 3818 N94-32390
Heliport Noise Model (HNM) version 2.2 (user's guide)
[AD-A277072] p 3861 N94-32418
THERM3D: A boundary element computer program for transient heat conduction problems
[DE94-008112] p 3708 N94-32709
METCAN demonstration manual, version 1.0
[NASA-TM-105607] p 3626 N94-32858
User's guide for a flat wake rotor inflow/wake velocity prediction code, DOWN
[NASA-TM-104139] p 3572 N94-32873
MOM3D method of moments code theory manual
[NASA-CR-189594] p 3682 N94-32897
BUCKY instruction manual, version 3.3
[NASA-TM-104793] p 3820 N94-32899
Incremental triangulation by way of edge swapping and local optimization
[NASA-TM-103979] p 3709 N94-32946
CET93 and CETPC: An interim updated version of the NASA Lewis computer program for calculating complex chemical equilibria with applications
[NASA-TM-4557] p 3638 N94-32948
Spur, helical, and spiral bevel transmission life modeling
[NASA-TM-106552] p 3728 N94-32979
Use and administration of UNIX (tm) systems p 3821 N94-33051
USER REQUIREMENTS
Automatic generation of context-sensitive textual help
[REPT-93-68] p 3812 N94-31646
A hypertext system that learns from user feedback p 3923 N94-32428
From optics to radar: Environmental problems and the SPOT/ERS systems p 3748 N94-32525
On the implementation of error handling in dynamic interfaces to scientific codes
[DE94-008970] p 3818 N94-32585
UTILITIES
Solar resource: Utility load-matching assessment
[DE94-000297] p 3758 N94-31264

Remote sensing for urban planning
p 3758 N94-32465

V

V-22 AIRCRAFT
V-22: Dual-use technology or red herring?
[AD-A276577] p 3579 N94-32058
V/STOL AIRCRAFT
Inlet distortion in engines on VSTOL aircraft
[NASA-CR-195841] p 3584 N94-33035
VACANCIES (CRYSTAL DEFECTS)
Indium-vacancy complexes in mercury cadmium telluride
[AD-A276177] p 3894 N94-31055
VACUUM
Space environment durability of beta cloth in LDEF thermal blankets p 3591 N94-31015
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
Pinched propagation of high-power, pulsed electron beams for welding and materials processing applications
[AD-A276925] p 3726 N94-32236
VACUUM APPARATUS
RF vacuum microelectronics
[AD-A276512] p 3691 N94-31928
VACUUM ARC SWITCHES
Theoretical studies on ionospheric irregularities and ion diode performance
[AD-A277115] p 3772 N94-31984
VACUUM EFFECTS
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781
VALENCE
A polynomial representation of the valence orbital ionization potentials
[USIP-93-06] p 3640 N94-31083
Characterization of the rare earth orthophosphates and Ce-doped LaPO4 by x ray absorption spectroscopy
[DE94-006313] p 3898 N94-31630
VAN DE GRAAFF ACCELERATORS
Knowledge engineering for PACES, the particle accelerator control expert system p 3854 N94-33342
VAN DER WAALS FORCES
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598
Metal cluster-rare gas van der Waals complexes: Microscopic models of physisorption
[DE94-008134] p 3873 N94-32797
VANADIUM
Tensile properties of commercially pure vanadium from room temperature to 1200 C
[DE94-006622] p 3641 N94-31581
VANADIUM ALLOYS
Creep properties of vanadium-base alloys
[DE94-006541] p 3641 N94-31486
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666
A state variable material model for superplastic titanium-6 percent Al-4 percent V p 3644 N94-32498
VANADIUM COMPOUNDS
Molecular/polymeric magnetism
[DE94-005888] p 3649 N94-31201
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE94-006759] p 3759 N94-31272
VAPOR DEPOSITION
The development of CVR coatings for PBR fuels
[DE94-004233] p 3875 N94-31480
A silicon condenser microphone: Materials and technology
[ISBN-9-09-005899-0] p 3688 N94-31518
Chemical vapour deposition of tungsten for the application in integrated circuits
[ISBN-9-09-005151-1] p 3641 N94-31519
Degenerate four-wave mixing as a diagnostic of plasma chemistry
[DE94-008588] p 3889 N94-31766
Chemical vapor deposition of metal nitrides, phosphides, and arsenides
[DE94-008096] p 3654 N94-31976
Chemical vapor deposition fluid flow simulation modelling tool
[NASA-CR-189648] p 3707 N94-32480
Engineering scale development of the Vapor-Liquid-Solid (VLS) process for the production of silicon carbide fibrils
[DE94-007132] p 3659 N94-32618
Anisotropic phase separation through the metal-insulator transition in amorphous Mo-Ge and Fe-Ge alloys
[DE94-007259] p 3646 N94-32795
VAPOR PHASE EPITAXY
Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools
[DE94-006367] p 3901 N94-32104
New zinc-bis(dialkylamides) potentially usable as site-selective dopants for p-type ZnSe
[AD-A276947] p 3902 N94-32218
Research on high reliability refractory ohmic contacts for GaAs FETs and MODFETs
[AD-A276848] p 3697 N94-33034
VAPOR PHASES
Modern integral equation techniques for quantum reactive scattering theory
[DE94-007039] p 3857 N94-31639
Metal clusters: Dynamics and structure
[AD-A276842] p 3643 N94-32091
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169
New zinc-bis(dialkylamides) potentially usable as site-selective dopants for p-type ZnSe
[AD-A276947] p 3902 N94-32218
Formation of gas-phase peroxides in a rural atmosphere: An interpretation of the recent SOS/SERON field results
[DE94-002995] p 3766 N94-32692
VAPOR PRESSURE
New zinc-bis(dialkylamides) potentially usable as site-selective dopants for p-type ZnSe
[AD-A276947] p 3902 N94-32218
VAPORIZING
Ultrahigh-current-density metal-ion implantation and diamondlike-hydrocarbon films for tribological applications
[DE94-008958] p 3906 N94-32843
VAPORS
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248
Using laser absorption spectroscopy to monitor composition and physical properties of metal vapors
[DE94-001530] p 3716 N94-31599
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-007723] p 3653 N94-31917
Remote infrared vapor detection of volatile organic compounds
[AD-A276982] p 3746 N94-31999
VARIABILITY
Diagnostic studies of climate variability
[DE94-003629] p 3767 N94-32711
Aspects of modeling uncertainty and prediction
[DE94-007565] p 3852 N94-32744
Spatial correlation of ionospheric variability
[AD-A278105] p 3776 N94-33041
VARIABLE GEOMETRY STRUCTURES
Real-time control of the Trussarm variable-geometry-truss manipulator utilizing machine vision
[ISBN-0-315-87054-0] p 3830 N94-31735
VARIATIONAL PRINCIPLES
Finite element analysis of time-independent superconductivity p 3691 N94-31905
VECTOR ANALYSIS
Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020
VECTOR DOMINANCE MODEL
The form factors of the nucleons
[DE94-007096] p 3872 N94-32630
VECTOR MESONS
The form factors of the nucleons
[DE94-007096] p 3872 N94-32630
VECTOR PROCESSING (COMPUTERS)
Parallel processing for differencing and histogramming
[AD-A277060] p 3826 N94-32274
VECTOR QUANTIZATION
Applications of data compression to 3-D scalar field visualization p 3817 N94-32294
VECTOR SPACES
The Cameron-Martin theorem
[W-9315] p 3844 N94-31676
Stability and instability criteria for magnetohydrodynamics
[PB94-148475] p 3889 N94-31772
VEGETATION
Modeling of the continental biosphere
p 3770 N94-31011
Analysis of GER imaging spectrometry data for the identification of soil and vegetation parameters in land degradation studies p 3744 N94-31857
Inflight calibration, preprocessing, and data evaluation of GER 2 imaging spectrometry data
p 3744 N94-31858
The effects of vegetation on the ability to map soils using GERIS data p 3744 N94-31860
Feasibility evaluation of new data interpretation approaches for vegetation analysis from airborne imaging spectroscopy p 3745 N94-31862
Monitoring fertilizer application by imaging spectrometry (Somerset Levels test site) p 3745 N94-31863
High resolution spectroscopy in agriculture: Results of the EISAC 1989 campaign p 3745 N94-31864
Extraction of agricultural parameters from imaging-spectrometry data and simulated MERIS data through red edge analysis p 3745 N94-31865
Use of SPOT and ERS-1 to map tropical vegetation and mangrove dynamics in Guiana p 3753 N94-32555
Dry deposition of PAN to grassland vegetation
[DE94-005111] p 3768 N94-32894
VEGETATIVE INDEX
Synergy of thermal infrared and microwave remote sensing for evaporation estimation p 3754 N94-32559
Quantitative analysis of woody vegetation in Soudano-Sahalian region. Textural approach (application to a Burkina Faso region) p 3757 N94-32574
VEHICLES
Automatic contact in DYNA3D for vehicle crashworthiness
[DE94-007143] p 3738 N94-32637
VELOCITY DISTRIBUTION
Atomic oxygen interaction at defect sights in protective coatings on polymers flown on LDEF
p 3593 N94-31024
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476
The kinematics of dense clusters of galaxies
p 3937 N94-32029
Scalar imaging velocimetry studies of turbulent flow structure and dynamics
[AD-A278395] p 3710 N94-33164
VELOCITY MEASUREMENT
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276463] p 3860 N94-31242
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476
Measuring the Hubble constant and our Virgo-infall velocity independently p 3926 N94-31968
Scalar imaging velocimetry studies of turbulent flow structure and dynamics
[AD-A278395] p 3710 N94-33164
VENTING
Honeycomb sandwich structures: Vented versus unvented designs for space systems
[AD-A276713] p 3624 N94-32122
VENTS
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981
VENUS (PLANET)
Tectonic History of the Terrestrial Planets
[NASA-CR-195696] p 3939 N94-31105
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus
p 3776 N94-31106
Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111
Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112
A tectonic resurfacing model for Venus
p 3941 N94-31113
The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114
Plains tectonism on Venus: The deformation belts of Lavinia Planitia p 3941 N94-31115
A study of areas of low radio-thermal emissivity on Venus p 3942 N94-31992
VENUS ATMOSPHERE
Multiple scattering of polarized radiation in planetary atmospheres
[ETN-94-96018] p 3674 N94-31551
VENUS SURFACE
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus
p 3776 N94-31106
Geoid-to-topography ratios on Venus: A global perspective p 3940 N94-31110
Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112

The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114
Plains tectonism on Venus: The deformation belts of Lavinia Planitia p 3941 N94-31115
A study of areas of low radio-thermal emissivity on Venus p 3942 N94-31992

VERBAL COMMUNICATION
Virtual annotation: Verbal communication in virtual reality
[REPT-93-67] p 3674 N94-31645

VERSATILITY
Design patterns mixing genericity and inheritance in the development of reusable components
[REPT-93-021] p 3808 N94-31178

VERTICAL MOTION
Three dimensional vorticity field in the California current system
[AD-A276951] p 3788 N94-32220
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791

VERY LARGE SCALE INTEGRATION
A neuron network for image classification: From algorithm to implantation
[TELECOM-93-E-005] p 3687 N94-31168
VLSI implementation of stray insensitive switched capacitor composite operational amplifiers
[AD-A276461] p 3687 N94-31240
Module generation for self-testing integrated systems
[ISBN-9-09-004570-8] p 3688 N94-31520
A hierarchical approach to test generation for CMOS VLSI circuits
[ISBN-9-09-005449-9] p 3689 N94-31535
An analysis of instruction-cached SIMD computer architecture
[AD-A276519] p 3806 N94-31934
Application of the modified voltage-dividing potentiometer to overlay metrology in a CMOS/bulk process
[DE94-007937] p 3695 N94-32700
VLSI for high-speed digital signal processing
[AD-A277617] p 3697 N94-32957

VERY LOW FREQUENCIES
Lightning-induced coupling of the radiation belts to geomagnetically conjugate ionospheric regions p 3772 N94-31773
Applied Computational Electromagnetics Society Journal, volume 9, number 1, March 1994
[AD-A276753] p 3679 N94-32183

VESTIBULAR TESTS
Model-based scientific discovery: A study in space bioengineering p 3799 N94-31990

VHSIC (CIRCUITS)
Formal semantics for a subset of VHDL and its use in analysis of the FTPP scoreboard circuit
[NASA-CR-191577] p 3827 N94-32734

VIBRATION
Vibration control and design of composite cantilevers taking into account structural uncertainties and damage p 3733 N94-31213
Vibration dampener and method for making same
[AD-D016094] p 3739 N94-32733
Limiting vibration in systems with constant amplitude actuators through command preshaping
[NASA-CR-188284] p 3739 N94-32907
Microreflectance infrared study of electron-molecular vibrational coupling and lattice softness in BEDT-TTF salts
[DE94-008490] p 3907 N94-32989
Design, development, and testing of a lightweight optical sensor cover system p 3604 N94-33302
Intelligent control of a multi-degree-of freedom reaction compensating platform system using fuzzy logic p 3605 N94-33306

VIBRATION DAMPING
Vibration control and design of composite cantilevers taking into account structural uncertainties and damage p 3733 N94-31213
Transmissibility of nickel-titanium shape memory alloy springs
[AD-A276055] p 3640 N94-31456
Control of a flexible space robot tracking a moving target p 3722 N94-31469
Passive vibration damping materials: Piezoelectric ceramic composites for vibration damping applications
[AD-A276550] p 3653 N94-31935
The 10th International Conference on Internal Friction and Ultrasonic Attenuation in Solids (ICIFUAS)
[AD-A276849] p 3902 N94-32209
Vibration dampener and method for making same
[AD-D016094] p 3739 N94-32733
Feed-forward control of gear mesh vibration using piezoelectric actuators
[NASA-TM-106366] p 3728 N94-32902
Limiting vibration in systems with constant amplitude actuators through command preshaping
[NASA-CR-188284] p 3739 N94-32907
Structural damping studies at cryogenic temperatures
[NASA-TM-109073] p 3740 N94-33118
Intelligent control of a multi-degree-of freedom reaction compensating platform system using fuzzy logic p 3605 N94-33306

VIBRATION ISOLATORS
Transmissibility of nickel-titanium shape memory alloy springs
[AD-A276055] p 3640 N94-31456
Vibration Isolation Technology (VIT) ATD project
[NASA-TM-106496] p 3567 N94-33064

VIBRATION MODE
Vibration control and design of composite cantilevers taking into account structural uncertainties and damage p 3733 N94-31213
Nonlinear vibration analysis of laminated plates on linear and nonlinear elastic foundations p 3737 N94-32079

VIBRATION SIMULATORS
A direct digital design for a multichannel structural test system using the characteristic locus method
[MATHS-REPT-A-206] p 3828 N94-31161

VIBRATION TESTS
A direct digital design for a multichannel structural test system using the characteristic locus method
[MATHS-REPT-A-206] p 3828 N94-31161

VIBRATIONAL SPECTRA
Degenerate four-wave mixing as a diagnostic of plasma chemistry
[DE94-008588] p 3889 N94-31766
Vibrational spectroscopy at metal-solution interfaces: Some perspectives and prospects for electrochemical surface science
[AD-A276781] p 3644 N94-32169

VIBRATIONAL STATES
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
Vibrational energy transfer of diatomic gases in hypersonic expanding flows p 3570 N94-31958
Electronic and nuclear factors in intramolecular charge and excitation transfer processes
[DE94-006598] p 3870 N94-32178
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes
[DE94-007623] p 3871 N94-32598

VIDEO COMMUNICATION
Voice and video transmission using XTP and FDDI p 3685 N94-32468
COVICS: A covert video communications system
[DE94-007568] p 3682 N94-32745

VIDEO COMPRESSION
A visual detection model for DCT coefficient quantization p 3850 N94-32467

VIDEO DATA
First-wall heat-flux measurements during ELMing H-mode plasma
[DE94-008310] p 3888 N94-31765

VIDEO EQUIPMENT
Development of a video fluorescence system for assessing burn depth
[AD-A278127] p 3798 N94-33092

VIDEO SIGNALS
An experimental compact Hi-Vision VCR using metal evaporated tape
[NHK-LABS-NOTE-423] p 3683 N94-33081

VIDEO TAPE RECORDERS
Night vision camcorder system
[AD-A277004] p 3712 N94-32002
An experimental compact Hi-Vision VCR using metal evaporated tape
[NHK-LABS-NOTE-423] p 3683 N94-33081

VIDEO TAPES
An experimental compact Hi-Vision VCR using metal evaporated tape
[NHK-LABS-NOTE-423] p 3683 N94-33081

VIEWING
Visual perception of 3-dimensional structure from different types of optical deformation
[AD-A278272] p 3884 N94-33141

VINYL COPOLYMERS
Dynamics of block poly(styrene-co-vinylpyridine) (SVP) in solution and on silica
[AD-A277139] p 3657 N94-32364

VINYL POLYMERS
PVDF pressure transducers for shock wave and explosives research
[AD-A277319] p 3712 N94-32051
Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056
Electrical communication between glucose oxidase and electrodes based on poly(vinylimidazole) complex of Os(bpy)2Cl2
[AD-A276585] p 3835 N94-32231
Conversion of polymers of methyl- and vinylsilane to Si-C ceramics
[NASA-TM-106554] p 3662 N94-32945

VINYL RADICAL
Design of new polymers to improve radiation stability of plastic scintillators
[DE94-008220] p 3652 N94-31764

VINYLIDENE
PVDF pressure transducers for shock wave and explosives research
[AD-A277319] p 3712 N94-32051

VIRGO GALACTIC CLUSTER
Measuring the Hubble constant and our Virgo-infall velocity independently p 3926 N94-31968

VIRTUAL MEMORY SYSTEMS
A comparison of distributed memory and virtual shared memory parallel programming models
[DE94-005473] p 3825 N94-31663
Compiler techniques for managing data motion
[AD-A276514] p 3918 N94-31930

VIRTUAL REALITY
Virtual annotation: Verbal communication in virtual reality
[REPT-93-67] p 3674 N94-31645
Designing in virtual reality: Modelling Objects in a Virtual Environment (MOVE)
[REPT-93-91] p 3813 N94-31704
Interactive graphical model building using telepresence and virtual reality
[DE94-001421] p 3818 N94-32353
Virtual reality in medical education and assessment p 3798 N94-32471

VISCOELASTICITY
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
Viscoelastic fracture characterization of polymeric solids p 3652 N94-31745
Influence of trace components on the viscoelastic properties of a polymer solution
[AD-A277171] p 3656 N94-32253
Elastic as limit of viscoelastic response, in a context of self-similar viscous limits
[AD-A277043] p 3738 N94-32273
A thermal viscoelastic analysis for thick-walled composite cylinders
[AD-A274143] p 3625 N94-32604

VISCOMETERS
Dielectric viscometer including fixed and variable cells
[AD-D016139] p 3639 N94-32973

VISCOPLASTICITY
Inelastic deformation of metal matrix composites p 3618 N94-31285
Micromechanics and effective properties of particulate composites and fluid suspensions p 3703 N94-31744
New micro- and macroscopic models of contact and friction
[AD-A277240] p 3726 N94-32320
A state variable material model for superplastic titanium-6 percent Al-4 percent V p 3644 N94-32498

VISCOSITY
Nonlinear calculations of the time evolution of black hole accretion disks p 3929 N94-31127
Convective solar nebula p 3930 N94-31130
Rotational effects in turbulence driven by convection p 3930 N94-31131
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-007723] p 3653 N94-31917
Status of developing a multifunctional aviation grease
[AD-A276755] p 3656 N94-32184
Influence of trace components on the viscoelastic properties of a polymer solution
[AD-A277171] p 3656 N94-32253
Dielectric viscometer including fixed and variable cells
[AD-D016139] p 3639 N94-32973

VISCOUS FLOW
A solution adaptive structured-unstructured grid procedure for unsteady flows p 3700 N94-31217
Numerical analysis of single-vortex/free-surface interaction
[AD-A276462] p 3701 N94-31241
Viscous limiter functions for model convection-diffusion equations
[CRANFIELD-AERO-9103] p 3702 N94-31559

Finite element vorticity-based methods for the solution of the incompressible and compressible Navier-Stokes equations
[ISBN-0-315-87265-9] p 3703 N94-31730
Incompressible viscous flow in tubes with occlusions
[ISBN-0-315-75467-2] p 3704 N94-31778
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802
On an adaptation method for dense, 2D, C-type grids
[W-9321] p 3706 N94-32045
Incorporating radial mixing in axisymmetric streamline curvature through-flow analysis
[AD-A277325] p 3706 N94-32279
A novel potential/viscous flow coupling technique for computing helicopter flow fields
[NASA-CR-193272] p 3571 N94-32476

VISCOUS FLUIDS
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245
Attitude dynamics of spinning rockets in space with internal mass motion p 3601 N94-31802

VISIBILITY
Synthetic vision technology demonstration. Volume 1: Executive summary
[DOT/FAA/RD-93/40-VOL-1] p 3582 N94-33076
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Synthetic vision technology demonstration. Volume 4: Appendices
[DOT/FAA/RD-93/40-VOL-4] p 3583 N94-33079

VISIBLE SPECTRUM
A historical perspective on fifteen years of laser damage thresholds at LLNL
[DE94-007930] p 3719 N94-32613

VISION
Sensory sensitivities and discriminations and their roles in aviation
[AD-A277312] p 3800 N94-32276
Workshop on Visual Perception: Computation and Psychophysics
[AD-A278412] p 3802 N94-33326

VISUAL AIDS
Variable-resolution imagery for flight simulation
[AD-A276199] p 3586 N94-31058

VISUAL CONTROL
Technology transfer of operator-in-the-loop simulation p 3802 N94-32472

VISUAL DISCRIMINATION
Variable-resolution imagery for flight simulation
[AD-A276199] p 3586 N94-31058
Sensory sensitivities and discriminations and their roles in aviation
[AD-A277312] p 3800 N94-32276
A visual detection model for DCT coefficient quantization p 3850 N94-32467

VISUAL FIELDS
Variable-resolution imagery for flight simulation
[AD-A276199] p 3586 N94-31058

VISUAL OBSERVATION
Construction of visual representations and time-space organization of resources in astronomy
[ISBN-0-315-86694-2] p 3925 N94-31914
Use of Air Force cloud cover data to evaluate and improve cloud forecasts and parameterizations in mesocale meteorological models
[AD-A277384] p 3784 N94-32054
An integrated cloud observation and modeling investigation in support of the ARM program
[DE94-003160] p 3785 N94-32716
Use of cloud observations and mesoscale meteorology models to evaluate and improve cloud parameterizations
[DE94-003610] p 3785 N94-32717

VISUAL PERCEPTION
Morphological directional coding of images
[ISBN-0-315-86336-6] p 3814 N94-31715
Analysis of pursuit tracking eye movements in pilots and nonfliers
[AD-A276597] p 3799 N94-32035
Algebraic functions for recognition
[AD-A276803] p 3846 N94-32167
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-visual module, volume 11
[AD-A276978] p 3589 N94-32317
Visual encoding of spatial relations
[AD-A277400] p 3800 N94-32344
Visual neural development and chromatic aberration
[AD-A277402] p 3800 N94-32345
Information theory for arm visuo-motor coordination p 3800 N94-32495
Mechanisms of temporal pattern discrimination by human observers
[AD-A277407] p 3801 N94-32577
Models of the neuronal mechanisms of target localization of the barn owl
[AD-A277332] p 3797 N94-32623
Visual processing of object velocity and acceleration
[AD-A277425] p 3801 N94-32998
Synthetic vision technology demonstration. Volume 2: Sensor tower testing
[DOT/FAA/RD-93/40-VOL-2] p 3582 N94-33077
Synthetic vision technology demonstration. Volume 3: Flight tests
[DOT/FAA/RD-93/40-VOL-3] p 3582 N94-33078
Visual perception of 3-dimensional structure from different types of optical deformation
[AD-A278272] p 3884 N94-33141
Workshop on Visual Perception: Computation and Psychophysics
[AD-A278412] p 3802 N94-33326

VISUAL SIGNALS
Visual processing of object velocity and acceleration
[AD-A277425] p 3801 N94-32998

VISUAL TASKS
Optical flow from 1D correlation: Application to a simple time-to-crash detector
[AD-A276777] p 3880 N94-32186

VITERBI DECODERS
Methods of implementing the Viterbi algorithm on a massively parallel computer of the SIMD (single instruction multiple data) type
[ISBN-0-315-86783-3] p 3814 N94-31752

VOICE COMMUNICATION
Virtual annotation: Verbal communication in virtual reality
[REPT-93-67] p 3674 N94-31645
Voice and video transmission using XTP and FDDI p 3685 N94-32468
An exploratory study of neuro linguistic programming and communication anxiety
[AD-A277756] p 3682 N94-32986

VOICE CONTROL
Application of the wavelet transform for speech processing p 3600 N94-31435

VOICE DATA PROCESSING
Application of the wavelet transform for speech processing p 3600 N94-31435
Spectral analysis method and sample generation for real time visualization of speech
[ETN-94-95732] p 3674 N94-31573

VOIDS
The influence of transmutation, void swelling, and flux/spectra uncertainties on the electrical properties of copper and copper alloys
[DE94-006213] p 3641 N94-31626
An experimental study of void formation during aluminum solidification in reduced gravity p 3667 N94-31944

VOLATILITY
Remote infrared vapor detection of volatile organic compounds
[AD-A276982] p 3746 N94-31999
Volatiles combustion in fluidized beds
[DE94-008382] p 3636 N94-32414
Magmatic volatiles and the weathering of Mars p 3946 N94-33201

VOLCANOES
Tectonic History of the Terrestrial Planets
[NASA-CR-195696] p 3939 N94-31105
Patterns of deformation and volcanic flows associated with lithospheric loading by large volcanoes on Venus p 3776 N94-31106
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111
Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112
A tectonic resurfacing model for Venus p 3941 N94-31113
The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114
Plains tectonism on Venus: The deformation belts of Lavinia Planitia p 3941 N94-31115
Time-dependent behavior of Mount Pinatubo aerosol
[DE94-001877] p 3764 N94-31601
Concentration system performance degradation in the aftermath of Mount Pinatubo
[DE94-001879] p 3764 N94-31602
The use of SPOT and ERS-1 images to map the eruption of Nevado Sabancaya (Province of Arequipa, South Peru) and evaluate associated risks p 3751 N94-32546

VOLCANOLOGY
Aspects of modelling the tectonics of large volcanoes on the terrestrial planets p 3940 N94-31107
State of stress, faulting, and eruption characteristics of large volcanoes on Mars p 3940 N94-31108
The tectonic and volcanic evolution of Venus: Catastrophic or gradual? p 3940 N94-31111
Keeping that youthful look --- impact cratering of Venus p 3941 N94-31112
A tectonic resurfacing model for Venus p 3941 N94-31113
The resurfacing controversy for Venus: An overview and a mechanistic perspective p 3941 N94-31114
Evidence for ultramafic lavas on Syrtis Major p 3950 N94-33229

VOLTAGE CONVERTERS (DC TO DC)
A series resonant converter in half bridge circuits with combined serial and parallel charge coupling and several output circuits
[ETN-94-95739] p 3687 N94-31373
Examination of fast semiconductor diodes (recovery) with respect to switching valves in PWM and resonance devices
[ETN-94-95740] p 3690 N94-31609

VOLUME
Apron heights around stepped massifs in the Cydonia Mensae region: Do they record the local paleobathymetry of Oceanus Borealis? p 3949 N94-33224

VORTEX ALLEVIATION
A study of the development and attenuation of wing-generated, vortical wakes p 3570 N94-31971

VORTEX BREAKDOWN
On the structure and stability of slender viscous vortices p 3700 N94-31218

VORTEX GENERATORS
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071

VORTEX RINGS
Simulations of the creation and motion of vortex rings
[W-9319] p 3703 N94-31691

VORTEX SHEDDING
The effect of an axial flow component on a circular cylinder wake p 3699 N94-31209
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071

VORTEX SHEETS
A study of weak solutions and their regularizations by numerical methods
[AD-A277453] p 3850 N94-33175

VORTICES
Rotational effects in turbulence driven by convection p 3930 N94-31131
The small-scale topology of a 2:1 aspect-ratio elliptic jet p 3699 N94-31184
A priori tests of large eddy simulation of the compressible plane mixing layer
[MEMO-1152] p 3699 N94-31185
On the structure and stability of slender viscous vortices p 3700 N94-31218
Numerical analysis of single-vortex/free-surface interaction
[AD-A276462] p 3701 N94-31241
Field studies of raindrop oscillations with applications to radar meteorology p 3782 N94-31743
Tip effects on the vortex wake of an axisymmetric body at angle of attack p 3570 N94-31907
A study of the development and attenuation of wing-generated, vortical wakes p 3570 N94-31971
Analysis and computation for vortex dynamics and rarefied gases
[AD-A277415] p 3708 N94-32581
Notes on the Langevin model for turbulent diffusion of marked particles
[DE94-007847] p 3708 N94-32652
Quantum fluctuations of vortices in Josephson-coupled superconductors
[DE94-007609] p 3905 N94-32747
New advances in the modeling of high-temperature superconductors
[DE94-007649] p 3905 N94-32815
Active vortex control for a high performance wing
[AD-D016140] p 3573 N94-32974
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071
Installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119
Stationary eddies in the Mars general circulation as simulated by the NASA-Ames GCM p 3944 N94-33192
Eddy transport of water vapor in the Martian atmosphere p 3949 N94-33221

VORTICITY
Convective solar nebula p 3930 N94-31130

The small-scale topology of a 2:1 aspect-ratio elliptic jet p 3699 N94-31184
The effect of an axial flow component on a circular cylinder wake p 3699 N94-31209
On wave interactions of rotational and irrotational flows p 3700 N94-31219
A study of the development and attenuation of wing-generated, vortical wakes p 3570 N94-31971
Three dimensional vorticity field in the California current system
[AD-A276951] p 3788 N94-32220

VORTICITY EQUATIONS
On wave interactions of rotational and irrotational flows p 3700 N94-31219
Finite element vorticity-based methods for the solution of the incompressible and compressible Navier-Stokes equations
[ISBN-0-315-87265-9] p 3703 N94-31730

VSAT (NETWORK)
Hubless satellite communications networks p 3600 N94-31433

VULNERABILITY
GRAFTED - GRAphical fault tree EDitor: A fault tree description program for target vulnerability/survivability analysis. User manual
[AD-A277067] p 3818 N94-32390
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667

W

WAFERS
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A277116] p 3900 N94-31985
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers
[DE94-006591] p 3634 N94-32110
Silicon-Film(tm) photovoltaic manufacturing technology
[DE94-000202] p 3760 N94-32143
A scanning defect mapping system for semiconductor characterization p 3865 N94-32446
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649
Application of the modified voltage-dividing potentiometer to overlay metrology in a CMOS/bulk process
[DE94-007937] p 3695 N94-32700

WAKES
The effect of an axial flow component on a circular cylinder wake p 3699 N94-31209
Gravitational effects of cosmic strings
[ISBN-0-315-75484-2] p 3934 N94-31789
Tip effects on the vortex wake of an axisymmetric body at angle of attack p 3570 N94-31907
Ship traffic monitoring and oil spill detection using the ERS-1 SAR p 3751 N94-32542
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684

WALKING
Tripping over obstacles: Biomechanical analyses of how young and old try to avoid it p 3803 N94-31954

WALL FLOW
Response of wall turbulence to high frequency streamwise and spanwise oscillations p 3700 N94-31211
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245

WALLOPS ISLAND
Operations summary for the convection and moisture experiment (CAMEX)
[NASA-TM-108445] p 3786 N94-33004

WALLS
Operation of D3-D with all-graphite walls
[DE94-004858] p 3886 N94-31304

WARFARE
Naval Surface Warfare Center Dahlgren Division Technical Digest: Advanced materials technology
[AD-A276448] p 3668 N94-31364

WARNING SYSTEMS
Covert channel analysis of trusted systems. A guide to understanding
[AD-A276418] p 3916 N94-31331

WASTE DISPOSAL
Sandia technology engineering and science accomplishments
[DE94-008312] p 3668 N94-32412

WASTE ENERGY UTILIZATION
Detailed design of the 2MW Demonstration Plant
[DE94-000042] p 3762 N94-32823

WASTE WATER
Catalytic methods using molecular oxygen for treatment of PMMS and ECLSS waste streams, volume 2
[NASA-CR-190299] p 3804 N94-32697

WATER
Interaction of water with metal surfaces
[AD-A276260] p 3632 N94-31293
Development of a catalytic system for gasification of wet biomass
[DE94-006216] p 3759 N94-31762
Glutinous water: Protecting vertical and overhead surfaces from fire spread
[AD-A277280] p 3575 N94-32405
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation
[DE94-007564] p 3637 N94-32743
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791
Thermal and hydraulic considerations regarding the fate of water discharged by the outflow channels to the Martian northern plains p 3946 N94-33202
Geologic controls of erosion and sedimentation on Mars p 3951 N94-33232
Simultaneous laboratory measurements of CO2 and H2O adsorption on palagonite: Implications for the Martian climate and volatile reservoir p 3952 N94-33240

WATER CURRENTS
ADCIRC: An advanced three-dimensional circulation model for shelves, coasts, and estuaries. User's manual for ADCIRC-2DDI
[AD-A276150] p 3787 N94-31250

WATER HAMMER
Fluid-structure interaction in case of water hammer with cavitation
[PB94-148277] p 3702 N94-31588

WATER IMMERSION
Validation and sensitivity analysis of Texas human thermal model predictions during cold water immersion
[AD-A275240] p 3797 N94-32156

WATER POLLUTION
Focused feasibility study final field sampling plan
[AD-A277445] p 3769 N94-33105

WATER RECLAMATION
Catalytic methods using molecular oxygen for treatment of PMMS and ECLSS waste streams, volume 2
[NASA-CR-190299] p 3804 N94-32697

WATER RESOURCES
Possible complementarity of SPOT/ERS in mapping land use: Study on agricultural land in Brittany (France) p 3755 N94-32563
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791
Food security in the context of global environmental change
[DE94-007481] p 3768 N94-32812

WATER SPLITTING
Scenarios for multi-unit inertial fusion energy plants producing hydrogen fuel
[DE94-006614] p 3666 N94-32114

WATER TREATMENT
Catalytic methods using molecular oxygen for treatment of PMMS and ECLSS waste streams, volume 2
[NASA-CR-190299] p 3804 N94-32697

WATER VAPOR
High resolution properties of the marine atmospheric boundary layer
[DE94-006235] p 3774 N94-32736
Water vapor from sunradiometry in comparison with microwave and balloon-sonde measurements at the Southern Great Plains ARM Site
[DE94-007479] p 3786 N94-32759
A correlated k-distribution model of the heating rates for atmospheric mixtures of H2O, CO2, O3, CH4, and N2O in the 0-2500 cm(exp -1) wave number region at altitudes between 0 and 60 km
[DE94-005136] p 3775 N94-32895
Eddy transport of water vapor in the Martian atmosphere p 3949 N94-33221

WATER WAVES
On wave interactions of rotational and irrotational flows p 3700 N94-31219
Additional capabilities of the unified waves model
[AD-A276114] p 3702 N94-31467
Observations of turbulence, internal waves and background flows: An inquiry into the relationships between scales of motion p 3705 N94-31988
The effects of altimeter sampling characteristics: Some Geosat examples
[AD-A276899] p 3747 N94-32214
Index and bulk parameters for frequency-direction spectra measured at CERC Field Research Facility
[AD-A277759] p 3791 N94-33085

WATERSHEDS
Snowmelt forecasting. Further cold regions development of operational hydrological forecasting, volume 2
[AD-A278123] p 3757 N94-33269

WATERWAYS
Real-time centimeter positioning with GPS: A system developed by the US Army Corps of Engineers
[AD-A278152] p 3577 N94-33095

WAVE ATTENUATION
Strain sensing using optical fibers
[NASA-CR-195807] p 3740 N94-32940
PSIDD: A Post-Scan Interactive Data Display system for ultrasonic scans
[NASA-TM-4545] p 3732 N94-33038

WAVE DISPERSION
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781

WAVE EQUATIONS
Aeroacoustic sources in internal flows
[ISBN-9-03-86-0282-0] p 3860 N94-31653
Boundary control of scattering p 3861 N94-31899
Finite element solution to the Helmholtz equation with high wave number. Part 1: The h-version of the FEM
[AD-A277396] p 3848 N94-32341

WAVE EXCITATION
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781
MOM3D method of moments code theory manual
[NASA-CR-189594] p 3682 N94-32897
Material engineering of the novel semiconductor structures
[AD-A278386] p 3910 N94-33355

WAVE FUNCTIONS
Development and implementation of a full-potential ASW method
[ETN-94-95757] p 3858 N94-31560
The form factors of the nucleons
[DE94-007096] p 3872 N94-32630

WAVE INTERACTION
On wave interactions of rotational and irrotational flows p 3700 N94-31219

WAVE PROPAGATION
Observation of the traveling component of an x ray standing wave field
[DE94-007671] p 3672 N94-31317
Study of wave propagation and dynamic response of laminated composite structures
[AD-A276123] p 3619 N94-31444
Additional capabilities of the unified waves model
[AD-A276114] p 3702 N94-31467
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781
Self-consistent effects of magnetospheric hydromagnetic waves on ring current ions
[AD-A277406] p 3774 N94-32346
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684
A study of near-surface and underwater explosions by computer simulations
[DE94-009038] p 3708 N94-32849
Finite-element modeling of the blockage and scattering of LG propagation
[AD-A277430] p 3775 N94-33006
A comparison of rough surface parabolic equation models
[AD-A278090] p 3791 N94-33185
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186

WAVE REFLECTION
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161

WAVE SCATTERING
On wave interactions of rotational and irrotational flows p 3700 N94-31219
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161
Finite-element modeling of the blockage and scattering of LG propagation
[AD-A277430] p 3775 N94-33006

WAVEFORMS
Waveform generation for ultra-wideband radar system
[AD-A276352] p 3673 N94-31401
Performance metrics for low probability of intercept-communication system
[AD-A277346] p 3677 N94-32073

Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
Generation of the ambiguity function for ultra wideband radar waveforms
[AD-A277913] p 3684 N94-33261

WAVEGUIDE ANTENNAS
Analysis of a slot coupled coplanar waveguide fed patch antenna
[NASA-TM-106567] p 3698 N94-33116

WAVEGUIDES
Manufacture of light-damage resistant, planar, single mode waveguide on lithium niobate
[DSIS-94-01503] p 3879 N94-31850
Applied Computational Electromagnetics Society Journal, volume 9, number 1, March 1994
[AD-A276753] p 3679 N94-32183
Metal-ion spin-on glasses: Novel materials for active waveguides
[DE94-007738] p 3882 N94-32649

WAVELENGTH DIVISION MULTIPLEXING
Advanced optical fiber communication systems
[AD-A276416] p 3878 N94-31330

WAVELET ANALYSIS
Regular wavelets: Application to fixed image compression
[TELECOM-93-E-004] p 3858 N94-31167
On wavelet representations of differential equations
[RR-482] p 3842 N94-31412
Application of the wavelet transform for speech processing p 3600 N94-31435
Wavelet transform of fixed pattern noise in focal plane arrays
[AD-A276963] p 3712 N94-32393
Neural network wavelet technology: A frontier of automation p 3839 N94-32425
Conference on operator, wavelet and control theory
[AD-A277429] p 3838 N94-33174

WAVERIDERS
A new inverse method for generating high-speed aerodynamic flows with application to waverider design p 3569 N94-31828

WEAK INTERACTIONS (FIELD THEORY)
Baryogenesis from a primordial lepton asymmetry
[PB94-145166] p 3868 N94-31921
Proceedings of the International Workshop on Low Energy Muon Science: LEMS 1993
[DE94-006495] p 3874 N94-32804

WEAPON SYSTEMS
Naval Surface Warfare Center Dahlgren Division Technical Digest: Advanced materials technology
[AD-A276448] p 3668 N94-31364
Unmanned Air Vehicle/Remotely Piloted Vehicle analysis for lethal UAV/RPV
[AD-A276052] p 3578 N94-31442
Modular Simulator System (MSS) management guide
[AD-A277098] p 3588 N94-32014
Getting a handle on designing for avionics software supportability and maintainability
[AD-A276362] p 3581 N94-32055
Analysis of Navy aircraft engine and engine component warranties
[AD-A276936] p 3584 N94-32238
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-weapons module, volume 7
[AD-A276974] p 3590 N94-32399
Vulnerability assessment of a space based weapon platform electronic system exposed to a thermonuclear weapon detonation
[DE94-007229] p 3611 N94-32667
Accelerated reliability testing utilizing design of experiments
[AD-A277989] p 3732 N94-33088

WEAR
Cost-effective ceramic machining: Summary of three-body wear experiments
[DE94-007757] p 3650 N94-31354

WEAR RESISTANCE
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941

WEAR TESTS
Cracking induced in small fretting: Application to the case of aeronautical aluminum alloys
[ECL-92-50] p 3735 N94-31870
The effect of prolonged exposure to 750 C air on the tribological performance of PM212
[NASA-TM-106472] p 3617 N94-32941
The preliminary evaluation of liquid lubricants for space applications by vacuum tribometry p 3606 N94-33313

WEATHER
Satellite direct readout: Opportunities for science education
[AD-A276257] p 3609 N94-31292
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model
[AD-A277217] p 3783 N94-32021
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153
Technical evaluation of the UH-60Q: Aircraft in typical aeromedical evacuation missions
[AD-A276944] p 3586 N94-32217
The influence of thermal inertia on Mars' seasonal pressure variation and the effect of the weather component p 3952 N94-33238

WEATHER FORECASTING
The climate of the Mediterranean basin: Its sensitivity to global change p 3778 N94-30993
Estimation and analysis of climate-scale rainfall over the Tropical Pacific p 3783 N94-32030
Use of Air Force cloud cover data to evaluate and improve cloud forecasts and parameterizations in mesocale meteorological models
[AD-A277384] p 3784 N94-32054
The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis
[AD-A277207] p 3784 N94-32094
Coordination of mesoscale meteorological research between ASL and European group
[AD-A276730] p 3784 N94-32162
Development and testing of improved techniques for modeling the hydrologic cycle in a mesoscale weather prediction system
[AD-A277416] p 3786 N94-32921
Forecasters handbook for the Philippine Islands and surrounding waters
[AD-A277993] p 3787 N94-33089
Might it be possible to predict the onset of major Martian dust storms? p 3948 N94-33215

WEATHER STATIONS
Selection of climate station data using clustering and triangulated irregular network techniques
[AD-A276658] p 3784 N94-32046
Station climatic summaries: China, the former USSR, and Mongolia
[AD-A276548] p 3784 N94-32057
Recommendations for meteorological data collection during physiological field studies
[AD-A276834] p 3901 N94-32153

WEATHERING
Deposition rates of oxidized iron on Mars p 3945 N94-33198
Magmatic volatiles and the weathering of Mars p 3946 N94-33201

WEAVING
Characterization and manufacture of braided composites for large commercial aircraft structures p 3630 N94-33137

WEDGES
Control of hypersonic aerodynamic forces with surface blowing p 3567 N94-31216
Penetrable wedge analysis
[AD-A277219] p 3845 N94-32022

WEIGHT ANALYSIS
Aircraft weight prediction capability. Volume 1: Weight study and results
[AD-A277206] p 3579 N94-32062

WEIGHT MEASUREMENT
Innovative mechanism for measuring the mass properties of an object p 3604 N94-33299

WEIGHTLESSNESS
Muscle disuse through tail-suspension: Etiology and therapeutics p 3796 N94-31746
An experimental testbed for a free-floating manipulator
[AD-A277350] p 3726 N94-32334
A large motion zero-gravity suspension system for experimental simulation of orbital construction and deployment
[NASA-CR-195881] p 3668 N94-33037

WEIGHTLESSNESS SIMULATION
A large motion zero-gravity suspension system for experimental simulation of orbital construction and deployment
[NASA-CR-195881] p 3668 N94-33037

WELD TESTS
A review of weldment failure modes and weldability testing methods
[AD-A278096] p 3729 N94-33251

WELDABILITY
A review of weldment failure modes and weldability testing methods
[AD-A278096] p 3729 N94-33251

WELDED JOINTS
Nd-YAG laser welding of the fiber optic connector to the header shell on the 2SL actuator
[DE94-006104] p 3723 N94-31621
Acceptance criteria for weld defects in aluminium weldments
[PB94-138575] p 3735 N94-31641
Correlation of flux composition and inclusion characteristics with submerged arc weld metal properties in HY-100 steel
[AD-A277040] p 3726 N94-32261
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639
A review of weldment failure modes and weldability testing methods
[AD-A278096] p 3729 N94-33251

WELDING
Effect of vibratory stress relief during welding of thick stainless steel plate
[DE94-006557] p 3733 N94-31312
Solid-state resistance upset welding: A process with unique advantages for advanced materials
[DE94-005941] p 3723 N94-31524
Pinched propagation of high-power, pulsed electron beams for welding and materials processing applications
[AD-A276925] p 3726 N94-32236
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639

WELDING MACHINES
Development of an automated wire delivery system for robotic welding applications
[NASA-CR-194216] p 3727 N94-32479

WETTABILITY
Aging effects on the microstructure, surface characteristics and wettability of Cu pretinned with Sn-Pb solders
[DE94-007033] p 3641 N94-31638

WETTING
Interfacial behaviour: Wettability in SiC(sub p) metal matrix composites
[ISBN-0-315-87206-3] p 3621 N94-31835
Physics of heat pipe rewetting
[NASA-CR-195902] p 3913 N94-33148

WHEATSTONE BRIDGES
The constant current loop: A new paradigm for resistance signal conditioning p 3685 N94-32461

WHIP ANTENNAS
Broadband, high-power, 2-30 MHz, twin-whip antenna. Computer and 1/10-scale model design study
[AD-A277619] p 3682 N94-32971

WHISTLERS
Lightning-induced coupling of the radiation belts to geomagnetically conjugate ionospheric regions p 3772 N94-31773
Dispersion relations for a plasma-filled helix-loaded-waveguide
[DE94-006333] p 3675 N94-31781
Plasma and radio waves from Neptune: Source mechanisms and propagation
[NASA-CR-195877] p 3943 N94-33103

WHITE DWARF STARS
Extreme ultraviolet opacity sources in the DA white dwarf G191-B2B p 3924 N94-31210

WHITE NOISE
Peak detection of Swerling type targets. Part 1: Detection probabilities in white noise
[AD-A276217] p 3670 N94-31062
Stochastic realization of a Gaussian stochastic control system
[CWI-BS-R9320] p 3852 N94-32350
The effects of a multipath channel and interference on coherent M-PSK digital communication systems
[AD-A278158] p 3684 N94-33254

WIND (METEOROLOGY)
A comparison of predictors for first-guess wind speed errors
[AD-A276460] p 3781 N94-31239
An integrated cloud observation and modeling investigation in support of the ARM program
[DE94-003160] p 3785 N94-32716
Evolution of diurnal surface winds and surface currents for Monterey Bay
[AD-A277649] p 3790 N94-33057

WIND DIRECTION
Wind-speed measurements with a scanning elastic-backscatter lidar
[DE94-004974] p 3785 N94-32726
Mexico City ozone concentrations as a function of readily-available meteorological parameters
[DE94-007576] p 3768 N94-32814
Polar sediment accumulation: Role of surface winds at the two poles p 3951 N94-33233

WIND EFFECTS
The effect of westerly wind bursts on a tropical ocean general circulation model
[AD-A276423] p 3788 N94-31448

The properties of sunflecks in a flexible plant canopy, and their relationship to turbulence p 3782 N94-31775
Regional sedimentological variations among dark crater floor features: Toward a model for modern eolian sand distribution on Mars p 3946 N94-33203

WIND EROSION
Arid regions and wind erosion p 3780 N94-31005

WIND MEASUREMENT
Three dimensional vorticity field in the California current system
[AD-A276951] p 3788 N94-32220
Wind-speed measurements with a scanning elastic-backscatter lidar
[DE94-004974] p 3785 N94-32726
Evolution of upwelling fronts off the coast of Portugal
[NASA-CR-195692] p 3790 N94-33045

WIND TUNNEL MODELS
Model borne data management system for wind tunnel testing, phase 2
[AD-A276296] p 3587 N94-31295

WIND TUNNEL TESTS
Model borne data management system for wind tunnel testing, phase 2
[AD-A276296] p 3587 N94-31295
Hypervelocity Tunnel 9 Mach 10/14 Calibration
[AD-A275960] p 3587 N94-31318
Investigation of sonic boom for the Space Shuttle: High cross-range orbiter
[NASA-TM-108238] p 3860 N94-31336
Investigation of sonic boom for the Space Shuttle: Low cross-range orbiter
[NASA-TM-108237] p 3860 N94-31337
Research in marine boundary layer intermittency
[AD-A276076] p 3701 N94-31460
Three-dimensional velocity measurements on a 6:1 prolate spheroid at 10 deg angle of attack
[AD-A276485] p 3702 N94-31476
Boundary layer study on nozzle wall at hypersonic velocities p 3569 N94-31882
A critical assessment of UH-60 main rotor blade airfoil data
[NASA-TM-103985] p 3571 N94-32063
A non-local model for prediction of the probability density function of turbulent fluctuations in boundary-layer flows p 3706 N94-32076
Six degree of freedom flight dynamic model of a Mk-82 store
[AD-A277065] p 3580 N94-32362
An experimental study of the flowfield on a semispan rectangular wing with a simulated glaze ice accretion
[NASA-CR-195301] p 3571 N94-32475
Aerodynamic drag of droplets in turbulent flow fields
[ISBN-0-315-75827-9] p 3571 N94-32491
Results for the hybrid laminar flow control experiment conducted in the NASA Langley 8-foot transonic pressure tunnel on a 7-foot chord model
[NASA-TM-107582] p 3601 N94-32870
Control of low-speed turbulent separated flow over a backward-facing ramp
[NASA-TM-109740] p 3573 N94-33071
Structural damping studies at cryogenic temperatures
[NASA-TM-109073] p 3740 N94-33118
Calibration and validation studies in the LENS facility
[AD-A278403] p 3591 N94-33167
Backward-facing step measurements at low Reynolds number, Re(sub h)=5000
[NASA-TM-108807] p 3711 N94-33290

WIND VARIATIONS
Low frequency variability observed in the tropical Atlantic Ocean p 3778 N94-30991

WIND VELOCITY
A comparison of predictors for first-guess wind speed errors
[AD-A276460] p 3781 N94-31239
Scatterometer wind-speed exponents: A review and SAXON 35-GHz measurements
[AD-A276568] p 3783 N94-31937
Recurvature dynamics of a typhoon
[AD-A276792] p 3784 N94-32164
Wind-speed measurements with a scanning elastic-backscatter lidar
[DE94-004974] p 3785 N94-32726
Mexico City ozone concentrations as a function of readily-available meteorological parameters
[DE94-007576] p 3768 N94-32814

WIND VELOCITY MEASUREMENT
Scatterometer wind-speed exponents: A review and SAXON 35-GHz measurements
[AD-A276568] p 3783 N94-31937

WINDPOWER UTILIZATION
NEMO: Advanced energy systems and technologies
[DE94-721996] p 3760 N94-31767
Renewable energy technology development at Sandia National Laboratories
[DE94-007734] p 3761 N94-32383

WING NACELLE CONFIGURATIONS
Multidisciplinary optimization of high-speed civil transport configurations using variable-complexity modeling p 3578 N94-31881

WING PANELS
Active vortex control for a high performance wing
[AD-D016140] p 3573 N94-32974

WING PROFILES
Computation of three-dimensional compressible boundary layers to fourth-order accuracy on wings and fuselages
[NASA-CR-4269] p 3709 N94-32871

WINGS
Grid sensitivity for aerodynamic optimization and flow analysis p 3568 N94-31287
Finite element analysis of MB326H Macchi wing lower spar cap fatigue cracks
[AD-A277062] p 3580 N94-32264
Active vortex control for a high performance wing
[AD-D016140] p 3573 N94-32974
Structural testing of the technology integration box beam p 3628 N94-33125
Resin transfer molding for advanced composite primary wing and fuselage structures p 3628 N94-33128
Test and analysis results for composite transport fuselage and wing structures p 3628 N94-33129
A new method for calculating wing along aerodynamics to angle of attack 180 deg
[AD-A277965] p 3574 N94-33263

WINTER
Simulation of a precipitation event in the western United States
[DE94-004835] p 3786 N94-32791

WIRE
Novel growth technologies for in situ formation of semiconductor quantum wire structures
[AD-A277188] p 3902 N94-32255
Development of an automated wire delivery system for robotic welding applications
[NASA-CR-194216] p 3727 N94-32479

WOOD
Laser applications in wood processing
[PB94-138567] p 3717 N94-31840

WORK CAPACITY
Drug-related problems in the workplace
[CRANFIELD-AERO-9306] p 3914 N94-31538

WORK HARDENING
Work hardening behavior in aluminum alloy 2090
[DE94-007036] p 3643 N94-32064

WORKING FLUIDS
Application of natural refrigerants: A rational solution to a pressing problem
[PB94-138781] p 3668 N94-31073

WORKLOADS (PSYCHOPHYSIOLOGY)
Unit specific crew rest strategies: Phase 1 evaluation of the 1/212th Aviation Battalion during shiftwork transitions
[AD-A277122] p 3804 N94-32379
The effects of Above Real-Time Training (ARTT) in an F-16 simulator p 3591 N94-32474

WORKSTATIONS
Minimization of carpal tunnel syndrome
[AD-A276409] p 3795 N94-31363
Modular Simulator System (MSS). System/segment specification for the generic modular simulator system-instructor/operator station module, volume 12
[AD-A276979] p 3589 N94-32318
A high-speed linear algebra library with automatic parallelism p 3828 N94-32440
Gigabits to the Desktop: Installing tomorrow's networks today
[DE94-007701] p 3827 N94-32646
Overview of shock physics codes for armor analysis
[DE94-008948] p 3739 N94-32842
Design and Monte Carlo analysis of an unmanned aerial vehicle
[AD-A277648] p 3580 N94-33056

WOVEN COMPOSITES
Analysis of new composite architectures
[NASA-CR-195303] p 3626 N94-32904
Comparison of the compressive strengths for stitched and toughened composite systems
[NASA-TM-109108] p 3627 N94-32939

WRIST
Minimization of carpal tunnel syndrome
[AD-A276409] p 3795 N94-31363

WURTZITE
Pump-probe method for investigating laser ablation and optical damage threshold mechanisms in optical materials
[DE94-008291] p 3720 N94-32753

X

X RAY ABSORPTION
Characterization of the rare earth orthophosphates and Ce-doped LaPO4 by x ray absorption spectroscopy
[DE94-006313] p 3898 N94-31630
The zinc electrode: Reactions and mechanisms
[DE94-007977] p 3691 N94-31919
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799
X ray absorption study of pulsed laser deposited boron nitride films
[DE94-008295] p 3662 N94-32855
Dependence of x ray absorption magnetic circular dichroism on layer periodicity in iron-platinum multilayers
[DE94-008786] p 3647 N94-32892
Evidence for symmetry breaking local distortions in thallium barium copper oxide
[DE94-006149] p 3907 N94-32944

X RAY ANALYSIS
Element-specific magnetic hysteresis measurements, a new application of circularly polarized soft x-rays
[DE94-007122] p 3858 N94-31397
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Simplified ultra-high resolution optic for soft x ray imaging
[AD-A278424] p 3885 N94-33331

X RAY ASTRONOMY
Workshop on Physics of Accretion Disks Around Compact and Young Stars
[NASA-CR-195756] p 3927 N94-31116

X RAY BINARIES
Evolution of vaporizing pulsars p 3929 N94-31128
Can a variable alpha induce limit cycle behavior and exponential luminosity decay in transient soft x ray sources? p 3929 N94-31129
A study of angular momentum loss in binaries using the free Lagrange method p 3931 N94-31134
A search for 100 TeV gamma ray emission from the x ray binary pulsar 4U 0115+63 using the CYGNUS extensive air-shower array p 3955 N94-31900
Winds from disks in compact binaries
[DE94-007452] p 3938 N94-32137
The evolutionary status of PSR 1259-63
[DE94-007094] p 3938 N94-32503

X RAY DETECTORS
Development and application of photosensitive device systems to studies of biological and organic materials
[DE94-008503] p 3793 N94-32516

X RAY DIFFRACTION
Observation of the traveling component of an x ray standing wave field
[DE94-007671] p 3672 N94-31317
Adsorption of water to the metal/polymer interface studied by neutron and x ray reflectivity
[DE94-005578] p 3651 N94-31649
Group 12 thiolates: Syntheses, characterization and decomposition pathways
[AD-A277055] p 3900 N94-32011
The new Metals and Alloys Indexes, search manual: A phase diagram research tool
[DE94-005371] p 3643 N94-32098
SUNY beamline facilities at the National Synchrotron Light Source
[DE94-006343] p 3905 N94-32770
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781
Extended-range order in glasses
[DE94-008135] p 3661 N94-32798
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799

X RAY IMAGERY
A multi-frequency study of an x ray selected sample of active galactic nuclei p 3937 N94-31987
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629

X RAY INSPECTION
Characterization of interface structure in multilayers using specular x ray reflectance
[DE94-007698] p 3657 N94-32358

X RAY LASERS
Impact of observed hyperfine splitting on X-ray laser gain
[DE94-005822] p 3717 N94-32128
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Quantum fluctuations of vortices in Josephson-coupled superconductors
[DE94-007609] p 3905 N94-32747

Progress in understanding and improving x ray lasers
[DE94-006048] p 3720 N94-32794
Ultrafast x ray sources
[AD-A277455] p 3721 N94-33012

X RAY OPTICS
X ray optics for science and technology
[AD-A277369] p 3880 N94-32155
Diamond turning in the production of x ray optics
p 3604 N94-33298
Simplified ultra-high resolution optic for soft x ray imaging
[AD-A278424] p 3885 N94-33331

X RAY SCATTERING
Experimental investigation of phonon eigenvectors using x ray interference fields
[ETN-94-95751] p 3865 N94-31511
Anomalous small angle x ray scattering studies of amorphous metal-germanium alloys
[DE94-007258] p 3900 N94-32065
X ray optics for science and technology
[AD-A277369] p 3880 N94-32155
Anisotropic phase separation through the metal-insulator transition in amorphous Mo-Ge and Fe-Ge alloys
[DE94-007259] p 3646 N94-32795
Dependence of x ray absorption magnetic circular dichroism on layer periodicity in iron-platinum multilayers
[DE94-008786] p 3647 N94-32892

X RAY SOURCES
Theoretical studies of x ray emission from clusters of galaxies p 3954 N94-31103
The physics of black hole x ray novae
p 3932 N94-31143
A multi-frequency study of an x ray selected sample of active galactic nuclei p 3937 N94-31987
X ray imaging and x ray source development at Lawrence Livermore National Laboratory
[DE94-007077] p 3719 N94-32629
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799
Ultrafast x ray sources
[AD-A277455] p 3721 N94-33012

X RAY SPECTROSCOPY
Spectroscopy and atomic physics in EBIT and SuperEBIT
[DE94-006050] p 3864 N94-31508
The Los Alamos National Laboratory precision double crystal spectrometer
[DE94-008075] p 3713 N94-32706
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799
Structural studies of photoinduced intramolecular electron transfer in cyclopentadienylnickelnitrosyl
[DE94-008467] p 3874 N94-32876
Evidence for symmetry breaking local distortions in thallium barium copper oxide
[DE94-006149] p 3907 N94-32944
Electron cyclotron resonance plasma oxidation studies of InP
[AD-A277431] p 3893 N94-33007

X RAY STARS
Workshop on Physics of Accretion Disks Around Compact and Young Stars
[NASA-CR-195756] p 3927 N94-31116
Disk irradiation and light curves of x ray novae
p 3929 N94-31124
Observational constraints on black hole accretion disks p 3929 N94-31126
Stellar x ray polarimeter polarizer development and calibration at LEA/LLNL
[DE94-006400] p 3712 N94-31783

X RAY TUBES
Design and characterization of a pulsed x ray source for fluorescent lifetime measurements
[DE94-007495] p 3880 N94-32138

X RAYS
Theoretical studies of x ray emission from clusters of galaxies p 3954 N94-31103
Observation of the traveling component of an x ray standing wave field
[DE94-007671] p 3672 N94-31317
Double photoionization of helium with synchrotron x rays: Proceedings
[DE94-006737] p 3866 N94-31668
X ray pulse considerations and electron flow in high voltage diodes
[AD-A277301] p 3868 N94-32044
X ray optics for science and technology
[AD-A277369] p 3880 N94-32155
Simplified ultra-high resolution optic for soft x ray imaging
[AD-A278424] p 3885 N94-33331

X-30 VEHICLE
The National Aerospace Plane (NASP): Development issues for the follow-on vehicle
[AD-A278417] p 3581 N94-33329

XENON CHLORIDE LASERS
Diagnostics of high-brightness short-pulse lasers and the plasmas they generate
[DE94-006165] p 3716 N94-31624

Y

YAG LASERS
High-power CW diode-laser-array-pumped solid-state lasers and efficient nonlinear optical frequency conversion
[AD-A276126] p 3714 N94-31278
Methods for SBS threshold reduction
[AD-A276554] p 3717 N94-31936
Backscatter and transmission of aerosol at UV through middle IR wavelengths
[AD-A277127] p 3718 N94-32305
High average power pulsed phase conjugate laser with birefringence correction
[DE94-006049] p 3719 N94-32659

YANG-MILLS FIELDS
The Kaluza-Klein approach and gauge supersymmetry
[ISBN-0-315-86553-9] p 3912 N94-31911
Tensor gauge potentials in loop space formulation of Yang-Mills fields
[PB94-147147] p 3912 N94-31924

YANG-MILLS THEORY
Tensor gauge potentials in loop space formulation of Yang-Mills fields
[PB94-147147] p 3912 N94-31924

YBCO SUPERCONDUCTORS
Low dispersion of the muon precession frequency in HTSC samples YBa2Cu3O(x) and EuBa2Cu3O(x)
[DE94-608388] p 3896 N94-31395
High performance YBCO films
[AD-A276493] p 3897 N94-31531
High pressure experiments on the Y-Ba-Cu-O superconductors: A major role for holes
[ETN-94-96013] p 3897 N94-31547
Impurities and conductivity in a D-wave superconductor
[DE94-006222] p 3898 N94-31628
Experimental evidence for lattice effects in high temperature superconductors
[DE94-006250] p 3899 N94-31633
The charging effect in high-Tc superconducting thin films
[AD-A277265] p 3900 N94-32040
Defect cascades produced by neutron irradiation in YBa2Cu3O(7-delta) superconductors
[DE94-007700] p 3903 N94-32372
Development, characterization, and applications of high temperature superconductor nanobridge Josephson junctions
[DE94-008113] p 3903 N94-32409
Effect of twin boundary density on the vortex melting transition in YBa2Cu3O(7-delta) single crystals
[DE94-007684] p 3904 N94-32601
YBCO Josephson Junction arrays
[AD-A277426] p 3908 N94-33005
The 20 GHz circularly polarized, high temperature superconducting microstrip antenna array
[NASA-CR-195097] p 3683 N94-33083
Microstructures and epitaxy in oxide superconductor thin films and devices
[AD-A278427] p 3910 N94-33332

YIELD STRENGTH
Tearing resistance of a thin shell against projectile penetration: Material property effects
[DE94-007466] p 3733 N94-31316
Influence of volume fraction of component materials and interlayer bond strength on fracture toughness of multi-layer Al 6090-25 volume percent SiCp and Al 5182 laminates
[DE94-007141] p 3626 N94-32665
Indentability of conventional and negative Poisson's ratio foams p 3629 N94-33131

YTTERBIUM COMPOUNDS
Fermi surface instability at 0.4 K in a heavy-fermion YbBiPt: SDW?
[DE94-006224] p 3899 N94-31916

YTTRIA-STABILIZED ZIRCONIA
High-temperature deformation and fracture toughness of duplex ceramic microstructures p 3653 N94-31945

YTTRIUM OXIDES
Mechanical properties of vacuum-sintered yttria ceramics
[DE94-008138] p 3659 N94-32617

YTTRIUM-ALUMINUM GARNET
High-temperature deformation and fracture toughness of duplex ceramic microstructures p 3653 N94-31945
Development of materials for spectral hole burning applications
[AD-A278408] p 3909 N94-33324

Z

ZEOLITES
Double rotation NMR studies of zeolites and aluminophosphate molecular sieves
[DE94-007032] p 3866 N94-31637
Studies of the fundamental nature of catalytic acidity, sites and intermediates
[DE94-006999] p 3646 N94-32805

ZETA PINCH
Instability heating of solid-fiber Z pinches
[DE94-007055] p 3889 N94-31809

ZINC
The zinc electrode: Reactions and mechanisms
[DE94-007977] p 3691 N94-31919

ZINC ALLOYS
Phase relationships and stability of the (mu)- and (zeta)-phases in the Ag-Al-X (X=Zn, Ga, Ge) systems
[DE94-009391] p 3648 N94-33270

ZINC COMPOUNDS
Lightweight zinc electrode
[AD-D016181] p 3698 N94-33181

ZINC OXIDES
The zinc electrode: Reactions and mechanisms
[DE94-007977] p 3691 N94-31919

ZINC SELENIDES
The relationship of the electronic structures of semiconductor surfaces and heterostructures to crystal growth
[AD-A276465] p 3896 N94-31473

ZINC SULFIDES
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS2 during ion bombardment
[DE94-008487] p 3871 N94-32515

ZIRCONIUM
Theoretical studies of zirconium and carbon clusters with molecular dynamics simulations
[DE94-005276] p 3862 N94-31146
A low cost igniter utilizing an SCB and titanium sub-hydride potassium perchlorate pyrotechnic
[DE94-006467] p 3666 N94-31827

ZIRCONIUM ALLOYS
Irradiation-induced phase transformations in zirconium alloys
[DE94-008484] p 3648 N94-32993

ZIRCONIUM ISOTOPES
Influence of long-range correlations on the spectral functions and response of 48Ca and 90Zr
[ETN-94-96017] p 3865 N94-31537

ZIRCONIUM OXIDES
Sol-gel metal oxide and metal oxide/polymer multilayers applied by meniscus coating
[DE94-005813] p 3649 N94-31199
Cost-effective ceramic machining: Summary of three-body wear experiments
[DE94-007757] p 3650 N94-31354
Fatigue crack propagation and fractography of 3Y-TZP and ZTA
[ISBN-0-315-86561-X] p 3736 N94-31912
Ion-irradiation-induced densification of zirconia sol-gel thin films
[DE94-006248] p 3656 N94-32103
Sol-gel coatings for high power laser optics: Past, present, and future
[DE94-007240] p 3718 N94-32252
Interface engineering in oxide fiber/oxide matrix composites
[AD-A277672] p 3627 N94-33029

ZONAL FLOW (METEOROLOGY)
Dynamic climatology of West Africa
p 3778 N94-30988

ZOOPLANKTON
Bioluminescence bathyphotometer
[AD-D016102] p 3790 N94-32959

PERSONAL AUTHOR INDEX

Typical Personal Author Index Listing

ALEXOPOULOS, JIM S. ..... p 436 N94-12023

PERSONAL AUTHOR | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AAMODT, R. E. ..... p 3890 N94-32520
AARTS, ERIK ..... p 3842 N94-31393
ABBATE, A. ..... p 3862 N94-32456
ABBE, B. S. ..... p 3599 N94-31428
ABBOTT, BEN ..... p 3817 N94-32219
ABBOTT, R. T. ..... p 3648 N94-33281
ABDELNASER, AHMAD SHEHADEH ..... p 3735 N94-31777
ABEL, P. B. ..... p 3606 N94-33313
ABEL, PHILIP B. ..... p 3728 N94-32893
ABEL, S. A. ..... p 3868 N94-31921
ABNEY, DARRELL T. ..... p 3883 N94-32738

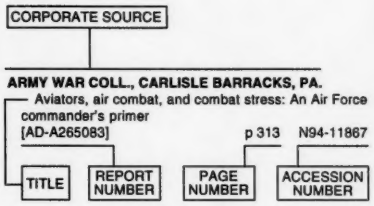
Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABERDEEN PROVING GROUND, MD.
In-bed multiport sampling system
[AD-A275908] p 3763 N94-31339

Chamber optics for testing passive remote sensing vapor detectors
[AD-A275909] p 3878 N94-31340

Focused feasibility study final field sampling plan
[AD-A277445] p 3769 N94-33105

ACADEMY OF SCIENCES (USSR), SAINT PETERSBURG.
F0-975, A0-980 as eye-witnesses of confinement
[PB94-147105] p 3868 N94-31923

ACOUSTICAL SOCIETY OF AMERICA, NEW YORK, NY.
Minutes: Accredited Standards Committee on Bioacoustics, S3. US TAG for ISO/TC 43, acoustics, IEC/TC 29 electroacoustics, and ISO/TC 108/SC4 human exposure to mechanical vibration and shock
[AD-A276201] p 3795 N94-31490

ADAPTIVE SOLUTIONS, INC., BEAVERTON, OR.
High performance hardware and software for pattern recognition and image processing
[AD-A276405] p 3816 N94-32130

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
AGARD highlights 94/1, April 1994
[AGARD-HIGHLIGHTS-94/1] p 3956 N94-31196

AGARD membership, 1994
[AGARD-MEMB-94] p 3914 N94-31197

Aerospace software engineering for advanced systems architectures
[AD-A277101] p 3581 N94-31977

Atmospheric propagation effects through natural and man-made obscurants for visible to MM-wave radiation
[AD-A276919] p 3679 N94-32235

AEROJET SOLID PROPULSION CO., SACRAMENTO, CA.
The 7.5K lbf thrust engine preliminary design for Orbit Transfer Vehicle
[NASA-CR-189175] p 3614 N94-31618

AERONAUTICAL RADIO, INC., ANNAPOLIS, MD.
Active matrix liquid crystal display. Industry survey results
[AD-A276415] p 3895 N94-31329

AERONAUTICAL RESEARCH INST. OF SWEDEN, STOCKHOLM.
Prediction of transonic potential flow with slipstreams around configurations
[FFA-TN-1992-15] p 3568 N94-31220

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Finite element analysis of MB326H Macchi wing lower spar cap fatigue cracks
[AD-A277062] p 3580 N94-32264

Assessment of impact damage in composite structures
[AD-A277063] p 3624 N94-32265

Six degree of freedom flight dynamic model of a Mk-82 store
[AD-A277065] p 3580 N94-32362

AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OH.
Aircraft weight prediction capability. Volume 1: Weight study and results
[AD-A277206] p 3579 N94-32062

AEROSPACE CORP., EL SEGUNDO, CA.
The impact of LDEF results on the space application of metal matrix composites p 3595 N94-31034

An overview of the on-orbit contamination of the Long Duration Exposure Facility (LDEF) p 3598 N94-31049

Honeycomb sandwich structures: Vented versus unvented designs for space systems
[AD-A276713] p 3624 N94-32122

Soft x ray photoelectron spectroscopy study of the interaction of Cr with MoS2(0001)
[AD-A276916] p 3635 N94-32233

Aerospace sponsored research
[ATR-93(8498)-1] p 3966 N94-32949

Torque characteristics of solid lubricated precision bearings during oscillatory motion
[AD-A278133] p 3728 N94-33061

Possible effect of the chlorine oxide dimer on transient ozone loss in rocket plumes
[AD-A278135] p 3616 N94-33094

Characteristics of ion flow in the quiet state of the inner plasma sheet
[AD-A277451] p 3894 N94-33106

Data processing algorithms for on-board satellite event analysis
[AD-A278406] p 3838 N94-33168

Temperature dependence of single-event burnout in n-channel power MOSFET's
[AD-A277921] p 3698 N94-33177

The impact of ASIC devices on the SEU vulnerability of space-borne computers
[AD-A278134] p 3808 N94-33252

Spacecraft environmental anomalies expert system
[AD-A277962] p 3612 N94-33262

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Analysis of pursuit tracking eye movements in pilots and nonfliers
[AD-A276597] p 3799 N94-32035

Aircrew Eye/Respiratory Protection (AERP): 16-hour extended wear evaluation of chemical protective equipment
[AD-A277288] p 3804 N94-32609

AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OH.
Human Computer Interface Specifications (HCIS) for the Integrated Maintenance Information System (IMIS)
[AD-A277184] p 3566 N94-32254

AEROSPATIALE, CANNES (FRANCE).
Fusion of multispectral (XS) and Panchromatic (P) SPOT images and radar images p 3750 N94-32541

AIR FORCE ACADEMY, CO.
Room temperature molten salts for advanced energy conversion and storage
[AD-A277777] p 3763 N94-33015

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, SCOTT AFB, IL.
Station climatic summaries: China, the former USSR, and Mongolia
[AD-A276548] p 3784 N94-32057

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.
An analysis of the records management process to determine the impact of automation on productivity
[AD-A275923] p 3916 N94-31344

An evaluation of aircraft maintenance performance factors in the objective wing
[AD-A276010] p 3565 N94-31362

The development and use of an evaluation mechanism for the assessment of software configuration management tools
[AD-A275961] p 3810 N94-31383

A study of theoretical models for managing technology change and a comparison to a radio frequency identification implementation
[AD-A276012] p 3672 N94-31385

Assessing the vulnerability of multi-commodity networks with failing components
[AD-A278434] p 3684 N94-33334

AIR FORCE OCCUPATIONAL MEASUREMENT CENTER, RANDOLPH AFB, TX.
Aircraft communication and navigation systems and communication and navigation systems
[AD-A277309] p 3582 N94-32328

AIR TRANSPORT GROUP HEADQUARTERS, ASTRA (ONTARIO).
A neural network application to search and rescue satellite aided tracking (SARSAT) p 3613 N94-33345

AKRON UNIV., OH.
Compatibility of refrigerants and lubricants with elastomers
[DE94-008552] p 3658 N94-32518

A procedure for 3-D contact stress analysis of spiral bevel gears
[NASA-CR-194472] p 3728 N94-32929

ALABAMA UNIV., HUNTSVILLE.
On the linearity of fast atomic oxygen effects p 3594 N94-31027

Preliminary results from the CONCAP-2-01 and EIOM-3 experiments on STS-46 p 3596 N94-31042

Numerical simulation of interplanetary dynamics p 3933 N94-31566

Fiber optic chemical sensors
[AD-A277128] p 3881 N94-32380

BATSE data analysis
[NASA-CR-195818] p 3927 N94-32942

Ionospheric plasma outflow in response to transverse ion heating: Self-consistent macroscopic treatment
[NASA-CR-195820] p 3893 N94-33048

ALABAMA UNIV., UNIVERSITY.
High energy physics program at the University of Alabama
[DE94-006544] p 3875 N94-31488

Penetrable wedge analysis
[AD-A277219] p 3845 N94-32022

ALASKA UNIV., FAIRBANKS.
Theory, Image Simulation, and Data Analysis of Chemical Release Experiments
[NASA-CR-194865] p 3954 N94-31101

ALBERTA RESEARCH COUNCIL, EDMONTON.
The CF-18 diagnostic and maintenance expert system project p 3567 N94-33338

ALBERTA UNIV., EDMONTON.
Automatic resonator alignment and power stabilization of high power C02 lasers
[ISBN-0-315-77217-4] p 3714 N94-31472

The spatial development of the magnetospheric low-latitude boundary layer
[ISBN-0-315-77418-5] p 3776 N94-33111

ALLIED-SIGNAL AEROSPACE CO., KANSAS CITY, MO.
Validation of the Environmentally Conscious Manufacturing Integrated Demonstration hardware
[DE94-003824] p 3765 N94-32144

New thick film feedthrough configurations
[DE94-008706] p 3694 N94-32582

ALLIED-SIGNAL CORP., KANSAS CITY, MO.
Assembly flow simulation of a radar
p 3823 N94-32431

ALTAMIRA INSTRUMENTS, INC., PITTSBURGH, PA.
Direct aromatization of methane
[DE94-008719] p 3638 N94-32888

AMAX RESEARCH AND DEVELOPMENT CENTER, GOLDEN, CO.
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane
[DE94-006759] p 3759 N94-31272

AMERASIA TECHNOLOGY, INC., WESTLAKE VILLAGE, CA.
Advanced satellite communication system
[NASA-CR-194211] p 3681 N94-32477

AMERICAN FOUNDREYMENS' SOCIETY, DES PLAINES, IL.
Expandable pattern casting research
[DE94-004342] p 3668 N94-31604

AMERICAN WELDING INST., LOUISVILLE, TN.
Empirical modeling for intelligent, real-time manufacture control p 3839 N94-32424

AMES LAB., IA.
Synthesis, characterization, phase diagrams and superconducting, and normal state magnetic properties of La(2-x)Sr(x)CuO4 (0 is less than or equal to x which is less than or equal to 0.08) and electrochemically oxidized La(2-x)Sr(x)CuO(4 + delta) (0 is less than or equal to x which is less than or equal to 0.33, 0 is less than or equal to delta which is less than or equal to 0.12)
[DE94-005260] p 3895 N94-31067
Proceedings of the Seventeenth DOE Solar Photochemistry Research Conference
[DE94-005552] p 3759 N94-31648
Photonic band gap materials
[DE94-005566] p 3677 N94-32101
The intramolecular cyclization of bis-2,5-dimethylene-2,5-dihydrofurans and bis-2,5-dimethylene-2,5-dihydrothiophenes: An approach to macrocycles
[DE94-007060] p 3657 N94-32377
Development of a low-latency scalar communication routine on message-passing architectures
[DE94-007061] p 3827 N94-32683

AMSTERDAM UNIV. (NETHERLANDS).
Lambek calculus is L-complete
[LP-93-14] p 3841 N94-31388
What comes first in dynamic semantics: A compositional, non-representational account of natural language presupposition
[LP-93-15] p 3855 N94-31389
The interpretation of free focus
[CL-93-01] p 3855 N94-31390
An algebraic view on Rosetta
[CL-93-02] p 3841 N94-31391
The meaning of duplicates in the relational database model
[CT-93-04] p 3916 N94-31392
Proving theorems of the Lambek calculus of order 2 in polynomial time
[CT-93-05] p 3842 N94-31393
Resumptive quantifiers in exception sentences
[LP-93-11] p 3855 N94-31403
Binary quantifiers and relational semantics
[LP-93-13] p 3855 N94-31404
On the independent axiomatizability of modal and intermediate logics
[ML-93-17] p 3856 N94-31407
Extensional realizability
[ML-93-18] p 3856 N94-31408
Comparing models of the non-extensional typed lambda-calculus
[ML-93-19] p 3842 N94-31409
The decidability of dependency in intuitionistic propositional logic
[ML-93-20] p 3856 N94-31410
Sums and quantifiers
[LP-93-05] p 3856 N94-31411
Effective truth
[ML-93-15] p 3856 N94-31416
Correspondence theory for extended modal logics, version 3.0
[ML-93-16] p 3856 N94-31417
Updates in dynamic semantics
[LP-93-06] p 3856 N94-31450
On the equivalence of Lambek categorial grammars and basic categorial grammars
[LP-93-07] p 3842 N94-31451
Information acquisition from multi-agent resources; abstract
[LP-93-08] p 3917 N94-31452
Completeness and decidability of the mixed style of inference with composition
[LP-93-09] p 3842 N94-31453
Weaks vs. strong readings of donkey sentences and monotonicity inference in a dynamic setting
[LP-93-10] p 3856 N94-31468
Spectral inhomogeneity of the bacterial light-harvesting antennae: Causes and consequences
[ETN-94-96020] p 3792 N94-31533
The measurement of the hadronic energy flow and jet production with the ZEUS calorimeter in deep inelastic scattering events at HERA
[ETN-94-96021] p 3865 N94-31534

ANALEX SPACE SYSTEMS, INC., COCOA BEACH, FL.
Pen-based computers: Computers without keys
p 3808 N94-32434
Automated mainframe data collection in a network environment p 3923 N94-32443

ANALYTICAL METHODS, INC., REDMOND, WA.
A novel potential/viscous flow coupling technique for computing helicopter flow fields
[NASA-CR-193272] p 3571 N94-32476

ANALYTICAL SERVICES AND MATERIALS, INC., HAMPTON, VA.
COINS: A composites information database system
p 3627 N94-33123

APA OPTICS, INC., BLAINE, MN.
GaAs/GaN strained layer superlattice materials for high temperature transistors, phase 1
[AD-A276115] p 3897 N94-31528

APPLIED EXPERTISE, INC., ARLINGTON, VA.
Software reuse case study: TRILLIUM
[AD-A276108] p 3811 N94-31465

APPLIED RESEARCH CORP., LANDOVER, MD.
A low-cost, CCD solid state star tracker
[NASA-CR-192722] p 3882 N94-32417

APPLIED SCIENCE AND TECHNOLOGY, INC., WOBURN, MA.
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A276904] p 3692 N94-32215

ARCO POWER TECHNOLOGIES, INC., WASHINGTON, DC.
Electromagnetic wave reflection from irregular plasma layers
[AD-A276727] p 3678 N94-32161

ARGONNE NATIONAL LAB., IDAHO FALLS, ID.
Observation of the traveling component of an x ray standing wave field
[DE94-007671] p 3672 N94-31317
Design of graphic screens using Neuro Linguistic Programming
[DE94-007634] p 3719 N94-32599

ARGONNE NATIONAL LAB., IL.
Analysis of beam-on-target interaction in a neutron-source test facility
[DE94-005392] p 3863 N94-31151
Time-resolved infrared absorption studies applied to the study of radical plus molecule reactions
[DE94-005921] p 3863 N94-31202
A survey of numerical cubature over triangles
[DE94-006810] p 3841 N94-31274
First theory institute on computational differentiation
[DE94-006491] p 3841 N94-31309
Analysis of the high energy behavior of the forward scattering parameters - sigma(tot), rho and B
[DE94-006537] p 3864 N94-31310
Nonlinearity as an origin of nonuniqueness in solution of Hartree's equation
[DE94-006538] p 3841 N94-31311
OTTER 3.0 reference manual and guide
[DE94-007457] p 3829 N94-31315
Review and status of Maglev in the United States
[DE94-006832] p 3722 N94-31319
Elimination of two atomic electrons by a single high energy photon
[DE94-006834] p 3864 N94-31320
High-temperature study of O+H2CO yields OH+HCO
[DE94-006837] p 3864 N94-31321
Implementation of instruments and facilities at the SGP CART site
[DE94-006839] p 3781 N94-31322
Creep properties of vanadium-base alloys
[DE94-006541] p 3641 N94-31486
Emissions of greenhouse gases from the use of transportation fuels and electricity
[DE94-006166] p 3765 N94-31625
A comparison of distributed memory and virtual shared memory parallel programming models
[DE94-005473] p 3825 N94-31663
Finite-part integrals and the Euler-Maclaurin expansion
[DE94-006539] p 3844 N94-31665
Effect of irradiation damage and helium on the swelling and structure of vanadium-base alloys
[DE94-006540] p 3641 N94-31666
Double photoionization of helium with synchrotron x rays: Proceedings
[DE94-006737] p 3866 N94-31668
The new Metals and Alloys Indexes, search manual: A phase diagram research tool
[DE94-005371] p 3643 N94-32098
Irradiation-assisted stress corrosion cracking of materials from commercial BWRs: Role of grain-boundary microchemistry
[DE94-006542] p 3643 N94-32109
A general stochastic Liouville theory for sequential and superexchange electron-transfer reactions involving three Marcus potential surfaces
[DE94-007695] p 3869 N94-32141
Moving BASISplus and TECHLIBplus from VAX/VMS to UNIX
[DE94-004696] p 3826 N94-32248
Parallel Monte Carlo reactor neutronics
[DE94-007642] p 3826 N94-32357
Characterization of interface structure in multilayers using specular x ray reflectance
[DE94-007698] p 3657 N94-32358
Defect cascades produced by neutron irradiation in YBa2Cu3O(7-delta) superconductors
[DE94-007700] p 3903 N94-32372
Structural ordering in liquid K-Te alloys
[DE94-008477] p 3645 N94-32514
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS2 during ion bombardment
[DE94-008487] p 3871 N94-32515
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes

[ISBN-0-315-86531-8] p 3620 N94-31706
Thermal-mechanical fatigue crack growth in aircraft engine materials
[ISBN-0-315-86543-1] p 3734 N94-31707
Optimization of the forming parameters of PEEK/carbon fiber composite
[ISBN-0-315-86410-9] p 3620 N94-31716
Finite element numerical simulation of turbulent flows
[ISBN-0-315-86416-8] p 3703 N94-31717
Stereoscopic correspondence based on the structure of shading
[ISBN-0-315-86418-4] p 3814 N94-31718
Fatigue behavior of unidirectional pultruded composite materials
[ISBN-0-315-86425-7] p 3621 N94-31719
Numerical modelling of turbulence
[ISBN-0-315-86439-7] p 3703 N94-31720
A contribution to the representation and identification of semi-flexible robots
[ISBN-0-315-86450-8] p 3724 N94-31721
Empirical optimization of the consolidation of thermoplastic prepregs
[ISBN-0-315-86455-9] p 3652 N94-31722
Simulation of non-uniform transmission lines for weakly dispersive structures
[ISBN-0-315-86525-3] p 3690 N94-31726
Time domain spectroscopy for studying a monopole antenna immersed in a plasma
[ISBN-0-315-86526-1] p 3888 N94-31727
Fractal and spectral analysis
[ISBN-0-315-86460-5] p 3676 N94-31796
Algorithms and parallel architectures for laser acoustic imaging
[ISBN-0-315-86466-4] p 3716 N94-31797
Adaptive control of a robot in Cartesian coordinates: Analysis and implementation
[ISBN-0-315-86493-1] p 3831 N94-31798
An adaptive method for the exact resolution of shock waves and contact discontinuities
[ISBN-0-315-86498-2] p 3704 N94-31799
Study of a path planning and tracking system for an articulated mobile robot
[ISBN-0-315-86502-4] p 3831 N94-31800
Development of a feedforward controller for a flexible manipulator
[ISBN-0-315-86515-6] p 3832 N94-31801
Low velocity impact damage in carbon fiber/PEEK composite laminates
[ISBN-0-315-86546-6] p 3622 N94-31909
Electrical properties of double layer dielectric structures for space technology
[ISBN-0-315-86547-4] p 3610 N94-31910
The Kaluza-Klein approach and gauge supersymmetry
[ISBN-0-315-86553-9] p 3912 N94-31911
Fatigue crack propagation and fractography of 3Y-TZP and ZTA
[ISBN-0-315-86561-X] p 3736 N94-31912
Study of stellar associations located in the region contained between the Magellanic Clouds
[ISBN-0-315-86692-6] p 3935 N94-31913
Construction of visual representations and time-space organization of resources in astronomy
[ISBN-0-315-86694-2] p 3925 N94-31914
Planning of air crew schedules
[ISBN-0-315-86506-7] p 3914 N94-32074

Beginning the 21st century with advanced Automatic Parts Identification (API) p 3923 N94-32444
Neutral ion sources in precision manufacturing
p 3875 N94-32447
A case study of analysis methods for large deflections of a cantilever beam
[NASA-TM-108454] p 3739 N94-32903
Operations summary for the convection and moisture experiment (CAMEX)
[NASA-TM-108445] p 3786 N94-33004
Diamond turning in the production of x ray optics
p 3604 N94-33298

NATIONAL AEROSPACE LAB., AMSTERDAM (NETHERLANDS).
Aircraft simulation and pilot proficiency: From surrogate flying towards effective training
[AD-B179300] p 3587 N94-31179
CFD-based drag prediction: State-of-the-art, theory, prospects
[AD-B179297] p 3567 N94-31180
Development concept for Dutch user support
[PB94-125523] p 3598 N94-31208
On an adaptation method for 2-dimensional C-type grids
[W-9322] p 3569 N94-31822
On an adaptation method for dense, 2D, C-type grids
[W-9321] p 3706 N94-32045

NATIONAL DEFENCE HEADQUARTERS, OTTAWA (ONTARIO).
A decision support system for electronic warfare analysts p 3853 N94-33336

NATIONAL DEFENCE RESEARCH ESTABLISHMENT, LINKOEPING (SWEDEN).
Fiberoptisk magnetfaltsensor (fiber optic magnetometer)
[PB94-148061] p 3878 N94-31584

NATIONAL INST. OF STANDARDS AND TECHNOLOGY, BOULDER, CO.
Aperture excitation of electrically large, lossy cavities
[PB94-145711] p 3675 N94-31683

NATIONAL INST. OF STANDARDS AND TECHNOLOGY, GAITHERSBURG, MD.
Putting the information infrastructure to work: Report of the Information Infrastructure Task Force Committee on Applications and Technology
[NIST/SP-857] p 3916 N94-31228

NATIONAL MAPPING AND RESOURCE INFORMATION AUTHORITY (PHILIPPINES).
Airborne SAR as a complement to SPOT HRV in land-cover classification: The use of normalization and principal components analysis p 3750 N94-32539

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, BOULDER, CO.
Solar physics and terrestrial effects. A curriculum guide for teachers, grade 7-12
[PB94-142247] p 3953 N94-31595
Proceedings of the International Workshop on Artificial Intelligence Applications in Solar-Terrestrial Physics
[PB94-142064] p 3832 N94-31808

NATIONAL TRANSPORTATION SAFETY BOARD, WASHINGTON, DC.
Annual review of aircraft accident data: US air carrier operations, calendar year 1991
[PB94-158847] p 3575 N94-32925
Aircraft incident report: In-flight turbulence encounter and loss of portions of the elevators, China Airlines Flight CI-012, McDonnell Douglas MD-11-P, Taiwan Registration B-150 about 20 miles east of Japan, 7 December 1992
[PB94-910403] p 3576 N94-32938

NAVAL AEROSPACE MEDICAL RESEARCH LAB., PENSACOLA, FL.
Effects of methamphetamine and fatigue on long- and short-term memory
[AD-A276452] p 3799 N94-32187

NAVAL AIR WARFARE CENTER, CHINA LAKE, CA.
The 18th annual electronics manufacturing seminar
[AD-A276038] p 3687 N94-31281
Wavelet transform of fixed pattern noise in focal plane arrays
[AD-A276963] p 3712 N94-32393

NAVAL AIR WARFARE CENTER, LAKEHURST, NJ.
Fuzzy-neural control of an aircraft tracking camera platform p 3839 N94-32423

NAVAL AIR WARFARE CENTER, ORLANDO, FL.
Night vision camcorder system
[AD-A277004] p 3712 N94-32002

NAVAL AIR WARFARE CENTER, WARMINSTER, PA.
Empirical and semi-empirical relationships of liquid-vapor, solid-vapor, and solid-liquid surface energies
[AD-A276480] p 3631 N94-31248
Validation and sensitivity analysis of Texas human thermal model predictions during cold water immersion
[AD-A275240] p 3797 N94-32156
Evaluation of the Hughes conversion coating touch-up pen
[AD-A278398] p 3664 N94-33166

NAVAL CIVIL ENGINEERING LAB., PORT HUENEME, CA.
Procedures for computing site seismicity
[AD-A277666] p 3775 N94-33028

NAVAL COASTAL SYSTEMS CENTER, PANAMA CITY, FL.
Covert channel analysis of trusted systems. A guide to understanding
[AD-A276418] p 3916 N94-31331
Thermotropic liquid crystals: A variable Clo material
p 3796 N94-31739

NAVAL COMMAND, CONTROL AND OCEAN SURVEILLANCE CENTER, SAN DIEGO, CA.
Evaluation of nondestructive inspection techniques for quality control of alumina-ceramic housing components
[AD-A276220] p 3730 N94-31065
Towards simplicity: Noise and cooperation in the perfect integrator
[AD-A276256] p 3799 N94-31291
Atmospheric effects assessment program: Ionospheric sounding
[AD-A276447] p 3770 N94-31303
The High-Frequency Benchmark propagation program
[AD-A276323] p 3672 N94-31334
Texture generation on irregular regions
[AD-A275999] p 3841 N94-31359
Control experiments in liquid metal combustion
[AD-A276918] p 3635 N94-32234
New approaches for real time decision support systems p 3915 N94-32426
Voice and video transmission using XTP and FDDI
p 3685 N94-32468
Broadband, high-power, 2-30 MHz, twin-whip antenna. Computer and 1/10-scale model design study
[AD-A277619] p 3682 N94-32971
Spatial correlation of ionospheric variability
[AD-A278105] p 3776 N94-33041
Simultaneous excitation of parametric decay cascades and the OTSI in 1D numerical simulations based on Aakarov's equations
[AD-A278108] p 3893 N94-33042
A comparison of rough surface parabolic equation models
[AD-A278090] p 3791 N94-33185
An approximate model for vertical polarization and surface roughness using the parabolic equation
[AD-A278091] p 3684 N94-33186
An evaluation of three GPS receivers for use in the GPS sounder
[AD-A278157] p 3577 N94-33253
The effects of a multipath channel and interference on coherent M-PSK digital communication systems
[AD-A278158] p 3684 N94-33254
A theory of conditional information with applications
[AD-A278164] p 3850 N94-33255
Diurnal, seasonal and solar activity variations of F-region parameters
[AD-A278106] p 3776 N94-33285

NAVAL ENERGY AND ENVIRONMENTAL SUPPORT ACTIVITY, PORT HUENEME, CA.
Bond stress-slip characteristics of FRP rebars
[AD-A277191] p 3623 N94-32070

NAVAL HEALTH RESEARCH CENTER, SAN DIEGO, CA.
A review of microclimate cooling systems in the chemical, biological, radiological environment
[AD-A276446] p 3802 N94-31302

NAVAL POSTGRADUATE SCHOOL, MONTEREY, CA.
Machinery monitoring and diagnostics using pseudo Wigner-Ville distribution and backpropagation neural network
[AD-A276219] p 3828 N94-31064
A comparison of predictors for first-guess wind speed errors
[AD-A276460] p 3781 N94-31239
VLSI implementation of stray insensitive switched capacitor composite operational amplifiers
[AD-A276461] p 3687 N94-31240
Numerical analysis of single-vortex/free-surface interaction
[AD-A276462] p 3701 N94-31241
A preliminary investigation of high amplitude standing waves with laser Doppler anemometry
[AD-A276463] p 3860 N94-31242
Scheduling techniques for multiple processor systems in real-time environments
[AD-A276149] p 3824 N94-31249
Computer implementation of Arnott's formulation of thermoacoustics using MATLAB
[AD-A276356] p 3860 N94-31257
An analysis of non-integerizing the aircraft engines Cost Effectiveness Analysis Spreadsheet Model (CEAMOD version 2.0)
[AD-A276251] p 3583 N94-31290
Air Force Space Command satellite orbit predictor using parallel virtual machines
[AD-A276316] p 3801 N94-31298
Kalman filtering approach to blind equalization
[AD-A276320] p 3671 N94-31299
Predicting antenna parameters from antenna physical dimensions
[AD-A276442] p 3672 N94-31300
An analysis of the maintenance performance measurement system for LAMPS MK 3 helicopter squadrons
[AD-A276421] p 3565 N94-31332
Rotordynamic effects driven by fluid forces from a geometrically imperfect labyrinth
[AD-A276424] p 3722 N94-31333
Analysis using bi-spectral related technique
[AD-A276017] p 3672 N94-31386
Waveform generation for ultra-wideband radar system
[AD-A276352] p 3673 N94-31401
Unmanned Air Vehicle/Remotely Piloted Vehicle analysis for lethal UAV/RPV
[AD-A276052] p 3578 N94-31442
The effect of westerly wind bursts on a tropical ocean general circulation model
[AD-A276423] p 3788 N94-31448
A model and algorithms for a software evolution control system
[AD-A276431] p 3811 N94-31449
Low sidelobe reflector antenna design for communications
[AD-A276079] p 3673 N94-31463
Short term teleconnections associated with an individual tropical cyclone
[AD-A277210] p 3783 N94-32019
Theoretical basis for state vector comparison, relative position display, and relative position/rendezvous prediction
[AD-A277216] p 3608 N94-32020
The evolution of jet features during the 1993 east coast white hurricane: A case study using the global spectral model
[AD-A277217] p 3783 N94-32021
Sodium sulfate corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composites
[AD-A277224] p 3623 N94-32023
Finite element analysis of damage in fibrous composites using a micromechanical model
[AD-A277226] p 3623 N94-32024
Shiptrack database analysis
[AD-A277228] p 3746 N94-32025
Development of a cascade simulation of fan-passage flow
[AD-A277234] p 3584 N94-32026
Hotwire measurements of the turbulent flow into a cascade of controlled-diffusion compressor blades
[AD-A277297] p 3706 N94-32042
Heat transfer studies on a rectangular channel with offset plate fins
[AD-A277300] p 3912 N94-32043
X ray pulse considerations and electron flow in high voltage diodes
[AD-A277301] p 3868 N94-32044
Combustor and nozzle effects on particulate behavior in solid rocket motors
[AD-A277304] p 3614 N94-32071
Air-sea interaction patterns in the equatorial Pacific
[AD-A277305] p 3788 N94-32072

The influence of cumulus parameterization on model forecasts of rapid oceanic cyclogenesis
[AD-A277207] p 3784 N94-32094
An analog preprocessing architecture for high-speed analog-to-digital conversion
[AD-A276737] p 3807 N94-32163
Development of a frequency-domain electromagnetic scattering measurement system
[AD-A276738] p 3678 N94-32179
A technique for multiplexing 3x3-coupler terminated interferometric fiber-optic sensors
[AD-A276739] p 3880 N94-32180
Prediction of the plane wave beamformed acoustic arrival structure for the 1992 Barents Sea coastal tomography test
[AD-A276741] p 3788 N94-32181
Design of a cold-flow test facility for the high pressure fuel turbopump turbine of the Space Shuttle main engine
[AD-A276743] p 3615 N94-32182
Applied Computational Electromagnetics Society Journal, volume 9, number 1, March 1994
[AD-A276753] p 3679 N94-32183
Semianalytic Satellite Theory (SST): Mathematical algorithms
[AD-A276836] p 3610 N94-32208
Three dimensional vorticity field in the California current system
[AD-A276951] p 3788 N94-32220
Analysis of Navy aircraft engine and engine component warranties
[AD-A276936] p 3584 N94-32238
Correlation of flux composition and inclusion characteristics with submerged arc weld metal properties in HY-100 steel
[AD-A277040] p 3726 N94-32261
Pulse-splitting and AM-FM conversion in a nonlinear dispersive medium
[AD-A277041] p 3861 N94-32262
Low altitude near-the-horizon propagation: A comparison between RPO and M-layer
[AD-A277358] p 3679 N94-32282
Estimating subpycnocline density fluctuations in the California current region from upper ocean observations
[AD-A277278] p 3789 N94-32325
ENSO forced variations of the sea surface temperature and adjusted sea level along the west coast of the United States
[AD-A277306] p 3789 N94-32327
An experimental testbed for a free-floating manipulator
[AD-A277350] p 3726 N94-32334
An analysis of ionospheric dayglow from observations of the Naval Postgraduate School Middle Ultraviolet Spectrograph (MUSTANG)
[AD-A277351] p 3773 N94-32335
Optimal adaptive estimation algorithm for harmonic current reduction using power limited active line conditioners
[AD-A277354] p 3693 N94-32336
Thermospheric modeling accuracies using F10.7 and Ap
[AD-A277355] p 3773 N94-32337
Trajectory planning for space manipulators
[AD-A277229] p 3611 N94-32369
Design of a two dimensional planer pressurized air labyrinth seal test rig
[AD-A277232] p 3726 N94-32370
Continuous measurement of aging response in aluminum alloys by eddy current methods
[AD-A277233] p 3644 N94-32371
Radiation tolerant, high speed, low power, gallium arsenide logic
[AD-A277293] p 3694 N94-32509
Multidimensional scaling of user information satisfaction
[AD-A277230] p 3920 N94-32633
An exploratory study of neuro linguistic programming and communication anxiety
[AD-A277756] p 3682 N94-32986
Multicast communication with guaranteed quality of service
[AD-A277650] p 3682 N94-33025
Design and Monte Carlo analysis of an unmanned aerial vehicle
[AD-A277648] p 3580 N94-33056
Evolution of diurnal surface winds and surface currents for Monterey Bay
[AD-A277649] p 3790 N94-33057
Fault detection and isolation for the Bluebird test bed aircraft
[AD-A277979] p 3586 N94-33086
Multiple-valued programmable logic array minimization by solution space search
[AD-A278033] p 3821 N94-33090
The analysis of wake-induced unsteady aerodynamics related to higher harmonic control
[AD-A277914] p 3573 N94-33108
An evaluation framework for designing a night vision, computer-based trainer
[AD-A278005] p 3590 N94-33139
Coastal boundary layer and refractivity measurements using the ground-based high resolution interferometer sounder (GB-HIS)
[AD-A277980] p 3683 N94-33159
An analysis of cellular telephone and INMARSAT systems for providing radio data link computer communications for US Navy vessels
[AD-A278143] p 3684 N94-33160
Increasing the practical impact of formal methods for computer-aided software development: Software slicing, merging and integration
[AD-A277929] p 3822 N94-33179
Generation of the ambiguity function for ultra wideband radar waveforms
[AD-A277913] p 3684 N94-33261
Time resolved measurements of light produced by onset of plasma formation on electrodes of fast pulsed high voltage diodes
[AD-A277974] p 3894 N94-33264
Least squares approximation by G1 piecewise parametric cubes
[AD-A277978] p 3850 N94-33265
A user's manual for the cost effectiveness analysis spreadsheet model for aircraft engines (CEAMOD version 2.0)
[AD-A278042] p 3585 N94-33266
Analysis of intermediate level maintenance following F404-GE-400 engine component life reductions
[AD-A277918] p 3585 N94-33283

Characterization of crosslinked electrooptic polyimides
[DE94-007934] p 3661 N94-32819
Overview of shock physics codes for armor analysis
[DE94-008948] p 3739 N94-32842
Sandia's photonic program and its changing national role
[DE94-008616] p 3883 N94-32878
Optical properties of lanthanide-doped RbTiOAsO4 and transition metal-doped KTiOPO4
[DE94-008433] p 3907 N94-32963
Operational experience and evaluation of a dual-element stretched-membrane heliostat
[DE94-008827] p 3763 N94-32965

SANDIA NATIONAL LABS., LIVERMORE, CA.
A compatibility study of FEFO with various containment materials
[DE94-005753] p 3649 N94-31198
Soot and liquid-phase fuel distributions in a newly designed optically accessible DI diesel engine
[DE94-005648] p 3723 N94-31651
A genetic algorithm based method for docking flexible molecules
[DE94-007525] p 3793 N94-32269
OPT++: An object-oriented class library for nonlinear optimization
[DE94-008890] p 3818 N94-32584
Compilation of diamond-like carbon properties for barriers and hard coatings
[DE94-008231] p 3661 N94-32803

SCIENCE APPLICATIONS INTERNATIONAL CORP., MCLEAN, VA.
Fluid Dynamics Lagrangian Simulation Model
[AD-A277438] p 3710 N94-33009

SCIENCE APPLICATIONS INTERNATIONAL CORP., NEW YORK, NY.
Space flight risk data collection and analysis project: Risk and reliability database
[NASA-CR-195879] p 3603 N94-32494

SCIENCE APPLICATIONS INTERNATIONAL CORP., SAN DIEGO, CA.
The intelligent monitoring system: Generic Database Interface (GDI). Revised user manual
[AD-A277131] p 3919 N94-32382

SCOT CONSEIL, RAMONVILLE (FRANCE).
Technique of ERS-1 image processing in association with SPOT data p 3750 N94-32538
Integration of ERS-1 images into the European Agriculture Statistics project Action 4: Thematic aspect p 3753 N94-32554
Land cover change detection with ERS-1 data and data from other remote sensing satellites. Example: The delta of the River Ebro (Spain) p 3755 N94-32564

SCRANTON UNIV., PA.
Ada support for the mathematical foundations of software engineering
[AD-A278031] p 3822 N94-33284

SCRIPPS INSTITUTION OF OCEANOGRAPHY, LA JOLLA, CA.
Profiling ALACE instruments
[AD-A277246] p 3789 N94-32321
Multi-scale studies of seafloor topography
[AD-A277008] p 3789 N94-32400
Long transect seafloor seismic array: A component of SAMSON (Sources of Ambient Micro Seismic Ocean ic Noise)
[AD-A277009] p 3789 N94-32401
Ocean optics, ocean imaging and optical tomography
[AD-A277010] p 3789 N94-32402

SELSKAPET FOR INDUSTRIELL OG TEKNISK FORSKNING, TRONDHEIM (NORWAY).
Evaluation of corrosion protective organic coatings for steel structures in fresh water
[PB94-138484] p 3649 N94-31072
Application of natural refrigerants: A rational solution to a pressing problem
[PB94-138781] p 3668 N94-31073
Scientific basis for safety science
[PB94-138534] p 3668 N94-31838
Systems for the monitoring of working conditions relating to health and safety: Extensive description. Norway
[PB94-138542] p 3803 N94-31839
Laser applications in wood processing
[PB94-138567] p 3717 N94-31840
Acceptance criteria for weld defects in aluminium weldments
[PB94-138575] p 3735 N94-31841
Description of DCS (Data Converting System) and CT (Cone Tool). A reprint of a note published in Fire and Materials titled Fire Test Data Available for Your Purpose
[PB94-138559] p 3918 N94-32293

SHEFFIELD UNIV. (ENGLAND).
A high-performance multi-arm environment: Theoretical aspects and practical implementation
[RR-479] p 3722 N94-31379
Nonlinear model validation using correlation tests
[RR-463] p 3842 N94-31394
On wavelet representations of differential equations
[RR-482] p 3842 N94-31412
Identification of polynomial and rational NARMAX models
[RR-483] p 3842 N94-31413
A neural network methodology for engineering applications: The learning control of robotic systems

Lattice geometrodynamics p 3857 N94-31825
Planetesimal dynamics in the vicinity of a growing protoplanet p 3935 N94-31926
Isolating strain parameters correlated to skeletal adaptation p 3797 N94-31960
Cooling and trapping of neutral atoms
[AD-A276957] p 3870 N94-32360
Ionization probes of molecular structure and chemistry
[DE94-007605] p 3872 N94-32643
Stochastic models in reliability theory
[AD-A277529] p 3731 N94-32953

STEVENS INST. OF TECH., HOBOKEN, NJ.
Computational study of simultaneous heat and mass transfer in turbulent separated flows p 3704 N94-31843
Computational prediction of stall flutter in spanwise-finite blade cascades p 3584 N94-31967

STOCKHOLM UNIV. (SWEDEN).
A polynomial representation of the valence orbital ionization potentials
[USIP-93-06] p 3640 N94-31083
Instrumentation for EXELFS measurements using convergent beam diffraction coupling to the electron energy loss spectrometer
[USIP-93-07] p 3858 N94-31084
Particle identification in a segmented calorimeter (NUMASS test data, September 1991)
[USIP-93-08] p 3711 N94-31085
Fireworks in velocity and configuration space applied to cosmology
[USIP-93-90] p 3927 N94-31086
Summary of some data processing routines in the molecular physics group of Stockholm University
[USIP-93-05] p 3808 N94-31087
A fully two-dimensional, non-oscillatory advection scheme for momentum and scalar transport equations
[DM-66] p 3700 N94-31221
Odin aeronomy science: A phase-A report by the Aeronomy Science Working Group for the Odin satellite
[AP-31] p 3770 N94-31222
A flexible IBM-PC based data acquisition system for nuclear physics experiments
[USIP-92-02] p 3922 N94-32856

STUTTGART UNIV. (GERMANY).
Fields of experiments in ERS-1 SAR interferometry in Bonn and Naples p 3756 N94-32572

SUNPOWER, INC., ATHENS, OH.
Oscillating-flow loss test results in rectangular heat exchanger passages
[NASA-CR-185297] p 3615 N94-32792
A 1050 K Stirling space engine design
[NASA-CR-182149] p 3616 N94-32866

SURVEILLANCE RESEARCH LAB., SALISBURY (AUSTRALIA).
Advanced infrared photodetectors: Materials review
[AD-A277058] p 3879 N94-32013

SVERDRUP TECHNOLOGY, INC., BROOK PARK, OH.
An analysis of supersonic flows with low-Reynolds number compressible two-equation turbulence models using LU finite volume implicit numerical techniques
[NASA-CR-195302] p 3572 N94-32926
Installed F/A-18 inlet flow calculations at 30 degrees angle-of-attack: A comparative study
[NASA-CR-195297] p 3573 N94-33119

SWEDISH INST. FOR MATERIALS TESTING, BORAS.
Databases and demands for solar heating materials
[PB94-137494] p 3758 N94-31070
Solar energy in China
[PB94-137502] p 3758 N94-31071
Influence of carbon dioxide on electronic equipment: Fire extinguishing with low concentration
[PB94-148749] p 3691 N94-31848

SYRACUSE UNIV., NY.
Processing boron and boron carbide thin films for protective coatings and device fabrication
[AD-A277266] p 3900 N94-32041
New polymer target-shell properties and characterizations
[DE94-008420] p 3890 N94-32415
Fusion with highly spin polarized HD and D2
[DE94-006209] p 3876 N94-32731

T

TAYLOR (S. R.) AND ASSOCIATES, BARTLESVILLE, OK.
Novel ultrasonic method for food hydration
[AD-A277411] p 3804 N94-32580

TECHNICAL RESEARCH CENTRE OF FINLAND, ESPOO.
An experimental and analytical investigation of a threaded fastener
[VTT-JULK-786] p 3724 N94-31654
Metal hydrides in hydrogen energy systems
[VTT-TIED-1407] p 3759 N94-31655
Joining of alumina by vacuum brazing
[VTT-TIED-1495] p 3724 N94-31656
Control and monitoring of heavy metal emissions
[VTT-TIED-1508] p 3765 N94-31657
Imaging devices for satellite remote sensing
[VTT-TIED-1517] p 3743 N94-31658
SPOT imagery for updating land cover information of 1:50,000 numerical topographic maps p 3749 N94-32532

TECHNICAL UNIV. OF DENMARK, LYNGBY.
Future directions of nonlinear dynamics in physical and biological systems. (Physica D nonlinear, volume 68, number 1)
[AD-A278085] p 3794 N94-33250

TECHNISCHE UNIV., BERLIN (GERMANY).
An active computer supported medium for distributed planning in enterprises
[ETN-94-95738] p 3829 N94-31372
A series resonant converter in half bridge circuits with combined serial and parallel charge coupling and several output circuits
[ETN-94-95739] p 3687 N94-31373
Theoretical principles for designing long stator/linear motors with iron
[ETN-94-95741] p 3688 N94-31374
Considering ties elasticities in high frequency rail dynamics
[ILR-MITT-281(1993)] p 3733 N94-31375
Hierarchical fault catalog process for diagnosis of analog circuits
[ETN-94-95730] p 3689 N94-31571
Stark broadening of the 2S state of hydrogen and deuterium in arc plasmas of low density
[ETN-94-95731] p 3888 N94-31572
Spectral analysis method and sample generation for real time visualization of speech
[ETN-94-95732] p 3674 N94-31573
Electrochemical surface modification of silicon monocrystals: A surface analytic examination
[ETN-94-95733] p 3633 N94-31574
Applicable dimensioning and measure and technological examination of long stator-linear motors for magnetic high-speed railways
[ETN-94-95734] p 3689 N94-31575
Real time simulation model for designing converter regulation
[ETN-94-95735] p 3689 N94-31576
Compositionality of application oriented structuring mechanisms for algebraic specification languages with initial semantics
[ETN-94-95736] p 3812 N94-31577
Structure estimation of phase objects from the diffraction near field: Microwave and model calculations
[ETN-94-95737] p 3674 N94-31608
Examination of fast semiconductor diodes (recovery) with respect to switching valves in PWM and resonance devices
[ETN-94-95740] p 3690 N94-31609
Hydrogen incorporation and radiation induced dynamics in metal-oxide-silicon structures: A study using nuclear reaction analysis
[ETN-94-95742] p 3898 N94-31610
The contribution of aeronautics and astronautics to the quality of life on Earth
[ILR-MITT-283(1993)] p 3764 N94-31611
Design of a logistics model for building and supporting a lunar station
[ILR-MITT-282(1993)] p 3803 N94-31852

TECHNISCHE UNIV., DARMSTADT (GERMANY).
Experimental investigation of phonon eigenvectors using x ray interference fields
[ETN-94-95751] p 3865 N94-31511
Numerical method for the investigation of the magnetohydrodynamic stability of three dimensional plasma equilibria
[ETN-94-95752] p 3887 N94-31512
Competition between crystallization and mixing/demixing in polymer mixture
[ETN-94-95753] p 3651 N94-31513
Adaptive operating systems concepts
[ETN-94-95754] p 3830 N94-31514
Concept, construction and testing of a high resolution QCLAM electron spectrometer with large solid angle and high impulse acceptance for the electron accelerator S-DALINAC
[ETN-94-95755] p 3711 N94-31515
Energy and angular distributions of secondary ions during electronic sputtering of nonconducting surfaces
[ETN-94-95756] p 3865 N94-31516
Development and implementation of a full-potential ASW method
[ETN-94-95757] p 3858 N94-31560
Time evolution and filamentation of KrF(star) laser gas discharges
[ETN-94-95758] p 3715 N94-31561
Electron spin resonance measurements of Er(3+) and Mn(2+) in the high temperature superconductor compounds La(2-x)Sr(x)CuO(4-delta)
[ETN-94-95746] p 3898 N94-31612
Optimal detector strategies for the phase contrast imaging for scanning transmission electron microscopes
[ETN-94-95747] p 3866 N94-31613
Control heavy ion collisions in the systems Ar-40 + Ca-40 and Si-28 + Si-28, and the nature of particle emission in fusion-evaporation reactions
[ETN-94-95749] p 3866 N94-31614
Study of structures of different complexity for the communication between two processors
[ETN-94-95750] p 3674 N94-31615

TECHNISCHE UNIV., DELFT (NETHERLANDS).
Filtering of satellite altimetry data with optimal smoothing cubic splines to compute geoid heights, along-tract geoid and gravity gradients in the Indonesian waters and its surroundings
[PB94-147527] p 3741 N94-31074
Application of radon transformation for improved analysis of sparsely sampled data: A feasibility study
[PB94-147535] p 3741 N94-31075
LORE and reason maintenance
[REPT-93-88] p 3812 N94-31522
Two models solving the increasing energy problem of the continuous Hopfield network model
[REPT-93-87] p 3843 N94-31552
Small cylindrical adhesive bonds
[PB94-148210] p 3651 N94-31585
Effective information modelling support
[PB94-148236] p 3917 N94-31586
Delft Ising computing engine
[PB94-148251] p 3806 N94-31587
Fluid-structure interaction in case of water hammer with cavitation
[PB94-148277] p 3702 N94-31588
Possible improvements of satellite ephemeris programs used in geodesy
[PB94-148681] p 3743 N94-31592
Budget allocation and monopolistic pricing in a multiproduct firm
[REPT-93-86] p 3924 N94-31617
On the validity of the BLP model
[REPT-93-70] p 3917 N94-31640
Some calculations on supersymmetric graphs as communication networks
[REPT-93-72] p 3824 N94-31641
Stirling's formula and approximations for n(factorial) and the middle ratio
[REPT-93-73] p 3843 N94-31642
Generalization of a theorem of Kusmin
[REPT-93-74] p 3844 N94-31643
Qualitative properties of two-dimensional predator-prey systems
[REPT-93-75] p 3844 N94-31644
Virtual annotation: Verbal communication in virtual reality
[REPT-93-67] p 3674 N94-31645
Automatic generation of context-sensitive textual help
[REPT-93-68] p 3812 N94-31646
Digital state-feedback H(infinity) control of Pritchard-Salamon systems: A Popov function approach
[REPT-93-69] p 3830 N94-31647
Solution of the incompressible Navier-Stokes equations in general coordinates by Krylov subspace and multigrid methods
[REPT-93-64] p 3703 N94-31660
A note on cocycles in a semidirect product
[REPT-93-65] p 3851 N94-31661
Invariance of the generalized steady-state for 1-D distributed parameter systems
[REPT-93-66] p 3825 N94-31662
Tractable deduction in some fragments of auto-epistemic logic
[REPT-93-89] p 3844 N94-31673
Damage tolerance aspects of a full composite airplane fuselage: Requirements, modelling, predictions, experiments
[LR-728] p 3578 N94-31674
Multiple-site damage in aircraft fuselage structures
[LR-729] p 3578 N94-31675
Powder metallurgical processing of fibre reinforced aluminium composites
[PB94-148285] p 3620 N94-31688
A Hyland-Bernstein approach to the digital control of Pritchard-Salamon systems
[REPT-93-76] p 3844 N94-31693
A Gauss-Seidel type solver for special convex programs, with application to frictional contact mechanics
[REPT-93-77] p 3813 N94-31694
Using atomic actions in replica groups to simplify the replication implementation
[REPT-93-78] p 3813 N94-31695
A predator-prey model with Ivlev's functional response
[REPT-93-79] p 3844 N94-31696
Diagonal band probability distributions
[REPT-93-80] p 3851 N94-31697
Probability distributions with given marginals and given correlation that have maximal entropy
[REPT-93-81] p 3851 N94-31698
The Laplace functional and Palm measure of a quasi-Cox process which is driven by a Markov chain
[REPT-93-82] p 3851 N94-31699
Generalized steady-state method for solving 2-D diffusion systems
[REPT-93-83] p 3825 N94-31700
Pairwise-comparison using the logarithmic least squares method and the generalized pseudoinverse
[REPT-93-84] p 3844 N94-31701
Simple Patch: A new heuristic for the product traveling salesman problem
[REPT-93-85] p 3845 N94-31702
Finite volume discretization of the k-epsilon turbulence model in general coordinates
[REPT-93-90] p 3703 N94-31703
Designing in virtual reality: Modelling Objects in a Virtual Environment (MOVE)
[REPT-93-91] p 3813 N94-31704
The influence of the deorbit-burn manoeuvre on the footprint of a re-entry capsule
[LR-727] p 3609 N94-31705
TECHNISCHE UNIV., EINDHOVEN (NETHERLANDS).
Managing customer order driven engineering. An interdisciplinary and design oriented approach
[PB94-145083] p 3917 N94-31583
Oxide pigments in water: The colloid-chemical point of view
[PB94-148616] p 3633 N94-31591
Aeroacoustic sources in internal flows
[ISBN-9-03-86-0282-0] p 3860 N94-31653
TECHNISCHE UNIV., MUNICH (GERMANY).
Investigation on correction models for airborne imaging spectrometry data from the EISAC-campaign for geoscientific purposes p 3745 N94-31861
Extraction of agricultural parameters from imaging-spectrometry data and simulated MERIS data through red edge analysis p 3745 N94-31865
The 6th International Conference on Modulated Semiconductor Structures
[AD-A276815] p 3906 N94-32908
TEL-AVIV UNIV. (ISRAEL).
Analysis of ionospheric parameters in Europe and creation of the prediction algorithm
[AD-A276342] p 3771 N94-31326
TELSTRA CORP. LTD., SYDNEY (AUSTRALIA).
Hubless satellite communications networks
p 3600 N94-31433

Parametric robust control and system identification: Unified approach
[NASA-CR-195826] p 3836 N94-32980
TENNESSEE TECHNOLOGICAL UNIV., COOKEVILLE.
Strain sensing using optical fibers
[NASA-CR-195807] p 3740 N94-32940
TESCO, INC., TULLAHOMA, TN.
Model borne data management system for wind tunnel testing, phase 2
[AD-A276296] p 3587 N94-31295
TEXAS A&M UNIV., COLLEGE STATION.
Electrooptic crystal growth and properties
[AD-A276023] p 3896 N94-31439
Viscoelastic fracture characterization of polymeric solids p 3652 N94-31745
Analysis of new composite architectures
[NASA-CR-195303] p 3626 N94-32904
TEXAS TECHNOLOGICAL UNIV., LUBBOCK.
High power switch design for the Nova upgrade laser (Project HERCULES: High Energy Research Concerning the Ultimate Lifetime of Experimental Switches)
[DE94-007921] p 3719 N94-32654
Metal ion complexation by ionizable crown ethers
[DE94-008301] p 3661 N94-32847
TEXAS UNIV., ARLINGTON.
Shock impingement near mild hypersonic expansion corners p 3569 N94-31879
TEXAS UNIV., AUSTIN.
Disk instability and the spectral evolution of the 1992 outburst of the intermediate polar GK Persei p 3928 N94-31123
Disk irradiation and light curves of x ray novae p 3929 N94-31124
A constraint on the pair-density ratio (Z+) in an electron-positron pair wind p 3930 N94-31132
Thermal continua of AGN accretion disks p 3931 N94-31137
Dynamics of flux tubes in accretion disks p 3932 N94-31142
The physics of black hole x ray novae p 3932 N94-31143
Transport suppression by shear flow generation in multihelicity resistive-g turbulence
[DE94-007108] p 3886 N94-31366
L-H confinement mode dynamics in three-dimensional state space
[DE94-007113] p 3887 N94-31396
Adaptive nonlinear control of spacecraft p 3609 N94-31564
Plasma confinement theory and transport simulation
[DE94-006065] p 3888 N94-31619
Hydrogen peroxide electrodes based on electrical connection of redox centers of various peroxidases to electrodes through a three-dimensional electron relaying polymer network
[AD-A276543] p 3691 N94-32056
Medium energy measurements of N-N parameters
[DE94-006067] p 3869 N94-32173
Electrical communication between glucose oxidase and electrodes based on poly(vinylimidazole) complex of Os(bpy)2Cl2
[AD-A276585] p 3635 N94-32231
Research program in particle physics
[DE94-008449] p 3871 N94-32512
Anomalous thermalization of fast ions in magnetized plasma
[DE94-007109] p 3891 N94-32631
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics
[DE94-007112] p 3891 N94-32664
Superluminous laser pulse in an active medium
[DE94-007110] p 3720 N94-32684
Particle diffusion from the beam-beam interaction in synchrotron colliders
[DE94-007111] p 3876 N94-32685
Magnetless magnetic fusion
[DE94-007114] p 3891 N94-32686
Quantum dynamics in dual spaces
[DE94-008303] p 3913 N94-32824
The 1994 International Sherwood Fusion Theory Conference
[DE94-008961] p 3877 N94-32844
Parallel supercomputing: Advanced methods, algorithms, and software for large-scale linear and nonlinear problems
[DE94-008446] p 3836 N94-32992
Adaptive control of nonlinear and stochastic systems
[AD-A278411] p 3839 N94-33325
TEXAS UNIV., EL PASO.
Optical and image transmission through desert atmospheres
[AD-A276022] p 3742 N94-31496
Investigation of modularly configured attached processors with intelligent memories
[AD-A278418] p 3839 N94-33330
TEXAS UNIV., HOUSTON.
Analysis and synthesis of adaptive neural elements and assemblies
[AD-A277423] p 3836 N94-32996
TEXAS UNIV. AT DALLAS, RICHARDSON.

TINI ALLOY CO., SAN LEANDRO, CA.
Implementation of heaters on thermally actuated spacecraft mechanisms p 3607 N94-33320
TOLEDO UNIV., OH.
An experimental study of void formation during aluminum solidification in reduced gravity p 3667 N94-31944
TORONTO UNIV., NORTH YORK (ONTARIO).
Thermal-vacuum response of polymer matrix composites in space p 3595 N94-31033
TORONTO UNIV. (ONTARIO).
Turbulence structure of a premixed flame in a coaxial free air jet in the presence or absence of a base flow
[ISBN-0-315-78739-2] p 3633 N94-31471
Space hypervelocity microparticle impact damage in polymer matrix composites
[ISBN-0-315-87057-5] p 3652 N94-31692
Perturbative aspects of lower-dimensional gauge theories
[ISBN-0-315-86269-6] p 3911 N94-31712
CAD-based off-line planning for an active-vision system
[ISBN-0-315-86317-X] p 3813 N94-31713
Motion and force control of coordinated robots
[ISBN-0-315-86323-4] p 3724 N94-31714
Morphological directional coding of images
[ISBN-0-315-86336-6] p 3814 N94-31715
Chaotic attitude motion of satellites in the central gravitational field
[ISBN-0-315-78768-6] p 3610 N94-31723
Estimation of visible and near-infrared reflectivity for Peyto Glacier Basin using satellite data
[ISBN-0-315-87039-7] p 3743 N94-31733
Heave dynamics of an air cushion vehicle bag and finger skirt
[ISBN-0-315-87053-2] p 3568 N94-31734
Real-time control of the Trussarm variable-geometry-truss manipulator utilizing machine vision
[ISBN-0-315-87054-0] p 3830 N94-31735
Fiber optic sensors for the detection of surface acoustic waves on metals
[ISBN-0-315-87055-9] p 3878 N94-31736
Point-contact and point-impact dynamics for multibody chains
[ISBN-0-315-87056-7] p 3734 N94-31737
Errors associated with the use of heat flow transducers p 3796 N94-31742

A real-time computer control and trajectory generation environment for Trussarm
[ISBN-0-315-87060-5] p 3632 N94-31833
The basement fracture pattern of southern Ontario: A tectonic interpretation based on Landsat TM imagery, airphotos and field data
[ISBN-0-315-87086-9] p 3772 N94-31834
Interfacial behaviour: Wettability in SiC(sub p) metal matrix composites
[ISBN-0-315-87206-3] p 3621 N94-31835
Optimization of composite material failure loads
[ISBN-0-315-87214-4] p 3621 N94-31836
Development of a reconfigurable helicopter flight control system
[ISBN-0-315-87218-7] p 3585 N94-31837
Manufacture of light-damage resistant, planar, single mode waveguide on lithium niobate
[DSIS-94-01503] p 3879 N94-31850
Model identification of a reconfigurable robot manipulator
[ISBN-0-315-87109-1] p 3725 N94-31874
Photopyroelectric spectroscopy as a non-intrusive technique for the determination of the optical absorption spectra of multiple quantum well samples
[ISBN-0-315-87164-4] p 3833 N94-31875
Real-time control and application to robotics: Hardware and software architectures
[ISBN-0-315-87192-X] p 3833 N94-31876
Investigation of scintillator and fibre light in plastic scintillation dosimetry
[ISBN-0-315-87190-3] p 3879 N94-31877
Automatic analysis of force distribution in multi-fingered articulated hands
[ISBN-0-315-87205-5] p 3725 N94-31878

TOULOUSE UNIV. (FRANCE).
Airborne instruments p 3757 N94-31006
Sources and wells of minor atmospheric constituents of climatic importance p 3770 N94-31008

Atomic oxygen damage characterization by photothermal scanning p 3598 N94-31051

WALES UNIV. INST. OF SCIENCE AND TECHNOLOGY, CARDIFF.
Lowering the Schottky barrier at metal or silicide/Si interfaces to extend the range of infrared detectors
[AD-A277253] p 3903 N94-32322

WALTER REED ARMY INST. OF RESEARCH, WASHINGTON, DC.
Exposure assessment of JAVELIN missile combustion products
[AD-A278128] p 3616 N94-33059

WASHINGTON STATE UNIV., PULLMAN.
Metal induced embrittlement
[DE94-007450] p 3640 N94-31325
Towards a detailed understanding of the structural variability in lignins: A new approach
[DE94-007449] p 3793 N94-32267

WASHINGTON UNIV., SEATTLE.
Ocean acoustic propagation measurements and wave propagation in random media
[AD-A276165] p 3787 N94-31053
An efficient higher order theory for laminated composite plates and a finite element implementation p 3617 N94-31215
The origin of neon-E: Neon-E in single interstellar silicon carbide and graphite grains p 3933 N94-31556
The finite element method with asymptotic self-similar solutions p 3736 N94-31904
Composition and properties of dust from Comet Halley p 3936 N94-31947
A chemical analysis of solar neighborhood dwarfs p 3926 N94-31951
Basic and applied studies of the ram accelerator as a hypervelocity projectile launcher
[AD-A277392] p 3602 N94-32288
Near edge x ray spectroscopy theory
[DE94-008179] p 3905 N94-32799
Coaxial slow source
[DE94-008191] p 3892 N94-32800
Mesh optimization
[AD-A277644] p 3820 N94-32972
Principles of ultradependability in chaotic routing
[AD-A277422] p 3827 N94-32995

WATERLOO UNIV. (ONTARIO).
Aerodynamic drag of droplets in turbulent flow fields
[ISBN-0-315-75827-9] p 3571 N94-32491
A critical evaluation of the Reynolds stress turbulence closure for the flow of a turbulent free-stream over a turbulent boundary layer
[ISBN-0-315-75792-2] p 3707 N94-32497
Laser and Fourier transform spectroscopy of novel propellant molecules
[AD-A277506] p 3667 N94-33013

WESTINGHOUSE HANFORD CO., RICHLAND, WA.
Agile total quality guidelines for enhancing teamwork and success
[DE93-019972] p 3915 N94-32678
Developing a personal-computer-based records retention system using Paradox(tm)
[DE94-007984] p 3819 N94-32749

WESTINGHOUSE SAVANNAH RIVER CO., AIKEN, SC.
A review of sensitivity analysis techniques
[DE94-007192] p 3842 N94-31399
Solid-state resistance upset welding: A process with unique advantages for advanced materials
[DE94-005941] p 3723 N94-31524
Managing performance of DB2 Ad Hoc Reports
[DE94-006669] p 3920 N94-32635
Modeling of residual stress mitigation in austenitic stainless steel pipe girth weldment
[DE94-007184] p 3738 N94-32639
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin
[DE94-007971] p 3660 N94-32698
Deuterium absorption and material phase characteristics of SAES St198 Zr-Fe alloy
[DE94-008275] p 3646 N94-32781

WESTINGHOUSE SCIENCE AND TECHNOLOGY CENTER, PITTSBURGH, PA.
Advanced silicon technology for microwave circuits
[AD-A278039] p 3698 N94-33091

WILMER OPHTHALMOLOGICAL INST., BALTIMORE, MD.
High peak power microwaves: A health hazard
[AD-A277168] p 3681 N94-32576

WINDSOR UNIV. (ONTARIO).
Production and detection of metastable atomic oxygen
[ISBN-0-315-87364-7] p 3868 N94-31915

WISCONSIN UNIV., MADISON.
Solidification structure synthesis in undercooled liquids
[AD-A276166] p 3910 N94-31054
Strictly positive definite functions on spheres
[AD-A276471] p 3855 N94-31244
Oscillations in piston-driven shear flow of a non-Newtonian fluid
[AD-A276472] p 3701 N94-31245
Multivariate spline approximation
[AD-A276034] p 3842 N94-31441
Frames and stable bases for shift-invariant subspaces of L(sub 2)(IR(sup d))
[AD-A276470] p 3843 N94-31474
Double-lined pre-main-sequence binaries: A test of pre-main-sequence evolutionary theory p 3933 N94-31497
Boundary-layer cumulus over land: Some observations and conceptual models
[DE93-040820] p 3781 N94-31597
Elastic as limit of viscoelastic response, in a context of self-similar viscous limits
[AD-A277043] p 3738 N94-32273
A study of the neutral hydrogen distribution of the Milky Way through 21 cm emission and Lyman alpha absorption p 3938 N94-32309
Stability of tearing modes in tokamak plasmas
[DE94-009205] p 3892 N94-32911
Stability of bootstrap current driven magnetic islands in stellarators
[DE94-009207] p 3893 N94-32912
Anomalous transport equations in toroidal plasmas
[DE94-009206] p 3893 N94-32922
Low energy ion beam assisted growth of homoepitaxial silicon films at low temperature
[AD-A278092] p 3908 N94-33039
TRMM-related research: Tropical rainfall and energy analysis experiment
[NASA-CR-195834] p 3787 N94-33288

WISCONSIN UNIV., MILWAUKEE.
Process parameter-growth environment-film property relationships for reactive sputter deposited metal (V, Nb, Zr, Y, Au) oxide, nitride, and oxynitride films
[AD-A276382] p 3640 N94-31258
High-speed path constrained manipulator operation using optimal-feedback combined controller p 3833 N94-31962
Physics of heat pipe rewetting
[NASA-CR-195902] p 3913 N94-33148

WOLLONGONG UNIV. (AUSTRALIA).
Near and far infrared observations of protostars and dark clouds p 3926 N94-31969

WOODS HOLE OCEANOGRAPHIC INST., MA.
Sound scattering by cylinders of noncircular cross section
[AD-A276663] p 3861 N94-32089
Light in Thermal Environments (LITE) Workshop
[NASA-CR-195851] p 3790 N94-32981
Fine and microstructure observations at Fieberlin g Guyot R/V new horizon cruise report
[AD-A277917] p 3791 N94-33109
Deep water studies of CTD data
[AD-A277741] p 3791 N94-33176
Fluid mechanical measurements within the bottom boundary layer over the Northern California continental shelf during stress
[AD-A277916] p 3791 N94-33243
Cruise report: Oceanus 250 leg 4 high resolution profiler survey for the North Atlantic Tracer Release Experiment, 25 March - 24 April, 1992
[AD-A277935] p 3791 N94-33245

WORCESTER POLYTECHNIC INST., MA.
The pH of Mars p 3950 N94-33225

WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.
The maintenance of operational flight program
[AD-A276363] p 3565 N94-31367
Technologies for avionics embedded computer systems
[AD-A276364] p 3581 N94-31368
Testing Operational Flight Programs (OFP's)
[AD-A276361] p 3578 N94-31387
A study of the Space Station Freedom response to the disturbance environment p 3600 N94-31434
Analysis of the effect of routing strategies for parallel implementations of a selected avionics application
[AD-A276069] p 3581 N94-31458
Direct-sequence spread-spectrum performance in a multipath fading environment
[AD-A276080] p 3673 N94-31464
Getting a handle on designing for avionics software supportability and maintainability
[AD-A276362] p 3581 N94-32055
Common modeling system for digital simulation p 3823 N94-32429
A framework for developing and managing reusable avionics software
[AD-A276846] p 3582 N94-32909
Comparison of coherent to incoherent detection at 2.09 micrometers using a solid state LADAR system
[AD-A277159] p 3721 N94-33102
Response of a cantilevered plate in supersonic flow
[AD-A277487] p 3580 N94-33107
An experimental study of pilot/vehicle dynamics using a tilt rotor flying machine
[AD-A277516] p 3805 N94-33349

WRIGHT RESEARCH DEVELOPMENT CENTER, WRIGHT-PATTERSON AFB, OH.
QUAD4 seminar
[AD-A277366] p 3818 N94-32330

WYOMING UNIV., LARAMIE.
Numerical simulation of thermally induced near-surface flows over Martian terrain p 3949 N94-33223

X

XEROX PALO ALTO RESEARCH CENTER, CA.
Research on the stability, electronic properties, and structure of a-Si:H and its alloys
[DE94-000292] p 3899 N94-31813

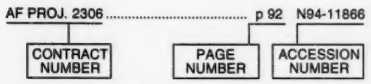
Y

YALE UNIV., NEW HAVEN, CT.
Neural networks for model-based recognition
[AD-A277375] p 3834 N94-32053
An algorithm for probabilistic, totally-ordered temporal projection
[AD-A277341] p 3817 N94-32257
Stress-induced enhancement of the startle reflex
[AD-A278414] p 3802 N94-33327

YARDNEY TECHNICAL PRODUCTS, INC., PAWCATUCK, CT.
Development of silver-zinc cells of improved cycle life and energy density
[AD-A277311] p 3693 N94-32329

YORK UNIV. (ONTARIO).
Sensory sensitivities and discriminations and their roles in aviation
[AD-A277312] p 3800 N94-32276

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

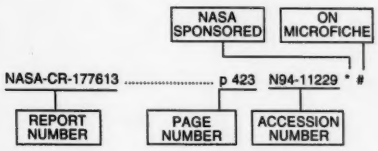
Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

16 SPACE TRANSPORTATION

Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support*.

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR.* European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR.* This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the

usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA.*

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI). The 1994 subscription price of $94.00/domestic, $117.00/foreign will be applied on a prorated basis, through 1994. 1995 *STAR* subscription prices are $100.00/domestic and $125.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

SCAN Goes Electronic!

*I*f you have NASA Mail or if you can access the Internet you can get biweekly issues of *SCAN* delivered to your desktop — absolutely *free*!

Electronic SCAN takes advantage of computer technology to alert you to the latest aerospace-related, worldwide scientific and technical information that has been published.

*N*o more waiting while the paper copy is printed and mailed to you. You can review *Electronic SCAN* the same day it is released! And you get all 191 — or any combination of — subject areas of announcements with abstracts to browse at your leisure. When you locate a publication of interest, you can print the announcement or electronically add it to your publication order list.

*S*tart your free access to *Electronic SCAN* today. Over 1,000 announcements of new reports, books, conference proceedings, journal articles . . . and more — delivered to your computer every two weeks.

Electronic SCAN.
Timely.
Flexible.
Complete.
Free!
